Hardware and Metal

Vol. XXXIV. No. 1 | THE MACLEAN PUBLISHING COMPANY, LIMITED
PUBLICATION OFFICE : TORONTO, CANADA | January 7, 1922

Over the Top!

This is the year of the big push. Supported by the finest army of kitchen ware ever manufactured, Mr. SMP is going Over The Top. The campaign will sweep all across the Dominion of Canada———The kitchens of Canadian homes are the objectives. Mr. SMP plans to have Pearl Ware or Diamond Ware introduced in every home——— The attack on each locality will be led by the most aggressive retail hardware merchant, who will take advantage of the situation to thoroughly clean up the territory. We will give him every assistance———There is powerful artillery behind and plenty of reserves———

Lower Prices

A short time ago we announced a substantial price reduction on Pearl Ware and Diamond Ware. This has already stimulated business in these two lines and will continue to do so. But of much more importance to the dealer—we are starting such a large and comprehensive consumer advertising campaign that big business is bound to come to each dealer handling our lines from now on.

We want the Hardware man of Canada to feel that we are not only interested in selling our goods to him but are just as interested in helping him sell our goods at a **profit** to the consumer, and we, as a firm, pledge ourselves to help these enterprising merchants in a more substantial way than ever before.

Selling at a Profit

Through the mail and from our representatives you will receive the necessary details. All we want to tell you here is—Buy Pearl Ware and Diamond Ware now with every confidence that you are going to sell these Wares at a greater gross profit than ever before.

'RICE LEWIS' NEWS

Do You Get The Hockey Club Business Of Your Town?

TELL THE BOYS THRU YOUR LOCAL PAPERS THAT YOU CAN SUPPLY THEIR HOCKEY NEEDS

We have on our staff a Sporting Goods Expert who makes a specialty of both Summer and Winter indoor and outdoor sporting supplies, and are in a position today to supply the needs of the trade in all sporting lines. We carry extensive stocks.

You no doubt have local clubs to be outfitted. Let us assist you. A note to the boys in your local paper will get you in touch with them.

Let us quote on Hockey Outfits for clubs: Sticks, Pucks, Skates, Boots, Ankle-Supports, Knee-Pads, Shin-Pads, Goal-Keeper's Pads, Gauntlets, Abdominal Supporters, Abdominal Protectors, Sweaters and Crests, Socks, Toques and Hockey Knickers, etc.

Let us know your requirements.

Rice Lewis & Son Limited, Toronto

Ask the "Rice Lewis" Man or Write Direct

If interested tear out this page and place with letters to be answered.

"Please send me," he said,

and we mailed him the book. This is the letter he wrote us:

Dayton, O., June 2, 1921.

"Henry Disston & Sons, Inc.
Philadelphia, Pa.

"Gentlemen:—I want to thank you for your 'Saw, Tool and File Book,' which I received several days ago, and with which I am very much pleased.

"Your Book is just what I need, I have six of your saws, but the way I have been filing them I think I shall need a jointer.

"I feel very good toward you for your courtesy to me! In fact, I think you are just about as fine as your saws. I don't think that I could pay you a higher compliment.

"I am fifty-five years old, and in all my years I have heard only two men praise any but the 'Disston Saws.'

"I am not familiar with your other tools, and, frankly, I didn't know that you made any others, but I shall get acquainted with some of them very soon.

"In conclusion let me again thank you for the Book; it has so much valuable information in it, and so many fine illustrations that I hardly know which to praise more—its utility or its art. I like both, and am immensely pleased.

Yours truly,
WM. BENZING,
1220 Wyoming Street."

When a man gives us a compliment like that, do you wonder that we want to talk about it? We wish you would read the book. If you would like a copy, or several for your clerks and customers, write your name and address on this page, and mail it to us. Address the envelope to Desk No. 2. We will send you the book free of charge.

Rainbow Sheet Packing

is the *original* red sheet packing. For more than 30 years it has held the confidence of the mechanical world because it has never failed to give satisfactory service.

The steam engineers in your vicinity know from experience that a gasket cut from genuine Rainbow is their best assurance of a permanently packed flange.

You cannot afford to overlook the remarkable sales possibilities of Rainbow Sheet Packing.

All Rainbow Sheet is red, but all red sheet is not Rainbow. Identify the genuine by the Diamond Rainbow trade-marks on every yard.

Genuine Rainbow is made in Canada. Your jobber will help you order a balanced stock, or write direct, to our nearest branch.

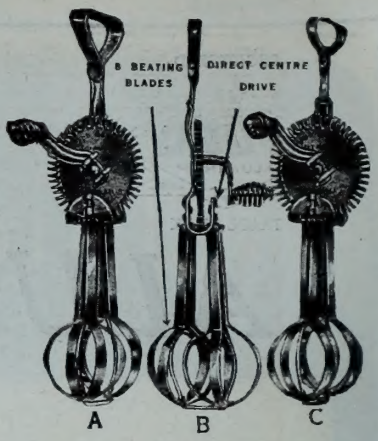
" Reproduced from 9 U.S. Trade Papers "

Egg Beater Philosophy



The great American who said, "The man who makes a BETTER mouse-trap will find a well-beaten path even through the forest to his door," (a great truth) meant EGG-BEATERS also. LADD ALL-STEEL BEATERS are in EVERY STORE PAYING ATTENTION TO QUALITY. These BETTER BEATERS are the magnet; all these stores are the paths to us. The well-beaten paths outward from these stores LEAD TO DISCRIMINATING HOMES EVERYWHERE. Dealers should keep these paths busy by CONTINUALLY STOCKING LADD-ALL-STEEL BEATERS, the proverbial "BETTER mouse-trap." Substitutes grow grass upon these paths.

LADD ALL-STEEL BEATERS—3 sizes for all requirements.
LADD MIXER CHURNS—1 qt., 2 qts., Removable Beaters.
SATURN REELS—2 finishes, 40 ft. cord.
SATURN CAN OPENER—Safety, Stationary.

NATIONAL

Guaranteed Axes and Tools

We make our own steel in our own vast plant covering 40 acres of ground! During the war we had one of the most extensive, best equipped and successfully operated munition plants in Canada.
We have devoted a year to perfecting the adaptation of this plant to the making of the best Canadian axes and tools. We are now ready to sell these.
Few, if any, axe and tool manufacturers in Canada have our expert tool-making facilities, tempering processes and tests, inspection or shipping facilities. Our special metallurgists and chemists, and our specially constructed forging, tempering and annealing furnaces, and chemical vats, assure you properly tempered tools. Making our own steel relieves us of the many handicaps existing where material has to be obtained in open market.

"Clear Ship For Action!"

The British Navy is a model of efficiency. When a battleship, or any other naval vessel, goes into a fight, the signal is made, "Clear ship for action!" All chests, gratings, boxes, and unnecessary impedimenta are heaved overboard. Nothing is retained that might impede the service of the guns or quick action of the crew.

A business battle will take place in 1922. Competition will be keen. Consumers, even now, consider prices. It will pay to "Clear ship for action." Get your shelves clean! Leave no old high-prices stock to impede action in your store. Start new. A fresh, attractive stock, at attractive prices, will make 1922 a banner year. Let us quote you on your new stock.

It's like a third hand that applies the right amount of the right kind of flux at the right time

Why *a Kester Solder Sale Means a Succession of Repeat Orders*

Solder business grows fast when you sell a solder of which you can truthfully say, "all you need is this solder and heat—*no flux*." There is just one such solder—

KESTER ACID CORE WIRE SOLDER

FLUX IN POCKETS

The drawing above tells the simple story of soldering without separate fluxing. The scientifically prepared acid flux is contained in small pockets located at the center of the genuine tin-and-lead wire. Just before the solder is melted the flux is released—result: exactly the right amount of flux at the right time, producing a hold-fast bond every time.

You'll know why every Kester sale brings repeat orders when you try a free sample of this solder. Just send the coupon. When you see how "self-fluxing" cuts soldering time in half, you'll decide to *let this better solder build a profitable solder business for you.*

Sold in one lb. cartons, and on one, five and ten lb. spools.

Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.

Gasoline Tanks

For Underground Storage

Made of the finest copper steel procurable, welded and then painted on the outside with Anti-Rust, Acid-Proof black paint, these tanks are practically rust and corrosion proof. For handling gasoline only the very best is safe. The thorough test all our tanks undergo before leaving our factory is a guarantee of their reliability. The prices are most reasonable.

Oil and Gasoline Tanks

Here's a tank made of copper-steel with handy screw cap opening at top for filling and faucet in side near bottom for drawing off contents. Another reliable tank at a moderate price. These tanks have been giving satisfactory service wherever sold.

Much Liquidation in Hardware Industry

Review of Recent Years' Trend of Hardware and Metal Production And Prices Shows That While This Industry Was One of The Most Recent to Reach its Peak, it Has Undergone Substantial Liquidation—Average Hardware Price Declined 25 Per Cent. In Nineteen Hundred and Twenty One.

THE YEAR which has just passed has marked an important step in the general readjustment of the hardware and metal industry from the boom period of the previous five years. Contrary to general opinion, this industry was one of the most recent to reach its high peak, and it has therefore been one of the last to undergo substantial readjustment. In fact it is held by some authorities that this industry has not yet been established on a sufficiently low price level to justify a return of normal trade. The recent course of readjustment in hardware and metals bears out the prediction made by a prominent economist, that those industries which were first to undergo liquidation would be the first to enjoy a return to healthy conditions with a fair volume of profitable trade, and vice versa. The hardware and metal industry has been one of the latter, but taking the year as a whole, substantial progress was made in liquidation of stocks, reduction of costs and lowering of prices.

A review of the course of hardware price movements indicates that the peak of prices was not reached until toward the end of 1920. Steady upward progress was made from 1914 until early in 1918 when a slight decline set in, followed by a somewhat stationary period. Then toward the end of 1919 the upward trend was resumed, reaching the peak in September 1920, since when the decline has brought hardware prices back to the equivalent of those prevailing toward the end of 1917.

A comparison of price movements on basic materials reveals much the same trend as that of manufactured products. Bar iron and bar steel for instance, continued fairly steady at from $2.00 to $2.20 from the beginning of 1914 until about the middle of 1915 when a slight depression set in, followed by a steady climb upward until about the middle of 1917 when prices remained stationary until the end of 1918 when the war was ended and prices took a drop back to 1916 levels of approximately $3.70. Toward the end of 1919 the upward trend was resumed and reached the peak of $5.30 toward the end of 1920. This high point was not held long when a rapid decline set in which has returned prices on these basic lines to a $3.00 level, the first time such a low point has been reached since April 1916.

THE ISSUE IN BRIEF

Hardware prices reached peak in September, 1920

Average hardware price rose from 90 in 1914 to 260 at the peak. Has now returned to 200.

Today's average price on hardware equivalent to that of latter part of 1917

Hardware went higher in proportion to farm produce and has declined more.

Paint prices are back to 1918 levels.

Many startling and valuable price arguments in this issue.

Bearing out this movement of prices on basic materials, manufactured hardware reflects a big variation in price. Fifty hardware lines show an average fluctuation as follows. Using 100 as a unit base, prices rose from 90 at the commencement of 1914 to 220 at the commencement of 1918. A slight reaction set in at the end of the war and prices declined to 205 at which they remained steady until near the end of 1919 when the ascent began which ended in prices reaching the unprecedented level of 260 in September 1920. Since that time a constant decline has been made which to date has returned prices to a level of 200, for the first time since 1917.

Much Liquidation

Hardware stocks in general seem to have been pretty well liquidated. Most manufacturers have followed the policy of reducing prices in line with reduced costs wherever possible, and while labor has declined very little and transportation costs are still high, some saving has been effected by the improvement of machine processes and increased efficiency on the part of labor. Recent production has been practically only for current requirements but in certain cases it is felt that some increased industrial activity providing for production for stock would be justified.

Wholesaler's stocks are noticeably light in some lines and about average in others. Western Canada wholesalers have suffered from the reduced buying power of the Western farmers and much averaging up of stocks has therefore been undertaken. Wholesalers report credit conditions as fair, except in the prairie provinces, though detraction of interest over the recent election has necessitated some extra prodding. In British Columbia a fair volume of trade is being done in hardware despite the continued lack of activity in lumbering, mining and fishing. Good fruit crops in the Okanagan have helped conditions there but in the northern part of the province the trade is slow in meeting commitments. Vancouver island represents a very satisfactory condition. On the whole retail hardware failures in Canada this year have been very light

(Continued on page 44)

Substantial Price Recessions In Hardware During Past Year

Remarkable Ratio of Decline in Quotations on Average General Hardware Evident in Recent Market Developments—Prices on Many Lines Have Literally "Come Down the Banister"—Drop of 25 Per Cent. Affords Convincing Price Arguments For Retail Merchants.

MARKET developments during ing the past twelve months provide the retail merchant with numerous convincing price arguments. In careful study of the various price tables and charts produced in this issue of Hardware & Metal, a number of exceptional market features are uncovered. A simple glance at the particular diagram shown on this page, clearly provides substantial evidence of the rapid and extensive recessions which have occurred in hardware prices generally.

During the year just ended, hardware quotations may be said to have "come down the banister" in a clear cut and determined manner. By following the price line on the the chart shown herewith, the downward tendency registers a 25 per cent drop, which is in itself a factor of considerable importance and constitutes a primary indication of existing basic market conditions.

Strong Downward Tendency

The method adopted in arriving at this conclusion will no doubt be of interest. Fifty staple hardware lines have been taken as foundation for the different charts, and the price variations prevailing are indicative of the current developments in the average hardware market. Quotations on these same commodities which were in effect on January 1, 1921, have been indicated on the diagram illustrated herewith by the index figure 100. The price average extending throughout the year has been followed week by week, with the result that the general tendency each month has been strongly in a downward direction.

While here and there an individual line may have assumed slight revisions of an upward nature also, such changes were merely evident on fluctuating markets and the collective trend has been to reach lower price levels, which represent well-liquidated stocks and more normal markets.

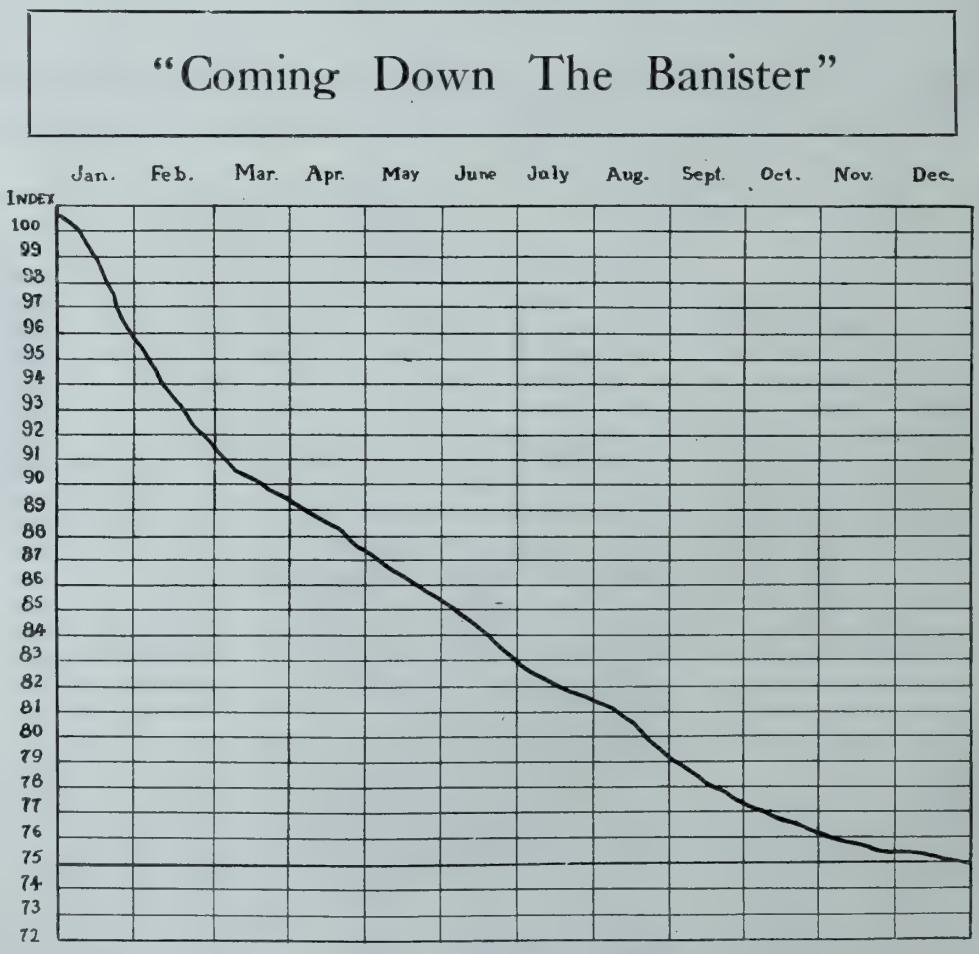
Record in Price Declines

Many hardware lines have undoubtedly registered a larger ratio of reduction than that depicted on this particular price chart. As stated above, this is representative of a given number of lines, and while serving as a useful average in comprehensive and accurate degree, at the same time it is not indicative of the actual price variations of each particular unit. It would be almost impossible to include in such price tables the many thousands of different lines on the hardware markets, and the staple goods chosen for this purpose supply a careful estimate of prevailing conditions generally.

Therefore the price reduction of 25 per cent which has occurred in the hardware markets during the recent twelve-month period, is perhaps a record in comparisons of this nature. Other trade fields may, or may not, have registered market changes to a similar extent, but such an extensive and representative drop in hardware quotations undoubtedly leads the way over other commodities back to pre-war standard values. And in computing the range of price concessions over a given period, the fact that hardware levels during the pinnacle of inflation did not attain the altitudes evident in many other circles, is a consideration of very great importance

The full significance of the recent reductions in hardware prices is perhaps on-

(Continued on page 32)



In compiling the above chart, the prices in effect on January 1, 1921, have been taken for the basis of computation, and are represented by the unit figure 100. At the close of the year quotations on the average had declined to the level of 75, which constitutes a reduction of approximately 25 per cent. This is a very substantial decline, and at the same time is an effective price argument available to the merchant.

Current Average Hardware Prices Equivalent To Those Of 1917

Many Lines Back to Pre-War Price Levels, But Others Still Show Increase Over Former Standards Which Brings Average Quotation Still Above 1914—Chart Depicts Price Developments During Last Eight Years in Accurate Manner

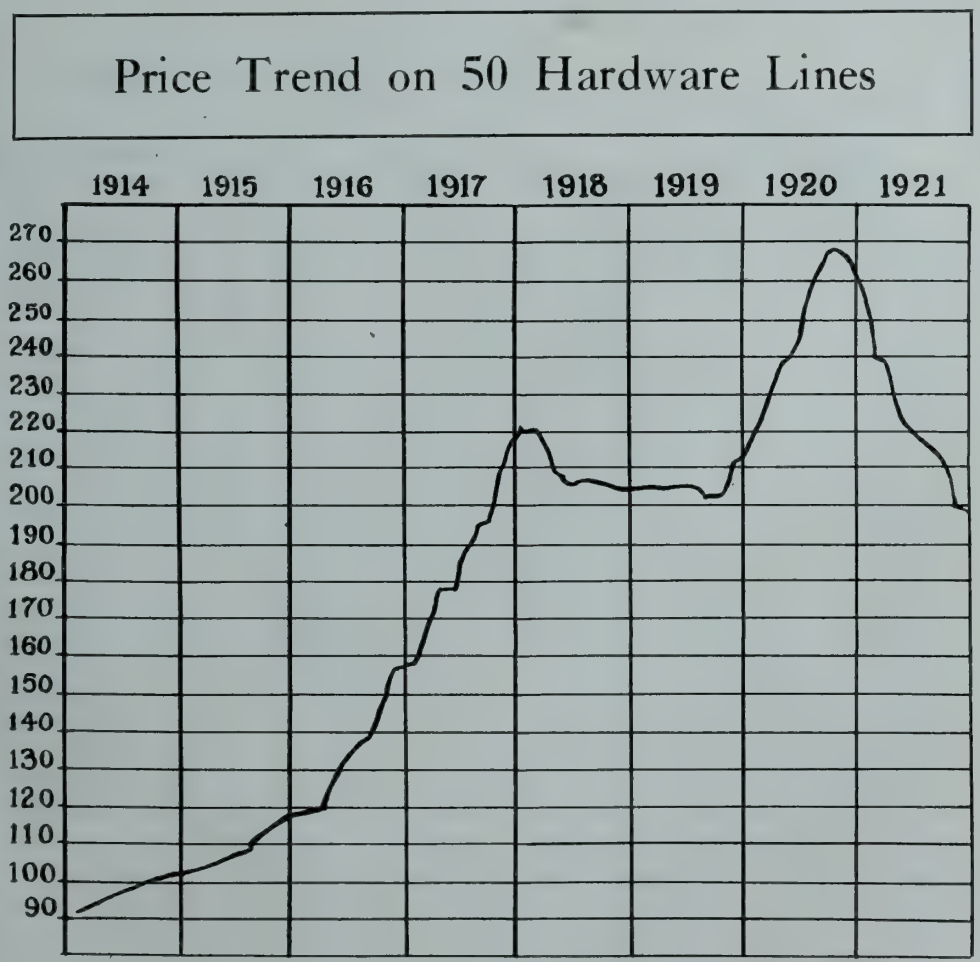
THE PRICE chart reproduced on this page, serves to illustrate the rise and fall of prices on hardware lines generally, during the last eight years. This period covers the inflation of war-times, and the still further rise in quotations which became evident for almost two years after the cessation of hostilities. Such a chart is an adequate reminder that the peak of high prices was attained in 1920, the highest level having been reached around the month of September of that year. Since then, hardware commodities have generally experienced a reduction in price when an average level is compounded over a given number of staple lines. In compiling this diagram, therefore, Hardware & Metal followed in detail the percentage basis of prices existing on fifty hardware items; thus ensuring a thoroughly comprehensive list, and at the same time giving an accurate indication of the price development which the trade in general has experienced.

Arguments of the Merchants

Such a chart also provides many decisive price arguments for the retail merchant. It will be noticed that the quotations which were in effect during the first week of August, 1914, supply the unit base, and are indicated by the figure 100. This index figure is used as the foundation in arriving at the varying percentage of fluctuations evident throughout the past eight years. In tracing the line over the years 1914-15 and 16, a gradual upward trend is noticed: a tendency becoming distinctly apparent during the latter part of 1916. This element of increase continued almost unabated—with but few spasmodic variations—throughout the entire year of 1917, to reach the high figure of 220. In 1918, there developed a slight recession, which continued only for a very short period. Prices then held on the average for more than a year beginning another climb during the closing months of 1919. This second flight was strongly in evidence throughout the greater part of the following year also; culminating in the peak of inflation around September 1920.

An active and continuous reaction then apparently set in, this decline having registered noticeable proportions during the past twelve months. The downward tendency has been practically uninterrupted, and of such marked degree, that prices in the hardware trade in general are now back to 1917 standards. In other words, the importance of this is more easily recognized by stating that in approximately one year, hardware quotations have gone back to the level which existed four years previously. The average price development took three years from 1917 to reach the pinnacle attained during the latter part of 1920; and have receded from that high point back to the 1917 level in the comparatively brief space of one year.

This does not indicate by any means that all hardware prices are still above pre-war standards. On the contrary, many goods are undoubtedly priced even below what they may have cost in 1914. Others again are almost back to where they were, and cannot conservatively sink lower at present under existing trade and manufacturing conditions. At the same time, there are some commodities yet remaining with prices higher than what they were seven or eight years ago; and it is the goods that are still costing more, which tend to elevate the average standard



The above diagram illustrates the percentage of fluctuation during the past eight years on fifty staple hardware lines. The list is thoroughly comprehensive, and the rise or fall gives an accurate indication of the price developments which the trade has experienced in general. The quotations prevailing in August, 1914, equal the unit index figure of 100.

Bar Iron Quotations

Variations in Base Prices on Bar Iron and Steel During Past Eight Years Offer Direct Gauge of Price Developments in General

IT HAS been claimed that the percentage of operation in the steel industry can generally be used as a barometer registering the healthy state, or otherwise, of business conditions. In a similar way, the base prices on bar iron and steel, can more or less accurately act as a direct gauge of price developments in general, thus giving to the careful observer a governing chart for the majority of other lines.

This is probably due to the fact that the consumption of iron and steel enters into the manufacture of a fairly representative proportion of hardware commodities, and the different fluctuations in the cost of this material, are usually reflected in the corresponding quotations on the finished products. Therefore, the chart covering the trend of base prices on bar iron and bar steel during the past eight years, 1914-1921 inclusive, constitutes a factor of vital importance and should prove of exceptional interest.

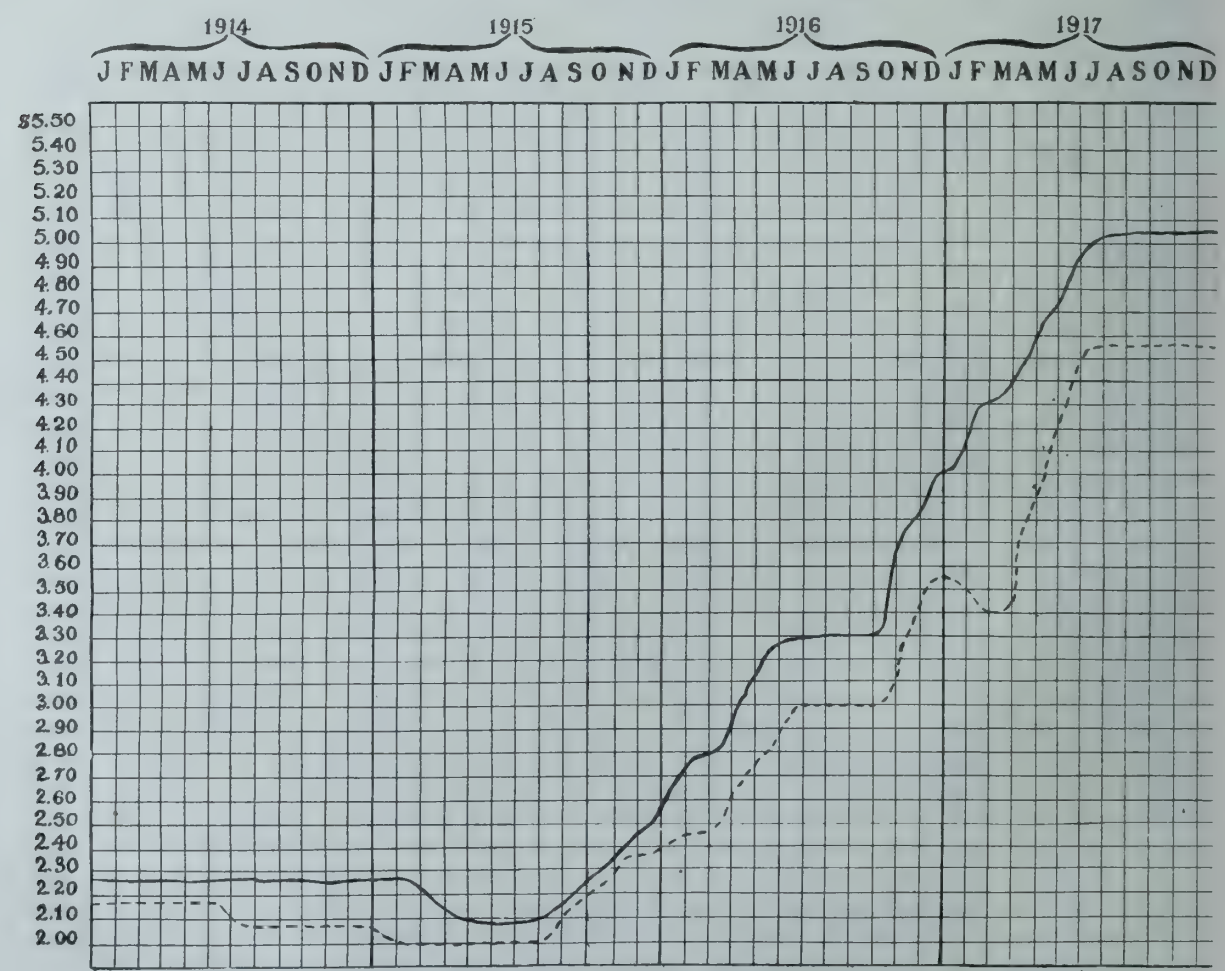
Accurate Business Barometer

Commencing with the year 1914, the state of the industry at that time is clearly observed by following the lines on the chart shown herewith. It is also noticeable that the outbreak of the war was followed by lower price levels during 1915; but commenced their upward climb during the latter half of that year. How this can be compared as a barometer measuring the stride of business conditions generally is here amplified, for the price reaction on bar products of this nature early in 1915 finds its parallel in the trade depression which followed the outbreak of the war.

Quotations on iron and steel products closely reflected the rise and fall evident in the basic markets; but in the case of manufactured goods, the ascension was preceded by rising costs in raw material. This upward tendency developed a strong movement throughout 1916 and 1917, practically without interruption. A slight halt is noted, but no recessions for the next three years. From around August, 1917, until the end of the following year, these quotations then remained almost stationary at unprecedented levels in the history of the industry.

This situation took a sudden change commencing with the year 1919; for the armistice announcement was followed by the discovery of huge production capacity being faced with the acute realization of immense war stocks, and the sudden cancellation of many contracts. The summer of 1919 was evidently spent in recovering from this condition; and this is another occasion where comparison with other price charts covering manufactured goods will afford interesting study. Another table inserted in this issue depicting the quotations during the last eight years effective on a number of staple hardware lines, reveals no such corresponding drop. A recession in the re-sale costs of a few commodities, brought about a temporary halt; but the general trend was practically unchanged.

Trend of Base Prices on Bar Iron



In the above table the spaced line represents the rise and fall of primary base prices in Canada on bar iron; the continued line indicates the fluctuations in quotations on bar steel.

Act as Price Barometer

Quotations on Many Finished Steel Products Reflect Rise and Fall in Basic Market Prices—Marked Decline Registered During Past Year

Under these circumstances, bar iron and steel prices naturally recorded a reaction. With the activity of re-construction programs, and the anticipation of renewed intensive industrial development, quotations again commenced to soar. As a result of this, the chart illustrates the fact that at the end of 1920, both bar iron and steel prices reached a higher altitude than was attained under the stimulus of war-time activity.

But one of the most pertinent phases is marked by the chart-line for 1921. During the past year, a most intensive and practically continuous decline has been measured, which brings these base prices well down to 1916 levels. This may be looked upon as a record recession and again runs true to form in being fully indicative of similar reductions apparent in finished hardware.

Therefore, it is readily seen that base prices on bar iron and steel have comparatively little further to go, before again reaching the low values of 1914. In this respect, it is generally admitted that the general advent of pre-war prices is prevented—at least temporarily—by prevailing freight rate levels, and similar production costs. In the steel industry, however, transportation charges assume an unusual degree of importance owing to the fact that some five tons of raw materials are required to be transported for the production of one ton of steel. Freight rates on an average are still 25 per cent.higher than in August, 1920; and still show considerable inflation from the 1914 levels.

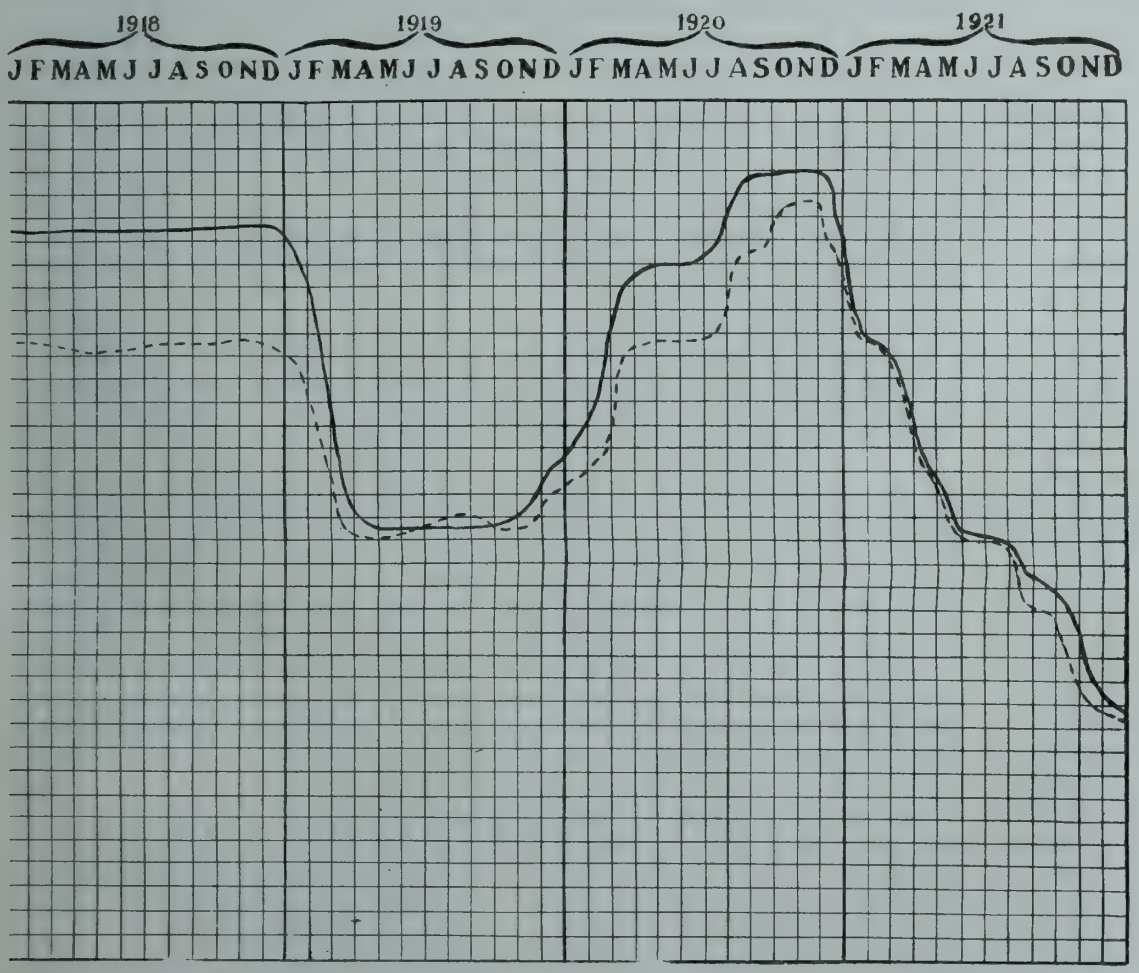
It has been intimated as a special feature in the use of illustrated charts depicting the trend of prices, that they serve a double purpose in the field which they represent. One factor is their simplicity, and the clearness with which rise and fall of prices during the past few years is registered, far more concisely than any table of figures could show. Another attribute is the effect which such charts record in general, and the direct object lesson which their contents provide.

Charts Afford Price Guide

The details necessitated in compiling such records frequently lead to interesting developments and to the uncovering of vital facts pertaining to market records; which not only provide fascinating recollections, but can be utilized as the basis for future action and guidance. Thus it is that a chart covering the trend of bar iron and steel base prices which have prevailed on Canadian markets during the past eight years indicates in a startling manner the fluctuations which recent seasons have witnessed in trade circles generally.

Reference to other similar price charts appearing in this issue will provide the comparisons between such materials as bar iron, and general hardware lines including many manufactured articles. One most important feature is found in the fact that the decline during the past year is almost identical in each case.

and Steel During Past Eight Years



Prices in effect during August, 1914, equal the u nit figure of 100. The changes since that date can be easily traced. The marked recession occur ing during 1921 is of particular interest.

Big Decline in Hardware Prices

During 1921 Quotations on Many Lines of Hardware Literally "Came Down the Banister"—Ratio of Reduction for Entire Year on Fifty Staple Lines Was 25 Per Cent., With Many Goods Having Registered Even More Substantial Declines.

Read In Conjunction With Table on Opposite Page

HARDWARE merchants in general will doubtless recollect a slogan which was very widely advertised some twelve or fifteen months ago to the effect that "prices went up a step at a time; they can't come down the banister."

It is self-evident however from the various charts and price tables prepared by Hardware and Metal, that the gradual rise in quotations on hardware commodities was spread over a period of several years, which embraced the actual duration of the great war and also the two succeeding years. It has also being illustrated in previous articles on this subject, that the peak of high prices was generally attained towards the latter end of 1920. That is, some two years after the cessation of hostilities, and not during the conflict itself. Various reasons and causes have contributed to this effect; but what is of more vital importance at the present time is the startling ration for decline in hardware prices which have been evident during the past year.

Price Reductions Substantial

In many respects, 1921 has proven to be a season of unique events and experiences in practically all phases of the hardware industry; but one of the outstanding features is the manner in which price recessions have upset the "dope" in the matter of sudden and substantial reductions—in several instances repeated more than once—so that hardware quotations have technically "come down the bannister," a thing many times previously declared to be almost impossible.

On the opposite page is reproduced a table showing the relative drop in prices during 1921 on fifty staple hardware lines. Such a comparison provides a series of pertinent facts, and when carefully studied, numerous interesting features are revealed. This computation of the average price in effect during each month of the year, is also absolutely conclusive proof of the unprecedented manner in which hardware prices have been reduced. The data contained in a table of this description should supply convincing testimony to both retailers and the general public, that prices have eased considerably, and are now nowhere near the high levels which were the result of war-time contingences.

A Series of Reductions

The extent of price recessions in hardware during 1921, has been of a drastic nature, and fully as pronounced as in any other line of trade. The movement became evident to discerning students at the end of 1920, but steadily gathered momentum with each succeeding month of the following year, until prices have been dropping on every side. A series of announcements from both manufacturers and distributors have followed one another in rapid succession, until 1921 contained a larger percentage of price developments and market changes generally, than any other similar period in hardware history.

Leads in Price Recession

Commencing at the high level attained some fourteen or fifteen months ago, the downward slide in price registered a more or less continuous trend, month by month, and also provided an element of the keenest importance throughout the entire season. This tendency to reduce to the limit of available liquidation, was undoubtedly resisted for a short time in certain quarters; while other declines were put in effect with evident reluctance. Some market changes, especially where subsequent reductions were involved, had materialized only after trade conditions practically forced easier prices. However, the total percentage of reduction occurring during 1921, is without precedent, and constitutes a worthy argument in rebuttal of the charges which have appeared at certain times that hardware commodities have failed to show reductions corresponding to the same extent as quotations in other commercial circles. The facts as they now appear fully indicate that prices on hardware have taken the lead in the matter of recession, and are not waiting upon developments in other trades, nor interested in merely declining in the same proportion. Prices on hardware have dropped according to the necessities and environments in its own particular sphere, and in conjunction with the comparative developments on basic commodities in the primary markets.

Such criticism levelled at certain intervals against the hardware trade, can be adequately refuted by reference to illustrative charts which clearly show the comparative prices. The table for 1921 reproduced in connection with this article, can be diretly used to this end; and such is the purpose for which Hardware and Metal has compiled the various other diagrams appearing in this issue.

SUBSTANTIAL PRICE REVISIONS

(Continued from page 28)

ly fully realized by a simple analysis of the laws governing percentage. The phrase that "what goes up must eventually come down," has been frequently repeated. And the chart lines often tend to substantiate such a contention. However, the true extent of a twenty-five per cent. reduction is found in the comparison of percentages of rise and fall. Take for examble, an article which at pre-war values was priced at one dollar. Assuming that a fifty per cent. increase was recorded during the period of general inflation, such a revision gives a quotation of $1.50. This high level therefore, is 50% above 1914 standards. But the price has only to recede one-third, or 33 1-3 per cent., in order to drop to its previous mark. And in studying market declines from this viewpoint, the range of a 25 per cent. decrease appears somewhat magnified. For it undoubtedly represents a greater amount, than the same percentage figure increase.

In this connection, an alternative price example serves to illustrate the matter more clearly. With a general margin of cost of $16.00, a 25 per cent. rise shows a quotation of $20.00. Should this higher level record a similar 25 per cent decline, the resultant price is $15.-00, which is lower than the original cost. This is, of course, a very simple matter, and one that contains no attribute of originality. However, it is well to bear in mind such factors in making price comparisons.

MONTREAL MOTOR SHOW

The annual Montreal Motor Show will be held in the Motordrome, Sherbrooke & St. Denis Sts., from February 25th to March 4th. Applications for display space are coming in in very satisfactory numbers, and the show promises to be one of the biggest yet held.

Table Showing Relative Drop in Prices During 1921.

The fifty staple hardware lines listed above, form a more or less accurate basis for comparatively average quotations in effect from the beginning of the year until the close. Incidentally, the substantial drop in many lines during these few months, adequately illustrates the rapidity of the decline and ratio of present prices, with the levels prevailing one year ago.

Pre-War, High Level and Existing Hardware Prices Compared

Big Decline From High Levels Recorded During Recent Years—Average Quotation is Still Above Pre-War Values—Prices Compare Favorably With 1914 Standards

HOW MUCH have hardware prices dropped? Are they back to pre-war levels, and if not, just how do they compare?

Undoubtedly a large number of prices covering various hardware lines have registered extensive reductions during the past few months, which have placed such commodities within reaching distance of 1914 values. However, only a list of actual prices can supply this information in concrete form. Such a table is contained herewith, compiled from Hardware and Metal market records.

In view of existing trade conditions, coupled with the prevailing high freight rates and the still inflated wage scale, it is not generally considered a fair comparison to look toward the 1914 price levels as indicative of how much higher the current values are, without also bearing in mind the altered circumstances which marketing commerce and trade enterprise have experienced.

Most Substantial Reduction

A more accurate and dependable judgment of the existing price trend in the hardware industry is found in the wide gulf between the inflated standards of 1918-20, and the present quotations. This viewpoint uncovers a most substantial ratio of reduction, which, both on the general average and also when applied to individual lines, can stand excellent comparison with other branches of trade. Liquidation in hardware, therefore, is clearly depicted in the table giving "prices at a glance" reproduced on this page.

A number of lines, comprising 25 in all, were chosen from Hardware and Metal market quotation pages as representative of basic goods in general. The prices in effect at the outbreak of the war in August, 1914, undoubtedly represent the average values at that time. The approximate high level quotations are then compared, thus showing plainly what degree of inflation has been evident during past years. It will be noted, however, that the price peak was not attained simultaneously, but was spread over the space of two years on the various commodities. That is why no set date could be given which would be applicable to all items listed as to just when quotations reached the high-water mark.

Ready Reference Summary

In order to make these comparisons complete, the average price levels in effect at the end of December, 1921, are also ranged alongside, thus supplying yet another illustration of the brisk decline apparent in hardware quotations generally.

A summary of this information is given for ready reference. Applying the index figure of 100 to the quotations of Aug. 1914, it is observed that the upward movement is attained a mark of 291. This, of course, represents the average rise. What is of greater importance, however, is the figure representing the prevailing price average, which is only 172. The true extent of this decrease can be realized more rapidly when the summary is supplied in the following form:

Aug. 1914.	High Level.	Present Price.
100	291	172

In other words, the lines listed in the table referred to, advanced on the average 191 per cent. Since then they have receded to an extent covered by the figure of 119, and are now just approximately 72 per cent. higher than prior to the outbreak of the war.

EXPORT CLUB TO BANQUET

Montreal.—Plans are being made by the Export Club of Montreal and district to inaugurate the club with a banquet to be held on the evening of January 12. Several meetings of the committee in charge of the arrangements have been held, and it is expected that the Dominion Government as well as the Provincial Government will be represented.

CATALOGS WANTED

Chas. McFarland, hardware merchant, Long Branch, Ont., wants catalogs on builders' and general hardware.

Prices At A Glance

	Unit	August, 1914	High level	Present price

Plumbers' oakum	cwt.	3.50	10.00	7.00
Lead pipe	lb.	0.07½	0.19	0.12

The above list is self-explanatory, and supplies in a clear-cut and comprehensive manner the information which many merchants have been seeking. It indicates the location of current prices compared with both their pre-war levels and high standards reached in past seasons. The twenty-five lines mentioned in this table are generally indicative of the average price trend in the hardware trade and therefore the comparison is representative.

Strong Price Argument for Rural Hardware Merchants

Hardware Prices Show Favorably When Compared With Field Crops—Hardware Went Much Higher Than Farm Produce and Has Declined More

IN A LETTER recently received from a subscriber to Hardware and Metal it was suggested that a comparison should be made between hardware prices and the average quotations on farm produce. The object of such an illustration is immediately apparent, for the retail merchant in agricultural districts throughout the country has been faced during the last two years with the "price argument" of farmer-customers.

The main contention of the farmer has been that prices on his products have now receded from the inflation of war-times, whereas average costs of hardware are still high. That there have been some grounds for these assertions in certain quarters, is not denied; but such statements are not irrefutable as indicated by a comprehensive survey of the whole situation.

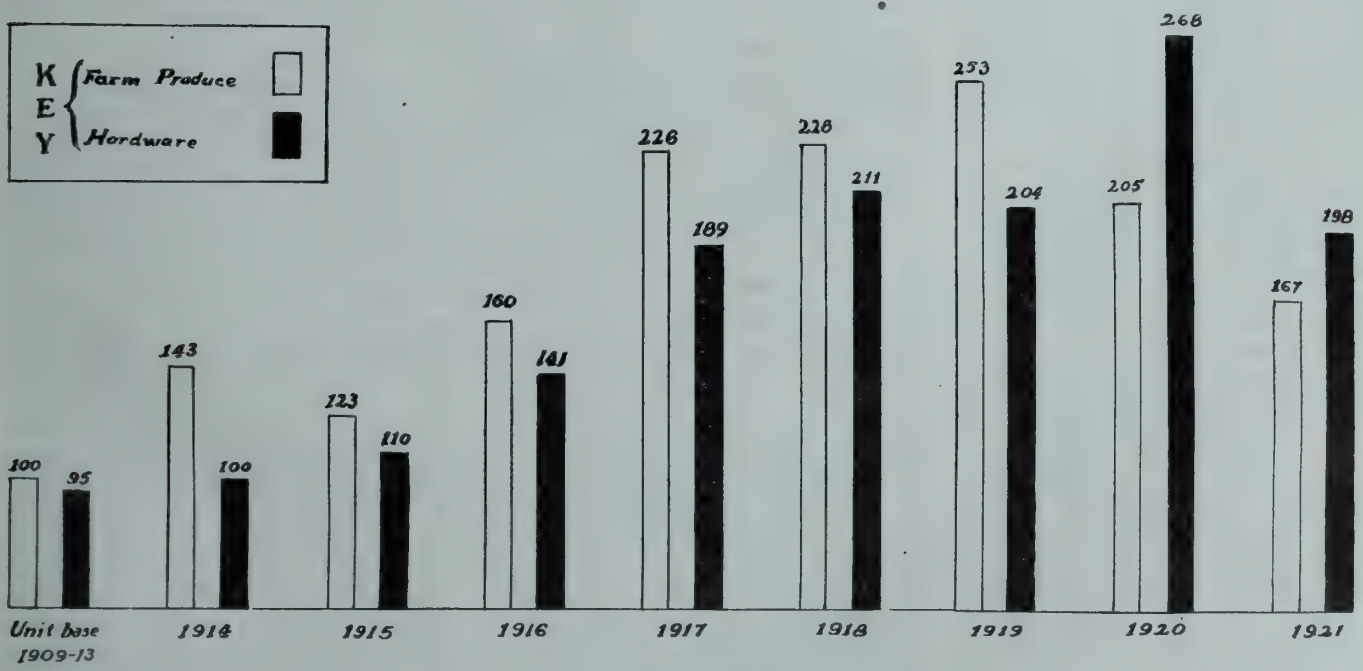
Those who desire to do so, may legitimately meet the farmers' price arguments on a sound basis by referring to the column chart reproduced on this page. This was compiled by Hardware and Metal with accurate figures. The averages covering hardware were taken from prices on fifty individual lines, and are therefore fully representative of the general trend of quotations in the trade. The actual prices were tabulated from file copies of Hardware and Metal weekly reports, and can thus be verified especially as regards the relation of rise and fall during recent years.

Farm produce quotations were supplied by the Dominion Bureau of Statistics, and can be checked in the official Government bulletin covering agriculture. Moreover, the figures are representative of all Canada, as they comprise the average statistics, from the various Provincial agricultural estimates.

These farm produce price levels cover the more important field crops only, and do not include dairy produce such as butter, cheese, eggs and milk, because of the very wide variation evident in the range of these prices throughout different sections of the country. Local markets show the prices to be extremely changeable, whereas the grain markets are more or less governed by general elements and remain closely allied between one State and another.

Field crops then include the following: wheat, oats, barley, rye, peas, beans, buckwheat, mixed grains, flax, potatoes, corn, hay, clover, fodder corn, sugar beet and alfalfa.

Comparing Hardware & Field Crop Prices



This chart will be of vital interest to the Farmer-Customer, as well as the retail merchant in all rural sections of the country It compares the official Government statistics covering field crops in Canada during the last thirteen years, with hardware prices over the same period. The big drop in hardware prices during 1921 is particularly noticeable. The farm produce figures for the past year are estimated from current market reports, the Agricultural Department figures not yet being available.

What Has Been Accomplished in 1921

Summary of Accomplishments of Hardware Trade of Canada in 1921, Through Hardware & Metal reveals Big Strides Forward in Importance and Influence—Strong Stand Taken on Many Big Subjects Helps Bring About Satisfactory Revision

NOT ONLY were Hardware and Metal readers given the unique opportunity of reading fifty-three weekly issues during the year 1921, in stead of the customary fifty-two, but they were provided with a very large volume of editorial data dealing with practically every phase of the hardware trade. A gradually improving editorial service has been the aim during the past year, as will be continued during the new year, and a brief survey of the editorial matter which appeared during 1921 will be of interest to readers in so far as it acts as a summary of the accomplishments of the readers themselves, of whom Hardware and Metal is the spokesman. During the year the closer co-operation of retailers, wholesalers and manufacturers was secured in order to set forth authoritative data on various hardware subjects and a reading of the following survey will show just what influence has been wielded by Hardware and Metal in connection with important subjects and what great assistance has accrued to retailers by this close co-operation.

1650 Pages Of Editorial Matter

A total of approximately 1650 pages of editorial matter have appeared in Hardware and Metal during 1921, of which 760 pages were devoted to market quotations on general hardware, paint and current hardware quotations listed in each issue. In the general editorial section space has been devoted to a discussion of the leading topics of current interest to the hardware trade, the setting forth of various proven plans for aiding selling or administration, editorial comment on curent topics based on thorough investigation of subjects dealt with, and other departments which will be outlined more fully.

A review of the actual selling help articles which have appeared during the year show the following number of pages on various topics. Subjects, if only partly dealt with in a general story, are included under the heading of "general articles" so that the following summary includes only articles specifically confined to the lines mentioned:—Electrical, 9 page stories, 3½ page ad. suggestions, 7½ page displays, total 20 pages; Auto Accessories, 6½ page stories, 5½ page displays, total 12 pages; Stoves and furnaces 8 page stories, 5 page displays, total, 13 pages; Sporting goods, 13 page stories, 13 page displays and ad. suggestions, total, 26 pages; Advertising, 8 page stories, 8 page ad. suggestions, total, 16 pages; Bathroom fixtures, 4 pages; Household goods 15½ pages; Christmas displays, 10½ pages; General articles including tools, cutlery, phonographs, store equipment, fall fairs, toys, showcard writing, etc., stories 42½ page stories, 6½ pages, ad. suggestions, 29 page displays, total 82 pages.

In the paint editorial section there appeared 109 page stories, 7 page ad. suggestions and 11½ page displays, making a total of 127½ pages, which with 106 pages of paint markets makes a total of 233½ pages of paint editorial matter.

A total of 325 pages of actual selling helps covering the various lines of

Retailers Whose Selling Methods Were Described

RETAILERS whose selling methods were described in Hardware & Metal in 1921, were as follows:

ONTARIO—Hendershot Hardware, Mt. Forest; Congdon & Marshall, Dunnville; Hunter Hardware, Wiarton; J. G. Steele Co., London; Carter Bros., Picton; Mathewson Hardware Co., Toronto; Tourtellot Hardware, Port Arthur; Walkerville Hardware Co., Walkerville; J. A. McCague, Alliston; Kerr's Hardware, Dundas; F. W. Karn, Woodstock; Pritchard's Hardware, Toronto; R. H. Breeze, Toronto; J. C. McFadden, Toronto; Ingram Bros., Toronto; Peterboro Hardware Co., Peterboro; Russell Beattie, London; Staples Hardware, Toronto; Dunlop & Co., Pembroke; Bond Hardware Co., Guelph; Danforth Hardware Co., Toronto; J. T. Bowes, Toronto; Cowan Hardware, London; Booth's Hardware, Port Colbrone: Rossiter Hardware Co., Toronto; J.R. Myers & Sons, Stratford; W. A. Rankin, Ltd., Ottawa; McKinley & Northwood, Ottawa; J. Smiley & Son, Woodstock; Baxter Hardware Co., Windsor; Mills Hardware Co., Hamilton; J. H. Slater, Ridgetown; Allin's Ltd., Lindsay; Plummer Ferguson Hardware Co., Sault Ste. Marie; T. S. Tait & Sons, Campbellford; Blain's Hardware, Brampton; May Bros., West Toronto; Purdom Hardware, London; Cochrane Hardware Co., Sault Ste. Marie; Otton Hardware, Barrie; Ingram & Davey, Ltd., St. Thomas; Mills Hardware (Barton Street) Hamilton; Stanley Mills & Co., Hamilton; Dundas Bros., Cobourg; J. M. Adam, St. Mary's; Hall Bros., Cornwall; G. A. McMurtry, St. Thomas; H. E. Moore, Oakville; T. A. Squire, Brantford; McGowan's Hardware, Teeswater; W. G. Edge & Co., Ottawa; G. Hubbard, Barrie; E. I. Torrens, Tillsonburg; Platt Bros., Toronto; Elliott Hardware, Brantford; Adams & Vandusen, Picton; McKelvey & Birch, Ltd., Kingston; Geo. Taylor Hardware, Cobalt; Guest Hardware, Toronto; Burns Hardware, Toronto; Doherty Hardware, Toronto; M. Weichel & Son, Waterloo; Russill Hardware, Toronto; H. Wolfhard & Co., Kitchener; O. B. Henry, Drayton; Crawford & Son, Shelburne; Collingwood Hardware Co., Collingwood; Turnbull & Cutcliffe, Brantford; Brockville Hardware Co., Brockville; Rutherford & Kayser, Simcoe.

QUEBEC AND MARITIME PROVINCES—W. R. Horner & Son, Granby; R. T. Holman, Ltd., Summerside, P. E. I.; R. Chestnut & Sons, Fredericton, N.B.; Lacroix & Leger Ltd., Montreal; Lariviere, Inc., Montreal; Besner & Chasle, Valleyfield, Que.; Omer de Serres, Montreal; J. L. Sauve, Montreal; Emerson & Fisher, Ltd., St. John, N.B.; D. J. Barrett Hardware, St. John, N.B.; J. E. Wilson, Ltd., St. John, N.B.; . H. Bedard, Westmount, Que.; W. H. Thorne & Co., St. John, N. B.; T. McAvity & Son Ltd., St. John, N. B.; Watson, Smith & Son, Shubenacadie, N. S.; J. & P. Davignon Sumner Co. Ltd., Moncton, N.B.; J. S. Mitchell & Co., Sherbrooke, Que.; A. Goyette, Montreal; Madison Hardware Co., Montreal; M. Philbin Hardware Co., Montreal; Fabien Limited, Montreal; A. R. A'Bear, Hardware, Montreal; Owen & Birmingham, Campbellford, Nova Scotia.

WESTERN PROVINCES

ALBERTA—McAfee Hardware Co., Holden, Alta.; Strathmore Hardware Company, Strathmore, Alta.; Consumer's Hardware Co., Lethbridge, Alta.; Hillhurst Hardware Co., Calgary, Alta.; Western Hardware Co., South Edmonton, Alta.; J. H. Ashdown Hardware Co. (retail), Calgary, Alta.; Gibb, Brown & O'Dell, Ltd., Hanna, Alta.; Nellis Hardware, Vermillion, Alta.; Northern Hardware Co., Edmonton, Alta.; W. H. Wilson & Co., Peace River, Alta.

SASKATCHEWAN—Latham's Hardware, Moose Jaw; Woodley & Thompson, Aneroid; F. C. Hesketh & Co., Ltd., Cupar; Erickson Hardware Co. Ltd., Biggar, Sask.; W. W. Cooper & Co., Swift Current, Sask.; E. D. MANITOBA—H. J. McLean, Grandview, Man.; Andrews Hardware, Minnedosa, Man.; Roland Hardware Co., Roland, Man.; Sutherland & Stelck, Ltd., Dauphin, Man.; J. H. Ashdown Hardware Co. (retail), Winnipeg; George Stambler Hardware, Winnipeg, Man.; Manitoba Hardware and Lumber Co., Virden, Man.

BRITISH COLUMBIA—Stearns Hardware Burns Lake, B.C.; Leith Bros., Prince George, B.C.; Share Bros., Ltd., Vancouver, B.C.; W. T. McArthur & Co., Vancouver, B.C.

goods sold by the retail hardware merchant appeared in 1921 comprising stories, advertising suggestions, window and store displays, etc. This does not include articles of a topical nature which indirectly might be classed as selling helps, such as will be outlined. These selling articles were based on actual experiences in retail hardware stores and were representative of all parts of Canada. A glance over the list of 131 retail hardware merchants, whose names are found elsewhere in this issue, will indicate how representative have been the selling articles which have appeared. Due attention has been given each province and the particular problems of merchants in those provinces dealt with.

Apart from the selling-help articles and the market reports, there have appeared a great many articles dealing from the standpoint of the hardware trade, with the national problems of the day, also with conditions among manufacturers and wholesalers, etc. Approximately twenty pages of interviews with manufacturers and wholesalers have appeared, these giving authoritative information from over ninety individuals on conditions in these branches of trade and dealing with the outlook. In a great many cases information secured by Hardware and Metal in such interviews has been responsible for guiding retailers aright in buying and administration. A large number of retailers' opinions were also expressed (see list).

On the subjects of accounting methods, inventory, collection letters, etc., approximately twenty pages of editorial matter have appeared, dealing with the most advanced methods as sponsored by authorities on the subject and as proven by hardware merchants.

Influence In Taxation Matters

Taxation has been an important subject during the past year and Hardware and Metal has wielded considerable influence in favor of the retail hardware trade in connection with burdensome legislation. Approximately fifty pages of editorial space was devoted to a consideration of taxation subjects during 1921. This editorial matter dealt with the turnover, sales, luxury and income taxes. Strong exception was taken to the luxury taxes and the advantages of the sales or turnover tax were dealt with. Involved points in the income taxes were explained, the case of the tinsmiths being classed as manufacturers for taxation was gone into very thoroughly. Proof has been forthcoming that on the subject of taxation and on other subjects dealt with during the year Hardware and Metal has been partially responsible for bringing about improvements from the retailers' standpoint.

Conventions have been fully reported and these in 1921 required thirty-seven pages. These included conventions of the Canadian Paint, Oil & Varnish Ass'n., Ontario Retail Hardware Ass'n., National Hardware Ass'n., Canadian Wholesale Hardware Ass'n., various Retail Merchants' Ass'n. conventions, wholesalers and manufacturers conventions, etc.

Price comparison tables give an adequate idea of the trend of hardware prices and comparing them with movements of other commodities were given fully during the year, requiring thirty pages of space.

(Continued on page 58)

Manufacturers, Wholesalers And Others Whose Opinions Were Outlined

MANUFACTURERS, wholesalers and others whose opinions have been expressed in Hardware and Metal in 1921 (apart from sources of market information) include the following:

A

S. H. Alexander, Wood, Alexander & James, Hamilton, Ont.; James Arnold, General Manager, Canada Foundries and Forgings, Ltd., Brockville, Ont.

B

B. C. Beach, Manager, Beach Foundry Co., Ottawa; J. C. Boeckh, Secretary-Treasurer, The Boeckh Co., Ltd., Toronto; H. C. Bonney, General Manager, The Barrett Co., Montreal.

C

Royal Cluxton, Manager, Canada Paint Co., Montreal; J. H. Conover, Manager, Martin-Senour Co., Montreal; W. H. Cunningham, Kasement Skrene Dore Co., Toronto; Geo. Caverhill, Caverhill, Learmont & Co., Montreal (wholesale); W. H. Cottingham, President, Sherwin-Williams Co. of Canada; C. N. Candee, President, Gutta Percha & Rubber Ltd., Toronto; Gen. Sir Arthur Currie, Principal, McGill University, Montreal.

D

G. C. Davis, Manager, Frothingham & Workman, Ltd., Montreal; J. W. Dowling, General Manager, Caverhill, Learmont & Co., Montreal.

E

A. T. Enlow, President, Dominion Sheet Metal Corp., Hamilton, Ont.

F

W. S. Fallis, Vice-President, Sherwin-Williams Co. of Canada; J. A. Fraser, Sales Manager, Lewis Bros., Montreal, (wholesale); C. M. Farringer, The Boeckh Co., Ltd., Toronto (brushes); D. R. Fowler, Sales Manager, James Smart Plant, Canada Foundries & Forgings, Ltd., Brockville, Ont.; F. W. Field, H. M. Trade Commissioner in Canada; R. R. Farrow, Commissioner of Customs and Excise, Ottawa; J. J. Foote, Sales Manager, McClary Mfg. Co., London, Ont.; James Feir, Regina Manager, Wood Vallance Co., Ltd.

G

E. H. Gurney, President, Gurney Foundry Co., Toronto; Edward Goodwill, Vice-President, Thos. Davidson Mfg. Co., Montreal; J. W. Gibson, General Manager, Canada Cycle & Motor Co., West Toronto; W. R. Gibson, General Manager, Gurney Foundry Co., Toronto.

H

P. Howland, President, H. S. Howland, Sons & Co., Toronto, and President, Imperial Bank of Canada; G. Henderson, President Brandram-Henderson Ltd., Montreal; Col. A. Hatch, Canada Steel Goods Co., Hamilton; Robert Hobson, President, The Steel Co. of Canada, Ltd., Hamilton, Ont.; E. W. Harold, Sanderson-Harold Co., Paris, Ont.; B. B. Halliday, Sales Manager, Canada Cycle & Motor Co., Toronto; T. Hutchinson, Drummond McCall Co., Montreal; W. R. Hobbs, Manager, Consolidated Plate Glass Co., Toronto; P. W. Haywood, Standard Silver Co., Toronto; Col. P. R. Hanson, Montreal District Manager, Dunlop Tire & Rubber Co.

I

John Irwin, President, McArthur Irwin, Ltd., Montreal.

J

A. C. Jones, N. Slater & Co., Hamilton, Ont.

Retailers Whose Views Were Expressed

THE OPINIONS of the following retailers on current topics were given in Hardware and Metal in 1921:—

ONTARIO—R. Hawkins, Smith's Falls; Brampton Hardware Co., Brampton; May Bros., West Toronto; G. F. Potter, Kitchener; H. W. Wilson, Paris; Wells & Emerson, Port Arthur; C. Murphy, Toronto; C. W. Bennett & Son, Gananoque; W. J. Bell, Beeton; Mr. Gilverson, Rice Lewis & Son, Ltd., Toronto; Nelson Mills, Mills Hardware, Hamilton; E. Wanless, J. C. Wanless, Chatham; W. F. Macpherson, Prescott; A. J. Wright, Hamilton; F. B. Smith, Belleville; R. Morwood Co., Welland; W. H. Turnbull & Co., Brantford.

QUEBEC AND MARITIME PROVINCES—Cragg Bros., Halifax, N. S.; E. K. Spinney & Co., Ltd., Yarmouth, N.S.; A. M. Bell & Co., Dartmouth, N. S.; K. Freeman, Bridgetown, N. S.; Lacroix & Leger, Montreal; J. S. Neill & Son, Fredericton, N. B.

WESTERN PROVINCES—Manitoba, Box Bros., Souris; W. E. N. King, Neepawa; Box Bros., Pierson; J. O. Cadham. Portage la Prairie; Sutherland & Stelck, Dauphin; W. A. Brady, Reston; J. Winwram, Pilot Mound; C. C. Falconer, Winnipeg.

Alberta—J. B. Taylor, Camrose; Hewitt & Black, Ltd., Medicine Hat; R. M. Snyder, Wetaskiwin; D. A. Sands, Yorkton; Scott & Lake, Edmonton; J. H. Ashdown Hardware Co. (retail), Calgary.

Saskatchewan—L. P. Woodhams, Elbow; Wood Hardware, Regina.

Valuable Market Reports in 1921

Summary of Reports Indicates That Remarkable Series of Market Developments Were Outlined From Time to Time During 1921 in The Columns of Hardware & Metal. Many Recessions and Advances Were Anticipated in Addition to Recording Current Price Tendencies

WHAT degree of usefulness and service a trade paper can render to its readers in the retail field, especially in times of fluctuating markets, is illustrated by developments that have occurred during the past year in the hardware industry, and in the manner in which these market occurrences have been predicted and outlined by Hardware and Metal.

Just a year ago, in the first issue of January, 1921, lower prices on galvanized sheets and builders' hardware were predicted as the year progressed. These changes slowly developed, many downward revisions having been announced on these lines from time to time. Another instance of this market service occurred in the January 22 issue, when it was stated that "there may be a decline in window glass prices." The following edition contained the report that lower quotations on glass were being given in some quarters through increasing the discounts. The February 5 issue supported the earlier report when a new box list was issued on Belgian window glass.

Predicted Higher Turpentine Prices

Another instance may be cited in the May 19 issue. Further declines were predicted in iron and steel basic markets, with such recessions being reflected later in finished steel products. Such developments have undoubtedly materialized, adequate proof of which can be secured by comparing the cost levels of nine months ago with the prevailing prices.

On April 9, when turpentine prices were down at the level of 80 cents per gallon, some strengthening of these quotations was outlined. When the prices which have prevailed during the past few months are compared, it is readily seen that such a prediction was fully justified and the change has materialized. The current average quotation is $1.15 per imperial gallon.

Drastic revisions to a lower scale on range boilers were outlined in the May 28 issue of this trade newspaper. A new nominal list which showed appreciable reductions appeared in the June 4 issue, while prices on these products were cut still further during the ensuing weeks. The June 4 edition of Hardware and Metal contained an article which pointed out that pre-war prices were expected to re-appear in some quarters on certain basic lines. A summary of the process of liquidation was given, the main features of which have been substantiated by later events, and also through the current standing of the hardware industry.

Expecting Some Further Declines

Turpentine quotations registered an upward tendency in the July 16 issue, the new quotation then being $1.00 per gallon. It was intimated that further increases in the future were considered possible. The prevailing price level undoubtedly substantiates this report.

On August 20, 1921, it was stated that "a considerable portion of the path leading to pre-war standards of cost still remains to be traversed if hardware prices are destined to revert to the levels existing in 1914." Current developments support this statement, as charts and figures contained elsewhere in this issue will clearly show.

Under the heading "Steel Prices Not Yet Stabilized", the opinion was tendered that some further gradual recessions may develop in the near future. These changes have recently been recorded, and this forecast is further supported by weekly and monthly comparisons of the composite average of steel market prices.

Easier Fall Prices On Paint Products

In the August 27 issue of this publication, the Paint market section contained references to anticipated price developments which would bring about lower quotations for the Fall on white lead in oil, putty, paints and the allied products generally. These predicted declines materialized; in the Sept. 10 issue as regards white lead in oil, and putty; and in the Sept. 17 issue on ready mixed paints and flat wall colors.

An article entitled "Cotton Flurry May Affect Prices" appeared in the Sept. 10 issue, covering the trend of prices on the primary cotton markets, and the probable effect of increases on manufactured cotton goods. These higher quotations on wrapping twines, clothes lines, sash cord and candle wick soon followed and were referred to in the next edition, Sept. 17. Other advances in prices on jersey cotton and canvas gloves appeared in the markets of Sept. 24; while further increases in these various lines of manufactured cotton goods followed in the October 1 issue.

Another article on the "Broad Revision In Hardware Prices", was inserted in the Sept. 17 issue, and was based on

1922 Commences with many Price Revisions

THE FIRST week in the new year brings forth an important budget of price changes on hardware lines. Following upon the year of price revision which was experienced in 1921, current changes reveal the necessity of continuing a close survey of market reports in each issue of Hardware and Metal.

Revisions this week, as outlined fully in the market department of this issue, are chiefly of a downward nature. A new list is announced on bolts and nuts, with carriage, machine and miscellaneous bolts all recording lower prices. Cut nails have also undergone revision. Other lines which show revision this week include clay and rock picks, crow bars, grub hoes, mattocks, wrecking bars, steel butts, heavy tee and strap hinges, alarm clocks, hammocks, hose nozzles, and couplings, square cap, hexagon cap and set screws, galvanized and barb wire, iron rivets and burrs, coach screws, stove bolts, single-barrel shot guns, certain makes of revolvers, radiators and boilers, cement, gate valves, soil pipe and fittings. Lower prices are also anticipated on both Dominion and American ammunition. **(See market section.)**

the current decline on paints and other sundries; the cotton goods advances as outlined; and suggested some initial increases were considered likely on finished steel products. This was followed by remarkable lists of price changes in both the October 8 and October 15 numbers.

Another article which appeared in the October 15 issue entitled "Predict Higher Prices On Oil Products" has been substantiated through the increases in gasoline, coal oil, lubricating oils, greases and other refined oil products which have since developed.

Copper Fluctuations Outlined

A further article outlining the copper markets, and indicating the probable trend of prices in this connection, has undoubtedly proved correct. This was under the caption of "Copper Improvement may not last", and as seen by the various prices on the copper markets since that date, the sudden rise did not last, but recorded a temporary set-back with considerable fluctuation. This viewpoint again proved correct.

The situation on stoves, ranges and furnaces was covered in the October 22 issue under the heading, "Says Stove Prices Will Remain Stable". This indicated just what conditions governed this industry, at that time, and compared the volume of current business with previous expectations; also pointing out some suggestions for increasing Fall business in these lines. A marked improvement in the stove market generally has since been noted, and this fact is borne out in the reports contained in the Oct 29 issue, Page 44.

Accurate Market Predictions in 1921

HARDWARE AND METAL'S endless effort to secure and confirm data about market tendencies is well justified by the following list of occasions on which accurate forecasts were made at various times in 1921. This is information available from no other source, such as price services, and can be secured only by being constantly in touch with all possible sources of information. The following summary shows how accurate these forecasts have been, and yet they represent only a minor factor in Hardware and Metal's weekly market service to its readers:

January 1—Lower prices predicted on galvanized sheets and builders' hardware. (Borne out.)

January 22—Lower window glass prices foreshadowed. (Effective January 29.)

April 9—Firming up of turpentine prices predicted. (Borne out.)

May 19—Further declines likely on iron and steel. (Borne out.)

May 28—Reductions in range boilers predicted. (Followed June 4.)

August 20—Predicted much liquidation yet necessary. (Borne out in following weeks.)

August 27—Change in paint prices forecast. (Noted September 10.)

August 27—Further changes in iron and steel predicted. (Borne out.)

September 10—Cotton price increases forecast. (Followed on September 17 and 24.)

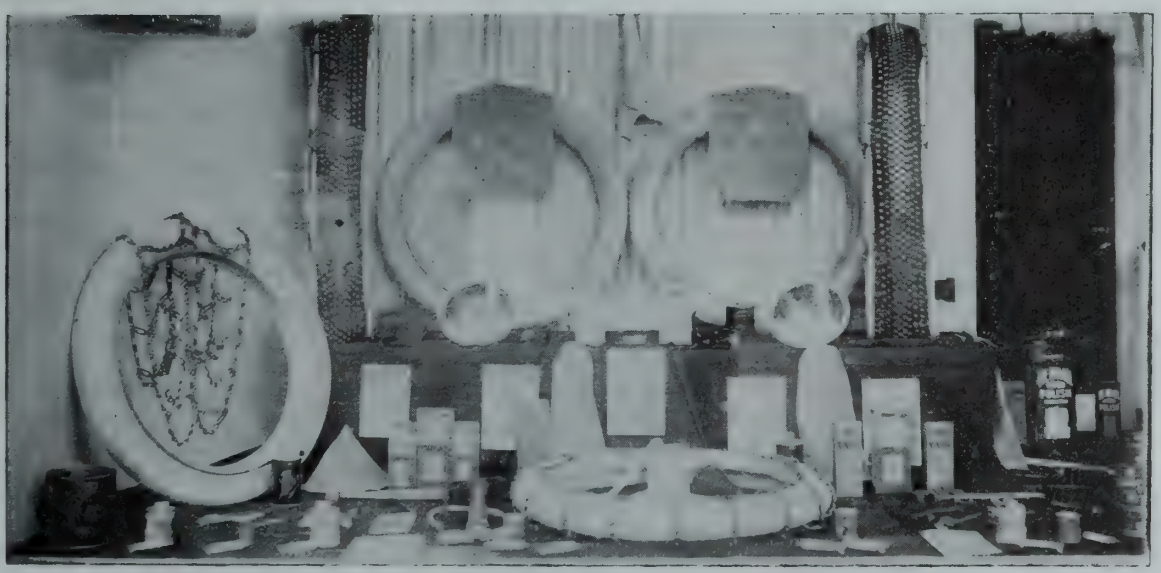
September 17—Broad revision in hardware predicted. (Followed on October 8 and 15 with big list of changes.)

October 15—Higher prices on oil products forecast. (Borne out shortly after.)

October 15—Prediction that copper improvement would not last. (Setback followed.)

October 22—Stability in stove prices till end of year forecast.

51,000 New Motor Vehicles in Year 1921



Figures just compiled for 1921 indicate that registrations of motor vehicles now number 459,818, an increase of nearly 51,000 over last year. Total volume of motor vehicle business in Canada last year was approximately $67,000,000. This would appear as though the motor business had not been quite as slack as some have believed, and with prices having recently undergone considerable reduction it is held that a sound basis has been established for big business in 1922. This may be taken as a fair indication of the present and future possibilities for the sale of auto accessories and it will generally be found that adequate displays and other sales effort will largely result in keeping up sales of accessories, many of which are necessities at this time of year. Note how seasonable lines are displayed herewith.

Hardware and Metal

Canada's National Hardware Weekly

Member Audit Bureau of Circulations Member Associated Busines Papers

The Only Weekly Hardware Paper in Canada

PUBLISHED EVERY SATURDAY SINCE 1888 BY

The MacLean Publishing Company, Limited

Montreal TORONTO Winnipeg

TORONTO, SATURDAY, JANUARY 7, 1922

SOME authorities in the iron and steel industry are predicting an average production of sixty per cent. during 1922. If this is achieved it will represent a considerable improvement over 1921 when an average of about thirty-eight per cent. was made. The mills are the sole dependence of many consumers now that surplus stocks of steel have been much reduced, but it is nevertheless likely that productive capacity of mills will continue much in excess of demand for some time.

Some Important Arguments

THE charts, tables and descriptive matter which appear in this issue represent much research by Hardware and Metal, in an endeavor to present to readers in a concise manner information which will show clearly the position of the hardware industry in the readjustment process which has been in progress for some time. In order to successfully conduct retail or other business a thorough knowledge of the position of the industry is necessary in order that a true perspective may be obtained. A study of the details given in this issue will provide the hardware merchant with a viewpoint and with facts which will enable him to offset many arguments which otherwise might be difficult to answer.

The recent trend of events shows that the hardware industry has played a more important part in the general liquidation than it is ordinarily credited with. Prices on finished hardware have declined approximately twenty-five per cent. in the year 1921 and in view of the fact that hardware was one of the last commodities to reach its peak this rapid decline within a year becomes significant. Present hardware costs are approximately equal to those of 1917.

Records show that while the product of the farm is a little lower in proportion to hardware prices, the latter soared to much greater heights in proportion than did farm products and the stubborn manner in which labor and freight costs are maintained makes improbable at the present any considerable reduction. The rapid decline in hardware enables it to appear in a very favorable light when compared with farm produce, and the merchant has a strong case particularly when supported with arguments that the farmer has not had to write off large depreciations on stock and equipment, and that the manufacturer still has to pay high labor and freight charges.

Government statistics record only a comparatively small reduction in the estimated cost of living which represents rent, fuel, light, food, etc. Transportation charges and overhead costs have undergone but slight reduction. Taken in comparison with these statistics and when compared with many other commodities, hardware has undergone considerable liquidation. These are only a few of the important arguments which can be secured from a study of the charts, tables and descriptive matter appearing in this issue, and this data might well be preserved for reference and as confirmation of arguments presented to customers.

The Buyer In Control

ACTIVITY in the iron and steel industry is somewhat curtailed due to inventory time and during this temporary lull some authorities on the industry have taken to retrospection and considered the probable influence of recent events on the future of the industry. One of the thoughts arising from such consideration is that while it is easy to argue that future steel prices will have to be higher because production costs are such as to allow a very small margin at existing prices, yet the outlook is such as would justify some doubt as to whether higher prices are very near, considering iron and steel products generally, for undoubtedly there will be some fluctuation of prices as the readjustment process continues, and many manufacturers seriously claim to-day that certain prices represent a loss to them.

Reviewed in a broad light, it is evident that the iron and steel industry underwent great expansion to provide war supplies and other articles required in the boom which immediately followed the war. As one authority describes it "producing capacity has grown disproportionately." For some years to come there will hardly be sufficient demand to take care of the total productive capacity of existing plants and close competition on prices will likely be the result. This does not mean that industrial activity will not make big headway in the next few years or that prosperous times will not return, but the capacity of steel mills on the American continent has grown so rapidly in recent years to take care of abnormal demands that while buyers may look upon the current demand as large, sellers will continue to view it as small. There is no doubt a buyers' market will exist for some time to come and the tendency will be to make purchases only on close margins.

Electrical Development

THIS WEEK the first unit of 55,000 horsepower is being developed by the new waterway from Chippawa to Queenston, an achievement which has resulted from years of labor on the great project which is designed to double the energy of the Niagara cataract for the generation of Hydro-electric power. Within a few weeks other units of development will be added and ultimately the total capacity of the canal, which is 600,000 horsepower, will be available. This development will make available for Canada power which will be a benefit and a stimulus to industrial life and it will carry comfort to thousands of homes still denied the advantage of cheap electric power.

It is a coincident that simultaneously with the commencement of electrical development at Chippawa, one of the chief subjects dealt with at a gathering of prominent scientists in Toronto, has been the application of scientific principles to rural life with the idea of making it more attractive. One of the chief recommendations has been the extension of cheap electric power throughout the rural districts in order to make life more interesting and healthy on the farm. With such definite action being taken the lot of the farmer should be materially improved in years to come, and with this improvement will come a greatly widened market for electrical and other requirements. The general prosperity of the country will also be improved by this extended market and by the greater production which will be possible on farms which are modern in every respect.

News of Western Canada

WESTERN CANADA NOTES

Pincher Creek, Alta.—Lebel Co. Ltd., hardware, have sold out.

J. C. Smith of the J. H. Ashdown Hardware Company, Limited, Saskatoon, is in Winnipeg on a business trip.

V. Vallance is on a combined business and pleasure trip to Hamilton and other eastern cities.

Messrs C. B. and N. C. McAllister have formed the Pacific Paint Co. with head office in Vancouver.

Thos. W. Giddens has started business in Vancouver and will deal in hardware and paints.

Guy Higgins, managing director of the Glidden Co. of Canada, was a visitor to Winnipeg during the week.

The hardware business of J. E. Hopkins at Marpole has been purchased by A. Daintree who has already taken charge.

David Corbett, representative of the Glidden Co. of Canada for Manitoba, is spending the holiday season in Winnipeg.

Adrian D. Joyce, president of the Glidden Co. of Canada, spent a day in Winnipeg with the manager of the Winnipeg branch en route to his home.

The Glidden Co. of Canada, Winnipeg, announce that they have appointed J. C. McGillivray, to represent them in the Province of Saskatchewan. Mr. McGillivray has a wide experience in the paint and varnish business.

T. L. Waldon, general manager Marshall Wells & Co., Ltd., Winnipeg, who has been on the coast on a business trip, announced prior to his return east that he found an improvement in business conditions on the coast both in Canada and the United States.

Instead of sending Christmas remembrances to the trade as has been the custom in the past, members of the Hardware and Metal Association of British Columbia took up a subscription this year and forwarded a cheque for $1,000 for the relief of distress in Vancouver, the proceeds being expended by the city relief department.

One of the main social events of the Christmas week in Vancouver was the informal dance and social evening given by the firm of Wood, Vallance & Leggat, Limited, of Vancouver, to members of the staff and their friends. Those responsible for the arrangements were John Dunsmuir, Mr. Applegate, Mr. Hall, Mr. Gerven, Mr. Johnston and the Misses M. Higginbottom, A. Miller and D. West.

One of the big features of the present week was the dinner by the Made-in-B.C. campaign committee to travelling salesmen included among whom were many representatives of the wholesale hardware trade. Frank Parsons, chairman of the committee told the gathering that if B. C. manufacturers put out a good article there was no need of retailers or consumers going outside of the province. He said, however, it was necessary to put out a product which would bear inspection with goods of eastern manufacture.

PLANNING AUTOMOTIVE EQUIPMENT SHOW

Winnipeg, Man.—Plans for the second annual show of the Western Canada Automotive Equipment Association in the Board of Trade building, February 6 to 11, 1922, are rapidly nearing completion. The show gives promise of equaling anything of its kind ever held in North America, and no efforts are being spared by the committee in charge to make this an accomplished fact.

It was announced that on one of the dates of the show a convention would be held, to which all the automotive equipment dealers in Western Canada would be invited. The association also will bring sales merchandising experts to the convention.

C. H. S. BAMFORD

Sales Manager J. H. Ashdown Hardware Co., Ltd., Winnipeg, who during the holiday season was presented with a leather club bag by the traveling staff of the firm as a token of appreciation. Mr. Bamford in acknowledging the gift, spoke of the good will existing on the part of the staff.

MARSHALL WELLS, LTD., CONVENTION

All the salesmen covering the four Western Provinces were in attendance at the annual convention of Marshall Wells Ltd. That more aggressiveness must be shown by manufacturer, wholesaler and retailers, was the opinion held. Stocks are very low in both the city and country towns.

MILLER MORSE HARDWARE CO., LTD., ANNUAL CONVENTION

The Miller-Morse Hardware Company Limited, has just concluded the best annual sales convention that the firm has ever held.

Some of the principal speakers included T. Monypenny, vice-president of the Imperial Varnish & Color Co.; H. Clare, of Clare Bros., Western; G. M. Cowderoy, of the Dominion Cartridge Company; G. W. Ternouth, of the Sheet Metal Products Co. of Canada; T. A. Kennedy, of the McClary Manufacturing Co.; L. R. Baker, of the Burgess Batteries, Ltd.; A. Dodds, of the Canada Dry Cells Co.; N. J. Dineen, Manufacturers' Agent; J. H. Parkhill, of the Parkhill Bedding Limited; W. M. Brennan, of the Oak Tire Co.; E. D. Ranch, of the Coleman Lamp Co.

These gentlemen spoke on various products. During the convention the salesmen went over to the Community Cut Glass Company, where a demonstration was given of the different processes of polishing and cutting glass, under the supervision of E. A. Borland. The salesmen also visited the factory of the Burgess Batteries Ltd.

A feeling of optimism for the coming yar was in evidence, as stocks are low and purchases made during the last few months have gone into consumers' hands. The prospects are very bright and the salesmen are looking forward to a splendid year in 1922.

One of the features of the convention was the social luncheons where the salesmen met and got acquainted with each other and enjoyed each other's good fellowship. Another feature was that the salesmen were taken through the warehouse and were introduced to each and every member of the staff and they were then shown where the goods were kept.

Entertainments were provided in the way of theatre parties, hockey matches and various other kinds of recreations.

Events in the Trade

BUSINESS CHANGES

J. A. Mulligan who recently disposed of his hardware business at Wardsville, Ont., is removing to St. Thomas where he has secured an auto agency.

FIRE LOSS

Hull, Que.—H. O. Boult, hardware, suffered recent fire loss.

OBITUARY

The sympathy of the trade is extended to A. L. Patterson of the firm of Wilson Patterson & Gifford, Montreal, importers of oils, naval stores, dry colors, etc., in the loss of his brother, Dr. R. C. Patterson, who was shot and killed in his office in Saranac Lake by a soldier patient.

The death took place this week of John C. Feely, West Brantford, Ont., formerly a member of Howie and Feely, hardware merchants, but who for the past four years has conducted his own business.

W. H. Bremner, traveller for Goodyear Tire & Rubber Co., Toronto, died in Toronto this week from an operation made necessary by internal troubles caused by overseas service during the war.

PERSONAL

Charles O. Stillman, President Imperial Oil, Ltd., was injured in a motor accident this week.

Herbert Seybold, sales-manager, Starke Seybold Limited, has decided to contest the aldermanic seat in Notre Dame de Grace, in the Montreal city council, in succession to the late Alderman J. P. Dixon.

W. S. McLennan, general sales-manager, Brandram-Henderson Limited, is visiting the Winnipeg branch this week.

W. H. Morgan of Fenwick, Ont., who for the past 21 years has represented the Thos. Davidson Mfg. Co. Ltd., Montreal and Toronto, covering Western Ontario and latterly the Hamilton and Niagara Districts, is leaving his present position to take up other lines over the same territory.

William A. O'Dell was installed as Worshipful Master of St. Johns 209a Masonic lodge, and Harry Abel as junior warden of King Solomon lodge, at a big gathering of London, Ont., Masons Wednesday evening. Wm. G. Kilpatrick of Kilpatrick Bros. was installed as W. M. of Corinthian lodge.

HON. T. A. LOW.

President of the Renfrew Electric Mfg. Co., Ltd., Renfrew Mfg. Co., etc., who becomes minister without portfolio in the newly elected Federal Government, representing South Renfrew. (Photo by courtesy International Press)

At the nomination meeting held at Thedford, Ont., D. L. Scriven was honored by being returned as councillor by acclamation.

PRESENTATION TO W. H. MORGAN

The office of Thos. Davidson Mfg. Co. Ltd., 120 Duke St., Toronto, was the scene of a presentation on Saturday to W. H. Morgan, a member of the travelling staff who has severed his connection with that firm after a service extending over 21 years. The presentation took the form of a gold watch and chain, the former bearing the inscription "presented by the staff of Thos. Davidson Mfg. Co. Toronto branch."

Many expressions were given of the esteem in which Mr. Morgan is held by his fellow workers and best wishes were extended for success in his future undertakings, to all of which he made suitable reply. Mr. Morgan has a wide acquaintance among the trade in Niagara and Western Ontario districts.

George E. Jackson, Toronto, is taking over the territory previously covered by Mr. Morgan.

WESTERN ONTARIO NEWS

James O'Mara and Leo Milord, youths who were arrested in a box car at Jackson, Mich., after robbing the hardware store of Shaw and Shaw at Wallaceburg were found guilty and given an indefinite term in the Industrial school at Toronto. When arrested one of the lads had a revolver which he admitted was taken from the hardware store.

Toronto Hardware Merchants to Organize

Need of Organization Evident at Informal Meeting With Paint Interests—Three-fold Purpose of New Organization to be Formed—Final Details to be Completed at Early Date

AN INFORMAL meeting of paint manufacturers representing the Paint, Oil and Varnish Club of Toronto, together with some of the retail distributors, was held at the Walker House, Toronto, on Wednesday, for the purpose of discussing ways and means of increasing and improving paint and varnish distribution in the city.

The discussion developed the need of organization among retail hardware men which would permit of concerted action in matters of common interest to them as well as co-operative action with various branches of the trade.

Action was taken by the retail hardware men present to form a club for this purpose and a tentative committee selected to draw up a plan of organization and constitution. The purpose of the club will be three-fold, viz., social, to permit closer relationship and a better fraternal feeling; the discussion of questions and problems of common interest and to undertake methods of business promotion in co-operation with various trades in which they are interested.

A further meeting embracing all of the retail hardware interests of Toronto is contemplated at an early date at which time organization will be completed.

The courtesy of the Paint, Oil and Varnish Club of Toronto was extended to the trade to be their guests at such an organization meeting.

Meakins & Sons Ltd. Appoint A. Lawrence To Montreal

Changes in Montreal Representation of Meakins & Sons, Ltd., Brush Manufacturers, Hamilton, Ont., following Death of Late C. W. Meakins.—Meakins Brush Co. Being Wound Up

ARTHUR Lawrence who has for some time been identified with Meakins & Sons, Ltd., brush manufacturers, Hamilton, Ont., has been appointed representative of the company in the province of Quebec following the late C. W. Meakins whose death was recently announced. In 1919, Mr. Lawrence represented the firm in England, Ireland and Scotland, and during the spring of 1920 he was occupied in developing business connections for the firm in South America. On July 1, 1921, he took over a portion of the firm's Ontario business and did the selling principally in Eastern Ontario. He will continue to oversee the Eastern Ontario territory from the Montreal office in addition to his new duties.

A. LAWRENCE

Appointed representative of Meakins and Sons, Hamilton, Ont., in Quebec Province, with headquarters in Montreal.

In the year 1875 the firm of Meakins & Son bought out Kirkup & Co., of Montreal, brush manufacturers, and started a warehouse there moving the factory of Kirkup & Co. to Hamilton and combining it with that of Meakins & Sons. This warehouse stayed under the management of the latter in Hamilton until 1905. In 1878 the late C.W. Meakins of Montreal, left Hamilton and went down a young man of twenty-one to take charge of the office in Montreal. At this time the firm of Meakins & Sons was a partnership and he was the junior partner. In 1905 he withdrew his interests from the partnership and formed a Limited Liability Company and took over the agency in the Province of Quebec handling Meakins and other lines that could be handled conveniently with this line of brushes, brooms and woodenware. This firm was called the Meakins Brush Co., Ltd., of Montreal. This arrangement has continued up to date, but on account of the unfortunate accidental death of C. W. Meakins on November 30th the business of the Meakins Brush Co., of Montreal, is being wound up and Meakins & Sons will open up their own warehouse on January 2nd, 1922, occupying the same warehouse as the Meakins Brush Company formerly occupied.

W. S. FISHER ADDRESSES ST. JOHN TRAVELLERS' ASSOCIATION

St. John, N. B.—On the evening of December 29 a most enjoyable smoker was held by the local Commercial Travellers' Association, with about 250 members and out of town guests in attendance. The president, G. D. Ellis, was in the chair. After welcoming the outside guests, the audience was delighted with a selection from a male quartette, composed of W. S. Charlton, E. C. Girvan, J. D. Woods and S. J. Holder. The chairman then called upon W. Shives Fisher, president of the Canadian Manufacturer's Association of Canada, to address those present. In the course of his remarks he said that Canada's exports per capita were two and a half times greater than the per capita exports of the United States. He spoke of this country's great natural resources and urged his hearers to work hard for the good of the country.

W. M. Gartshore President McClary Mfg. Co.

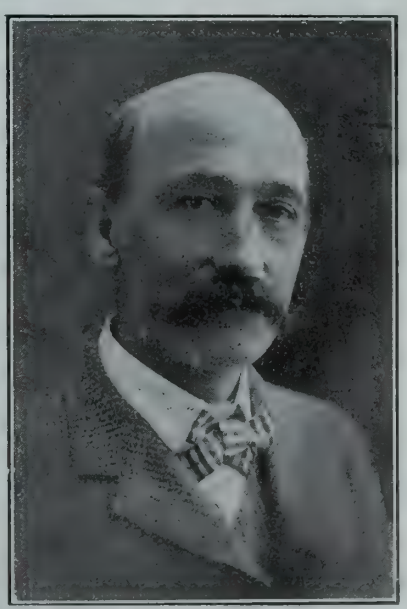
Directors Caused By Death of Late President John McClary—A. M. Smart is Vice-President and T. G. Meredith, K.C., Fills Vacancy on Board of Treasurer

AT THE MEETING of the directors of the McClary Manufacturing Company, held at their head office in London, Ontario, W. M. Gartshore was appointed president and general manager, and A. M. Smart, vice-president and treasurer.

The vacancy on the board, caused by the death of the late president of the company, John McClary, was filled by the appointment of T. G. Meredith, K.C.

It is the intention of the directors, at the next meeting, to pass a by-law appointing another vice-president in the person of John McClary Gunn, assistant general manager.

The directors of the company are now constituted as: W. M. Gartshore, A. M. Smart, John McClary Gunn, John McClary Moore, T. G. Meredith, K.C., with J. K. H. Pope as secretary of the company.



W. M. GARTSHORE

Appointed President and General Manager of The McClary Mfg. Co., Ltd., London, Ont., succeeding the late John McClary.

CONGRATULATIONS!

Among those associated with the hardware trade who were honored in connection with local elections in towns and cities throughout Canada were the following:

Belleville, Ont.—C. Hanna, Walker Hardware Co. (re-elected mayor).

Brockville, Ont.—J. M. Dobbie, A. G. Dobbie & Son, hardware (re-elected mayor).

Waterloo, Ont.—W. G. Weichel, ex-M.P., M. Weichel & Sons, hardware (elected mayor).

Newmarket, Ont.—Howard Cane, Wm. Cane & Son (elected mayor).

Toronto, Ont.—F. M. Baker, local manager T. S. Simms & Co. (alderman, Ward 8).

Wroxeter, Ont.—John Douglas, hardware (re-elected reeve for fifth term by acclamation).

Letters to the Editor

ALBERTA HARDWARE MAN DISAGREES WITH SECRETARY MACPHERSON

Blaimore Hardware Co.,
Blaimore, Alta., Dec. 28, 1921
Editor, Hardware and Metal, Toronto.

I have read with interest, in your number of December 24, page 30, an article entitled "Making the Inventory Tell the Truth," by a Mr. W. F. MacPherson—and I certainly do not agree with him; in fact if one was to take the inventory on the lines as laid down by Mr. MacPherson, he would have anything but the truth, and besides, being in possession of wrong figures it might cause a retailer, taking stock on such basis, untold losses in case he should have to face fire loss adjustment during the following year; everybody knows that the inventory book plays a prominent part in adjusting fire losses.

Mr. MacPherson would have one to list its cost on cost price when such cost is lower than replacement values. He would drop it to replacement values, on the other hand, when such cost is higher than replacement values. For instance I have on hand, say $5,000 of builders' hardware, and this happens in the best regulated families, bought before the war; everybody knows that there has not been any building going on since then. This was bought at about 50 per cent. of present costs. Mr. MacPherson would have me list it at cost price. I have also on hand, say $2,000 of auto tires and tubes, the replacement value of which is now $1.600. Mr. MacPherson wants me to list these at replacement values.

To my mind there is only one correct way to list an inventory, although I don't pretend to be able to do it accurately myself, and it is to list it "all" at replacement costs up hill or down hill; this gives you the information of what you may expect, if you burn down, sell out, or keep in business.

This is the way I endeavor to list my stock, that is, as close to it as I can, but I know it won't be accurate. For instance, I notice two only, basting spoons on the shelf. In looking over this particular item, I see they were bought before the last drop, still they are being listed at the cost price marked on the spoons, being such a small item the pricer has not deemed it necessary to look up the present price. Still, I think our inventory will be as close to the truth as the one taken by Mr. MacPherson.

Thanking you for the space, and wishing Hardware and Metal all kinds of success for 1922.

(Signed) L. Dutil, Prop.

MUCH LIQUIDATION OF HARDWARE

(Continued from page 27)

especially when compared with other trades. Rental stocks likewise are light and surplus stocks of slow selling lines have by this time been pretty well liquidated, under the urgings that such stocks be reduced at any price and a clean slate provided for a fresh start in 1922. In some cases stocks have been reduced to the danger point and possible sales lost by such practice. Under prevailing circumstances however it is difficult to anticipate all the tendencies of buyers. As a general rule hardware retailers have been reducing prices in line with replacement values, but in a very few quarters there is some disposition to hold prices for thirty days or until the high priced stocks of certain lines are cleared out. These few cases have been responsible for the aspersions which have been very unjustly directed at the whole retail hardware trade.

Lack of Industrial Activity

Taking it as a whole the average run of store trade in hardware has not been very greatly affected. Industrial inactivity has affected trade in industrial centres but the alleged slackness in building has merely had the effect of attracting new lines in household goods to the hardware store and it is unlikely that these will be replaced even though builders' hardware trade again becomes active.

The iron and steel industry represents a gradual improvement in the latter months of the year. Leading Canadian producers are now operating at about 50% of capacity compared with 30% early in the year. Recent rail orders placed by Canadian railways will help to maintain activity over the winter months. U. S. steel mills are operating at about 50% capacity at present, though some sheet mills are up to about 75%. The recovery in the case of U. S. mills has been even more rapid than in the case of Canadian mills as judged by the fact that U. S. mills reached a low ebb of about 18% in production early in the year. November figures indicate that the increased production was maintained by both U. S. and British mills.

Recent events in this branch of industry, such as the recent merger of a number of independents and pre-inventory price concessions, make it difficult to form an idea of the approximate prices at which the big business which is expected this year will be booked. As for the other metals, it is significant that with the exception of the Central European powers and Russia, non-ferrous metals are dearer in Canada to-day than in any other country in the world. Copper has been showing considerable

(Continued on page 51)

Twenty Years Ago

Following items reprinted from Hardware and Metal of January 4, 1902:

"The death is announced of Real Angers of Frothingham & Workman, Montreal."

"The Canadian Steel and Wire Co., Ltd., Hamilton, Ont., has obtained a charter."

"Lewis Bros., Montreal, expect to be moved into their additional premises at 26 and 28 St. Sulpice Street, by Feb. 1st."

"By Feb. 1st B. and S. H. Thompson will be settled in their large new warehouse at the corner of De Bresoles and St. Sulpice Streets."

"On January 1, I. P. D. Dods & Co., Montreal and Toronto, admitted Mr. J. H. Morin (who has been connected with R. C. Jamieson & Co., for nearly 30 years) as partner in their Toronto branch."

"When some 20 months ago it was announced that The Copp Bros. Co., Ltd., stove manufacturers, Hamilton, Ont., had been forced into liquidation, a great deal of regret was expressed in many parts of Canada.

"Those who then expressed regret will now doubtless find matter for gratification in the fact that the outgoing year of 1901 saw every creditor, direct or indirect, paid in full. But this is not all; in spite of the enormous sacrifices necessary in order to wind up the business so rapidly, a handsome surplus remains, and that without disposing of any of the company's property except the foundry or without discounting customers' paper.

"From the very fact that the affairs of the company have been so satisfactorily wound up, one is naturally led to examine the circumstances which brought about the liquidation.

"As our readers are doubtless aware, the direct cause of the liquidation was the demand of the Merchant's Bank for the immediate payment of the sum of $37,000 owing that concern. Why the bank should have made this peremptory demand is something we cannot understand.

"As we have already intimated the demand for a settlement of the liabilities to the bank was made early in 1900. The business of the Copp Company in 1899 was the largest in its history. And not only was its paper under discount of better quality than at any other period during 20 years, but it was reduced from over $44,000 in April 1899, to less than $24,000 in 1900, while during that period the business of the company increased by over $15,000. It was true that the company was at the time a little hard up, because of the rather extra heavy stock on hand, but it must, we think, be obvious to most people that its financial condition was by no means unhealthy particularly when we consider that the stove trade in Canada during the year or two previous to the demand of the bank being made was more than usually prosperous."

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

Markets at a Glance

THE OPENING market reports of the year are featured by another large budget of price recessions. Among numerous declines recorded this week, the new discount list on bolts and nuts attracts attention, with machine, carriage and miscellaneous bolts all noted at easier price levels. Varying changes of a similar nature appear on square and hexagon tapped and blank nuts. Important developments have also been announced in quotations on cut nails; galvanized, and barbed wire; iron rivets and burrs; one line of gate valves; radiators and boilers; cement; soil pipe and fittings; stove bolts; clay and rock picks; grub hose; Crescent wrenches; wrecking bars; both pick and cutter mattocks; crow bars; coach screws; alarm clocks; some single-barrel shot guns; the Ivor-Johnson make of revolvers; Winchester arms; square cap screws; hexagon cap and set screws; hammocks; coiled spring wire; steel butts; heavy tee and strap hinges; hose nozzles and brass hose couplings. Some price reductions are also anticipated on both Dominion and American makes of ammunition.

The current markets in the steel industry are of a quiet nature, with the holiday and inventory periods adding to the seasonal dullness. Similar conditions are reflected in the ingot metals, and scrap material markets. The tendency to drop back to easier price levels on range boilers is still apparent, with current sale of these products being very light. The change in discounts on soil pipe and fittings has been more or less anticipated, an unsettled condition having prevailed in these markets during recent weeks.

Montreal Markets

MONTREAL, JANUARY 5.—An exceptionally long and varied list of price reductions is recorded in the hardware markets this week. The New Year usually brings price developments, and this year is no exception. Of special interest is the new list on bolts and nuts, a reduction of varying extent being made on the different sizes and kinds of both lines. Another feature is the complete list of price declines in wire and wire products now announced. Barbed wire has new prices, also plain galvanized wire in all gauges. Coil spring, plain twist, hay wire, both annealed and cut and single loop bale ties all show reduced prices. To those interested, hot water and steam boilers and radiators are revised in price, showing a reduction of approximately 12 per cent; while cement quotations are now lower.

Clay and rock picks, mattocks, both pick and cutter, and grub hoes will all sell for less. Crowbars have been reduced to $7.75 per 100 lbs., and Snap hand cleaner shows a slight reduction. Through increasing discounts, square cap, hexagon cap and set screws are lowered in price, the same being applicable to iron rivets and burrs. A slight reduction is announced by the makers of Winchester arms, all models of guns and rifles being revised. At the time of going to press the new prices on ammunition were not available, but it is understood that both Canadian and American makes are reduced, and new quotations will be announced within the next few days.

CROWBARS NOW $7.75 PER 100 LBS.

Montreal

A reduction of approximately 9 per cent. has been made in the prices of crowbars, these now being quoted at $7.75 per 100 pounds.

BARBED WIRE PRICES REDUCED

Montreal

In the announcement of a general reduction in wire and wire products last week, new quotations on barbed wire were not then available. A corresponding price decline is also made in this commodity, and following are new lower prices:

BARBED WIRE—Catch weights, when available, $4.60 per 100 lbs.

In 20-rod reels, per reel, 2 x 5 in., $3.65; 4 x 6, $3.90; 4 x 4, $4.25.

LOWER PRICES ON HAY WIRE

Montreal.

Annealed hay wire has new lower prices, the reduction being made in this as in other wire products. New quotations on the different gauges are as follows:

ANNEALED HAY WIRE—No. 13, $3.90 per 100 lbs.; No. 14, $4, and No. 15, $4.15.

CUT HAY WIRE, 6 ft. to 11 ft., per 100 lbs., No. 12, $4.80; 13, $4.90; 13*, $5; 14, $5.10; 15, $5.35; 16, $5.70.

SINGLE LOOP BALING TIES ALSO REDUCED

Montreal.

A corresponding reduction is also made in prices of single loop bale ties, and following are reduced quotations:

BALING TIES—No. 12 $4.80; 13, $4.90; 13½, $5; 14, $5.10; 15, $5.35; 16, $5.70.

Maritime provinces, 15 cents per 100 lbs. extra.

GALVANIZED PLAIN TWIST WIRE $5.50 PER 100 LBS.

Montreal

Galvanized plain twist is reduced in line with other wire, and is now quoted at $5.50 per 100 lbs.

COIL SPRING WIRE SHOWS A REDUCTION

Montreal.

Quotations on coil spring wire show a reduction, and following are reduced levels; No. 9, $4.15 and No. 12, $4.30 per 100 lbs.

NEW PRICES ON PLAIN GALVANIZED WIRE

Montreal

Following are the reduced prices on all gauges of plain galvanized wire, announced in the general reduction of wire and wire products:

PLAIN GALVANIZED WIRE— Per 100 lbs.—Nos. 3 to 8, $4.75; 9, $4.10; 10, $4.85; 11, $4.90; 12, $4.25; 13, $4.40; 14, $5.25; 15, $5.85; 16, $6.

BOILERS AND RADIATORS SHOW A REDUCTION

Montreal.

Current quotations on both hot water and steam boilers and radiators are revised, showing a reduction of approximately 12 per cent. on the various sizes and patterns in both commodities. Dur-

ing the past twelve months both boilers and radiators have undergone revisions at different periods, and manufacturers now claim prices are at bottom levels, when present day productive costs are considered.

Following are list prices and revised discounts:

Radiator list prices are for 1, 2 ,3, 4 and 5-column radiators per square foot.

45 in. to 38 in., $1; 32 in., $1.10; 30 in., $1.15; 26 in., $1.20; 23 in., $1.26; 22 in., $1.30; 20 in., $1.36; 18 in., $1.40; 16 in., $1.50; 14 in., $1.55; 13 in., $1.60. Discount 59 per cent. for hot water and 60 per cent. for steam.

Wall Radiators—5 ft., $1.25; 6 ft., $1.10; 7 ft., $1.05; 9 ft., $1.05; 12 ft., $1.05. Discount 56%.

Boilers—Round hot water boilers, low base only (high base discontinued); sizes from 0 to 10, 64 per cent. off list.

Square or sectional hot water or steam boilers, 15-in., 20 per cent.

For Ontario Government trimmings add 5 per cent.

Square or sectional steam boilers, 19 in. to 36 in.. 20 per cent.

Square or sectional water boilers, 19 in. to 36-in., 20 per cent. Ontario Govt. trimmings, 10 per cent. discount.

Round steam boilers, standard trimmings, 28 per cent. off. Ontario Government trimmings 25 per cent.

All prices f.o.b. Toronto, Montreal, Guelph, Hamilton, St. Catharines or Brantford.

BOLTS AND NUTS AGAIN REDUCED

Montreal

Revised discounts are announced on the various kinds of bolts and nuts, superseding the list of October last. A further reduction is recorded on all kinds, but varies to a considerable extent. Plow bolts are the only class not showing a decline in prices. Following are the new discounts:

BOLTS AND NUTS—

Discounts apply to standard list.

Carriage bolts ($1 list), 3/8 in. dia. and smaller, 6 in. and shorter, 47½ per cent.

Carriage Bolts ($1 list), 3/8 in. dia. and longer lengths, 40 per cent.

Carriage Bolts ($1 list), 7-16 in., dia., and larger, 40 per cent.

Machine Bolts, 3/8 in. dia. and smaller, 4 in. and shorter, 55 per cent.

Machine Bolts, 3/8 in. dia. and smaller, longer lengths, 42½ per cent.

Machine Bolts, 7-16 inch dia. and lrager, 42½%.

Sleigh Shoe Bolts, all sizes, 30 per cent.

Coach and lag screws, 55 per cent.

Bolt ends, 42½ per cent.

Square head blank bolts, 42½ per cent.

Plow bolts. 1, 2, 3 head, 35 per cent.

Plow bolts, others, 35 discount, plus 20 per cent.

Elevator bolts, large heads, 30 per cent.

Elevator bolts, corrugated heads, 60 per cent.

Fancy head bolts, 30 per cent.

Shaft bolts, ($3 list) 30 per cent.

Step bolts, large head, ($3 list) 30 per cent.

Whiffletree bolts, 30 per cent.

Tire bolts, 52½ per cent.

Stove bolts, 72½ per cent.

Nuts, 2 in. and smaller, square, blank, off net list, $1.25.

Nuts. 2 in., and smaller, square, tapped, 75 off.

Nuts 2 in., and smaller, hexagon.

Blank, 75 off.

Tapped, 25 off.

Hexagon—Terms—Cash in 30 days from date of shipment, less 2 per cent.

LOWER PRICES ON CLAY AND ROCK PICKS

Montreal

Quotations on both clay and rock picks are reduced, following being the revised prices:

PICKS—Clay or rock. 5 to 6 lbs., $7.25 doz.; 6 to 7, $8; 7 to 8, $8.75.

CRESCENT WRENCHES SLIGHTLY REDUCED

Montreal.

New prices are given on the Crescent pattern wrenches, a slight reduction having been made in the various sizes. Following are new prices:

CRESCENT WRENCHES—4 and 6 inch., $8; 8 in., $10; 10 in., $12.50 dozen.

MATTOCK PRICES ARE REDUCED

Montreal.

A reduction is made in quotations on both pick and cutter mattocks, and these are now quoted at $9.00 a dozen.

GRUB HOES ALSO SHOW A REDUCTION

Montreal.

In line with other picks and mattocks, grub hoes also show a reduction in price, and these will now sell as follows; No. 3, $6.75; No. 3½, $7.00 per 100 lbs.

SQUARE, HEXAGON & SET SCREWS AT REVISED DISCOUNTS

Montreal.

Through increasing the discounts on square and hexagon cap screws, and set screws, these will now sell for less. Square and hexagon cap are now quoted at less 50 per cent., set screws less 55 per cent.

HEXAGON NUTS SHOW A REDUCTION

Montreal

Finished and semi-finished hexagon nuts have new lower prices, a reduction of approximately 20 per cent. having been made.

WINCHESTER ARMS ARE SLIGHTLY REDUCED

Montreal

Rifles and guns of the Winchester make show a revision on the various models, with a slight reduction in most numbers. The reduction varies, and new prices will be supplied to the trade upon application to the jobbing houses .

REDUCTION IN CEMENT PRICES

Montreal.

As announced in the last issue, cement prices are now quoted at a reduction, effective from the first of the year. The decline is of varying extent on quantities, but is approximately 7 per cent. Current business is now seasonably quiet, but a revival of trade is looked for in the near future as a good amount of building is now under construction. Following are revised quotations:

CEMENT—

Car load lots, per bag, f.o.b. cars	$0 92
Per bag, delivered	1 00
Less car lots, per bag, f.o.b., yard	1 00
Per bag, delivered	1 10

Less 5 per cent.

Rebate of 20 cents for empty bags.

REVISION IN AMMUNITION PRICES

Montreal

New lower prices on both Canadian and American ammunition will be announced within the next few days. At the time of going to press revised prices were not available, but Hardware and Metal understands that manufacturers in both countries have new quotations almost ready to announce.

IRON RIVETS AND BURRS HAVE NEW DISCOUNTS

Montreal.

A silght reduction has been made in quotations on iron rivets and burrs. Discounts in each case have been changed from 50 per cent. to 52½ per cent. off list prices. Extras remain as formerly.

NEW PRICES ON THERMOS BOTTLES

Montreal

As announced in a former issue of Hardware and Metal, a reduction has been made in Thermos Bottles and Kits, effective from January 1st. Following are new prices on some of the well known lines:

THERMOS BOTTLES—6, $4; 6Q, $5.50; 11, $2; 11Q, $3.50; 14, $2.50; 14Q, $4.

FILLERS—61C, $1.25; 61QC, $2.25.

Discount 25 and 10 per cent.

SNAP HAND CLEANER AT SLIGHTLY EASIER LEVEL

Montreal.

Makers of Snap hand cleaner announce new lower prices. Three dozen to a box will now sell for $5.40 a case, and the 5 lb. pails at $9.60 a dozen.

PRACTICALLY NO INTEREST IN SCRAP METALS

Montreal

The scrap market fails to show any improvement, and dealers now look for a more or less dull period until the weather improves. The depressed feeling has been felt more in these markets than in other commodities, the only signs of a spurt being evident in October and November last. The increased interest was not for long standing, however, the winter weather closing in soon after. Following are nominal local quotations, which show no change:

Automobile tires	....	0 75
Rubber shoes	....	0 03
Yellow brass	....	0 05
Red brass	....	0 09
Light brass	....	0 03¼
Scrap zinc	0 03	0 03¼
Lead, heavy	....	0 04¼
Lead, tea		0 02½
Light copper	....	0 08
Heavy copper	....	0 10½
Wrought iron, R. Rd., No. 1 per gr. ton	....	10 50
Malleable scrap (ton)	....	8 00
Pipe scrap (ton)	....	6 50
Heavy melting steel	7 50	8 00
No. 2 busheling,	....	4 00
Boiler plate	....	8 00
No. 1 machinery cast	....	21 50

IMPROVEMENT LOOKED FOR IN IRON AND STEEL

Montreal.

Much the same can be said of the iron and steel market as in sheets. Although quietness is now apparent, there seems every indication of an improvement in the earlier months of spring. Stocks and prices are favorable for increased business over the past twelve months, and with the present price of $2.90 base on common bar iron, other lines in proportion, a favorable price footing is established for the next season's business. Little change has developed at primary sources, the seasonable quietness there also apparent. Following are local quotations:

Common bar iron, 100 lbs.	....	2 90
Refined iron	....	4 40
Irish finish machinery steel	....	2 95
Mild steel	....	2 90
Single reeled machinery steel	....	4 75
Band steel	....	2 90
Spring steel	....	4 50
Sleighshoe steel	....	2 90
Tire steel	....	3 10
Toe caulk steel	....	3 80
Harrow tooth steel, per lb.	....	3 05
Mining tool steel per lb.	....	0 22
Black Diamond tool and cast steel, per lb.	....	0 22

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

OPTIMISM AMONG SHEET DEALERS

Montreal

Although there is little activity at present on the local sheet markets, distributors are apparently fairly well satisfied with present outlook. With the closing weeks of the year, and the inventory period following, there is usually an extra dull showing in sales, and dealers do not consider present business any quieter than other years. Sales are small, but fairly numerous, present buying no doubt assisted by low dealer stocks who purchase in very small quantities.

On the whole conditions are thought to be on a much better basis than twelve months ago, and every indication points to an improvement. Local nominal prices are as follows:

BLACK SHEETS

10 gauge	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 40	4 70
16 gauge	4 50	4 80
18-20 gauge	4 55	5 20
22-24 gauge	4 60	5 25
26 gauge	4 65	5 25
28 gauge	4 75	5 35

Sheets 3 in. wide, 20 cents per 100 lbs. extra.

GALVANIZED SHEETS.

ONLY SORTING DEMAND FOR PIPE FITTINGS

Montreal

Although trade in pipe fittings is generally quiet, there is still a fair amount of small sorting orders coming to hand. With the conclusion of the inventory period, brisker sales are anticipated, as dealers are then able to place their orders for complete requirements. Following are unchanged discounts:

FITTINGS—	
Cast Iron fittings	25%
Bushings, cast	27½%
Do., malleable	25%
Flanges	37%
Plugs	27½%
Flange unions	22½%
Malleable unions	42½%
Dart unions, black	33%
Do., galvanized	18%
Nipples, ⅛ to 4 in, close and short	50%
Do., long	60%
Do., 4½ to 8 in., close and short	40%
Do., long	50%
Couplings, 4 in. and under	30%
Do., 4 in. and longer	10%

Class B	0 21½	0 28¼
Class C	0 14	0 21½

METALS HAVE NOT OVERCOME HOLIDAY DULLNESS

Montreal.

The markets for ingot metals opened rather quietly after the New Year and prices generally are slightly easier than have been ruling recently. The fluctuations however are comparatively small and are probably due to the dullness which characterizes the holiday season and which is still more or less in evidence.

TIN.—Tin declined slightly in London during the week and as Sterling exchange is also a little easier, the market is somewhat lower. Stocks of this metal are still heavy and it is difficult to prophesy the future trend. Local market quoted at 38½ cents.

COPPER.—There is no particular change as far as New York is concerned, although activity is lacking in the market. London has declined slightly. It would appear as though the quiet period would be extended for a time. Local quotations are a little easier at 17¾ cents for electro, and 17 cents for casting, chiefly owing to the decline in New York exchange.

LEAD.—This metal is quiet but there is no sign of weakness and the southern market is perhaps slightly firmer. There is not likely to be any particular change in either direction in the near future. Local price now quoted is 7 cents.

SPELTER.—Spelter is also dull but the situation is fairly firm and with the present price of ore it would not be surprising to see price revisions in the near future. The production in the U.S.A. during 1921 was just about half of previous year with the result that stocks have been reduced considerably. Quotation unchanged at 7¾ cents.

ANTIMONY.—Although this metal has been displaying an easier tone in recent weeks, prices for the present are unchanged at 6¾ cents for Chinese, and 7¾ for high grade English.

ALUMINUM.—Aluminum continues the dullest metal on the list, but prices are this week remaining at 26 cents.

Toronto Markets

TORONTO, JAN. 5—The market reports this week are practically one long list of price recessions. Heading the changes is the new discount list on bolts and nuts. Carriage, machine, and miscellaneous bolts all record lower quotations, while the discount on stove bolts is also revised. Another substantial price development appears on cut nails, this change following the similar decline recorded last week on wire nails. A price decrease has also materialized on galvanized and barbed wire. Other easier prices are noted on clay and rock picks, crowbars, both pick and cutter mattocks, iron rivets and burrs, coach screws and alarm clocks. Some single-barrel guns, and the Ivor-Johnson make of revolvers are now priced at easier levels. Lower quotations have been announced on cement, while there have been similar recessions on radiators and boilers. The lower quotations anticipated during recent weeks on soil pipe and fittings have now developed. Revised discounts are also noted on the J.M.T. line of gate valves. Decreases are also looked for on both Dominion and American ammunition. The current markets in the steel industry are of a quiet nature, with the holiday and inventory periods adding to the seasonal dullness.

LOWER QUOTATIONS RECORDED MATTOCKS

Toronto.

Mattocks have been reduced in price, and are now quoted at $10.00 per dozen for both pick and cutter. This change represents a reduction of $1.50 per dozen, or approximately 12 per cent.

IRON RIVETS & BURRS ON EASIER PRICE LEVEL

Toronto.

New discounts appear on iron rivets and burrs, which reduce quotations on these products approximately 5 per cent. The revised discount is 52½, compared with the previous figure of 50 per cent.

LOWER QUOTATIONS ALSO APPEAR ON STOVE BOLTS

Toronto.

Quotations on stove bolts are also revised in the downward direction, in conjunction with changes which appear on other makes and styles of bolts. The new discount is 72½ per cent., compared with the previous figure of 67½. This reduction, therefore, is in the neighborhood of 16 per cent.

CROW BARS NOW REGISTER PRICE RECESSION

Toronto

A reduction of 50 cents per cwt. has been recorded in the current quotations on crow bars. These are now priced at $8.00 per 100 lbs.

SUBSTANTIAL PRICE RECESSION NOTED ON CUT NAILS

Toronto.

Following the recent decline in prices on wire nails, a fifty cent decrease is now recorded in quotations on cut nails. This revised level of $4.35 is f. o. b. Montreal, with carload rate of freight allowed on Toronto, Hamilton and London.

DECREASE IN GALVANIZED AND BARBED WIRE

Toronto.

In conjunction with recent easier price levels on wire and various wire products, both galvanized and barbed wire base prices record a similar decrease. The extent of the recession is between 10 and 11 per cent. The revised levels are as follows:

WIRE—

Galvanized	$4 10
Barbed wire	4 10

EASIER PRICE LEVELS NOTED ON CLAY PICKS

Toronto.

Lower quotations are also announced this week on clay and rock picks. The revised prices on these products are as follows:

PICKS—

Clay—5 to 6 lbs., per doz.	$ 7 80
Do., 6 to 7 lbs., per dozen	8 50
Rock—7 to 8 lbs., per dozen	9 25
Do., 8 lbs., per dozen	9 75

NEW DISCOUNT LIST NOTED ON BOLTS AND NUTS

Toronto

Among the numerous price developments recorded on the New Year markets, is the revision in discounts on bolts and nuts. Both carriage and machine, as well as miscellaneous bolts, appear with lower quotations through increasing the discounts. The revision is of varying extent on the different products. Both square and hexagon, black and tapped, are also noted with easier price levels. The complete list of changes is recorded on the current market quotation pages.

PRICE RECESSIONS NOTED ON RADIATORS AND BOILERS

Toronto.

Through increasing the discount quotations, the prevailing price levels on both radiators and boilers now register a more or less substantial decline. The average reduction of radiators is approximately 13 per cent. while the change on water and steam boilers is in the neighborhood of 10 per cent.

This revision to lower levels was generally anticipated as price shading in these products has been reported. The new levels are effective from January 1, 1922, it having been announced in recent market reports that the previous discounts would remain in effect for the balance of 1921. Following are the current quotations:

RADIATORS—

Revised radiator list prices are for 1, 2, 3, 4 and 5-column radiators per square foot.

38 in., $1; 32 in., $1.10; 30 in., $1.15; 26 in., $1.20; 23 in., $1.26; 22 in., $1.30; 20 in., $1.36; 18 in., $1.40; 16 in., $1.50 14 in., $1.55; 13 in., $1.60.

Discount on 2, 3, 4 and 5-column standard sizes, 59 per cent. for water and 60 per cent. for steam.

Discount on 1-column standard size, and 2, 3, and 4-column hospital sizes 51 per cent. for water and 52 per cent. for steam.

Discounts on 1-column hospital size, water, 33 per cent.; steam, 34 per cent.

Wall radiators—5 ft., $1.15; 6 ft., $1.10; 7 ft., $1.05; 9 ft., $1.05; 12 ft., $1.05. Discount 56 per cent.

BOILERS—

Water:

Round, 64 per cent. off list. Square, 15 per cent. off list.

Steam:

Round, 28 per cent. of flist; square, 15 per cent. off list.

REVISED DISCOUNT NOTED ON COACH SCREWS

Toronto.

Added to the long list of price recessions on the current hardware markets, are the easier quotations on coach screws. The discount on these products has been changed to 55 per cent.

EASIER PRICE LEVELS ON SINGLE BARREL GUNS

Toronto.

Easier prices are now recorded on single barrel shot guns. The revised price on the non-ejector type is $11.50, while the similar new quotation on single barrel guns with ejector is $11.85.

REVOLVERS ALSO HAVE SOME LOWER QUOTATIONS

Toronto.

The Ivor-Johnson make of revolvers now have lower prices. The new quotation on the safety hammer type is $11.00, while the hammerless revolver is now quoted at $12.00.

LOWER PRICES ON AMMUNITION

Toronto.

Some reductions are being contemplated on both Dominion and American ammunition. These revised price levels were not available at the time of going to press, but Hardware and Metal is informed that the new quotations are expected to be announced within a few days.

ALARM CLOCKS AGAIN SHOW PRICE REDUCTION

Toronto

Easier prices have been announced on several makes of alarm clocks. The Big Ben type is now quoted at $3.43, and also the Baby Ben at the same price. With the luminous dials, the new level on these products is $4.80. Other revisions are contained in the current market quotation pages.

LOWER PRICES ON CEMENT

Toronto.

Lower prices on cement have now materialized, the extent of the reduction being in the neighborhood of 9 per cent. Quotations on barrels in car load lots have been lowered to $3.70, while the price on single bags has been reduced to $1.10.

The trend of the market has been easier during the last few weeks, building activities being of a moderate nature at this season of the year, while stocks of cement are described as fairly heavy. The current revisions are as follows:

CEMENT—Car load lots.	Toronto.
Per barrel	$3 70
Per barrel, f.o.b. yard	4 30
Per barrel, delivered	4 50

Single bags, $1.15 each; 4 bags to barrel.
Extra charge of $1.50 per load on less than 24 bag lots.
Rebate of 20 cents for empty bags.

LOWER PRICES QUOTED ON SOIL PIPE AND FITTINGS

Toronto

The anticipated readjustment in the local quotations on soil pipe and fittings has now materialized. The revised price levels, however, are still somewhat above the quotations which have recently prevailed in eastern markets, but it is stated that the current changes are in keeping with present production costs, and that other levels indicate an unusual situation. On some sizes of pipe a decrease of 25 per cent. is noted, while the local quotation on fittings is now 50 and 10 per cent., compared with the previous figures of 40 and 10. Following are the latest revisions:

SOIL PIPE—

2 inch	40%
3 inch	40%
4-inch	40 and 5%
5 and 6 inch	40%
8 inch.	net

FITTINGS—

2 to 6 inch fittings	50 and 5%
8 inch fittings	net

QUIET MARKET ON SHEETS

Toronto

Prices on steel in a semi-finished condition such as sheet and plates, remain generally unchanged on both the primary and domestic markets. Following the holiday period, when an absence of the usual moderate inquiry was recorded, the current quiet conditions are evident during the inventory season. It has been pointed out in Southern distributing circles that a "buyers' market" is generally looked for during the following months, but expressions for the New Year are generally of a hopeful nature. Following are the local average quotations:

BLUE ANNEALED—

10 gauge, base	3 75	4 50
12 gauge	3 80	4 55
14 gauge	3 85	4 60
16 gauge	3 90	4 65

BLACK—

18—20 gauge	4 30	5 05
22—24 gauge	4 35	5 10
26 gauge	4 40	5 15
28 gauge	4 50	5 25

Charge of from 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—

	Queen's Head	Fleur-de-lis.
28 gauge	8 25	7 75
26 gauge	8 00	7 50
24 gauge	7 60	7 10
22 gauge	7 25	6 75
18 and 20 gauge	7 10	6 60
Premier and Apollo.		
10¾ oz.	6 25	7 00
U. S. 28 base	5 85	6 60
U. S. 26	5 55	6 30
22 and 24	5 40	6 15
18 and 20	5 25	6 00
16	5 10	5 85
12 and 14	4 95	5 70

An extra 40c per 100 lbs. is charged for Keystone and Premier brands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10 3-4 oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds.

PLATES, CANADA—	
Dull 60 sheets	$5 65
Ordinary, 52 sheets	5 60
PLATES, COKE TIN—	
I.C., 20 x 28, 112 shets	13 50

1XX, 20 x 28, 56 sheets	16 00
PLATES, TERNE—	
1C, 14 x 20, 112 sheets	12 00

REDUCED PRICES ON UNION TOOL PRODUCTS

Toronto

A general revision to lower price levels has been announced by the manufacturers on Union Tool Co.'s line of products.

SHADING OF RANGE BOILER PRICES NOW GENERAL

Toronto.

While practically all manufacturers and distributors of range boilers still

claim to be maintaining prices at the nominal list recently introduced, it is generally being recognized at the same time that boilers can be purchased at varying quotations below those levels. As one dealer summed up the current situation when discussing this subject with Hardware and Metal, "business is quiet in these products just now, and we are not passing up any possible orders for the sake of a few cents. We find that boilers are being sold at prices slightly below the nominal lists, and we, of course, have to meet this kind of competition."

WROUGHT PIPE MARKET AT MODERATE LEVELS

Toronto.

Quotations on wrought piping are now covered by List No. 54, which became effective during the latter part of December. The revision averaged a price decline of around 8 per cent., and is calculated to place this market on a substantial basis for current trade in the early months of the year. Prevailing business is described as fair for this season, while production is still recording a moderate rate.

REVISED DISCOUNT RECORDED ON GATE VALVES

Toronto.

Current prices on valves and compression work are mostly stationary at the recently revised levels, with the exception, however, of the J. M. T. line of gate valves. The discount on these products has been revised, with the result that prices are now 10 per cent. lower than formerly. Business in these products is described as quiet, a condition which is considered more or less usual at this season of the year. Many firms have been engaged upon the annual inventory, and consequently little variation in the prevailing degree of market activity has been recorded. Following are current changes:

COMPRESSION GOODS—	
Compression work, standard	43%
Fuller work, standard	30%
Bath cocks, compression	32%
do., Fuller	25%
Flat way stop and waste cocks, standard	54%
Round-way stop and waste cocks, standard	46%
Brass steam cocks, standard	40%
Globe, angle and check valves, standard	20%
J. M. T.	20-10%
J. M. T. C.	25-10%
J. M. T. Gate Valves	25-10%
Jenkins Gate or straightway	25%
Jenkins Globe	19%
Radiator valves, standard	58%
do., removable disc	58%
Emco. Check Valves	20%
Webber gate valves	25%
Emco Globe valves, ¼" to 2"	30%
Do., Do., Do., 2½" to 3"	20%
BASIN COCKS—	
No. 0 and 1, Fuller pattern	30%
Quick opening No. 3633	43%

BASE PRICES ON BAR IRON AND STEEL UNCHANGED

Toronto.

The local market for bar iron and steel continues of a quiet nature, with only a moderate degree of trade. The seasonal dullness has been more or less extended by reason of the inventory period. Dealers generally, however, remain more cheerful over the outlook in the industry, preparations being reported under way for much structural work later in the year. As far as prices are concerned there appears to be no definite movement towards further change, with quotations on the basic markets being fairly steady at recent levels. The following are the average current local prices:

IRON AND STEEL—		
Mild Steel bars, base	3 00	3 25
Mild steel bands, 3-16 in. base	3 50	3 75
Bar iron, base	3 00	3 25
Angle iron, base	3 10	3 35
Horseshoe iron	3 75	4 10
Tire steel	3 50	3 75
Spring steel	5 50	6 00
Sleigh shoe steel	3 00	3 25
Hoop steel	3 75	4 25
Norway iron	12 50	15 00
Toe caulk iron	4 00	4 50
Crucible cast sheet steel	30 00	35 00
Mining drill steel	.. ..	18 50
Cast tool steel, high grade	20 00	23 00
Cast tool steel, medium	30 00	36 00

CHANGE IN PRICES ON PENBERTHY BRASS VALVES

Just as Hardware and Metal goes to press, a downward revision is announced in quotations on the Penberthy line of brass valves. The changes in discounts are contained in the current market quotation pages.

LITTLE INTEREST DISPLAYED IN SCRAP MATERIALS

Toronto.

Prices on waste materials have been showing encouraging steadiness as a rule in the face of the suspension of buying by consumers, and even by dealers.

The scrap iron and steel market is in a waiting position. All descriptions are unchanged in price.

Non-ferrous scrap has moved in relatively brisk fashion, some dealers stocking up at unchanged prices despite falling off in demand. Other scrap metals are dull.

The following are averages of dealers' buying prices for large quantities:

Gross Tons— Scrap Iron		
Heavy melting steel (Hamilton)	$11 50	$12 00
Borings and turnings	2 50	3 50
Rerolling rails	10 50	11 50
Scrap pipe	6 00	7 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	6 50	7 50
Agricultural malleable	10 00	11 00
Railroad malleable	11 00	12 00
Net tons—		
No. 1 cast	18 00	19 00
Stove plate	12 50	13 50
Grate bars	11 50	12 50
Standard car wheels	13 50	14 00
Scrap Metals.		
Heavy copper and wire	10 50	11 50
Light copper	8 00	9 00
No. 1 composition	9 00	10 00
No. 1 comp. turnings	6 00	7 00
Light brass	3 25	3 75
Heavy yellow brass	5 50	6 50
Heavy lead	4 00	4 50
Tea lead	2 00	2 50
Scrap zinc	4 00	4 50
Scrap Rubber		
Boots and shoes	2 50	3 00
Lumbermen's rubber boots	2 50	3 00
Auto tires	0 50	1 00
Solid tires	0 75	1 25

ONLY MODERATE TRADE IN INGOT MARKETS

Toronto

Quotations on the ingot markets in general are nominally unchanged. Copper prices remain unchanged at the recent higher levels, although the usual reports of slightly easier prices for spot delivery are prevalent. The undertone to the tin market continues firm, with trade of a moderate nature in general, and other ingots displaying nominal levels.

COPPER.—The copper market maintained a dull attitude over the holidays, but quotations on both primary and domestic markets remained steady. The undertone continues of a firm nature, with only minor transactions recorded. The local prices remain unchanged between 17½ and 18 cents.

TIN.—A fair proportion of tin is reported to have recently been purchased for current delivery, and this development tended to again firm up the tin markets. Fluctuations in this metal continue, with consumers confining their purchases to very moderate quantities. Local quotations are firm at the recent higher level of 39 cents.

LEAD.—Owing to lack of demand, prices on lead have registered some easier levels from the official figure. This condition, however, is not general, and the primary situation is steady, with local prices also unchanged at $6.75.

SPELTER.—There is no considerable activity in this market, the holiday season having recorded a quiet period. The market is nominally unchanged, with the buying policy being still restricted to the hand-to-mouth principle prevalent during the recent months. The local quotations are generally holding at $7.25 .

ANTIMONY.—Sellers are reported to be showing very little anxiety although current stocks are said to be fairly large. The demand is still slack, but the general tone is fair. Prices locally continue between 8 and 10 cents.

ALUMINUM.—This market remains devoid of any new features, and the dull period continues with prices unchanged. The local quotation remains at the 27 cent level .

EASIER TENDENCY NOTED IN CORRUGATED SHEETS

Toronto

An easier tendency has been recorded in the market for corrugated sheets, with some dealers admitting the possibility of slight downward revisions materializing early in the New Year. This situation is generally attributed to the lead recently taken as regards lower prices on galvanized sheets, coupled with the similarity of previous developments in these markets.

Corrugated—	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 7 ½ per cent.

Lighter than 24 gauge and wider than 27 ins., 75c a square extra.

London Markets

LONDON, JANUARY 5.—Another large number of price recessions commence the New Year hardware market reports. Revisions to lower levels appear on steel butts, heavy tee and strap hinges, hose nozzles, hose couplings, the Yale line of padlocks and also night latches, alarm clocks, picks, mattocks, crow bars and hammocks.

Business in this district during the holiday week has generally been of a dull nature. Travellers are not yet back on their territory, and wholesalers report that mail orders are light. Fair business, however, is generally expected during January, and especially in the early Spring months, as it is recognized that present hardware stocks are low.

LOWER QUOTATIONS NOTED ON STEEL BUTTS

London, Ont.

New prices, approximately 5 per cent. lower, have now been announced on steel butts. Following are the revised levels being quoted locally:

STEEL BUTTS—
Loose pin steel butts, No. 804, list, less 15%
Loose pin steel butts, No. 840, list, less 10%
Narrow riveted butts, No. 838, list less 5%
Narrow riveted butts, No. 800, net list.

PRICE RECESSIONS ON HEAVY TEE AND STRAP HINGES

London, Ont.

Price developments are now recorded on heavy tee and strap hinges. The downward revision is approximately 5 per cent. The new lower prices follow:

HINGES—	Heavy Tee.	Heavy Strap.
4 inch, doz. pairs, ...	1 50	1 80
5 inch	1 90	2 20
6 inch	2 15	2 40
8 inch, ...	2 40	3 20
10 inch	4 30	5 70
12 inch	6 90	7 10
14 inch	7 50	8 05

HOSE NOZZLE QUOTATIONS ON REDUCED LEVEL

London, Ont.

New lower prices have been announced on hose nozzles for Spring booking. The revised net quotations are as follows: Simplex, $8.25 per dozen.
Mystic, $7.75 per dozen.

LOWER PRICES NOTED ON BRASS HOSE COUPLINGS

London, Ont.

Quotations on brass hose couplings also record a downward revision this week. The new prices now in effect for present and Spring delivery, are as follows:

HOSE COUPLINGS (brass)—½ inch, $1.75 doz.; ⅝ inch, $1.75; ¾ inch, $1.80; 1 inch, $4.25; 1¼ inch, $11.25.

YALE NIGHT LATCHES RECORD EASIER LEVELS

London, Ont.

A reduction of approximately 15 per cent. has now been announced in the current price levels on Yale night latches. Following are the new net prices in effect locally on some of the regular numbers:

NIGHT LATCHES—No. 26, $5.85 doz.; No. 33, $15.75; No. 34, $18.80; No. 34X, $18.80; No. 37, $21; No. 42, $31.05; No. 343, $38.

WEATHER STRIP SALES NOW ON THE INCREASE

London, Ont.

Weather strip sales are now increasing with the advent of cold weather. The seasonal demand for this product is now under way, and a fair movement is generally reported. Quotations are as follows:

WEATHER STRIP—
Frost King Felt.
Per doz. pkgs. 5 00
Wood and Felt.
No. 60, list, per foot 0 05
No. 61, list, per foot 0 05
No. 61½, list, per foot 0 07
No. 64, list, per foot 0 10
Less 45 per cent.

SUBSTANTIAL REDUCTION ON YALE PADLOCKS

London, Ont.

New prices averaging about 15 per cent. lower than formerly now appear on the Yale line of padlocks. Following are some of the local net prices figured at the revised levels:

YALE PADLOCKS—No. 115X, $3.80 doz.; 215, $8.50; 223, $6.40; 225, $8.50; 235, $8.50; 326, $9.70; 463X, $2.30; 455X, $3.30; 563, $13; 565, 15.60; 645J, $4.60; 805F, $14.70; 813, $16.80; 833, $20; 843, $22.35; 853, $25.65; 9465J, $3.90.

HAMMOCK QUOTATIONS SHOW RECESSION FOR SPRING

London, Ont.

Th new prices now announced on hammocks for Spring delivery, are approximately 7½ per cent. lower than the previous quotations. This revision is another of the timely price announcements on the current hardware markets.

DECLINE IN PRICES ON ALARM CLOCKS

London, Ont.

Included among the lengthy list of price revisions this week are alarm clocks, which products record a drop varying between 5 and 10 per cent. Following are the revised net quotations on some popular lines in this district:

ALARM CLOCKS—	Small lots.	Doz. lots.	2 doz. lots
Big Ben, each ...	3 43	3 30	3 23
Big Ben, luminous ..	4 80	4 62	4 52
Baby Ben	3 43	3 30	3 23
Baby Ben Luminous .	4 80	4 62	4 52
			4 doz. lots.
America	1 37	1 32	1 29
Sleepmetre	2 06	1 98	1 91
Lookout	1 88	1 82	1 72

PICKS, GRUB HOES, AND CROW BARS ALL REDUCED

London, Ont.

All kinds of picks now record reduced prices. This change affects such products as clay picks, rock picks, mattocks, grub hoes, crow bars and wrecking bars. Following are the revised quotations:

CLAY PICKS—5-6 lb., $7.50 doz.; 6-7 lb., $8.25; ⅞ lb., $9.

ROCK PICKS—5-6 lb., $7.50 doz.; 6-7 lb., $8.25; ⅞ lb., $9.

MATTOCKS—5½ lbs., $9.25 doz.; 6 lb., $9.75.
GRUB HOES—3-lb., $6.75; 3½ lb., $7.25; 4 lb., $7.75.

CROW BARS—$7.75 per 100 lbs.

WRECKING BARS—18 in., $2.75 doz.; 24 in., $4; 30 in., $4.75; 36 in., $5.75.

REVISED NET WIRE PRICES

London, Ont.

The new net prices on oiled and annealed wire, figured at the revised base price of $3.80, as announced in last week's issue of Hardware and Metal, is as follows:

No. 11, $4.07 per 100 lbs.

No. 12, $4.15 per 100 lbs.

Hay baling wire, No. 14, gauge, is now priced at $4.20 per cwt.

Winnipeg Markets

WINNIPEG, JANUARY 5.--Additional price revisions are again noted in the hardware markets, the easier prices on wrought iron pipe, attracting particular attention. Another feature in this week's changes are the lower prices on enameled ware, galvanized ware, stamped and pieced tinware, also japanned ware. Other lines quoted at lower levels are cold drawn machinery shafting, Bailey pattern and Stanby planes, and "Yankee" tools.

EASIER PRICES ANNOUNCED ON "YANKEE" TOOLS

Winnipeg.

A downward revision has also been announced in prices on "Yankee" tools. The many lines are now selling at 5 to 10 per cent. lower than formerly.

REDUCED PRICES NOTED ON BAILEY PATTERN PLANES

Winnipeg.

Among the price recessions noted on the current hardware markets are easier quotations on the Bailey pattern iron planes. Following are some of the revised prices on these products.

PLANES—P3, $2.75 each; P4, $3; P4½, $3.55; P5, $3.55; P5*, $3.90; P6, $4.40; P7, $5.05; P8, $6; 3G, $2.90; 4G, $3.15; 5G, $3.60; 6G, $4.65; 7G, $5.30; 8G, $6.30.

REVISED DISCOUNTS APPEAR ON WARE PRODUCTS

Winnipeg

New lower prices are quoted this week on all wares such as enamel ware; stamped ware, galvanized ware, japanned ware and pieced tin ware.

Following are the new discounts:

WARES—
Pearl 30 and 2½ per cent.
Diamond, 10 per cent.
White, 50 per cent.
Decorated, 7½ per cent. advance.
STAMPED WARE—
Plain, 40 and 15 per cent.
Retinned, 40 and 76 per cent.
Galvanized wash tubs, light and heavy 15% adv.
Galvanized Buckets, 37½ per cent. adv.
Galvanized buckets with copper bottoms, 45 per cent. advance.
Pieced tinware, 37½ per cent. advance.

DOWNWARD REVISION IN PRICES ON STANLEY PLANES

Winnipeg

Lower quotations are noted this week on the Stanley make of planes. Prices on all styles are now substantially lower, as can be verified by some of the following new figures:—

STANLEY TOOLS—

PLANES — Bed Rock 603, $3.55 each; 604 $3.85; 605, $4.40; 606, $5.60; 607, $6.40; 608, $7.60.

EASIER PRICE LEVELS ON MACHINERY SHAFTING

Winnipeg

A reduction in prices is recorded this week on cold drawn machinery shafting. Following are the latest quotations.

SHAFTING—3-16, $8.20 per 100 lbs., ⅜, $8.20; 7-16, $7.70; ½, $7.70; 9-16, $7.70; ⅝, $7.40; ¾, $7.40; ⅞, $7.23; 1, $7.23; 1⅛, $7.15; 1¼, $7.15; 1⅜, $7.15; 1½, $7; 1¾, $7; 2, $7; 2¼, $6.75; 2½, $6.75.

NEW LIST PRICES ON WROUGHT PIPING

Winnipeg

As pointed out in a recent issue of Hardware and Metal, new lower quotations have appeared on wrought piping. The revised list quotations—No. 54—are now available as follows:

BLACK PIPE

F.O.B.	Winnipeg	Calgary, Edmonton, Lethbridge & Medicine Hat.	Saskatoon.	Regina.	Brandon.
		(Add to Winnipeg price.)

SLIGHTLY EASIER TONE IN PIPE FITTINGS

Winnipeg.

Although there seems to be a slightly easier tone in pipe fittings, prices have not changed, as yet, and sales have fallen off considerably during the holiday season. The revised prices are given on the market quotation pages.

Pittsburg Markets

PITTSBURGH, January 5.—The finished steel markets have been altogether inactive in the past week, thus being true to all the precedents. The influence is not so much the holidays, as the annual inventory.

As is to be expected in a quiet market, there have been no price developments. The last important changes in prices were in connection with the reductions the Steel Corporation made, December 15 on tubular goods, and December 22 on wire products. These reductions did not represent corresponding declines in the open market, as the market had declined more or less by way of independents cutting the nominal prices. Since the corporation put out its new prices the markets on these lines have been very steady, the independents not having started any fresh price cutting. Quite possibly they will not do any cutting in the near future, as the new prices are very low, relative to the cost of production.

Finished Steel Market

The finished steel market having stood still long enough to be counted, following may be regarded as regular market prices: Bars, shapes and plates, 1.50c.; hoops, bands and hot rolled strips, 2.00c.; plain wire, 2.25c.; galvanized wire, 2.75.; wire nails, $2.50; standard steel pipe, 71 per cent. basing discount; blue annealed sheets, 2.25c.; black sheets, 3.00c.; galvanized sheets, 4.00c.; tin plate, $4.75.

Varying degrees of firmness are exhibited by the different markets. Bars, shapes and plates sometimes bring a little over 1.50c., particularly in carloads, while on a distinctly large lot 1.50c., might be shaded. Strips would probably be shaded on a large lot, but the test does not come as orders are in very small lots. Wire products are very firm, and this seems to be the case with pipe. The blue annealed sheet quotation of 2.25c., is probably firm with the jobbing mills, while the heavier gauges would be sold by plate mills at a lower price. Black and galvanized sheets are phenomenally rigid at 3.00c. and 4.00c. respectively. Tin plate is quite steady, but of course some large buyers can secure slight concessions, this having been the usual thing in the tin plate market.

Future of Prices

As to the future of steel prices, it is very easy to argue that prices will have to be higher, and therefore very many do so. Present prices are at around the cost of production, and some say they are below the cost of production. One is not observant, however, if he does not see that the whole iron and steel producing trade has passed into a period, probably of several years duration, in which there will be close competition and not enough demand to take care of all the productive capacity. This does not mean that demand will not be fairly large or that the country will not be busy, the point being simply that the producing capacity has grown disproportionately. For the country to give work to the entire iron and steel producing capacity it would have to curtail many of its other activities and take to consuming iron and steel instead, or would have to find many new ways in which to use iron and steel.

That is, demand can be large from the viewpoint of buyers and still be small from the viewpoint of sellers, therefore there will probably be a "buyers' market" for several years, and it will not be easy to get the price of any commodity up, once it has gone down. Quite possibly there will be a number of paper advances, by the mills filling up for a few months at strenuously competitive prices and then advancing their asking prices until the orders are worked off. That is a very old practice, and even in the past few months it has been seen in some commodities, particularly sheets. Somewhat the same thing was attempted in hoops two or three months ago, sales being made at around 2.00c., the mills afterwards all advancing to 2.25c., but in a short time they began selling at 2.00c. again.

Such developments seem to suggest that when men get down to actual trading very close prices have to be made, and when that is the case in coke there is no reason to suppose it will not be the case in pig iron and in steel products generally. In the past six years the seller has had the upper hand.

MUCH LIQUIDATION OF HARDWARE

(Continued from page 44)

activity in recent weeks and present prices are expected to be maintained. Tin is of course a highly speculative market, the forces controlling the output and marketing of tin being a most exclusive ring. Spelter is showing signs of strength and zinc producers seem to have the situation well in hand with higher prices expected in the new year. Lead is in an uncertain position and it is interesting to note that while December is generally a quiet month for this metal that more lead was sold in the first two weeks of December than during the entire month of November. These are but brief indicators of the trend of the metal markets.

Taking the situation as a whole it would seem that the hardware trade is on a fair way toward recovery of normal business at a fair profit. There will be some further adjustments due to importing into this country of various hardware lines at prices which represent a loss even on to-day's production costs, and due to other influences, but it is generally conceded that the pendulum has had its big swing up and back and that the adjustments yet to be made will be comparable to the settling down movement after the abnormal trend of the last five years.

Paint Prices are Back to 1918 Levels

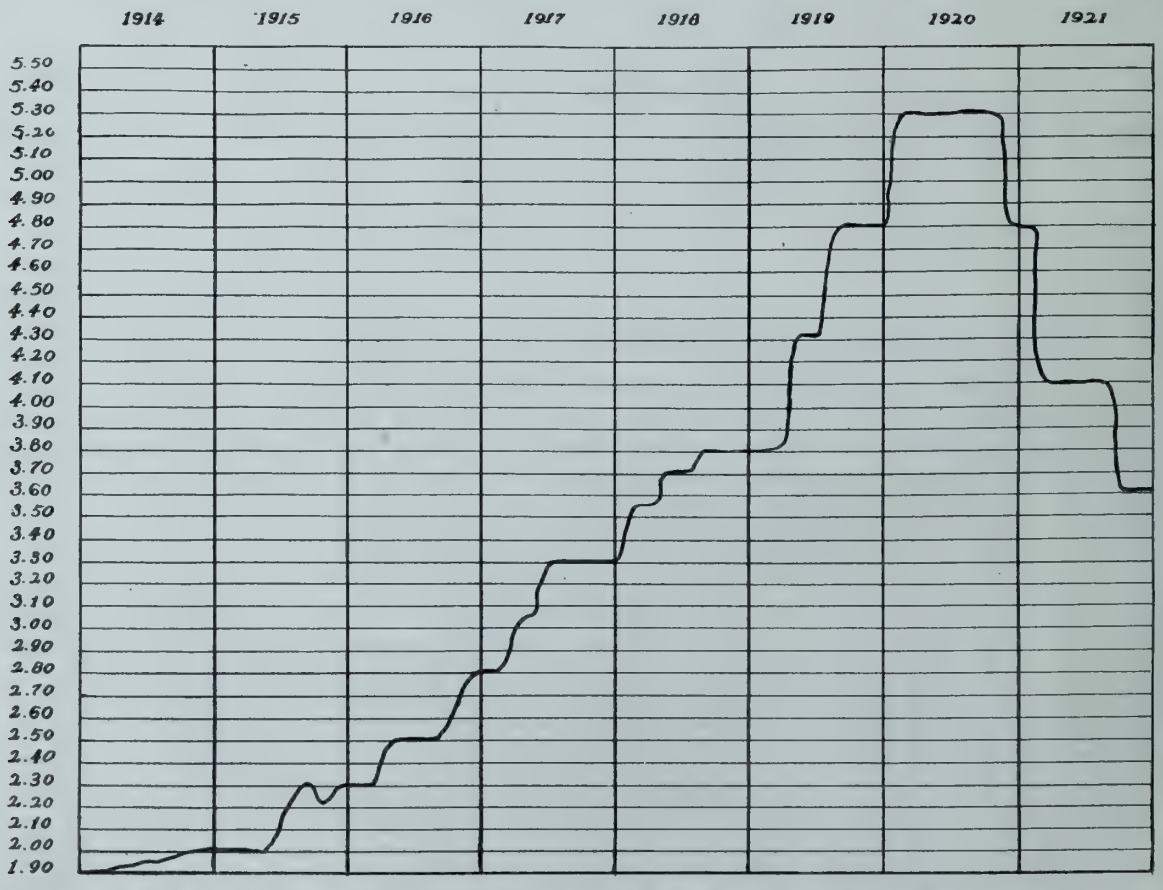
Percentage of Increase Recorded in War Period More Than Cut in Half Through Recessions Announced During 1921—Liquidation in Paint Industry Represented by Price Chart Covering Ready-Mixed Colors—Primary Cost Elements Still Above 1914 Standards

ANY comparison between the prevailing cost of paint and the high price levels which were recorded in 1920, merely tends to place other substantial arguments within the reach of the retail merchant in connection with this vital problem of comparative values. Therefore, in aiming to make 1922 the greatest year in the history of the paint industry, such additional legitimate selling points are available in various instances.

In representing the average price tendency on paint and allied products, any popular line supplies a more or less accurate basis for general application. The price chart reproduced herewith, indicates the net quotations to the trade on high-grade ready-mixed colors throughout the past eight years. In

(Continued on page 58)

Liquidation in Paint Industry



Above chart represents the average prices prevailing throughout the last eight years on a high-grade ready-mixed paint. It clearly shows that the general quotations on paint are now back to the levels which prevailed during the Spring of 1918. Substantial declines are evident since the high peak was reached in 1920. The present prices are only 80 per cent. higher than pre-war standards, while the inflation of fifteen months ago represented an advance of 165 per cent. over Aug. 1, 1914.

SERVICE

CONFIDENCE

FAIR DEALING

The Unwritten Advertisement

ONE DAY about noon I dropped in on one of our "High Standard" Agents for a short social visit, and while there he handed me an order for ten gallons of Paint.

"Nice little sale?"

"Sure is."

"This order is the result of the cheapest and most effective advertising you ever had at that."

"Is that so? How's that John?"

"Oh, just the wagging tongue of a satisfied customer to a friend."

He gave me in three very brief minutes a thought that is well worth passing on.

The wagging tongue of a satisfied customer! True enough—it is the cheapest, surest business building advertisement a Merchant or Manufacturer can enjoy. But, let us not forget the tongue of the dissatisfied customer. Conversely, it is the costliest and most destructive of advertisements.

To secure *satisfied* customers thru the exercise of the highest business principles and practices and to *hold* them permanently is your job and our job. Your job in the case of the Consumer. Our job in your case.

We strive hard—but whether we have succeeded or not you may judge from inquiry and *comparison*.

The Brush Department

Brush Department Plans For 1922

Cleaning Up of Old Stocks After Inventory And Replenishment With Fresh Stock of Adequate Range of Brushes Necessary Before Fresh Start Can Be Made For 1922

AS SOON as inventory time is over and it is known exactly how the brush stock stands, plans can be made for clearing out any stock which shows signs of shop wear and replenishing with new stock. Recent buying has been light due to the pending inventory and the desire to have low stocks at this time, but with the slate cleaned for a fresh start in 1922 some new plans may be brought into effect to good advantage in the brush department.

The merchant who has followed the plan of keeping the brushes in a drawer where they soon take on a shopworn appearance through being jostled about, and where they make no inviting display, will find it advantageous to make an attractive display and to sell stock largely from the display. By following this plan no stock will be exposed long enough to undergo any damage and the reserve stock kept in drawers will not be damaged by being constantly turned upside down to find what is wanted.

Many attractive display ideas have been outlined in past issues of Hardware and Metal which enable a wide range of brushes to be shown effectively without damaging them. When the stock has been brought up to proper volume in various grades and sizes to take care of local trade then the question of plans for stimulating local opportunities must be taken up. In this connection there is always much room for the education of the housewife concerning the use of various labor-saving brushes provided for use in the home. Many women are wasting much time and energy cleaning various parts of their homes which could be much facilitated by the use of a brush specially designed for the purpose. The best way to achieve this result is to get the housewife into the store and then have her attention directed toward a group of brushes. This should be accompanied by some explanatory talk concerning the particular use for which the various articles are designed and the amount of time and energy which their employment will save. The latter are most important points to consider when attempting to "sell" a woman customer.

The whole theme of the selling talk, advertisements and displays in the store and window should be education along the line of the uses for which the existing wide range of brushes is designed, and linking up the idea that a fresh and complete stock is available for the customer's scrutiny.

BOSTON VARNISH CO. SALES CONVENTION

Departing from the usual custom of holding general conventions, involving the attendance of the whole sales force, the Boston Varnish Co., Boston, Mass., manufacturers of Kyanize Varnishes and Enamels, this year, conducted regional or divisional meetings.

It was felt that no conventions in the history of the company were ever attended with more enthusiasm and more genuine interest than these two of the East and West. The convention plans, at both places, were laid down along novel and unusual lines. First, the products themselves, were thoroughly tested and their merits discussed by each salesman. During these "personal application sessions" the Eastern salesmen were assembled in one of the large rooms of the new factory, and facilities were provided whereby each salesman had a bench individually assigned to him, with test panels whereon he could apply and experiment with each individual product on the list. One of the features was accomplished by providing each of the salesmen with an apron on which was boldly painted one of the letters in the words "Kyanize Products."

Both the Eastern and Western conventions were so arranged that the morning sessions were given over to a personal, first-hand acquaintance with the products, both old and new, by every salesman present. The afternoon session of the first day confined itself to a thorough presentation of the company's selling policies and matters of general organization interest. On the second afternoon a complete presentation of the new advertising plans for 1922 was released to the men. Each salesman was presented with a unique style of portfolio, wherein the full scope of the advertising plans was exhibited. New display matter for the dealer's window and store was also shown.

In concluding the sessions at both points the general business situation was analyzed in detail by the executives of the company and the plans, for meeting these conditions and for making "1922 the greatest Paint and Varnish Year" were emphatically put forth and enthusiastically received by the men.

PAINT PRICES BACK TO 1918

(Continued from page 52)

compiling this diagram, the price levels were taken from file copies of Hardware & Metal. These supply—in compact form—a brief synopsis of the service contained in the current weekly paint market quotation pages, as well as a summary of costs recently experienced in the paint industry.

Increases During War Time

Similar arguments undoubtedly apply to the majority of other paint products such as flat wall colors, ready-mixed white, porch and floor paints, and also enamels and varnishes. The trend of quotations on ready-mixed colors serves as a fair and reliable foundation of the average tendency and is indicative of developments which have occurred in the ratio of rise and fall from time to time.

In studying the diagram, it is observed that there was practically no change at all in paint quotations until June 1915. This was almost a year after the commencement of the war; while during the following four years, the changes were of a minor nature composed of numerous small advances. Frequent revisions in existing price levels were announced, but the trend was always upward, thus reflecting the steady rise in the cost of raw materials and production levels.

Highest Point Reached In 1920

In 1919, two marked increases were recorded, to be followed by another substantial boost early in 1920, which brought quotations up to the highest point, that of $5.30 per gallon. Within the last fourteen months, three reces-

Boeckh's Brush News

Seven Brushes for A Young Man's Kit

The following is an extract from an article by the Rev. Byron Stauffer:

A young fellow from Orillia asks me for advice on what he calls "minor matters" pertaining to success in the big city.

"You may cut out the usual ministerial dope about purity, sobriety and honesty," he writes, "for with the young man of the gospels I can say, 'All these things have I kept from my youth up.' What I want is to save valuable time by securing a few tips on catching the eye of some big man of the business world and thus get into the game quick."

Here goes then.

I earnestly advise the immediate purchase of seven brushes: Tooth Brush, Shaving Brush, Shoe Brush, Hair Brush, Clothes Brush, Flesh Brush and Hand Brush. By the faithful use of these seven tools, I would keep neat.

I would shave every morning without skipping even once a year. Don't make the excuse that you have an exceptionally tender face. Keep your razor sharp, rub in the lather well, steam the face with a hot towel and shave once over. But don't you ever go downtown with your chin looking like the autumn stubble fields of your native county of Simcoe.

Go and have your nails manicured just once. Watch the procedure carefully; then buy a manicure outfit and go to it.

It does not cost much to keep neat after these few initial expenditures and the first effort of establishing the habit.

Cause Miss Nimble-Fingers of your office staff to remark that the Orillia chap always looks as if he had just emerged from a band box.

Young fellow from Orillia, I salute you! From your very questions, I know you'll do.

The above will call to your mind the many possibilities that are right in your midst for the sale of Brushes.

Seven Brushes for the young man means an equal number for every member of the family, with the necessary house-cleaning and Paint Brushes added. This opportunity for increased business is right at your door all the year round—as Mr. Stauffer says "GO TO IT."

Weekly Paint Markets

Montreal

MONTREAL, January 5.—The opening week of the year has brought little or no change in any of the paint markets. Prices on all products are continuing unchanged, with the undertone in practically all markets displaying a fair amount of firmness, notwithstanding the usual dullness at this season. Linseed oil is very quiet, but owing to the steady flax seed market in recent weeks, and a slight recession in cake and meal prices, oil quotations are fairly firm. Turpentine in primary circles is still on a strong footing, with practically no change from last week. Locally this product remains quiet, but an improvement is now anticipated after the turn of the year.

Window glass prices are somewhat firmer owing to increased transportation rates since the close of navigation, and an improvement in the Belgium situation. Although there is no immediate indication of a revision to higher levels, one importer states a price increase in the near future would not be surprising. Paint and varnish manufacturers look for a continuance of brisker business now that salesmen are on the road after the holidays. Prices on all products are holding unchanged with no indications of a revision for spring business.

TURPENTINE STILL DISPLAYS FIRM TONE

Montreal.

With quotations on turpentine remaining unchanged, the market continues seasonably dull, although more activity is anticipated now that the holiday season is over. Interest continues to be shown in the future of this product, and some look for a steady-to-firm situation with higher prices not unlikely as soon as more activity is displayed. It is pointed out that all through the quieter months of late Fall and Winter, and up to the present, there has been a fairly strong undertone in the market. There have been fluctuations, but on the whole the position of this product has been well upheld. There will undoubtedly be an increase in the volume of business as the following few months pass and this is apparently what is required to stiffen prices. Prevailing prices too are generally considered low in comparison with allied products, and producers maintain they cannot supply at any lower prices than they are now quoting. Apparently much depends on demand, and if an improvement is felt with the advancing season, changes to lower prices, would seem very remote. Following are prevailing quotations:

TURPENTINE—	Imp. gal.
1 barrel lots	$1.17
2 to 4 barrel lots	1 15
Broken lots	1 27

NO CHANGE IN LINSEED OIL PRICES

Montreal.

There is little change to record in the linseed oil market this week, prices remaining at former figures and the undertone continuing fairly firm considering the present slack season. With the holiday season now past, more interest in this product may be expected, although buyers are not expected to purchase for spring requirements until later in the spring months. In the undertone of the oil market it would seem that one factor was pulling against the other. Flax seed has been very steady recently, which has tended to check any recessions in oil prices, while the lack of interest on the part of buyers would ordinarily cause a weaker tendency. However, notwithstanding the quiet period usual in the present month, and this season has been no exception, prices have been well maintained throughout. The by-products, cake and meal, are recorded at slightly easier quotations, and this is also assisting in keeping a firm tone in the oil market. Unchanged local prices are as follows:

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrel lots, per gal	0 81	0 83
3 to 5 barrel lots, per gal	0 79	0 81

Less barrels, add 10 cents per gallon.

Toronto

TORONTO, January 5.—Current interest in the New Year paint markets is centered upon the local reduction of 5 cents per gallon in the price of turpentine. This change brings the domestic level to $1.15 per Imperial gallon in one barrel lots; but is of particular significance at this time owing to the fact that quotations on primary markets are maintaining the recent firm undertone, and in addition have recently advanced. The local change is attributed to the current easier rate of exchange, combined with the slack season. The prevailing demand on southern markets is also quiet, but requirements are stated to be absorbing the new receipts, and the consequent call for supplies from stocks on hand, has resulted in strengthening the nominal position at primary centres.

LOCAL TURPENTINE PRICES ON EASIER LEVEL

Toronto.

Further fluctuations in turpentine prices commence the New Year market reports. Owing to the easier rate of exchange, combined with the absence of any real demand, local distributors of this product announce a reduction of 5 cents per gallon. This change brings the nominal quotation down to the level of $1.15 per Imperial gallon in one barrel lots.

It is considered a noticeable fact, however, that quotations at primary production centres have not receded, but on the other hand the recent firm tone is still evident, with the latest reports indicating a price advance.

Local distributors state that there is very little business at present, but the domestic quotations are usualy governed by primary market levels, and should the current increase in southern circles develop a permanent trend, another revision in local price levels would not be surprising under such circumstances.

TURPENTINE—	Imp. gal.
1 barrel lots	$ 1 15
2 to 4 barrel lots	1 14
5 gallon lots	1 30

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $15 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph Windsor, or Montreal but freight may be equalized from any of these points.

Car load lots of 70 bbls. Price on application.

Less than 1 barrel lots—15 cents per gallon additional.

SEASONAL DULLNESS IN LINSEED OIL MARKETS

Toronto.

Linseed oil continues very quiet, and has failed to record any new development. Many consumers have been engaged upon the annual inventory period, and this is attributed as another feature of the current absence of demand. Such conditions, however, are seasonal, and there is little disposition to purchase other than sufficient for immediate requirements.

There is much more interest in future requirements. The flax seed markets are remaining fairly steady, with a recession in the prices on cake and meal having a tendency to maintain the prevailing levels on oil, in spite of the apparent dullness. More interest in linseed is generally looked for during the early months of the year. The unchanged nominal quotations follow:

LINSEED OIL—	Per Gallon.	
1 to 2 barrel lots	0 84	0 87
3 to 4 barrel lots	0 82	0 86
6 to 9 barrel lots	0 81	0 84

Less barrels, add 15 cents per gallon.

SIGN OF MERIT
BEST B&Co MADE

"Muresco"

Oftenest Called For--Easiest to Sell

Retail hardwaremen know that "Muresco" is the first thought of customers who want an easy, satisfactory finish for their walls. It's easiest to sell what they ask for.

This popularity is the result of sheer merit in Muresco. The soft, agreeable finish, harmonizing so readily with artistic interiors, has won its way into the hearts of Canadian home-lovers. The hardware merchant can cash in on this.

A Brush Worthy of Muresco

This is a 5¾-in. brush of absolutely pure Chinese bristles. There is no horse hair used, or other hair of any kind. As can be seen, it is a broad, full, generous brush, suitable in every way to get the best results from Muresco, with consequent satisfaction to all concerned.

The Moore Line Consists of:

MURESCO: The best wall finish.
HOUSE COLORS: A pure linseed oil paint.
FLOOR PAINT: "Can't be beat for under feet."
TILE-LIKE: Varnish and Stain combined.
MOORAMEL: Perfect flowing enamel.
SANI-FLAT: A non-poisonous flat oil paint.

PAINT PRICES BACK TO 1918

(Continued from page 54)

sions have been announced by paint manufacturers, the net results of such declines placing the average current quotation on a par with 1918 Spring standards. While the peak was reached in 1920, or just over one year ago, paint prices have since dropped to the approximate ratio of more than three years ago.

It will be noticed that the decline during 1921 was of a substantial nature, and clearly indicates the steady strides made toward liquidation in the paint industry. In reaching the present level of $3.60 per gallon, from the pinnacle of $5.30, the three separate concessions given occurred within the space of eleven months, and thus quotations receded in less than one year to the same to climb. While paint prices in general extent that they took almost two years are still above the average of pre-war days, the ratio of decline can be followed very clearly when calculated on a percentage basis. The high level of $5.30 represents an advance of 165 per cent. over the August, 1914 value. Similarly, the present price of $3.60 is only 80 per cent. higher than the pre-war basis, thus giving the retail merchant another authentic price argument.

Increase Cut In Half

In other words, the proportion of increase has been more than cut in half during the past year. Including the reduction which occurred towards the end of 1920, paint quotations have now reached a mark which is approximately 32 per cent. lower than the high record of that season. At the same time, however, it should be remembered that when calculating the percentage of decline, the same amount in figures is apparently smaller than when based on the percentage of increase, although the actual sum is identical in each case. Thus it is that the drop of $1.70, is 32 per cent. of $5.30; but the same amount of $1.70, is a 47.2 per cent. advance on the prevailing cost of $3.60.

WHAT HAS BEEN ACCOMPLISHED

(Continued from page 37)

Other regular features which were imports and exports, eight pages (small type) of answers to retailers' enquiries concerning the buying of merchandise; twelve pages of advice to retail salesmen; seventeen pages of selling helps as applied to brushes.

Western Canada

Western Canada was well taken care of with sixty-five exclusive pages of editorial matter setting forth news of the prairies and British Columbia and reviews of conditions and the market outlook. In addition, a portion of the market space is devoted each week to a comprehensive report on hardware price tendencies from Winnipeg and Vancouver. In the general articles on topical subjects, retailers', wholesalers and manfacturers' opinions, dealer selling-help articles, etc., due attention was also paid to Western Canada.

Eighty-five pages of news of the hardware trade also appeared during 1921 including brief notes on business changes, fire losses, obituaries, personal items, incorporation notes, new firms, etc. New hardware lines of interest to the trade were dealt with in twenty-two pages of space, and a page of editorial comment on live topics was contained in each issue.

Other subjects dealt with during the year include the following:—Bankruptcy Act fully outlined; Sheet Metal problems outlined; Freight rates on hardware dealt with; Firearms legislation analyzed fully in 8½ pages of space; Marking of silverware, Insurance plans,; Parcels Post; Building schemes; Half Holidays; Trade Marks on hardware; District business men's associations; Marking of Imports regulations (now amended) 7 pages; Mail order competition; Buy-at-home campaigns; Oil heater controversy; Tire Manufacturers action re the hardware trade; Basing of prices on replacement values;

Considerable space was also given to a consideration of the basis of buying and selling gasoline in the Western provinces and at the present time Hardware and Metal is in co-operation with Government officials at Ottawa with a view to removing the difficulties. The Christmas window contest of 1920, judged early in 1921, represented the largest number of competitors who, up until that time had taken part, thus showing the increasing interest being taken in it. A controversy with the Weights and Measures officials concerning the sale of spring weighing scales by a department store was also fully aired. Readers of Hardware and Metal who have given their co-operation during 1921 in dealing with the problems of the trade will therefore be interested in noting from this summary that such co-operation has, through Hardware and Metal, resulted in much influence being brought to bear on such subjects as Gasoline Sales, Luxury Taxes, Marking of Imports, Sale of Spring Weighing Scales by Department Stores, Price Cutting on Oil Heaters, Revision of Firearms Legislation, Classing Tinsmiths as Manufacturers, etc. On a number of these subjects satisfactory revision has been made and on others further effort will be made during 1922.

A pretty winter wedding was solemnized at London, Ont., when Miss Jean A. Wardrope, a daughter of J. W. Wardrope of the Hobbs Hardware Co., became the bride of William E. Smith of Plenty, Sask., son of G. E. Smith of Esterhazy.

O.P.W.

1921—Post-Mortem

In most businesses 1921 has not been a good year.

In the paint business it has been very good.

Whatever your own general line, whether paints and wallpapers, hardware, building supplies or "everything," you know what your Paint Department has done this year.

When all other lines were still, paint and varnish moved. Often, they alone kept a dealer's balance in the profit columns of his monthly statements.

Paint and varnish will move again in 1922, as it never moved before. The "Save the Surface" Campaign is producing wonderful results, now is the time to cash in on it.

Our message to O.P.W. dealers is that the year 1922 can be made the greatest Paint and Varnish year yet if they will equip themselves for the public demand that must inevitably arise.

Sign and Send It *Now!*

Just a penny postcard requesting us to send you particulars of the Elastica Agency proposition. The work of a moment but a moment well spent. By return mail we will send you detailed information about

TRADE ELASTICA MARK.

The Complete Line of Paints and Varnishes

and will show you the many and varied advantages that will accrue to you through the exclusive agency for these widely known and popular Paint and Varnish Products.

Some of Canada's most successful paint dealers have found the Elastica Agency the straight road to bigger and better paint and varnish sales. The very fact that it offers a complete line—a paint, varnish, stain or enamel for every customer's requirements—is a point worth remembering.

Bear in mind that your post card enquiry involves no obligation at all. We just think you'll be interested and will be glad of the opportunity to place our proposals before you.

Barrett Roofings, Cements Industrial Paints etc.

IT is *repeat* sales, not *first* sales, that keep business going and growing. That's why successful dealers like to handle Barrett products. They know from experience that these products make satisfied customers and that satisfied customers make profits.

Elastigum Plastic Patching Cement

A tough, elastic, waterproof cement for general repair work and waterproofing purposes. Known as "The Plastic Cement of a Hundred Uses." Unequalled for patching holes in roofs, repairing flashings, gutters, etc., etc.

Comes ready for use in 1-lb. tins (24 to the case); 5-lb. cans (12 to the case) and larger packages up to barrels of about 600 lbs.

Plastic Elastigum being applied to make a water-tight joint around a ventilation pipe. It sticks to any surface.

Everlastic "Rubber" Roofing

The fastest selling roll roofing on the Canadian market and the first choice of experienced buyers for all steep-roofed farm and factory buildings. Everlastic is a safe roofing for you to sell and a safe roofing for your customers to buy. It sells at a low price, is easy to lay, and gives unfailing satisfaction.

Everlastic "Rubber" Roofing comes in three weights; light (1-ply), medium (2-ply), heavy (3-ply). Rolls of 108 sq. ft. Nails and cement for laying are packed with each roll.

Everlastic Liquid Roofing Cement

The greatest material in the world for resurfacing worn-out prepared and "rubber" roofs. Comes all ready for use, is easy to apply and forms a smooth, durable, weather-proof coating which adds years of service to the old roofing, at very small cost.

Put up in all sized packages from 1-pint tins to barrels of 40 gallons.

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

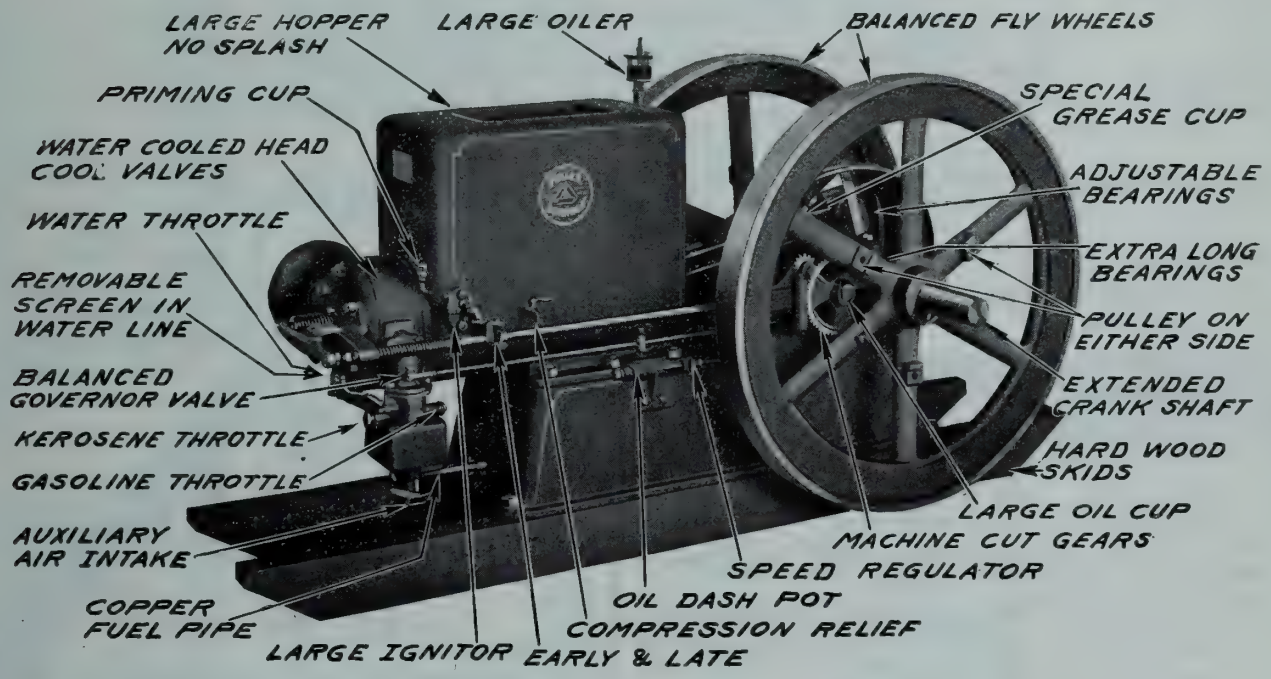
The Largest Wholesale Hardware Dealers in Canada

FULLER & JOHNSON

Model "K" Throttling Governor

KEROSENE OIL ENGINES

All Sizes, 3 to 25 H.P., Stationary or Portable



Dependable—Quality Construction—Guaranteed

Fuller and Johnson Model "K" Throttling Governor Kerosene Engines embody all the latest improvements and developments in internal combustion engines.

Never Misses An Explosion

They are of the horizontal, hopper cooled, throttling governor type, regularly equipped with low tension, built-in magneto, and operate on the reliable 4-cycle principle.

Runs smoothly and evenly under light load, full load, or varying loads, with the fuel always used in proportion to the load.

A Pleasure to Hear it Run

More power, gallon for gallon, than you get in other engines from high-priced gasoline.

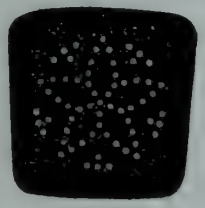
Real Profit in Canadian Veneer Chair and Toilet Seats

We are talking about real, tangible profit that comes in particularly freely in the Fall months because there is a little extra demand now.

These splendid, three-ply veneer seats are made in a pleasing variety of patterns, carefully shaped, corners rounded, and fastened with genuine water-proof cement. They will not warp, curl, crack or come apart.



Everlasting 7- and 11-Ply Toilet Seats

These are expertly joined in 7 and 11-ply veneer. They cannot come apart and will outlast any other seat on the market.

Write to-day and let the extra profit come to you as soon as possible.

TRADE MARK **Red Devil Tools**

"Red Devil" Tools
at the reduced schedule of prices
Are Greater Sellers

"Red Devil" Pliers —drop forged of tool steel — made in 100 styles. Have a ready demand and pay a handsome profit.

RED DEVIL Tools at the new reduced prices give greater value than ever before. They appeal to everyone who is trying to economize and save money.

The reduction is big enough to take care of the expected drop in the cost of raw materials for the next six months—to protect the trade.

"Red Devil" Tools sell all year round to mechanics, electricians, carpenters, glaziers, tinsmiths, motorists and householders — at a price they can afford to pay. **Over twenty years' reputation for quality behind them.**

Send for the 175 page "Red Devil" Catalog and new trade price list—no obligation.

SMITH & HEMENWAY CO., Inc.

"VIKO"

Aluminum Products

Satisfy Consumers and Pay the Merchant

CANADIAN housewives know "Viko" and want it. They know its handsome, winning appearance and its splendid wearing qualities. "Viko," in any kitchen, is a source of pride.

"Viko" Products are stamped from pure aluminum; attractively designed; will not tarnish; rust-proof and sanitary. Rounded corners, easily cleaned; economical of fuel; heat readily and evenly, and will not burn or scorch foods; no joints to give trouble; handles of tinned steel, hinges nickeled steel.

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U. S. A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

"SABATIER" TRADE MARK "LA TROMPETTE"

We are again supplying the Canadian Hardware trade with our famous lines of cutlery, including the knives as illustrated.
Avoid imitations of our cutlery by seeing that our Trade Mark
"La Trompette Medaille d'or Expn. Univl. 1878"
is stamped on each blade as shown on above illustration.

SABATIER Pere & Fils **THIERS (France)**

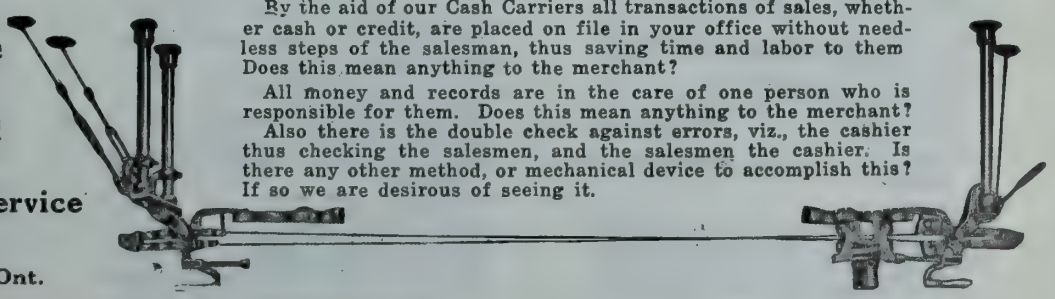
Why Not Have a Double Check on all Sales?

All kinds of Cash and Parcel Carriers

Gipe-Hazard Store Service Co., Limited
113 SUMACH ST., TORONTO, Ont.



By the aid of our Cash Carriers all transactions of sales, whether cash or credit, are placed on file in your office without needless steps of the salesman, thus saving time and labor to them Does this mean anything to the merchant?

All money and records are in the care of one person who is responsible for them. Does this mean anything to the merchant?

Also there is the double check against errors, viz., the cashier thus checking the salesmen, and the salesmen the cashier. Is there any other method, or mechanical device to accomplish this? If so we are desirous of seeing it.

If interested tear out this page and place with letters to be answered.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

A PIECE OF TABLEWARE *may* be solid silver without the "sterling" stamp, the accepted "Hall Mark" of quality.

But you don't know.

A Bank might be honest and efficient without Government inspection.

But you don't know.

A business concern may be absolutely responsible without a commercial rating.

But you don't know.

A publication may have the circulation it claims without verification by the Audit Bureau of Circulations.

But you don't know.

Better be sure.

The circulation of Hardware and Metal is verified by the A. B. C. Hardware and Metal is the only hardware publication in Canada that will supply an A. B. C. Audit.

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

SITUATIONS WANTED

HARDWARE CLERK WOULD LIKE POSITION. Has two full years' experience and is not afraid of work. Geo. Grundenberger. New Hambourg, Ont.

EXPERIENCED HARDWARE MAN WILL take your stock and relieve you of all worry. Charges reasonable. Box 101, Hardware and Metal.

FOR SALE

WE HAVE TWO LARGE GASOLINE OR coal oil tanks for sale. Capacity 1,700 gals. and 1000 gals. respectively. Price f.o.b. $275.00 and $225.00 respectively. Terms cash. Box 100, Hardware & Metal.

STOVE REPAIRS, FIRE BRICKS, IRON Linings, Waterfronts for Acmes, Sunlights, Welcomes, Supremes, Souvenirs, Crown Hurons, Garlands, New Empress, Pearl Champion, Silver Kings, Climax, Colonials, Pen Esthers, Ideals, Princes, Crown Treasure, Nelsons, Laurels, and all makes of stoves. Write for list and prices. Grundy Bros., Strathroy, Ont.

Follow Nature's Example

Paint is to the House as Bark is to the Tree

Nature is mankind's greatest teacher—not only does she give free instruction in the art of decoration in color, line and form, but she is also the greatest living exponent of protection against decay and destruction.

A tree without its bark would rot and die through lack of protection against the elements—similarly all surfaces subject to wear and tear need the protection of a "surface saver."

Merchants who pass along this thought to customers during the winter months can do a lot to create new business for interior paint, oil stain, varnish, enamel.

Remember also that ever since the inception of the "Save the Surface" campaign, the B-H advertising has always very closely tied up with the movement. We realize fully that the B-H dealer represents us in his territory—so we put forth every effort to help him make the maximum number of sales. This is the sort of co-operation that helps the dealer. This effective dealer support, combined with highest quality goods, makes the B-H line highly profitable for any live dealer to handle.

Particulars of the B-H Agency Proposition will be gladly sent free on request.

PORT HOPE - ONTARIO

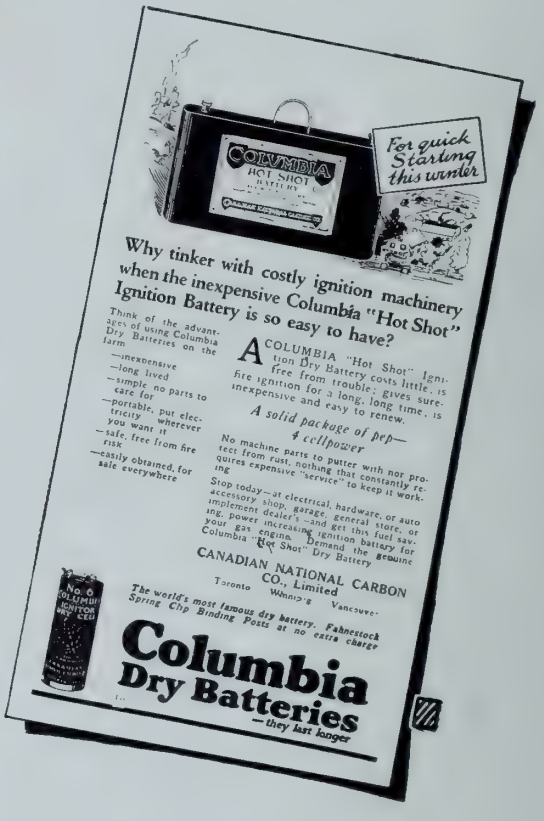
A Big Year for COLUMBIA

ALL records for sales of Columbia Dry Batteries were smashed in 1921. The demand was very large—due to the wide use of gasoline engines of every description requiring dry batteries for ignition, and the recognition of the public that Columbia Dry Batteries have the most "pep" and longest life.

Dealers should order their stock early through their Jobbers to make sure of securing a full supply of fresh, powerful Columbias.

Columbia Advertising

ONE factor in the success of Columbia Dry Battery sales is the consistently good advertising which has made Columbia stand for not only the best dry battery but the one battery which has been obtainable everywhere in uniformly good quality. The advertising plans for this year are the most comprehensive ever planned by the Company.



Leading newspapers, farm papers, and magazines will be used extensively. New window and store display material is being prepared. 1922 will see Columbia more widely advertised than any previous year—and that means much to the dealer.

Advertising!

To Help You Sell More

These are the first advertisements of a **real** campaign of national advertising. They will shortly be appearing in a long list of the finest papers in Canada.

They advertise Diamond Ware and Pearl Ware and every one of them is a strong invitation to women to go to their nearest retail hardware merchant to ask about either Diamond or Pearl Ware.

A Force That Will Work *For* You

We have worked hard for months on this great campaign and all through the one big idea has been to make our advertising a real, valuable asset to the retailers carrying Diamond and Pearl Ware. As a result, this powerful campaign is going to be a force working **FOR** you, rather than **ON** you.

While Diamond Ware and Pearl Ware always have been good sellers, from now on they are going to be far better than ever before, because they are lines that are now backed with the most powerful kind of consumer advertising.

The dealers who cash in biggest on SMP Enameled Ware business for 1922 are the dealers who are going to co-operate most fully with us in our efforts. If our traveler has not already explained our plan fully, write us and we will be glad to let you have full particulars.

Where You Come In

Dress your windows frequently with Diamond Ware or Pearl Ware—whichever you push. Keep a price tag on every article and show Diamond or Pearl right up in the front of your store—on tables, if you have them, or, if not, then on your best shelves. In any case, keep it where it can be easily seen and handled. But remember this—it is the dealer who co-operates most fully and does his level best to hook up with our advertising who is going to show a real profit in handling SMP Enameled Ware during 1922.

Watch for our advertisement in next week's issue of this paper

Sell Freedom from Ice and Snow

Ice and Snow cannot interfere with the reliable and easy working of Hatch Garage Door Outfits. Show your customers the advantage of being able, in any weather, to enter or leave the garage without delay. Who wants to shovel a lot of snow away to make room for doors to open, or stop to free moving parts from ice and snow?

With Hatch Garage Door Outfits

The doors slide easily out of the way and cannot blow or swing in the wind—and cause an expensive breakage of glass, headlights, windshield, etc.

Canada's total of motor cars still grows. Hardwaremen have assured business for Hatch Garage Door Outfits.

TRADITIONS

Sixty five years have passed since James Smart founded on the banks of the St. Lawrence River the business which still bears his name. Dedicated to the ideal that the people of Canada should be furnished with products of wood and metals high in quality and fair in price, this institution has grown and prospered. Throughout the years that have gone and in the years that are to come, fair dealing is the corner stone of this business. Such traditions handed down make us very proud to mark "SMART" on these products of proven worth.

1915 Door Hangers and Track

An "Easy Mover" For Doors and Stores

This hanger brings business to merchants. It has those desirable, distinctive features of individuality that make selling easy.

It attracts attention, gains interest, and convinces by its good points: the oiling device, the bearings, the enclosed carriage in its weather and bird proof track, and the flexible joint that allows the door to swing.

It is Easy to Sell S-B Door Hangers because of their superior selling points. The 1915 Hangers are packed one pair in a carton, complete with bolts and special oiling track support; 1915 Track and 1915 Brackets.

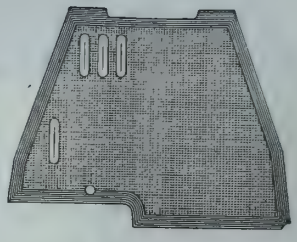
COUPE MAT

No Draft
No Dirt
No Engine Odors



SEDAN MAT

"Gutta Percha"

Wind and Heatproof Mats
for
Ford Coupe, Sedan and Touring Cars

These mats have anti-draft control slots which prevent the wind, heat and engine odors from passing through the clutch and emergency brake openings. They are made in pyramid pattern with a corrugated border, and are reinforced with an exceedingly tough non-abrasive stock where the hubs come in contact with the rubber.

The advantages of this mat are so apparent that practically no sales talk in necessary—to show them to your customers is to sell them. Every Ford owner is likely to buy one if he sees it.

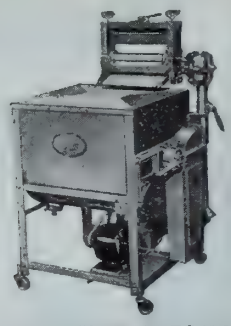
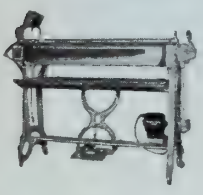
A B C ALCO WASHERS
Single and twin tub models; power and electric types.

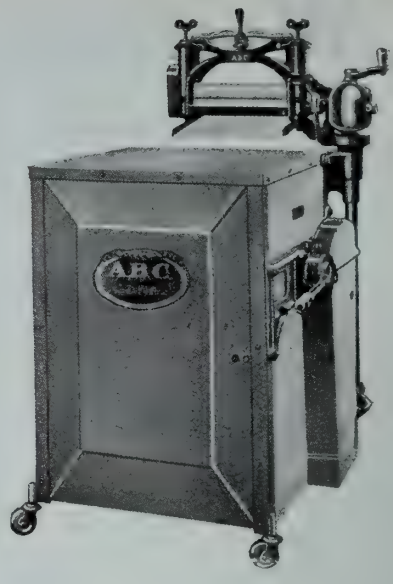


A B C SUPER ELECTRIC
Semi-cabinet washers; copper or galvanized iron tubs.



A B C ELECTRIC IRONER
Can be run by any A B C electric washer; also separately motored.

A B C SUPER ELECTRIC
The "Packard" of Electric washers; full cabinet.



Why Not Sell ONE Complete Line?

Why tie up your capital in stocks of three or four makes of washers and ironers?

Why talk, advertise and sell three or four makes?

Why order separate shipments, enter into separate correspondence, and endure all the extra trouble and work that dealing with three or four sources entails?

Why not **concentrate** on **one** make that covers all popular types and meets every price demand? You can also secure better discounts by that policy. Take on the famous A B C line and make up combination orders. You can offer a greater variety of models to your trade, on a smaller investment, and make more profit per sale besides!

There are twelve A B C models from which you can select your assortments. No other line is as complete. Power and electric washers, and electric ironers, are included. The retail prices range from $110 to $225 on electric models. Power-driven washers are correspondingly less in price. All prices are at rock-bottom; greatly reduced from previous levels.

The manufacturers of the A B C line, Altorfer Bros. Company, are pioneers in the industry. They are a big, progressive, reliable $2,000,000 organization, of broad and liberal policies. A B C Washers have been on the market for 14 years—their success is a matter of record. Every model is a high-grade one.

Exclusive dealerships for this famous A B C line are assets. Real co-operation with the dealer goes along with them. They are worth getting. A few more are to be allotted at the present time. Immediate investigation is therefore advisable. Your inquiry does not place you under any obligation. Wire or write at once.

Model 35
5-burner Stove
with Cabinet

Model 39-G
5-burner Range
with built-in Oven

For The New Year

IN WISHING you the Compliments of the Season and a very prosperous 1922, we take the opportunity of announcing something new in the Perfection line,—a big, new 5-burner New Perfection cook stove.

The merits of New Perfection cook stoves have long been recognized by dealers everywhere. Over 4,000,000 users have endorsed them for the economies they make possible and the comforts and conveniences they bring. And now the new 5-burner New Perfection will enable dealers to offer all the advantages of the complete oil cook stove to even the largest family.

The 5-burner New Perfection oil stove (illustrated above) is an all-the-year-round convenience. Has all the well-known good points of the 2, 3, and 4-burner stoves, but the extra burner means that while two are being used for baking, there are still three available for other cooking service.

If you are not at present handling New Perfection stoves, it will pay you to investigate our dealer proposition. The whole Perfection line is a profit maker for dealers.

HARVEST KING

The Best Known Grindstone Is the Best Seller

The better known you are in your community the better your opportunity to make sales. And this applies with equal force to grindstones.

Cleveland grindstones are the best known grindstones because they are produced in largest quantities by the oldest and largest producer of grindstones.

There are more of them in use. They have been advertised more than any other grindstone and consequently are known better than any grindstone. All of which means they are easier for **you** to sell.

Of Special Interest to You

"How to Win a Prize" is the title of a folder we have just issued for hardware dealers. Your copy is ready for the asking. Write for it today.

Release Capital for 1922

Indications are that 1922 will see us restored to normal, healthy business conditions.

It will be no year to stagger along under a stock of old goods, bought at peak prices, and heaviest in the slow-selling "luxury" goods.

Wisdom and common-sense urge the shaking off of this handicap by every retail hardwareman so situated.

Sell the old stock and sell hard! Release all the capital possible. Begin 1922 with a fresh, new, attractive stock, bought at present prices to sell at figures of alluring interest to consumers. Let us quote you on your new stock.

QUEBEC the PROVINCE of PROSPERITY

From the Crucible of Readjustment

In 1920 And 1921 The Iron and Steel Industry Reaped What It Had Sown—Trials of Readjustment Period Will Help to a More Rapid Stabilization—Living in the Age of Iron

Written for Hardware and Metal by General Sir Arthur Currie, Principal McGill University, Montreal, and formerly Commander-in-Chief of Canada's Overseas Forces.

English Version

IT IS remarkable that the old myth of the four ages through which mankind has passed or is passing (the ages of gold, silver, bronze and iron) place these four metals in the order in which they were probably discovered or utilized. We are living to-day in the age of iron in a sense more complete and more comprehensive than is realized even by us—the heirs of the three preceding ages. We are the true sons of Vulcan, for our civilization is based upon iron as no preceding era has been. While the iron horse is vastly more efficient than the horse of flesh and blood; while the iron road serves a purpose which the road of earth and stone could not; while the iron machine greatly exceeds in effectiveness its weak and feeble predecessor, the late war disclosed that the only thing which iron shot and shell could not overcome was the spirit of man. "We, too, sons of McGill, are workers in the age of iron, loyal sons of the Iron King; not all of us, it is true, but in our midst you will find the workshop and the noisy forge. True, we do not produce for a market, nor are we buyers or sellers, but we think we learn best how things are done and how they should be done by doing them. In other departments we study the markets of the world, the questions of management, the trials and perplexities of the labor problem, matters affecting prices and wages; and in doing so we are of you and with you. Now the decline of the old and the beginning of a new year bid us (whether of the College laboratory or the busy market-place) to halt for a moment to consider what has been and to enquire what may be. During 1920 and 1921 we reaped what we had sown in the preceding years and the harvest was bitter to our taste. As the iron and steel industry was among the first to feel the impetus of the war and the consequent inflation, so it was among the first to suffer from stagnation and deflation. I am confident, though, that it will be among the first of our industries to profit by and to hail with joy and glad-

(Continued on page 102)

GENERAL SIR ARTHUR CURRIE

Principal of McGill University, Montreal, and formerly Commander-in-Chief of Canada's Overseas Forces, who herewith extends a message to Canadian hardware merchants.

French Version

L'ANTIQUE légende veut que l'humanité ait passé par les quatre âges successifs de l'or, de l'argent, du bronze et du fer, et elle a désigné ces quatre métaux dans l'ordre où ils furent probablement découverts et utilisés. Nous vivons en ce moment à l'âge du fer, et d'une façon plus intensive que nous ne le réalisons peut-être, nous, les héritiers des trois âges précédents. Nous sommes les vrais fils de Vulcain, puisque notre civilisation est tributaire de l'industrie du fer plus qu'à aucune autre époque. Le cheval de fer est infiniment plus efficient que le cheval de chair et d'os. Le chemin de fer remplit un rôle que, ni le chemin de terre, ni le chemin de pierre ne pourraient jamais concurrencer; tandis que les machines de fer font un travail qu'on n'aurait jamais cru possible au temps de leurs ancêtres, les machines de bois; enfin la dernière guerre a démontré que, seul, le génie humain pouvait triompher des obus de fer.

"Nous, du McGill, sommes aussi des travailleurs de l'âge du fer, sujets loyaux de sa majesté le ROI FER: pas tous, du moins trouve-t-on dans notre milieu l'atelier perfectionné et la forge bruyante. Nous ne produisons pas pour un marché quelconque; nous ne sommes pas acheteurs, ni vendeurs; mais nous apprenons comment on doit faire les choses en nous appliquant à les bien faire. Dans les autres facultés, nous étudions les marchés mondiaux, les questions d'administration, les difficultés et les perplexités des problèmes sociaux, les causes d'abaissement et de relèvement des prix et des salaires; et, par ces occupations multiples, nour vivons de votre vie et nous sommes des vôtres.

"A l'aurore de cette nouvelle année, il importe que tous, professionnels au laboratoire collégial, ou hommes d'affaires sur la place du marché, nous nous arrêtions à considérer ce qu'a été le passé et à nous demander ce que sera l'avenir. Durant les années 1920 et 1921, nous avons récolté ce que nous avions semé dans le cours des années précédentes: les fruits en ont été amers. L'industrie du fer et

QUEBEC—*the Province of Prosperity*

C. O. CLARK & BRO. - - - MONTREAL

Order this attractive counter display card from your jobber. It catches the eyes of customers and reminds them they need new locks, resulting in many profitable sales for you. Do not handle foreign made padlocks when you can get a better line made in Canada.

Donnez à votre jobber votre commande pour cette attractive carte d'étalage. Elle attirera l'attention de vos clients et leur rappelera qu'ils nt besoin de nouvelles serrures, le résultat sera un accroissement de ventes. Ne tenez pas en stock des cadenas de marque étrangère, quand vous pouvez vous procurer une meilleure ligne de fabrication Canadienne.

QUEBEC the PROVINCE of PROSPERITY

Industrial Features of Quebec

THE textile industry in Quebec might be described as the foundational industry of that province, the mothers of the early days laying the foundation with the spinning wheel and the hand loom, and the development to the present-day industrial wealth of the Province is an interesting study. In passing it would be well to indicate the development of the past twenty years.

From total manufactured products of $158,287,994 in 1900, Quebec's industries progressed in the next twenty years to such an extent as to reach a total output in 1919-20 of $890,420,023. The chief manufacturing centres of the Province are, Montreal, with products valued in 1919-20 at $551,814,605, Quebec, $32,742,192, and Lachine $27,156,203.

Manufacturing, Comparative With Balance of Dominion

In the value of manufactured cottons Quebec leads with twelve textile plants having a capital of $37,962,311 out of a total, for the Dominion, invested in this industry of $58,732,941. These plants produced in 1919 goods valued at $57,530,438 out of a total for Canada of $82,642,949.

Quebec has $3,892,851 invested in her twenty plants for the manufacture of agricultural implements.

She operates 83 of the 147 factories in Canada employed in the manufacture of men's clothing, and they represent a capital of $14,180,989 of a total investment in the industry in the Dominion of $25,703,795.

Two of the eight Canadian sugar refineries are in Quebec and they represent an investment of $5,869,592 of a Canadian total of $37,256,851 for Canada.

Of the 1919 hat, cap and fur manufacturing establishments of the Dominion, 71 are in Quebec and they have a capital of $7,585,382 of the total of $14,431,530 for the Dominion.

Twelve of Canada's woollen textile mills are in this province with a capital of $3,126,141 of a total of $21,311,633 for Canada.

Eighteen of the fifty-seven glove and mitt factories of Canada are in Quebec and have invested in them $3,315,328 of a total of $6,291,269.

In the leather, boot and shoe industries, of the 161 establishments in the Dominion, 91 are in Quebec, and they represent a capital of $24,894,251 of a total for Canada of $38,680,581, furnishing employment to 9,746 of the 15,341 hands engaged in the industry in Canada, and producing goods valued at $41,689,124, of a total Canadian boot and shoe and leather production of $63,319,128.

In the milling of flour Quebec has 428 industries, but mostly of small capacity, having only about twelve and a half million dollars invested in them out of a total for Canada of $76,411,423 in 1,255 different establishments.

Of abattoir and meat packing establishments Quebec has 15 out of a Canadian total of 82, capitalized at $10,613,712 out of $93,363,791 for the whole Dominion.

Men's furnishings are made in 31 factories out of a total of 84 in Canada.

The province has nine shipbuilding plants representing a capital of $14,423,090.

The Pulp And Paper Industry

The pulp and paper industry shows remarkable development, and is now regarded as the leading industry of the

A view of the Port of Montreal showing activity in this important harbor. The shipping facilities of this port are kept busy handling the output of the province's industries.

QUEBEC—the Province of Prosperity

province. In the early part of the present century Quebec forged ahead as the leading pulp and paper producing province of the Dominion, due to the proximity to the raw product and water powers of considerable capacity, also to legislation favorable to the industry. The manufacture of this product is responsible for the building up of large towns at Shawinigan Falls, Bromptonville, La Tuque, Grand' Mere, Windsor Mills, Kenogami and Chicoutimi.

Pulp produced in 1919 was 831,291 tons. Pulpwood consumed in 1919 was 1,176,134 tons.

Other Industries

Not only does the Province of Quebec lead Canada in the pulp and paper industry, but it is the greatest producer of all the Canadian provinces in respect to boots and shoes, clothing, cotton fabrics, lumber, steel bridges, railway rolling stock, tobacco, cigars and refined sugar.

The City of Montreal

As has been stated Montreal, Quebec and Lachine are the chief industrial centres of the province. Montreal, further than being the largest centre of the Dominion both in population and industrial enterprises, can boast of being the second chief seaport of the Continent. It is the furthest inland port in the world, situated one thousand miles from the sea, at the interchange point between ocean and inland navigation, approached by a ship channel with a minimum depth of thirty feet at low water, and linked with a canal and lake system of sixteen hundred miles of inland navigation, extending to Chicago and Duluth, into the heart of the North American Continent.

The Port of Montreal is nearer Europe than any other large Atlantic seaport, as is demonstrated by the following distances to Liverpool. This offers superior advantages not only to her immediate hinterland, but also to the American States, bordering on the Great Lakes.

Montreal	2,773 miles,
Boston	2,810 miles
New York	3,010 miles
Philadelphia	3,160 miles
Baltimore	3,324 miles
New Orleans,	4 553 miles
Galveston	4,730 miles

Twenty-one large well lighted double transit sheds, about 500 feet long by 100 feet wide, are available for goods destined for shipment.

The harbor of Montreal represents in round figures an expenditure of $27.-000 000 and the commissioners have at their disposal for its further development a sum of $6.000,000.

The harbor limits comprise sixteen miles of water frontage on each shore of the St. Lawrence, every foot of which is owned by the public and administered by a Harbor Commission, and is the greatest grain exporting seaport in the world, with an elevator storage capacity of eleven and one half million bushels. It has eight miles of completed wharfage, capable of accommodating one hundred vessels as follows.

For vessels of 500 feet in length and drawing 30 feet of water ... 28 berths.
For vessels 400 feet long, with draught of 25 feet of water... 36 berths.
For vessels 300 feet long, with draught of 20 feet ..... 17 berths
For vessels 200 feet long, with draught of 10 feet and over .. 19 berths.

With all these features to its credit it is considered the ideal location for manufacturers, affording the most economic handling of their raw materials and finished products, and through the proper co-ordination of the Port's railroad and terminal facilities provides every possible factory and warehouse site in proximity to the waterfront, with access by all lines of transportation.

Wide Range of Industries

The manufacturing activity within the limits of Montreal are very diversified as to output. Factories number close to 2,500, employing approximately 175,000 persons. The city is the centre of the boot and shoe industry in the Dominion, also the textile and sugar refining activities. It has great manufactories of electric appliances, and some important iron and steel works. It is the centre of paint and cement manufacture in Canada. These apart from its importance in the brick, lumber, tobacco and clothing industries. In addition, Montreal is the headquarters of some of the leading financial and commercial institutions of the Dominion, also of Canada's railway, telephone and telegraph companies.

To the hardware trade, the iron and steel industry and the manufacture of paint and varnish are of chief interest. For the former it can be stated that local firms turn out every imaginable product from steel ingots and billets to small screws and pins.

The City of Quebec

The Capital of the province is one of the oldest and most historic cities in Canada. The industrial activities are not confined to boot and shoe and leather manufacturing, as it is sometimes spoken of as such. This industry is undoubtedly chief, but the largest single factory in the City is that of the Dominion Corset Company, and this is said to be the largest corset factory under the British flag. Another important industry in the city is tobacco, represented by four establishments. Other industries for which the city is noted are lumber, fur, iron and steel.

The City of Quebec now has a population of nearly 120,000 and ranks seventh in importance as a manufacturing centre of the Dominion, housing all classes of industries to the number of 450 establishments, representing 90 different kinds.

Being fortunately located in close proximity of plenteous hydro power, the electrical power situation in the city of Quebec is recognized as very good. The amount of H. P. available is amply sufficient to meet the requirements of any industry, large or small.

Quebec, too, can boast of her harbor. It is not only an asset to the city itself, but to Canada as a whole. It is said to be large enough to accommodate the whole British Navy as well as the passenger and freight vessels that now call at the port. On account of its depth, it is the only port on the St. Lawrence river which can offer accommodation for more than eight months of the year. Apart from being endowed with natural advantages, which cannot be equalled anywhere on the continent, it has been developed during late years according to plans carefully studied and designed by experts in port construction and engineering, and the most modern appliances have been added to its equipment.

The docks cover an area of about 56 acres and are provided with modern landing sheds with a floor area of 542,-500 square feet. The Quebec Harbor Commission (three members appointed by the Dominion Government) have 16 miles of tracks and the docks available for the handling of freight. With the completion of the Quebec Bridge, the docks are now accessible to all railways, and the railways have their terminals right within the harbor.

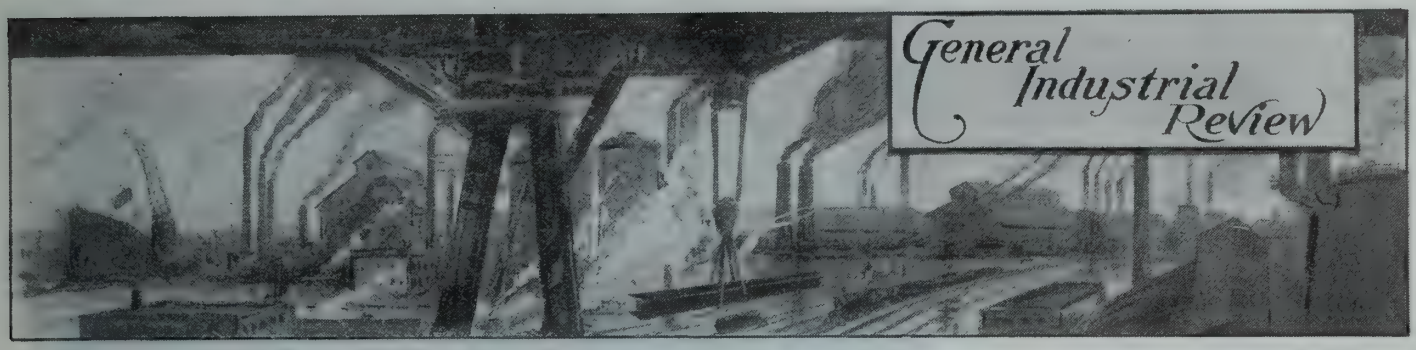
The Electric City of the East

Sherbrooke, 100 miles from Montreal, is the "hub" of the Southern Quebec territory. Good labor conditions, hydro-electric power, railway facilities and living conditions in a progressive community, are said to be outstanding features of this centre. The abundance of water-power available being responsible for the term, "The Electric City of the East." Sherbrooke has not been slow to make their waterpower available for manufacturing purposes.

Asbestos, the richest in the world, is found in the neighborhood of Sherbrooke, while rich copper mines are also in close proximity. In a word, raw materials available for manufacturing purposes found near the city are; asbestos, platinum, chrome ore, iron, copper, sulphur ore, acids, lumber, wood pulp, grain, furs, wool, hides and maple sugar. The production of raw materials in the district surrounding Sherbrooke now runs over $12,000,000 per year.

Over sixty industries are now located in the city.

QUEBEC—the Province of Prosperity



Steel Industry In Quebec

ALTHOUGH Quebec cannot claim the Sydney, Hamilton nor Sault Ste. Marie mills, the province may boast of having a very large centre of activity in the steel industry. Commercial activity demands activity in steel, and Montreal houses some of the largest enterprises engaged in the production of steel products. By reason of requirements of railways, car building shops and shipbuilding alone, demands for commercial requirements are great. While the three foregoing industries call for heavy tonnages, other local enterprises furnish a wide and varied demand. In addition, Montreal is all important as a distributing centre as far as the wholesale trade is concerned, and for the hardware trade it produces a large percentage of highly finished products. By finished products is meant; bolts, nuts, bright wire goods, burrs, butt pins, cotter pins, cut nails, escutcheon pins, horse shoe nails, wire nails, spikes, rivets, screws, staples, all kinds of wire, etc.

Advancement of Industries Furthers Steel Demands

The growth of Montreal and district as a manufacturing centre has brought a corresponding development in the steel industry. As new industries arrived, calling for construction needs, the steel mills expanded and became more self-contained until to-day they are able to meet the varied demands of the different manufacturers. Although not a manufacturing enterprise in the true sense of the word, a factor contributing to the growth of the industry has been the gradual development of power in the province. Quebec is noted for its advancement in hydro power, and this has played no small part in furthering the output of steel products.

Local Industries

The output from the rolling mills in Montreal not only includes iron and steel blooms, billets, bars, angles, sheets, wrought pipe, etc., but a complete line of finished products, such as mentioned above, is manufactured.

Among the users of the heavier products in Montreal and district are a number of bridge and construction firms which use structural steel for buildings, bridges for railways and highways, girders, trusses, towers, tanks, apart from marine engines, boilers, etc. Shipbuilders' foundries for making car wheels and castings, wire rope, pumps, rolling stock, steam, appliances, tools, containers, etc.

Potential Wealth in Quebec's Water Power

IT IS generally conceded that hydro power, when available, should be made the basis of most industries in a province or state where coal deposits do not exist, and where fuel must be imported. The Province of Quebec has no coal deposits known, but its water-powers are plentiful, various authoritative estimates placing the total power from five to six million horse-power. This figure not including the power which may be supplied by rivers north of the 50th degree of latitude.

Power Developed By The Province

A census carried out by the Dominion Water Power Branch and the Federal Bureau of Statistics shows that on the 31st of December, 1919, there was developed in the province a total of 902,000 h. p. Of this amount 638,000 h. p. was being generated in central electric stations, 175,000 h. p. was generated by pulp and paper companies, and the balance by other manufacturing industries.

At the time the amount of power used by pulp and paper companies in the province was 267,000 h. p.; the amount of electric power used by other manufacturing industries was 289,000 h. p. The amount of hydro-power used for street railway service was 54,000 h. p. and the amount used for lighting purposes was 90,000 h. p.

The principal power rivers in the province are the Quinze, the Ottawa and its tributaries, the St. Lawrence between Lake St. Francis and Montreal, the St. Francis, the St. Maurice, the Lake St. John Tributaries, the Saguenay and the main rivers on the north shore of the St. Lawrence.

Quinze, The Ottawa And Its Tributaries

Many streams less important than the above afford good power sites for small industries. For example; the North River, the Ouareau River, the Batiscan, the Jacques-Cartier, the Montmorency, the St. Anne (Beaupre), etc. Most of the rivers on the south shore of the St. Lawrence, except the St. Francis and the Chaudiere, abound in waterfalls and rapids, but none can form the nucleus of a large development.

Beginning at the west boundary of the province is the Ottawa district where a fall of 30 feet between Quinze Lake and Temiskaming gives a possible development of 175,000 h. p. The Ottawa River, from Temiskaming to Ottawa, can supply about 600,000 h. p. However, this part of the Ottawa forms the boundary between the provinces of Ontario and Quebec and the power must be divided in equal shares between the two provinces.

The Carillon Rapids afford a possible development of 135,000 horse-power.

Good power sites may be developed on the River Gatineau—a very large stream with a drainage area of 9,130 square miles and discharging into the Ottwa River a few miles below Ottawa. The principal powers may supply at least 135,000 h. p. The River du Lievre which flows about twenty miles east of the Gatineau has also some good power sites, but they are in the hands of private interests.

The second group of powers to be taken into account are those of the St. Lawrence, between St. Francis and

QUEBEC—the Province of Prosperity

Montreal. The difference in level between St. Francis and St. Louis is 82 feet, divided in three principal chutes, namely; The Coteaux, Cedars, and Cascades, in a distance of about fourteen miles. The minimum flow of the St. Lawrence at that point is approximately 180,000 second-feet. Figured at 80 per cent efficiency, this amount of water can generate 1,300,000 horse-power. At the foot of Lake St. Louis the Lachine Rapids afford a possible head of 27 feet and a possible development of 450,000 horse-power.

The St. Francis River

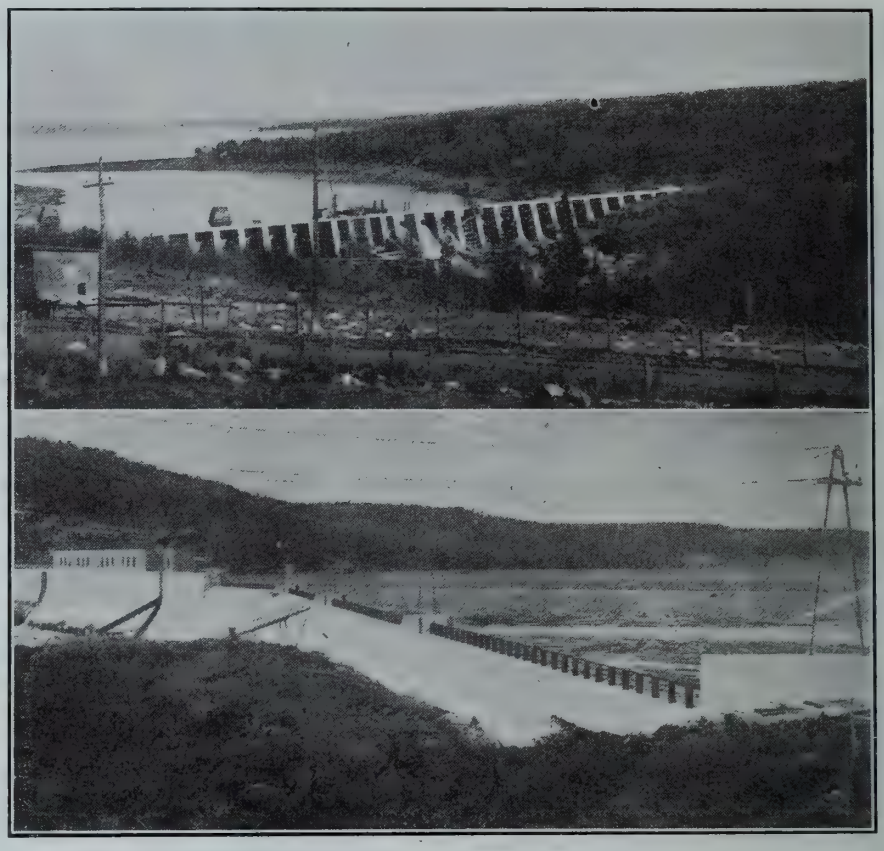
The third group is found in the territory drained by the St. Francis River, which comprises most of the Eastern Townships. The water-powers on the river itself have a capacity of about 70,000 h. p. River Magog, which is its main tributary, supplies about 10,000 h. p. to industries located in Sherbrooke and vicinity.

The St. Maurice River

The next group is that of the St. Maurice River. It is the most important, both on account of the size of the river which drains 17,000 square miles and the high falls which break its course. The head waters of the St. Maurice are about 1,260 feet above the level of the St. Lawrence at Three Rivers. This river has been regulated so that a minimum flow of 12,000 c. f. s. at Shawinigan is assured at any period of the year. The possible amount of power that can be derived from its falls is nearly 1,000,000 h. p. The Crown still has for lease the water-power sites known as Rapid "des Coeurs," from which a minimum of 60,000 h. p. can be derived, and Rapid Blanc from which 125,000 h. p. can be generated. Other falls of less importance can also be leased. The falls at Shawinigan, with a capacity of 200,000 h. p. and those at Grand' Mere with a capacity of 100,000 h. p. are fully developed. The Gres Falls, where a combined development of 70,000 h. p. is possible, and La Tuque Falls, where a development of 125,000 h. p. can be made, will be developed as soon as the market for power demands it.

Lake St. John Tributaries

The next important group is to be found in the Lake St. John district where the river tributaries to the Lake, namely: Chamauchouanne, Mistassini, Peribonka and Ouiatchouan, offer within easy reach from the lake an aggregate possible development of 150,000 h. p. This figure may be increased to 200,000 h. p. by the regulation of the flow of River Peribonka. The water of St. John flows into the sea via the Saguenay River. Its two outlets are called "the Great Discharge" and "the Little Discharge." The total head between the lake and the sea level at Kenogami is about 300 feet. It is possible to develop 600,000 h. p. in two developments of 100 and 200 feet respectively.



Waterpower scenes in Quebec Province. Above is shown the Allard Dam at the outlet of Lake St. Francis. Below is the Gouin Dam on the upper St. Maurice river.

In the Lake St. John district also are located the water-powers of the Chicoutimi River, the River "aux Sables" and the River Shipshaw. The former two are fully used by pulp and paper mills; the powers of the Shipshaw are being developed to supply power to the pulp mill at Kenogami.

North Shore Powers

Next in importance are the powers of the north shore of the St. Lawrence. The north shore of the St. Lawrence, from the Saguenay down to the gulf, is 600 miles long and is near the Laurentian chain of mountains. The fifty or so rivers which flow into the St. Lawrence in that distance offer important power sites. Information is lacking as to the value of these powers. In late years, an examination has been made of Rivers Manicouagan, aux Outardes, Betsiamites (Persimis), Escoumains and Natashquan. The water-power sites on the latter do not offer any facilities for development as the river is large and the falls are low; the powers examined on the Manicouagan River, in the lower part, offer two possible developments with an aggregate capacity of 81,000 h. p. on the River aux Outardes, the first two falls may be developed to their full extent for an aggregate capacity of 50,000 h. p.; on the Bersimis River the first fall is located forty-two miles from the mouth of the river and the second fall about twenty further upstream and they could be developed for an aggregate capacity of 51,000 h. p.

Government Adopts Water Conservation

In late years, the Government of the province has adopted the policy of water conservation, and has built storage dams in the upper St. Maurice River, at the head of the St. Francis River and at the head of the St. Anne (Beaupre) River. The amount invested in those reservoirs is about $3,300,000. The water stored during spring freshets and wet periods is distributed during the low water months, so as to greatly increase the minimum flow of the river. In the case of the St. Maurice the minimum flow was 6,000 c. f. s. under natural conditions: it is now 12,000 c. f. s. and may be increased to 15,000 c. f. s.

QUEBEC—the Province of Prosperity

On the St. Francis River, the minimum flow has been increased by 900 c. f. s. and on the St. Anne River the minimum flow has been increased by 100 c. f. s.

From these three reservoirs, the annual revenue derived is $278,000. The operating expenses are about $20,000 per annum. This revenue will be increased when new developments are made.

The Government of Quebec has not seen fit to go into the power business itself. It prefers to let private capital and initiative look after public requirements in that line. It has adopted a power policy which gives capital the guarantees it requires, and investments in water powers have been made without taxing the exchequer of the province.

Rapid Agricultural and Dairy Development

REVIEWING the agricultural development in the Province of Quebec it is found the land under cultivation has tripled in extent in the last 20 years. The native of Quebec has not lost his agricultural instincts, nor those of settler and pioneer.

Area under cultivation in Quebec is as follows:—

1901	4,704,396,
1911	8,147,633,
1920	12,145,103,

The farmer follows in the wake of the pioneer's axe trail and the number of homesteads increases rapidly from year to year. The colonization regions are always under the care of the Government. Many farmers and their sons enter new regions each year and establish themselves in their new homesteads.

The following figures speak for the growth of the farmer settlements;

Number of farmers;

1901	150,599	
1911	159,554	
1920	175,000	(estimated)

The principal crops are included in the table below, showing their yield and value:

	bushels	value
Wheat	4,206,000	$10,010,000
Oats	57,275,000	60,712,000
Barley	5,344,000	8,764,000
Rye	578,000	1,156,000
Peas	1,225,000	4,435,000
Beans	853,000	3,856,000
Buckwheat	4,081,000	6,938,000
Mixed grains	4,256,000	6,384,000
Corn for husking	1,788,000	3,290,000
Flax	111,000	434,000
Turnips	27,780,000	14,723,000
Potatoes	57,280,000	48,688,000
	tons	value
Hay and clover	6,449,000	132,462,000
Fodder corn	611,000	5,139,000
Alfalfa	67,000	953,000

The area of the Province under tobacco cultivation in 1920 was estimated at 33,000 acres, producing 26,400,000 lbs.

Fruit

This branch of agriculture continues to show progress year after year, although up to the present the province cannot boast of its extensive orchards like some of its sister provinces of the Dominion. In most of the counties of the province the fruit that is gathered is consumed on the spot; there are comparatively few places where sufficient fruit is grown for the market. However, in certain regions the planting of fruit trees is increasing each year. In the Montreal district, rich in former years in its apple production, apple growing has considerably decreased because the great orchards have been abandoned and converted into public lots.

Below is an estimate regarding four kinds of fruit trees in the province;

Apple trees	1,162,965
Cherry	389,121,
Plum	258,666,
Pear	13,242

Agricultural scenes in the Province of Quebec showing the use of tractors and other modern implements to facilitate the tilling of the soil. Quebec's agricultural resources are extensive and varied and with much pioneering and development the product of the soil in this province has become an important factor in increasing its wealth and importance.

QUEBEC—the Province of Prosperity

Live Stock

The animal stocks on Quebec's farms are one of the greatest riches of its farmer population and a great deal of effort has been put forth lately to improve strains, taking into consideration the adaptability of the various kinds and and their chances of developing and becoming profitable assets in our climate. As in the case of land under cultivation the progression in number and value of farm animals has greatly increased in the past twenty years, as is clearly demonstrated.

Dairy Industries

The dairy industry is, beyond contradiction, the most wide-spread industry in the country places of the province, and that which contributes most to the prosperity of the farming class.

In 1919 there were 1,867 dairy product factories classified as follows:

Butter factories	631
Cheese factories	833
Combined butter & cheese factories	403

The total value of butter in 1920 was $22,352,146, and of cheese $13,356,457.

Before concluding, the maple sugar industry must not be overlooked. Maple sugar products amounted to 15,615,-141 pounds at an average value of 20 cents. or $3,123,028. Maple syrup production was 1,449,649 gallons at $2,50 a gallon, or $3,624,123. The total value was $6,747,151 in 1920.

Quebec's Forests of Outstanding Value

THE province of Quebec, occupying the Northeastern part of North America, with a total area of 703,-653 square miles, is especially rich in its forests, extending from the far North shores and Hudson's Bay district to the very doors of its pulp and paper manufacturers and other industrial centers. White pine, Red pine, Grey or Jackpine, Spruce, Balsam, Hemlock, Birch, White Birch, Cedar brass-wood, Ash, Elm Tamarack, Poplar, Maple, Oak, Walnut and Hickory offering the variety.

Forest lands in the Province are classified in five categories, name'y:

1. Private forests.
2. Leased forests.
3. Forests and land held under location tickets.
4. Unleased forests.
5. Township forest reserves.

The cutting of timber is one of the most, if not the most, important industry of the province owing to the value of its products. Statistics show for the year ending June, 1921, the cut of logs of the various kinds of trees to be 1,162,-672,623 feet, board measure, the value of which is $39,269,902.44. By adding the other forest products with a value of $19,058,574.73 we get a total of $58,-328,477.17.

With such a variety of trees, the products are also varied. Besides sawn lumber, the other products may be classified as pulpwood, shingles, ties, poles, laths, staves, stavewood and square timber. The appended table gives the quantity of logs cut on private lots and on limits as well as other forest products obtained from these two sources.

CONTRIBUTING TO PULP AND PAPER INDUSTRY

The pulp and paper industry is dealt with on another page, but is here mentioned because of its relation to the forests of the Province. This industry has so increased for some years that it may now be looked upon as one of the most important, through the value of the forest trees it absorbs and the quantity of manufactured products it puts upon the market. The principal kinds of wood used in making pulp are spruce, balsam, fir, hemlock, grey or jack pine and poplar. Spruce is the most common of all and the proportion used in pulp making since 1914 has never been less than 61.-03 per cent.; it rose to 76.5 per cent. in 1917; in 1919 was 64.68 per cent. Balsam fir came next; its proportion has varied since seven years, between 23.04 and 35.84 per cent.

FOREST RESOURCES ARE NOT INEXHAUSTIBLE

While the Province has its vast territory of forest land, the resources are by no means inexhaustible. With its enemies working their destruction on the one hand, and industry demanding her supply of the other, the time would come when the Province of Quebec, and Canada as a whole, could not boast of its forest wealth. A constructive policy of conservation and reforestation is necessary, and the Forest Service, and agents in the employ of that Service, whose duty it is to supervise the cost of timber on Crown Lands, is here worthy of praise.

Forest fires are a menace that require continuous fighting to keep the ravages to the lowest minimum possible. During the year 1920, the forest fires devastated an area of about 290,000 acres. It is fortunate that quite a number of these fires occurred on lands which had been lumbered or burned recently.

The wealth of Quebec's forests is depicted in this logging scene. Such scenes as this are comparatively common in the great hinterland of the Province of Quebec and a large army of foresters is kept busy supplying the pulp mills and the saw mills with the material from which valuable products pour forth in a finished or semi-finished state.

QUEBEC the PROVINCE of PROSPERITY

Le Canada a L'Aube D'Une Ere Nouvelle

LE CANADA est présentement à l'aube d'une ère nouvelle et d'un regain de vie. Une grande destinée nous apparaît et nous allons revêtir la livrée des grandes nations.

Nous nous éloignons des affaires de la plus grande guerre que le monde ait connue; nous envisageons maintenant l'avenir avec la confiance et le courage que nous inspire notre héritage incomparable. Le Canada possède, en effet, des ressources naturelles illimitées, et c'est aux hommes d'affaires, fabricants, grossistes et détaillants, qu'il incombe de leur donner tout le développement dont elles sont susceptibles. A chacun sa part de dévouement pour le bien de tous, dans un esprit de solidarité, car l'idéal canadien doit l'emporter sur toutes les autres considérations.

HARDWARE & METAL, le plus important des journaux de commerce canadien, est le lien entre les fabricants et les marchands de toutes les provinces du Canada, et l'une de ses raisons d'être est de promouvoir l'harmonie et la bonne entente. L'histoire enregistre rapidement ses fastes, et c'est avec la pleine confiance d'exercer une autorité dans le domaine industriel que ce numéro de HARDWARE & METAL est consacré à la Province de Québec.

Le temps des querelles de clochers est passé. La vie, jusqu'ici limitée aux horizons de Provinces, a pris un nouvel essor et les imaginations se complaisent à des projects grandioses. Le Québec est riche en agriculture, en houille blanche et en forêsts, et, ce dont on ne peut exagérer l'importance, ses industries sont puissantes et variées. Les articles éditoriaux de ce numéro forment un commentaire de ses multiples ressources.

Québec possède de nombreux produits fabriqués qu'il peut échanger avec les autres provinces. Or, le développement normal du commerce interprovincial est absolument nécessaire à la prospérité de chaque province, comme il l'est à celle du pays tout entier.

Il incombe donc aux manufacturiers de la Province de Québec de tenir les grossistes et les détaillants canadiens parfaitement renseignés sur la qualité et la variété des articles qu'ils fabriquent. Il est prouvé que, faute de renseignements, des maisons canadiennes importent souvent des autres parties de l'Empire Britannique, ou même des pays étrangers, des marchandises fabriquées en Canada. Par l'entremise des journaux de commerce, les fabricants ont la facilité d'offrir leurs marchandises aux marchands des Provinces Maritimes, de l'Ontario et des Provinces de l'Ouest, avec la certitude morale que leurs offres sont lues et qu'il en résultera des affaires qui iront en se multipliant, au grand avantage du pays tout entier. En agissant ainsi, on fait preuve d'amitié a l'égard de ses concitoyens, on manifeste le désir d'aider au développement du commerce de son pays et l'on éveille, chez les hommes d'affaires, un sain esprit de patriotisme.

Pourquoi Hardware & Metal est le plus important Journal de Commerce Canadien

Hardware & Metal paraît depuis 33 ans.

Hardware & Metal est, en Canada, le seul journal de quincaillerie hebdomadaire.

Hardware & Metal est le seul journal de quincaillerie national.

Hardware & Metal est le seul journal de quincaillerie publiant des rapports hebdomadaires des marchés de Montréal, Toronto, London, Winnipeg et Pittsburg.

Hardware & Metal est le seul journal de quincaillerie publiant des rapports hebdomadaires sur les Peintures, les Huiles, les Vernis, le Verre à vitre, etc.

Hardware & Metal est le seul journal de quincaillerie publiant des informations hebdomadaires sous les rubriques: "Ce que font d'autres marchands," "Législation," "Nouveaux articles de quincaillerie," "Etalages dans les vitrines et le magasin (illustré)," "Publicité des détaillants," etc.

Hardware & Metal compte au nombre de ses abonnés tous les quincailliers en gros du Canada, dont la plupart abonnent également leur personnel de voyageurs; 90 per cent. des quincailliers détaillants, d'un océan â l'autre; plus de 900 rayons de quincaillerie, dans les magasins à rayons et les magasins généraux, et plus de 250 acheteurs pour des usines ou le service du Gouvernement.

Lettres recues prouvent l'estime dans laquelle Hardware & Metal est tenu par le Commerce de Quincaillerie.

PROVINCE DE QUEBEC

La Perle du Canada

L'Héritage doré du Canada

FONDEE en 1853, notre Maison a, depuis cette époque, expédiée dans tous les coins du pays, les marchandises sorties de ses vastes entrepôts de Montréal.

L'expérience que nous avons acquise par suite de nos relations commerciales avec nos concitoyens (de langue francaise) durant cette longue période, a amplement justifiée la confiance que nous a inspirée leur intégrité et leur intelligence des affaires.

Quiconque est en mesure d'apprécier les ressources et le peuple de notre riche Province de Québec, ne saurait douter du brillant avenir qui l'attend.

Actuellement, nous sommes plus que jamais, capable de satisfaire aux besoins de notre clientéle toujours croissante, grâce à l'assortiment aussi complet que varié de notre immense stock de marchandises, dont les prix sont raisonnables, si l'on tient compte de la qualité fournie et de la garantie accordée sur les prix, jusqu'à la date de la livraison.

31 Déc. 1921.

Chers Amis,

Nous est-il permis à la fin de cette année de reconstruction de chercher à addresser quelques lignes aux personnes avec lesquelles nous avons eu l'avantage de traiter des affaires et en quelque sorte d'essayer d'exprimer à tous nos amis notre appréciation des relations d'affaires très agrèables qui ont existé durant cette année 1921 de même qu'au cours des années qui se sont écoulées auparavant depuis l'organisation de notre maison qui remonte à 1870, époque à laquelle l'actuel M. J. P. Seybold débuta avec son père, et développa l'entreprise à laquelle se joignirent feu James Howden et feu William Starke.

Les intérêts de Starke et ceux de Seybold ont été fusionnés en 1907. Les affaires se sont développées graduellement jusqu'au point actuel que, nous sommes fiers de le dire, nous ont permis d'atteindre la bienveillance et la confiance de ceux à qui nous achetons aussi bien que celles de ceux à qui nous vendons et, pouvons-nous ajouter, de nos concurrents.

Les meilleurs sentiments règnent également chez nous depuis les plus jeunes commis juspu'aux tètes dirigeantes qui mettent en pratique dans toute la mesure de leurs moyens les traditions qui leur ont été léguées.

A la veille de 1922 nous saisissons l'occasion de souhaiter à tous un très joyeux Noel et une nouvelle année heureuse et prospère qui, nous l'espérons apportera à notre cher Canada tout comme à notre bonne vieille Province de Québec toute la prospérité possible.

Nous tenons à remercier également le "Prix Courant" dans les pages duquel nous sommes capables d'adresser ce message par quoi nos représentants désirent se rappeler au bon souvenir de leurs amis.

Sincèrement,

STARKE-SEYBOLD, LIMITED.

R. SEYMOUR

May we at the close of this year of reconstruction attempt to address a few lines to the people with whom it has been our privilege to do business, and in some way try to express to all our friends our appreciation of the very pleasant business relations that have existed through this 1921, as well as the years that have gone before.

Since the organization of our business, dating back to 1870, when the present Mr. J. P. Seybold and his father started, and leading up to the enterprise entered into by the late James Howden and the late William Starke, the Starke and the Seybold interests were merged in 1907, the business has gradually developed to its present stage, carrying with the development, we are proud to say, the good-will and confidence of the people we buy from, as well as the people we sell to, and, may we add, our competitors. The kindest feeling also exists from the junior clerks up to the heads, who carry out to the best of their ability the traditions that have been handed down to them.

In entering 1922, we take this opportunity of wishing all a Happy New Year, which we trust will bring to our Province and Canada every prosperity.

We wish to add our appreciation of "Hardware and Metal," through whose pages we are able to send this message, in which our travelling staff, also, would like to be remembered to their friends.

With very best wishes,

Sincerely yours,

STARKE-SEYBOLD, LIMITED

(Sgd.) ROBERT STARKE,

President.

Aero

Order Your Aero Stocks
Now For Early Spring Orders

Aero Cord

The only truly weather-proof, rot and stretch-proofed cordage made. It is superior in tensile strength and durability. Aero Cord is made by covering a special, twisted, fibre core with braided, multiple plies of cotton, under high tension. It is also weather-proofed. Aero Cord is unexcelled for Sash Cord, Clothes Line, Trolley Cord, Bell Cord, Signal Cord, Tent Rope and Tiller Rope.

Aero Pulleys

These are the most efficient clothes line pulleys known. The Aero Clothes Line Pulley has a deep V-shaped friction groove which will accommodate itself to various diameters of clothes line. The space between groove and guard is sufficient to allow passage of knots. The weather-proofing treatment repels moisture; hence, no freezing. Pulley being of wood, weather-proofed, lubricates itself at bearing, rendering it noiseless and smooth working. The use of wood does away with all troubles from rust. The large axle and bearings render the Aero Clothes Line Pulley capable of carrying heavier loads than others used for a like purpose. The diameter (6″) insures easy working for long drives. The wire guard guides the rope to its proper place on pulleys, no matter at what angle the pulley may be swayed by the wind. The price is lower than for others of similar diameter. The Aero Junior (2¾″) is for general domestic use.

The Aero

Sherbrooke

Factory: **Lennoxville, Quebec**

QUEBEC—*the Province of Prosperity*

AERO

Cord

Donnez votre commande des produits Aero maintenant pour les premiers ordres du printemps

Corde Aero

Le seul cordage fait à l'épreuve des intempéries, de la rouille, qui n'allonge pas. Ce cordage possède une force de tension et une durabilité supérieure. La corde Aero est fabriquée en recouvrant à haute tension, un centre de fibre spécial tordu, avec des plis multiples de coton tressés. Elle est aussi à l'épreuve des intempéries. La corde Aero est insurpassable pour les usages suivants: cordes pour chassis, cordes à linge, cordes pour Trolley, cordes pour cloches, cordes pour signaux, cordes pour tentes et cordes pour le cultivateur.

Poulies Aero

Ce sont les poulies les plus efficaces pour cordes à linge sur le marché. La gorge de friction profonde de la poulie Aero, pour cordes à linge, est faite en forme de "V" de façon à pourvoir utiliser des cordes de différentes grosseurs. L'espace entre la gorge de la poulie et la garde est suffisant pour laisser passer les noeuds. Le traitement qui la rend à l'épreuve des intempéries, combat l'humidité de sorte qu'elle ne gèle pas. Cette poulie étant faite de bois préalablement rendu à l'épreuve des intempéries, se lubrifie elle-même sur ses coussinets, la rendant ainsi silencieuse et facile à manier. L'emploi du bois prévient tous les troubles de la rouille. La grosseur de son axe et des coussinets permet à la Poulie Aero pour corde à linge de supporter une plus forte charge que les autres poulies employées à cet usage. Son diamètre (6″) donne un roulement facile pour les longues cordées. La garde de broche guide la corde et la tient en position sur la poulie quelque soit le balancement occasionné par le vent. Son prix est plus bas que les autres d'un diamètre égal. L'Aero Junior (2¾″) est généralement employée pour usage domestique.

Machine a Bois Combinee "CRAIN---CANADIAN"

La Machine à Bois combinée "CRAIN" est usagée dans le monde entier par les charpentiers, menuisiers, contracteurs, charrons, modeleurs et dans les boutiques et manufactures de toutes sortes, ou le bois est travaillé.

Cette machine comprend un corroyeur, "shaper," table à déligner, scie à ruban, drille, botteur, machine à tenons, planeur, et perceur. Presque toutes les opérations pour travailler le bois peuvent être faites sur cette machine sans y ajouter d'attachements, excepté le changement des outils. Trois hommes peuvent travailler en même temps sur cette machine sans se nuire l'un à l'autre.

Elle est justement célèbre par les nombreux services qu'elle rend dans les boutiques et manufactures ou on l'emploie, et le coup d'oeil exercé d'un connoisseur sur cette vignette aura vite jugé des qualités de cette machine.

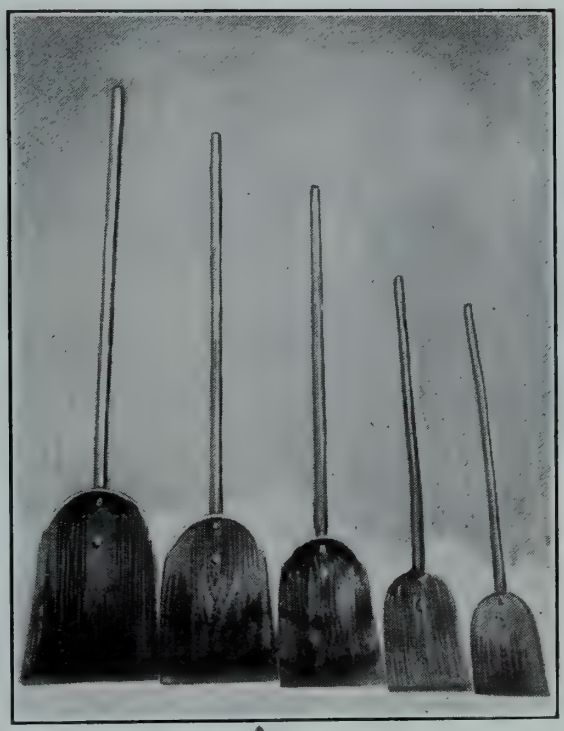
"VICTOR"

Improved Wood Snow Shovel

Good for the West
As well as for the East

The Victor line is well assorted. It gives you extra chances to supply the customers' requirements. There are large sizes for general use, and small sizes for children. The children's shovels are plain or painted red; the large sizes are plain with top ferrules, or top and bit ferruled. All shovels are oiled to prevent the snow sticking.

Be independent of the steel market vagaries—sell wooden shovels.



Victor Mkt. Express Sled

The Mkt. Express Sled shown, is strongly and substantially made of first-class materials, handsomely finished in varnished colors. Note the strong bracing to the handle and across the runners. This is a sturdy article sure to give excellent wear. It is consequently a good seller.

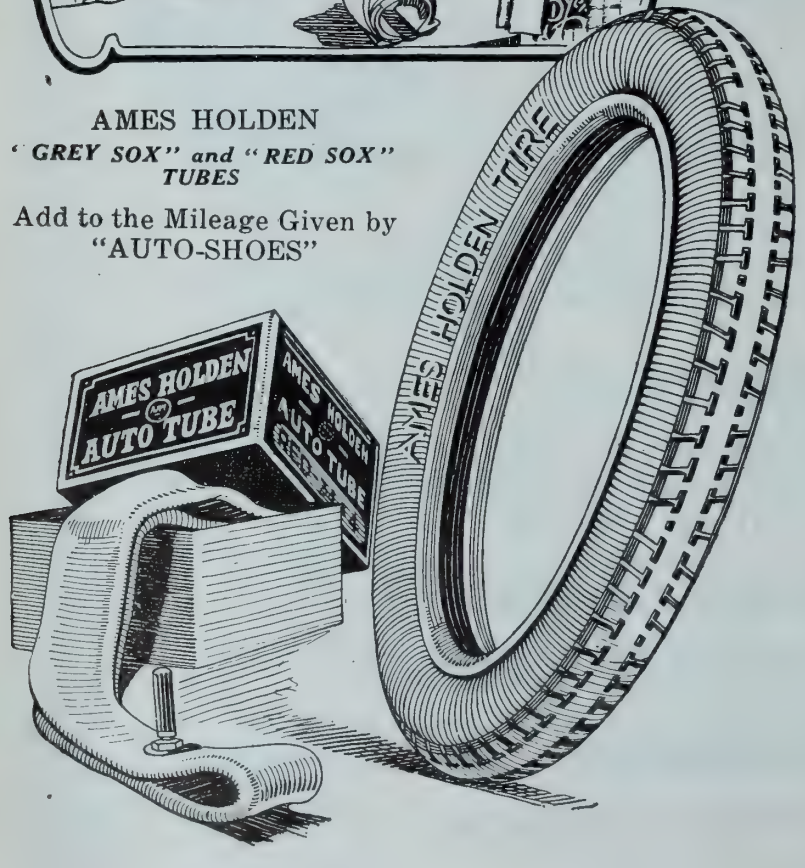
AMES HOLDEN
"GREY SOX" and "RED SOX" TUBES
Add to the Mileage Given by "AUTO-SHOES"



AHM System

To Know Tires —Make This Test

Try one AUTO-SHOE on the south-east wheel of your own or a friend's car. Put your present best selling tire on the other wheel. After five, ten and fifteen thousand miles—compare the wear—if the other tire is still in service. Let the speedometer show you the sales possibilities AUTO-SHOES offer you.

Many AUTO-SHOES that have run over 15,000 miles are still in service—good for thousands of miles more. This better mileage means the better tire value that will increase your tire business if you are recommending AUTO-SHOES.

Your customers are learning about AUTO-SHOE lesser cost per mile—and cost per mile is the basis on which they are buying tires.

More mileage, the "satisfied customer" guarantee and the unusually generous dealer policy should interest you. Ask our nearest Sales Office to tell you about the opportunity there is, in your district, for bigger tire business with

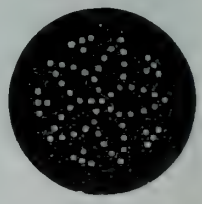
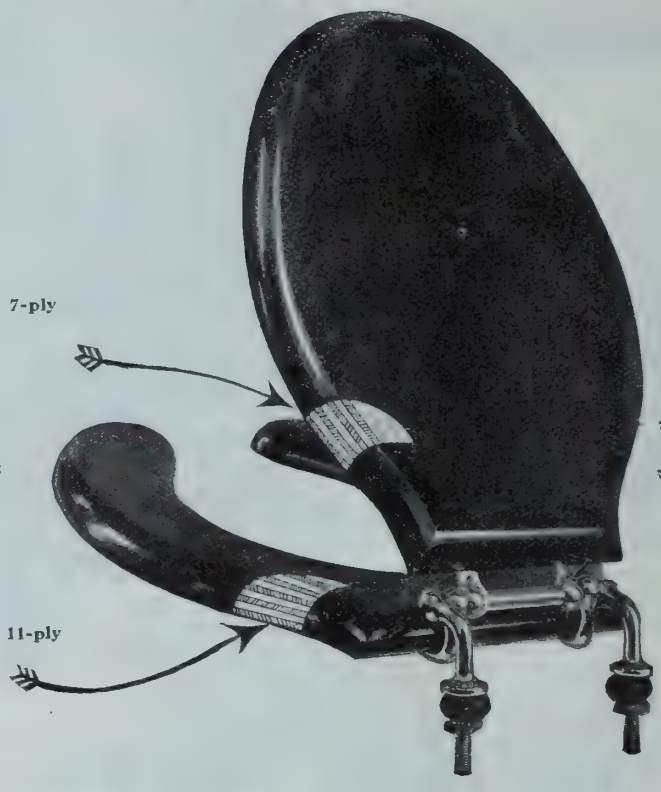
Crown Dining



Round



The Everlasting Veneer Toilet Seat

Air-seasoned wood veneer in 7- and 11-plys, according to the amount of strain and wear required of its respective parts, makes this a substantial seat, unequalled for durability. The veneer is held together by means of our special wood-cement that is proof against extremes of heat, cold and dampness.

For cold, damp basements, schools, factories, or other public places where the closets are subjected to all manner of abuse or rough usage, it is specially recommended. The Everlasting Veneer Toilet Seat will never crack, warp or split.

Three-Ply Veneer Chair Seats

The corners of these reliable seats are rounded, the edges smoothed, sand-papered, and the whole finished with genuine special hard drying seat varnish. These desirable seats are made up entirely with waterproof cement; they cannot come apart if exposed to the severest weather. We are the only makers using waterproof cement.

Hanson's

Profitable Suggestions

Hanson's Refrigerators have long since passed the experimental stage. They are now accepted as the acme of refrigeration production in Canada, and are being sold from coast to coast in the Dominion, and are winning recognition in foreign markets.

This splendid record has been founded on the actual merit of the materials and workmanship, which are features of every refrigerator leaving our factory.

There is absolutely no essential lacking which should be found in a modern refrigerator. The No. 207 Style shown is a one-piece, porcelain-lined, oak case; merely a sample of a line of refrigerators in interesting variety.

Hanson's Dominion Spring Clothes Pins are the kind that stay on the line.

The "Standard" and "Glass" brands of Washboards are up to the Hanson Standard in every way; strong, durable, and will not warp, split, splinter or fall apart.

We make a varied line of woodenware and invite inquiries at any time for special designs. Write today for quotations.

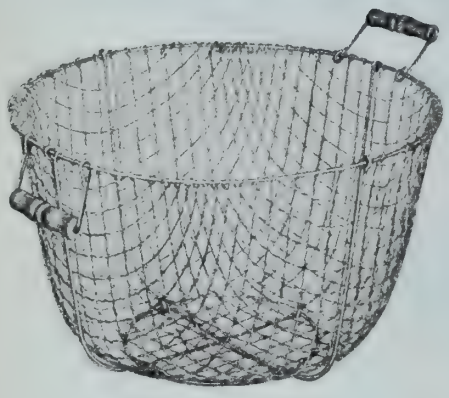
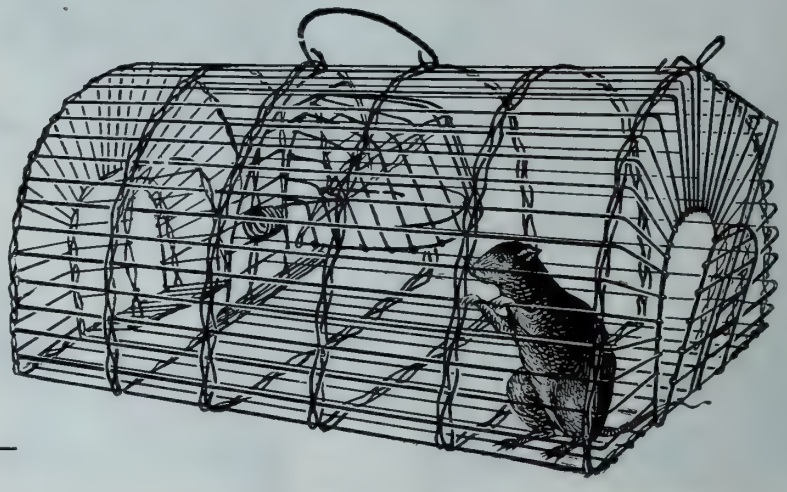
QUEBEC—*the Province of Prosperity*

MACDONALD





Wire Goods—

This staunch, reliable Root or Fish Basket is made in three sizes: No. 60, approximately ½ bushel, with drop bail and wood grip; No. 61, approximately 1 bushel, drop side-handles with wood grips; No. 62, approximately 1½ bushels, drop side-handles with wood grips.

Made with one-inch mesh of steel wire, heavily coated by the hot dip process, after making, which renders it rust-proof and solders every joint; well braced, smoothly finished. Fitted with one-inch band steel reinforcing around top, for hoisting on boats, at small extra charge.

Extensively used in harvesting root crops and indispensable on the farm. Extremely popular with fishermen in all fishing districts.

The effective, "sure-thing" Rat Trap, the Root Basket, our Wire Baskets and other products, are useful, handy products that sell briskly.

INSECTICIDES

COVER THE EARTH

Combatting The Insect Menace

TIMELY spraying with Insecticides of full strength and killing power is just as important as proper cultivation and fertilizing where a good yield of fruit and vegetables is looked for.

Spraying with S.W. Insecticides assures a heavy yield and a high grade crop because even under the most difficult conditions of season and climate they will effectively control the destructive insect pest.

A stock of S.W. Insecticides will enable you to supply the spraying requirements of farmer and fruit grower. For the line is complete—an insecticide for every purpose—including S.W. Dry Lime Sulfur for fruit, Dry Powdered Arsenate of Lead for all leaf eating insects. Bergers Standard Paris Green and Tuber Tonic for root plants.

The Right Paint to Paint Right

Remember the Agate Family

Ramsay's Covers, Spreads and Lasts the Best

Ramsay's Paints were established in 1842—eighty years ago!

If you are not already dealing in these reliable, time-tested, Paints and Varnishes, consider them in relation to your business. In deciding on a paint to handle, you want that which offers quality, uniformity, stability, and, that is made by a house interested in your success; a house that will co-operate with you.

The fact that Ramsay's has stood this test for eighty years and to-day enjoys the confidence of Canadian merchants more than ever, is a very convincing argument. Suppose we talk it over?

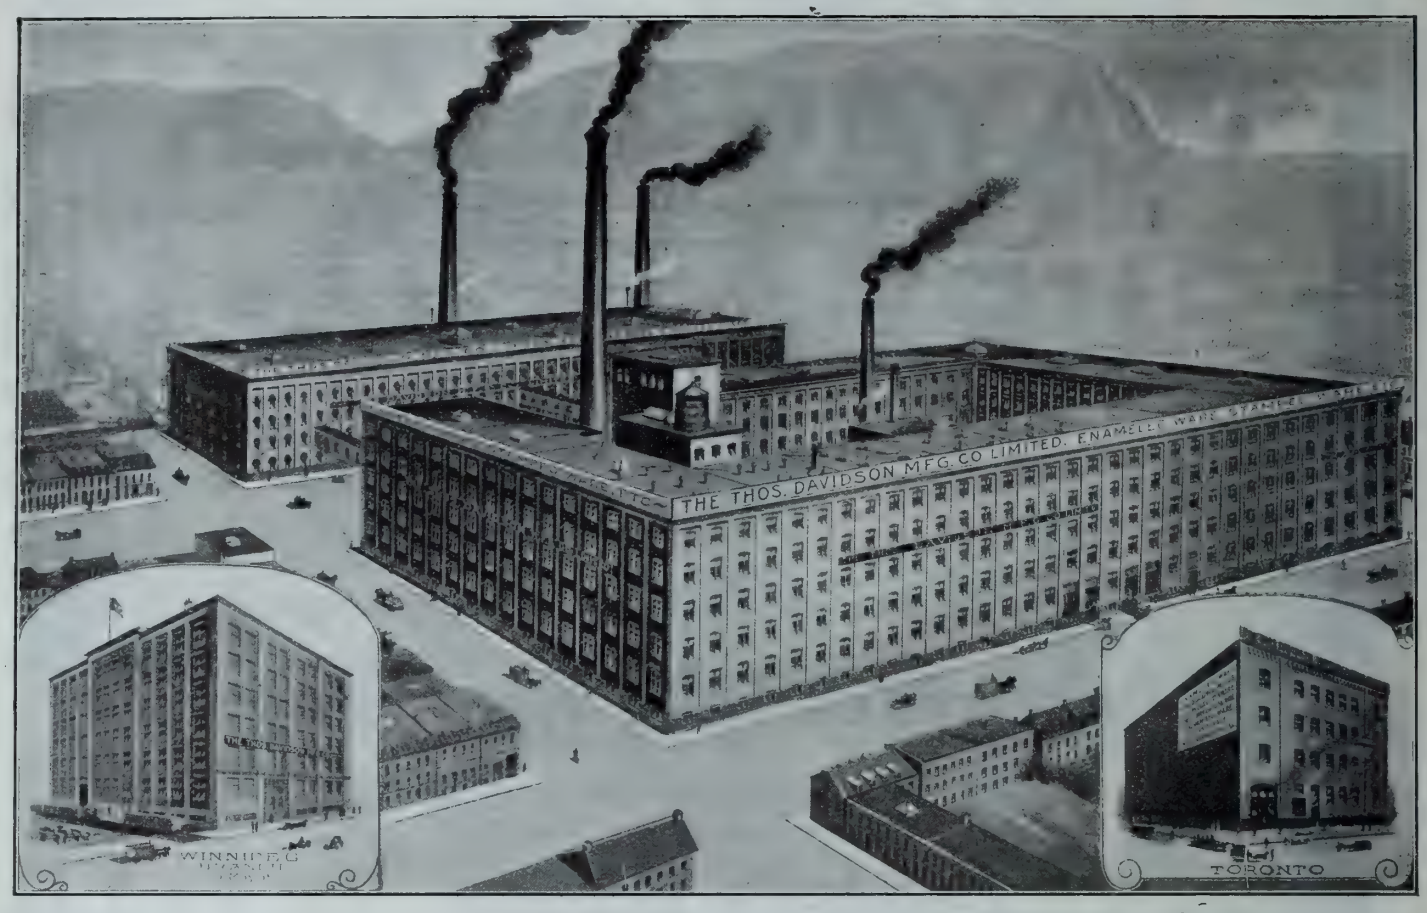
QUEBEC—*the Province of Prosperity*



ABOVE is a photographic reproduction of our Works and Head Office situated at 187 Delisle St., Montreal. Inserts are also our Toronto and Winnipeg buildings.

It may be of interest to our clients, actual and prospective, who as yet have not honoured us with a visit, to know that the Davidson works occupy considerably more than two and a half city blocks—several acres in extent. It was founded in 1860 and is one of the largest concerns of its kind in Canada.

We make a very large and varied range of articles in Enameled Ware Lithographed pressed and pieced Tin Ware, Sheet Iron and Steel Ware, Galvanized Wares, Wire Goods—Davidson's Stoves, Ranges and Heaters and Range Boilers, in addition to our well-known "Frost River" all-steel Refrigerators.

For upwards of sixty-two years our name has been associated with the manufacture of high grade articles of general household utility in these wares. It has been estimated that there is hardly a home in the Dominion of Canada where some product of the Davidson factory is not in daily use.

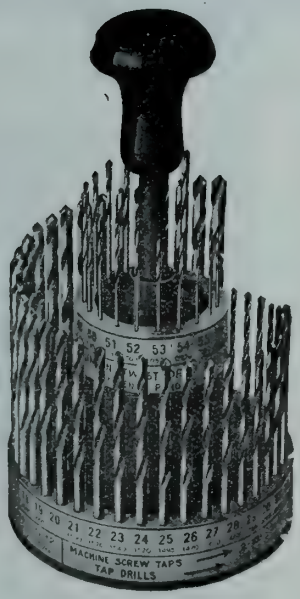
BUTTERFIELD

Butterfield Tools

Sell Because of their Well-known Speed and Accuracy

In the prosperous province of Quebec there are many purchasing agents of large industries who habitually order Butterfield Tools for their plants. They have made it a matter of routine, to specify Butterfield, because they know that they lower production costs by increasing each machinist's output, use less power, and require less grinding and tool-maker's attention.



The Butterfield variety includes almost every possible need, but we can assist you to supply any special requirement, because we make tools to order, from working drawings or customer's samples.

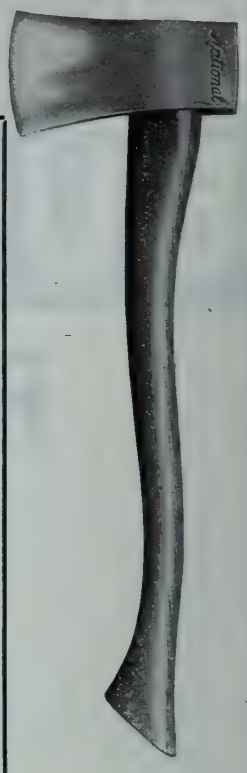
BUTTERFIELD



NATIONAL

Guaranteed Axes and Tools

We make our own steel in our own vast plant covering 40 acres of ground! During the war we had one of the most extensive, best equipped and successfully operated munition plants in Canada.

We have devoted a year to perfecting the adaptation of this plant to the making of the best Canadian axes and tools. We are now ready to sell these.

Few, if any, axe and tool manufacturers in Canada have our expert tool-making facilities, tempering processes and tests, inspection or shipping facilities. Our special metallurgists and chemists, and our specially constructed forging, tempering and annealing furnaces, and chemical vats, assure you properly tempered tools. Making our own steel relieves us of the many handicaps existing where material has to be obtained in open market.

Strength and Resiliency to Cushion Powerful Blows without Becoming a Shapeless Mass

LYON RESILIENT BUMPERS are made of the finest grade of heat-treated, oil tempered spring steel, scientifically formed to give resiliency. They are the most efficient motor car bumpers made. Their resiliency will absorb any jolts experienced in congested traffic, as well as dangerous collision impact.

LYON Resilient BUMPERS

are built for service, a service which insures absolute protection to the car, its driver and occupants. They are the only bumpers that can be repeatedly bumped without becoming a shapeless mass. Lyon Resilient Bumpers can be attached quickly and securely to all makes of cars without drilling or the use of special tools, and there are no weak joints or complicated bolts to work loose and rattle. Protect your customers and increase your business by selling Lyon Resilient Bumpers. We are offering generous co-operation to dealers and will gladly supply details upon request.

THE "STANDARD"

Superior Fibre Seats

The kind that is guaranteed not to break through.

In introducing the "Standard" Fibre Chair Seats we wish to call your attention to the following points which merit consideration:

They are of extra thick material of exceptional quality which will outlast four ordinary chair seats. Our "Standard" Process prevents the warping or splitting as veneer seats do.

They will not injure clothes by rust or tearing, as on metal seats.

The embossing and designs speak for themselves, and can safely be matched to leather for service and appearance.

Write your jobber for facts and prices.

Hardware Inventories Complete January 15

Practically all inventories in wholesale and retail hardware establishments across Canada will be completed by January 15. Buying for Spring will be under way before the end of the present month. Competition will be keen. Retailers will buy more frequently and in smaller lots than a year ago. Travelling salesmen need the assistance of well-planned advertising this year, more than ever before. Hardware and Metal is being read more closely than ever before. Advertisers in Hardware and Metal have a big advantage over non-advertisers. Drop us a line to have a representative call and explain these advantages to you.

How Frost Fence Builds Good Will For Your Store

Frost Fence is purchased by the best class of farmers in every community —who have helped us build up the largest fence business in Canada.

That is the class of customer you like to see coming through your front door. You know he will be a good buyer of all lines you sell to farmers.

Sell Frost Fence and Capture His Trade

FROST
Hold-tight Lock

While you can sell Frost Fence at practically the same price as ordinary fence, the farmer gets fence quality that gives him extra years of good service.

—A tight and trim fence that will save him time and money in both erection and maintenance.

Frost Fence is drawn, tempered and woven in our own factory. We control the quality. Frost wire, toughness, strength and pliancy meet every usual strain. The waved lateral takes care of unusual strains. The famous Frost Hold-tight lock keeps every wire in place always. These special Frost advantages capture and hold business.

Frost Fence will be a good-will builder for your store. It will pay you to handle this fence of superior quality.

Important Movements in Hardware

Second Week of New Year Marks Continuation of Major Price Movements in Hardware Lines—Chiefly Downward Revisions But a Few Advances Are Noted—Necessity of Watching Markets Closely Following the Annual Inventory, is Emphasized

THE EXTENSIVE range of price developments announced in the opening market reports of the year, and which have been continued this week, attach particular significance to the prevailing trend of events in the hardware industry. The lengthy budget of revisions enumerated in last week's issue of Hardware and Metal, has been greatly enlarged during the past few days by other numerous and important changes in the quotations on various hardware commodities. Such market revisions further emphasize the vital necessity of closely following the price tendencies week by week and of keeping in close touch with basic conditions.

Announcements of this nature by both manufacturers and distributors of hardware products, add considerably to the progress of liquidation, and supply many direct examples of deflation as applied to the trade. They also comprise solid arguments for the retail merchant wherever he desires to personally convince his customers that hardware prices have declined, and are still declining in a manner which will stand excellent comparison with similar conditions in other branches of trade.

The extreme importance of the price factor is one of the dominant features of present trade and this has taken on a new significance through the recently increasing number of price changes which almost create a record number of market revisions.

Lines Affected

Featuring the current reports are downward price tendencies on such products as ammunition, roofings, building papers, cotton wastes, eavestrough and many other lines. The quotations on ammunition were anticipated in last week's reports. The reductions in roofings have also been looked for during recent weeks; while the change in quotations on building papers and sheathings adds to the lengthy list of declines recorded on these products during the past few months.

Cotton waste prices, both on white and colored, are revised to lower levels through easing of costs in various contributory elements. The downward revision in eavestrough, both on ridge roll and valley, has appeared through an additional ten points being quoted on the discount. A similar change, and to the same extent, is also announced on conductor pipe, with elbows remaining unchanged.

Advances Recorded

Higher prices on beaver manila, sisal rope and lathyarn, attract special attention; this development being attributed by the manufacturers to higher costs on the fibre market, combined with a Mexican production tax on sisal. Other changes are generally in the nature of recessions. A fifty cent concession is noted in prices on poultry netting staples, both bright and galvanized. Glazier points are reduced, while lower prices are recorded in various models of Winchester rifles. Another decrease is evident in fuel oil quotations, thus reflecting the easier tone of primary crude oil markets.

The new tack list about to be issued also entails changing discounts on this line of products. Lower range boiler list prices have now been generally adopted, this being the result of price shading recently prevalent in these markets. An easier tone in corrugated sheets has resulted in a change in the discount. List prices are unaltered, with a quotation of ten per cent. off now in effect, compared with the previous figure of 7 1-2 per cent.

Other items included in the list of current reductions are, some lines of cultivators, sprayers and drills; carpenters' tool baskets; certain makes of pruners; English tinned "S" meat hooks; one line of silverware, and one make of nail hammers. Reduced prices are also noted for spring delivery on some electric fans.

PRINCIPAL PRICE CHANGES

Another downward revision in building papers and sheathings.

Price declines announced in roofings.

Revised discounts effective on both Dominion and American ammunition.

Easier price levels on Winchester rifles.

Higher prices on beaver manila, or equal, sisal rope and lath yarn.

Lower range boiler list now generally adopted.

Cotton waste prices, both on colored and white, revised downward.

Reduced quotations on eavestrough, both ridge roll and valley.

Ten per cent. drop in quotations on conductor pipe.

Recession in corrugated sheets through changed discount.

Quotations on poultry netting staples 10 per cent. lower.

New tack list to be issued, also entails changing discounts.

Another decrease in fuel oil.

Turpentine Advance Noteworthy

The sharp advance in turpentine levels is worthy of note, the situation at primary centres being of a strong speculative nature, with producers in a statistically firm position for the next few weeks owing to the absence of new receipts at this time of the year.

In discussing the large proportion of market changes, the majority of which are concessions of a more or less substantial nature, certain manufacturers

Retailers Will Not Collect Gasoline Tax

Hon. H. C. Nixon, Provincial Secretary of Ontario, Advises R. M. A. Delegation That Gasoline Tax Will be Collected at Primary Sources—Eight Hour Day Not to be Extended to Retailers—21st. Annual Convention Ontario Branch R.M.A. Brings Out Many Interesting Topics

ONE OF THE most important features of the twenty-first annual convention of the Ontario Branch of the Retail Merchants' Association of Canada, held on Wednesday and Thursday of this week, was the visit to members of the Legislature of a delegation consisting of the executive officers including B. W. Ziemann, Preston, president, W. J. McCully, 1st vice-president, Stratford, W. Hodgins, 2nd vice-president, London, D. W. Clark, treasurer, Toronto, and W. C. Miller, secretary, Toronto, accompanied by a representative of Hardware and Metal.

Hon. H. C. Nixon, Provincial Secretary and Hon. Peter Smith, Provincial Treasurer, were the two ministers interviewed and after a sympathetic hearing, some information was given on certain matters which indicate a favorable attitude toward the position of the retail merchants.

Opposition was made by the delegation to the proposed provincial tax on gasoline sales if the retailer was to be the medium of collection. Mr. Nixon informed the delegates that they need have no uneasiness on this score because if the bill was finally authorized the retailer would not be the medium of collection. Ziemann pointed out that the trade had been through enough difficulty in connection with the luxury taxes to know that a tax collected on retail sales would cause much hardship and confusion.

Eight Hour Day

Another subject on which the delegates secured a favorable expression was in connection with the eight hour day as applied to retailers. Secretary Miller pointed out that legislation on this point was introduced at the last session but was later withdrawn. Mr. Nixon stated that retailers need not worry concerning the application of such legislation to them.

The Ontario Government was asked to amend the Transient Traders and Hawkers Act so as to make it apply effectively under prevailing conditions. It was shown that certain practices now being indulged in worked out to the detriment of retailers and to the municipalities through transient traders avoiding business and other local taxes. The case was cited of the transient trader who brings a stock of goods to a town and arranges with some merchant to distribute the goods through his store to avoid a licence fee and tax. Frequently the merchandise he distributes is of a poor character but he does not stand to lose because he is there today and gone tomorrow. Mr. Nixon suggested that educational effort in the association might overcome this among the members, but Secretary Miller replied that the complaint was with retailers who were not reached by the organization.

Early Closing

It was also asked that the lines handled by certain trades to defined so as to place these stores in the right category as regards the early closing regulations of the Factory and Shop Act It was shown that in some cases the courts were not fully cognizant of the facts and that a skilful lawyer could generally bring what decision he desired.

Concerning the Division Court Act it was shown that in Ontario the collection of small debts through the courts is costly. Some change was desired, and it was pointed out that the motive was not to enable the retailer to force payment from the poor but rather to have some adequate means of meeting the "dead beat." Mr. Ziemann admitted that the retailer might be more careful in extending credit but thought some more assistance was needed in the courts.

On the subjects other than those on which he declared the stand of the government, Mr. Nixon promised careful consideration. The details of the various subjects will be submitted later for consideration of government members.

One of the Best Years

Opening the first regular session on Wednesday afternoon, Mr. Ziemann stated that 1921 had been one of the best years in the organization despite the fact that it had been a hard year for many retailers. He referred to the newspaper statements alleging that the retailers were responsible for holding up prices, stating that the buyers' strike did not bring down prices, but on the other hand brought about a disorganization of business, and that as a result retailers could not sell goods and so could not give business to wholesalers. In turn the manufacturer was forced to curtail with the result that unemployment resulted in a large measure.

"No one body can act alone in the commercial world," said Mr. Ziemann, "and what affects one affects every branch, and the worker, who is the ultimate consumer, is going to feel it just the same as the retailer, wholesaler and manufacturer. The people by this time have come to the conclusion that the retailer is not responsible for high prices and he retailer cannot break away by himself from the situation. I venture to say that there is not a retailer who is not taking his loss day after day and not saying anything about it. We have had high priced goods on our shelves and the only way to take advantage of lower prices has been to clear out the old goods at any price and stock up on the new. This process has been general throughout the country and retailers are not in league to keep up prices. There are so many retailers, and all anxious to do business, that this competition regulates prices to a large extent. I believe we have reached the turning point in the road. I believe from now on we will find the people throughout the country are gaining confidence. We find that factories are beginning to operate more steadily than in the past year."

Increased Membership

Secretary Miller's report showed a total of 3995 members, a net increase of 685 for the past year. He briefly reviewed legislative matters taken up during the year including the eight hour day, transient traders, motor vehicles, amendments to minimum wage law, female help, damage to stores from riots, trade section meetings, auto dealers' delegation to Ottawa concerning the tax on automobiles, etc. In regard to this latter matter he stated that the manufacturers had agreed to absorb 50% of the tax which was demanded by the Government from dealers on cars in stock at time of application, but the adjustment had not been satisfactory and a full refund of the amount was asked. Concerning the minimum wage regulations Mr. Miller pointed out that in most cases the wages

ONTARIO R.M.A. OFFICERS FOR 1922

The following officers were elected by the Ontario R.M.A. for the ensuing year: president, W. J. McCully, Stratford; first vice-president, Wilfred Hodgins, London; second vice-president, T. A. Sharp, Midland; third vice-president, R. A. Stephens, Ottawa; treasurer, D. W. Clark; secretary, W. C. Miller. Officers to the Dominion executive council, Henry Watters and R. A. Stephens, Ottawa; representatives on the National Exhibition Board, D. W. Clark and T. Bartram, Toronto; and auditor, W. S. Ball, Toronto.

paid by retailers are higher than the minimum wage suggested.

His report showed that five new trade sections had been organized in Toronto in the year. Assessment matters were also being taken up and it was stated that in future more care would be exercised in assessing retailers' properties. The help which the association had been to merchants in connection with the Income Tax was also dealt with, it being pointed out that whereas some merchants had been penalized $50 for laxity in making returns, representations had been made and this fine reduced to $10 in most cases.

The report of the Treasurer, D. C. Clark, showed a very substantial balance on hand.

Henry Watters, Dominion treasurer, speaking for E. M. Trowern, Dominion secretary, pointed out that it was the plan to appoint provincial advisory committees to bring pressure on the Dominion Government in connection with national problems. He stated that an assistant secretary had been appointed on the Dominion Board for the purpose of keeping in close touch with various Government departments.

Govt. Should Pay Inspection Fees

Referring to the fees charged for the inspection of weights and measures, he expressed the opinion that this should be borne by the government as such inspection was in the interests of the people. Postage rates on mail order catalogues was also taken up and it was suggested that the government investigate the subject to ascertain the cost to the country of this service which enabled the distribution of merchandise under such circumstances as gave little opportunity for competition by retailers. In giving an argument for branch associations, Mr. Watters stated that the Eastern Ontario and Ottawa District Ass'n had increased its membership to 442 this year and had a surplus of $927 on hand.

IMPORTANT MOVEMENT IN HARDWARE

(Continued from page 77)

have pointed out that endeavors have recently been made to reach the lowest possible levels, based on lowered production costs and easier replacement values. This movement has developed, according to one manufacturer, in the hope that this will assist in stabilizing business conditions generally. On the other hand, it is generally admitted as a possibility that the process of deflation may continue to be evident as long as basic elements are experiencing downward revision. The anticipated declines in transportation charges, wage levels, distributing and production costs, are factors which individually bear small relation to current prices. Collectively, however, they constitute matters of importance with a significant appeal to the producer as well as the ultimate consumer.

When interviewed by Hardware and Metal on the subject of price declines occurring since the New Year, one manufacturer mentioned that the endeavor was to reduce prices to the lowest possible level. This movement is generally in preparation for the salesmen going to their respective territories after the annual inventory period. It was stated that the sales representatives had been given every opportunity to test the prevailing quotations, and they are consequently convinced that present prices are about as low as current costs will allow. With this spirit spreading throughout the trade, the opinion was expressed that business should be stimulated in the coming months through an accurate knowledge of the facts.

"Some months ago," remarked one wholesaler to Hardware and Metal, "we heard the statement at frequent intervals that quotations were down to rock bottom. Since then, however, it would appear that the bottom has evinced a tendency to recede on several occasions."

OPERATION OF MARKING ACT POSTONED

As we go to press Hardware and Metal has received telegraphic advice from its Ottawa representative that the operation of the Marking Act governing marking of country of origin on imports, has been postponed until the next session of Parliament. This action is interpreted as meaning that Section 12 A, of the Customs Regulations, as outlined in a recent issue of Hardware and Metal will be subsequently repealed. The fact that the postponement is effective until after the close of the session is in itself regarded as indication that the Government has this end in view.

ELECTED REEVE

Wroxeter, Ont.—John Douglas, hardware merchant, has been elected Reeve by acclamation for the fifth term.

ALL VEHICLES TO CARRY LIGHTS

Toronto, Ont.—The carrying of lights on all vehicles, a traffic safeguard that motorists have striven for years to secure through province-wide legislation, is to be enforced in the city of Toronto by sanction of the voters on New Years' day.

Big Ad Campaigns Lose Effect Unless Retailer Does his Part

AN ADDRESS on "Retail Selling" was given to the convention by T. A. Trestrail, Secretary Toronto Ad Club, in which he suggested that closer co-operation should exist between the Associated Ad Clubs of the World, or the Association of Canadian Advertisers, and the Retail Merchants' Association. He suggested that retailers study the methods of increasing sales so that their influence might be increased. He cited the case of a shoe clerk who sold two pair of shoes and two pair of shoe trees where another would sell one pair of shoes only, because of suggesting forcibly that wear equal to four pair of shoes would be secured by interchanging the two pair of shoes every day or two and in the meantime keeping a pair of trees in the shoes not being worn.

"A million dollar advertising campaign will lose much of its effects unless the retailer does his part," said Mr. Trestrail emphasizing the importance of the retailer as a factor in carrying forward the general campaign to aid merchandising.

Mr. Trestrail asked that where retailers knew of local advertisements appearing which were not clean and truthful that such be reported to the organizations previously mentioned, whereupon vigilance committees will take the matter up.

"There is no reason to exaggerate terms," he added.

An argument was advanced for standardizing sales in order to increase their effectiveness and dissipate any idea that they were designed to "put one over" the public. He suggested a set time for clearance sales, stock-taking sales, mid-summer sales, etc. "Retailers should also get away from quoting former prices where reductions are meant to be emphasized," he stated.

Co-operation of ads with window displays was important, and it was suggested that a copy of the ad be placed on the display window, the ad printed on better paper than news print if possible. This plan would link up the two forces closely and increase effectiveness.

In closing, Mr. Trestrail, suggested that retail salesmen make their business a hobby in order that best result might be secured, and that where advertising was undertaken that it be done systematically. "Don't advertise unless you have something to say and when you do advertise, do it forcibly and systematically," he concluded.

Mid-Winter Selling of Household Lines

E. M. Lapierre, Buckingham, Quebec, Finds That Each Month in the Year Can be Devoted to Featuring Certain Lines—Close Personal Touch, Assisted by Special Letter Heads and Local Paper Keep Lapierre Name Before the Community—Clearing the Deck for Stove Selling

JANUARY and February are good months in which to make selling plans in order to offset any temporary dullness which may come after the Xmas rush and so as to be ready for trade in seasonable lines of household and other goods in early spring.

March marks the commencement of more activity, and toward the latter end of this month the brisker trade of Spring appears. The two former months allow the merchant to prepare his campaign on the many household and other lines, seasonable in the Spring. It is in these months that Eugene M. Lapierre of Buckingham, Quebec, devotes much time to plans of this nature.

An Appeal to the Car Owner

It is at this time that an appeal is made to the car owner. The season for the automobile is now more extended than a few years ago, and if roads will permit, many cars are used in practically every month of the year. However, the annual over-hauling is usually undertaken by the car owner, who is in many cases mechanic enough to do his own work, before the better roads open after the snow disappears. An early appeal then must be made to catch this trade, and Mr. Lapierre uses the form of a circular letter. Two years ago the accessory department was first opened, and following was the manner in which this was announced to the customers owning cars;

"Dear Sir:

We have much pleasure in announcing that we have added to our stock of hardware a complete line of repair parts and accessories for automobiles, Chevrolet, Ford and other models. It will be a pleasure for us at any time to give you prices on these goods and demonstrate to you their advantages and qualities. We also handle oils and greases for automobiles, the best quality of gasoline at the lowest market price. Buy your own repairs and do your own work.

Selecting your valuable patronage which will have at all time our special attention, we remain,

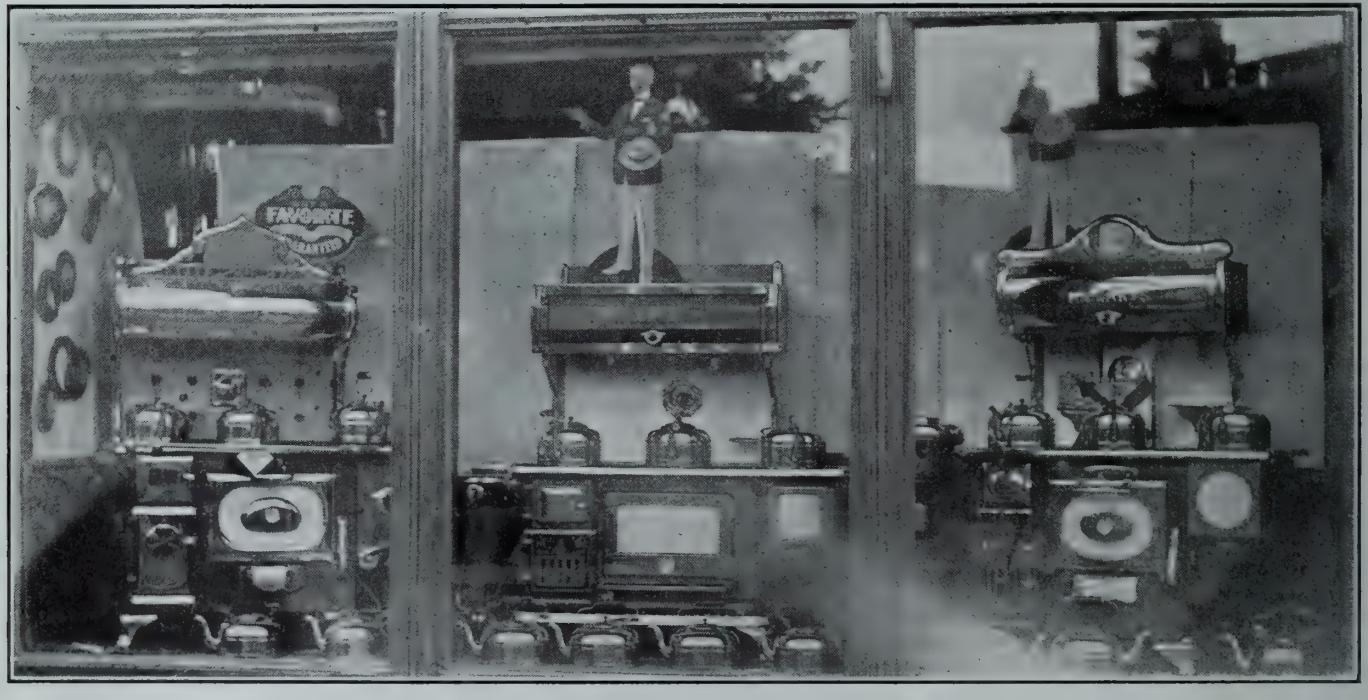
"Yours truly
Eugene M. Lapierre."

Early Advertising

Also at this early stage, special efforts are devoted to the lines that will sell in the following months, and letters of a varied nature are sent out as a fore-runner. A feature used by Mr. Lapierre in his circularizing is the letter heads. For the accessory appeal, an attractive, colored cut of an automobile with natural surroundings is used; paint and varnishes, roofings, tires, garden tools, etc., each have a special letter head, brightly colored and outstanding in its appearance. These, according to Mr. Lapierre, force the message home with double force.

Other means of bringing to the minds of the people that Spring is approaching are the early displays on one side of the store. This portion is larger than the side where the counters and shelf hardware are located, and is separated by a partition with a wide, open doorway at front and rear. A large display window, level with the pavement outside, allows a full clear view from the exterior, thus affording an ideal display room. In February and early March, Spring goods are displayed, and the paint stock (which occupies one entire side wall) is put into shape for the earlier demands. This section of the store is a great asset, being very valuable as an advertising medium.

Following come the active months of April, May and June with their heavy demands of kitchen utensils, washing machines, gardening tools, house-cleaning needs, paint, varnishes, wall-paper, etc. In this busy season two "bigger sales" helps are the delivery service and personal calls on prospects; classed together because they further the campaign outside the store. An auto-



The display windows represent an important factor in stimulating local interest in seasonable household and other lines of hardware in the E. M. Lapierre store, Buckingham, Quebec. Here is shown an attractive grouping of ranges and kitchen utensils, stove boards, heaters, etc., with prices shown.

An extensive grouping of paints, varnishes, etc., is shown in the paint department of E. M. Lapierre store, Buckingham, Quebec. Here the customer may readily examine the paint cards or the cans themselves. The stock shelves are always kept well filled to drive home the fact that the store is prepared to give good service on requirements. Mr. Lapierre considers a neat, well-stocked department, backed up with a thorough knowledge of paint on the part of salesmen, is a sure foundation on which to make plans for stimulating trade through the medium of window display, advertising, letters, etc.

mobile truck and a bicycle are the vehicles used in delivery, and while the former is very important and essential, the bicycle plays no small part.

"When our truck is on a long trip, perhaps away from the store for more than an hour, we use the bicycle and a delivery boy for rush calls. Not long ago a painter called us over the telephone for a pound of glue. He was hanging paper in one of the outlying sections of the town and it was necessary that he should have the glue before he could commence his work, and the bicycle did the trick. This man wanted service, as many others do, and the smaller vehicile is the only way to give this, especially in the rush season," said Mr. Lapierre.

Dealing with personal calls and working with the customers in their own homes, Mr. Lapierre said these could be accomplished in conjunction with the delivery. He recalled a few years ago when a certain mop was first placed on the market, that in one afternoon they sold eighteen, merely by taking a sample and introducing them in the different customers' homes. Vacuum cleaners more recently met with equal success through the same method.

Mid-Summer Months

July and August furnish another slackening between seasons to a degree, although there are lines that can be "pushed" in these mid-summer months. Oil stoves, refrigerators, hammocks, and other lines that offer comfort in the real hot weather are popular at this season. Both the extensive display room and the outside canvassing are here very valuable. Newspaper advertising with suggestive cuts and drawing are also used to advantage. Two columns, the full length of the front page of the local paper are occupied to convey the message of an oil stove demonstration, or of the real comfort of the articles in the effort to keep cool. "Our newspaper advertising is of special benefit in announcements of this kind," continued Mr. Lapierre.

Fall Campaign

Mr. Lapierre has found that fall and early winter months contribute very liberally to a successful closing of a year's business. Although the spring of the year has generally been considered the "harvest" for the hardware store, the autumn offers seasonable lines which with timely displays and sales efforts, swell the yearly turnover in the closing months. It is the time when the merchant can, by looking up his last year's gross sales set a standard, by which he and his selling staff must sell so much merchandise to surpass the records of the year previous. An opportunity is then offered to inspire the salesmen to further their efforts in selling the wares that are in demand at this period of the year.

There are three leading lines contributing to bigger business from the end of August to the beginning of the New Year, viz., paint, stoves, and Christmas holiday wares. Numerous other artcles are seasonable at this period of the year, but the aforementioned are lines that Mr. Lapierre makes a special effort to "push."

Commences With Fall Painting

To carry on a bigger-sales campaign in paint means to Mr. Lapierre a repetition at other seasons of spring activities. A well dressed window will remind people that the season is ideal for painting purposes, and many who delayed, may now be persuaded to proceed to brighten and protect their homes. However, a much greater effort than the dressing of a window is required to sell paint. It will do its duty, as far as it goes, but the campaign must be entered through other channels as well. The mailing lists are revised, each prospect being advised of the advantages of painting. The lists are extensive and under constant revision, new names are added while others are cancelled. This being done, the campaign has just commenced. Windows and mailing lists are important; they undoubtedly bring results, but it is at this stage that further efforts are put forth. To use Mr. Lapierre's own words:

"We do not leave it to the manufacturers alone to advertise our paint and varnishes. They supply displays, cards and literature, and are invaluable in forwarding advice through circular letters to our customers, but we must also follow-up from our own end," he said.

An important factor in this direction

is keeping in close touch with the painter. Asking him for a list of the property owners who had intended to paint, or even contemplated giving him work, should bring results. Another item that is not overlooked in the Lapierre store is the display table, situated in front of the counter down the centre of the store. At this time of year an arrangement of paint, varnishes, stains, polishes, etc., meets the customer's eyes as soon as the front door is entered, thus the housewife is not forgotten any more than she is in the spring of the year. Color cards are also freely distributed both through the mail and in parcels, reaching the women folk who are thinking of brightening the rooms during the winter.

Clearing the Deck for Stoves

"Our early shipments of stoves usually arrive in August, but owing to floor space not being available, we do not commence our stove display until September as a rule. This side of the store is cleared, thus giving us ample room for the various lines we handle," said Mr. Lapierre, when asked about his stove season. He then led the way to the portion of the store set aside for household goods in general where oil stoves, wagons, bicycles and other summer goods were neatly arranged. "We used a different method in our stove purchases last year. Our buying had been light, and while our showing was as varied and complete as ever, there was very little surplus in the warehouse at the rear. In other words we had what we believed our customers would want, but a repeat order filled the vacancy when the stove was delivered."

It is in selling stoves that personal calls on prospects again have in a good percentage of cases resulted in sales. A lady comes into the store to look at a stove, and it is very seldom the sale is made on the first call, but she has inspected them all and expresses delight on some certain style. Very often the money involved is the stumbling block to a quick sale of range or cooking stove, and she requires time to decide. This is rightly so, and rather than "pushing the deal" on the spot, after demonstrating it thoroughly, she is asked to call again. However, here is a good stove prospect, and in the course of a few days or a week is followed up by a personal call at the home, where in many instances the sale is closed while in most other cases it is a good stride in the right direction.

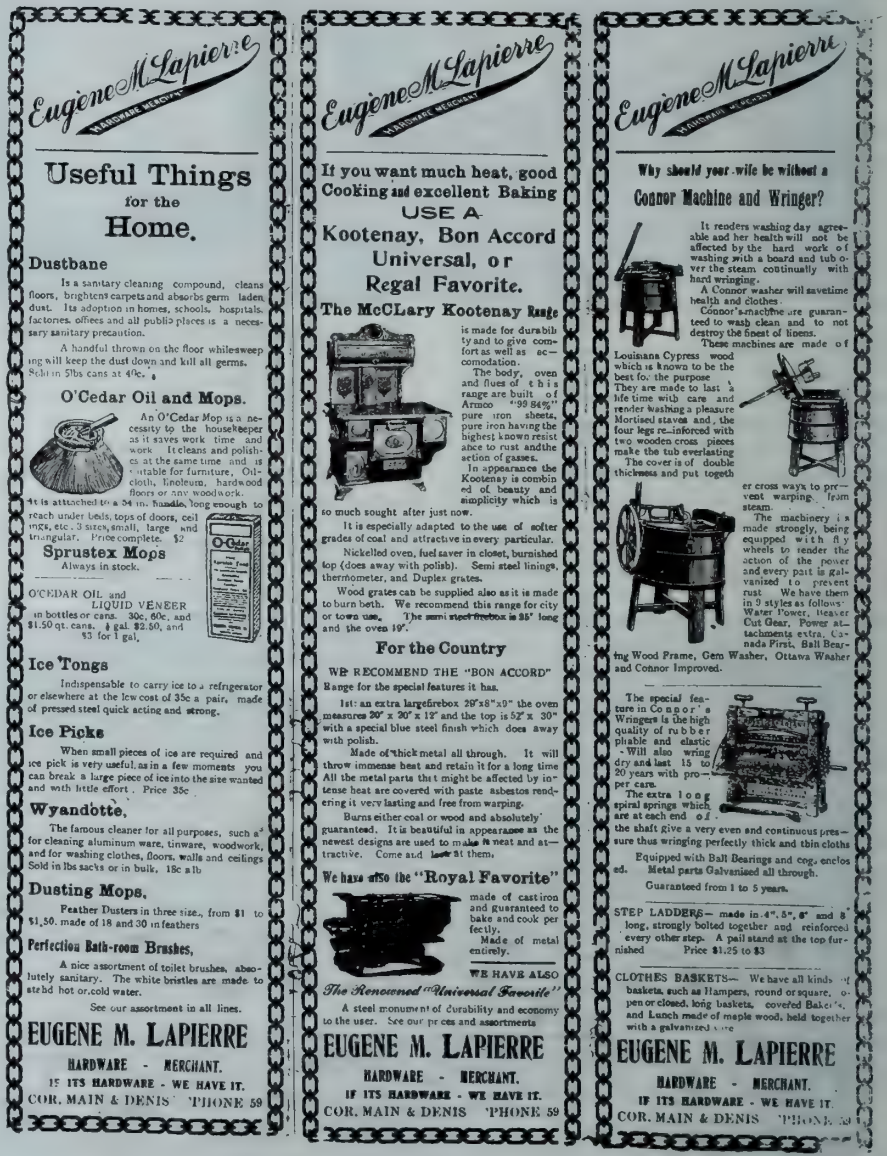
In December of each year preparations are made for the holiday festive season which always brings with it a "harvest" for the hardware dealer, and usually as extensive as the merchant has been willing to prepare for it. In the Lapierre store the preparations are on a large scale, and here again is where the stove department is converted. The floor is again cleared and takes on the appearance of a large and complete Toyland, using one whole side of the store for displaying the gifts for mother, father, sister, brother and baby.

"We go after the Christmas trade in earnest," said Mr. Lapierre. "By the use of tables down the centre of the floor where the stoves were in the Fall, a good amount of display space is obtained. At either end and in the centre of the tables, arches are formed from stove pipes and 45 deg. elbows which are ideal for forming almost a perfect half circle. These are covered with bunting, evergreens and garlands, making a very attractive appearance further improved by being illuminated at night by electric bulbs around each arch."

Next comes the arranging of the toys and other gifts. Toys form a good display, being hung on the arches, also under and on the tables, but the elder folk are not forgotten and a gift for mother can be chosen from anything in tinware to silverware and cut glass.

In the Christmas season just passed

Featuring Household Lines In Local Advertising



Some samples of advertising of Eugene M. Lapierre, Buckingham, Quebec, are shown herewith. These ads were used in full page length of the local newspaper and were each two columns wide. The first one is devoted to "Useful Things for the Home," including cleaning compounds, mops, furniture polish, ice tongs and picks, dusting mops, brushes, etc.

The second one deals with ranges and is headed "If You Want Much Heat, Good Cooking and Excellent Baking, Use a ——." Full details are given of each range.

In the other ad devoted to washing machines and wringers the heading asks the question, "Why should your wife be without a —— machine and wringer? It renders washing day agreeable and her health will not be affected by the hard work of washing with a board and tub over the steam, combined with hard wringing." Step ladders, clothes baskets and other household lines are also dealt with.

Santa Claus arrived by train two or three days ahead and was at the store where he inspected the outlay and listened to the wants of the kiddies. The announcement of his coming was widely advertised both in the windows and in the daily paper, and at the same time children were invited to write Santa Claus the presents they would like, so he might have the letters in plenty of time before Christmas Eve.

"We got lots of letters, and you would be surprised at the results this had on our Christmas trade. The kiddies do not forget to tell father or mother they have written for such and such a toy which he has at Lapierre's," concluded Mr. Lapierre.

Getting Cash In The Hardware Business

Is the Money You Are Earning Staying in the Pockets of Your Customers?—Here Is a Plan Which One Merchant Used to Improve Collections

"HOW CAN I get cash?" is the cry of many a merchant today. Farmers have extended their credit on account of the low price of farm stuffs. The result is many dealers are carrying accounts on their books ranging from $200 to $700 and books show collections in 1921 are 10 per cent, to 15 per cent. lower than in 1919.

Yes, sir! Ready cash is mighty hard to lay hands on these days.

Here is how one dealer met the problem. He writes:

"For seven years I watched my business grow on the books. But the cash drawer and the bank balance didn't seem to grow. My banker always watched my account and it was hard for me to get credit. And yet I was giving long time credits to all of my customers.

"It took me seven years to realize that the money I was earning by increasing my business was mostly in the pockets of my customers instead of in my own. I finally woke up to the fact that a balance on the books didn't mean anything. It was a balance in the bank that counted.

"I made a complete change in my business methods. Today, three-fourths of my business is strictly cash, and except in rare instances the other fourth of my trade pays up every thirty days.

Here's The Scheme

"Liberal credit had always been my policy and I couldn't revolutionize things in a minute by insisting that customers pay cash. So I offered 5 per cent. discount for cash on all purchases amounting to one dollar or more. I offered a discount of 2 per cent. on all bills which were paid on or before the 10th of the month following purchase.

"On my statements and bills I had this notice printed:

"'When we borrow money from the bank we have to pay interest. When we sell goods to you on credit it is the same as loaning you that much money. We are extending this accommodation with the understanding that you will pay promptly. If you do not pay by the tenth of the month we will charge you interest at the rate of 6 per cent.

"It wasn't long before my customers began to realize that the 5 per cent, discount for cash meant a real saving to them. To make this clear, I instructed my staff to count out the discount separately from the charge. As an

Lessons Learned from Tool Selling in 1921

A visit among hardware merchants in Quebec and other provinces indicates just how prominent a part mechanics' tools play in the daily turnover, and despite reported slackness in the building industry in 1921 it is significant that in many cases active business in tools has followed upon the exercise of stimulating measures on the part of the trade. The property owner and the housewife, too, have been encouraged to purchase tools necessary for effecting minor repairs in the household and close watch has also been kept on local building developments to get in "on the ground floor" for tool requirements of mechanics.

example, suppose a customer made a purchase amounting to $3.80 and gave the clerk a $5.00 bill. The clerk says, 'Here is your change', handing the customer $1.20. At the same time he says, 'And here is your cash discount, 5 per cent. on $3.80,' handing the customer 19 cents. In this way, people recognize the saving in paying cash. As I said before, three-fourths of my trade is now strictly cash. They like to pay cash.

Charging for Credit Brings Cash.

"Charging interest on unpaid bills is a wonderful stimulant toward prompt payment. This plan has driven the 'slow pays' away from my store but it brought more than enough 'prompt pays' to take their places.

"Last year my total business amounted to $73,640, which was a splendid increase over any preceding year. I paid out $2,500 in discounts. At first thought it might appear that these discounts would make a big hole in my net profits. But not so. I didn't have to borrow money and pay interest.

Today I Am Independent

"Best of all, I know exactly where I stand. For seven years I was hard up for cash. To-day I am under obligation to no one.

"Show your customers that by paying cash, and getting a cash discount, they are getting what belongs to them; and they are not helping to pay for goods which the deadbeat walked away with. The merchant who decides that he should change his methods, and encourage the cash buyer, should work out the details in his own way. Of one thing you may be sure, a business will never grow and be really profitable to the owner, as long as he has to borrow money to take the place of money outstanding on open accounts."

START RAILWAY EXTENSION TO JAMES BAY

Cochrane, Ont.—On a recent occasion Honorable E. C. Drury, Premier of the Province, turned the first sod on the extension of the Temiskaming and Northern Ontario Railway from Cochrane to James Bay.

A first unit will be built next year to Uno Post—a distance approximately 75 miles north of Cochrane. The line traverses a very heavily timbered section of the north with several large water powers available.

The first sod was actually turned with a nickel-plated shovel, supplied for the occasion, although the Cochrane Board of Trade also presented the Premier with a miniature silver spade suitably enscribed, the Premier insisted also on having the nickel-plated shovel, which, no doubt, appealed to his practical sense as being of more value in case of his return to Crown Hill.

How Quebec Merchants Advertise Hardware

Some samples of the advertising of hardware lines as done by retail hardware merchants in Quebec province. Samson & Filion, Quebec city, advertise a range of sporting goods including most hockey requirements, under the heading "Ideal Pastimes for everybody during Winter." Some cutlery lines are illustrated by Lisle Kittredge Hardware, Montreal. A somewhat novel style of advertising is that done by Fabion, Limited, Montreal, advertising gas stoves, pointing out that they save the price of coal, eliminate ashes and no drafts to watch, fire always ready, etc. In the other ad a personal talk is directed to the reader suggesting closer attention to the window displays. Having in mind the fact that many motorists paint their cars in the winter months, the ad by Eugene M. Lapierre, Buckingham, Que., gives some pointers on the use of various finishes.

News of Western Canada

1922 Hardware Trade Prospects In B. C.

Re-opening of Many Lumber Camps in Spring is Forecast—Industrial Stocks Lower Than at This Time Last Year

VANCOUVER, B.C. — Wholesale jobbers in the hardware trade in British Columbia are reasonably optimistic as to the outlook for trade during the coming year. The reasons given are logical and it is anticipated that while last year there was a slight increase in tonnage though at lesser value owing to lower lists, this year will record gains in both value and tonnage. The year started out with a decline of twenty per cent. on all lines of tin and enamelware and though these reductions have not yet made their appearance in advertised retail prices, they are expected shortly.

The main argument for the optimists is based on the announcement that several of the large lumber companies will open up their logging camps as soon as the snow disappears in the woods. Last year proved a record one for the industry which was kept going, however, by export orders and affected the larger concerns, chiefly. The outlook is brighter this year for the smaller companies and hardwaremen are looking for an increased volume of orders as a result of this trade. It is said that this will not affect the interior dealers to the same extent as the mountain mills have made no announcement as to opening of camps.

The letting of the contract by the Britannia Mining and Smelting Co., for the construction of the concentrator plant together with the announcement that activities at Britannia Beach, including the rebuilding of the store and its full equipment of hardware and other lines, indicates business from that quarter following the recent period of dullness.

Again, operations of the Canada Copper Co., at Copper Mountain in the Similkameen Valley and other lesser corporations means so much added trade affecting the local houses.

Doubt exists as to the operations of the canning companies but it is believed that with anything like an average run, this industry will be operated satisfactorily as the stocks at the commencement of the year are much less than a year ago.

The demand for builders' hardware has slowed up to some extent owing to the cold weather during the latter part of December and the first of this year. This let-up in orders will probably obtain until the latter part of next month when construction will again be under way.

As a whole the hardware trade is considered to be in very fair condition for the start of another year. Stocks are in good shape and accounts well in hand. Collections are inclined to the slow side but up to the average.

WESTERN CANADA NOTES

Winnipeg.—Frank Humphries, retail hardware merchant of Vanguard, Sask., is on a business trip to Winnipeg.

Tarbell's hardware store at Cumberland, B.C., narrowly escaped the fire which destroyed three retail businesses in that city.

Ald. W. R. Owen of the hardware firm of Owen and McCallum, Vancouver, B. C., some time ago announced his intention of running for the position of mayor of this city. Six others followed suit. Two, including Owen, have dropped out. Owen will run again for alderman.

Winnipeg.—G. V. Thompson, George Cunningham and George A. Jamieson of the J. H. Ashdown Hardware Company, Limited, Edmonton Branch, are attending the annual sales convention, also S. J. Lewis, Edmonton, A. McCallum, Medicine Hat and S. E. Levett, Saskatoon.

Winnipeg.—In a recent interview H. B. Dale, sales manager Winnipeg Paint & Glass Co., states that on visits to the trade in Western Canada the retail hardware merchants have led him to believe that they would prefer to have screen wire cloth invoiced to them at prices per lineal yard instead of per 100 sq. ft., inasmuch as their selling price is made out in the former manner and this firm will in future unless otherwise instructed make their screen wire cloth charges read per lineal yard.

A. L. Teetzel of Macpherson and Teetzel, wholesale hardware and stove jobbers, was one of the nominees for the school board in Vancouver at the forthcoming elections. While his nomination papers were filed, irregularities were discovered to the regret of the members of the Kiwanis Club of which organization he has just retired as president, following a year of office.

DEATH OF J. F. HENDERSON

Winnipeg.—The death is announced of J. F. Henderson, who for some years had been associated with the hardware trade in various parts of Canada, and latterly with Wood, Vallance, Ltd. Mr. Henderson commenced the hardware business with Lewis Bros., Ltd., Montreal, assuming the management of the heavy hardware department. He arrived in Winnipeg in 1904 and represented Miller-Morse Ltd., as salesman in Eastern Saskatchewan, resigning to accept the management of a hardware store at Manor, Sask. Since 1908 he has been associated with Wood, Vallance, Ltd.

J. H. ASHDOWN HARDWARE CONVENTION

Winnipeg.—Much interest was taken by the sales staff of the J. H. Ashdown Hardware Co., Ltd., in the 1922 convention just concluded. A variety of subjects were dealt with during the meetings which extended over a week and much benefit resulted from the discussion of topics of vital interest to the salesman.

The opening address was given by J. H. Ashdown following which Mr. Russell spoke on Ratchet Can Openers. In the afternoon session of the first day a visit was paid to the plant of the Martin Senour Co., and a talk was given on Diamond "A" paint. On the second day oil stoves were discussed and pictures shown by lantern describing the development of cooking utensils. This was given by Messrs. Clarke and Kennedy. In the afternoon new tints in interior wall finishes, screen doors and refrigerators were discussed under the guidance of Mr. Haney. The subject of "Sales through Service" was dealt with by L. R. Baker, manager Burgess Batteries Ltd.

Subjects discussed on the following day included, gas lamps and lanterns by E. D. Rauck, automobile springs by Mr. Welton and a visit to the plant of the Gregg Mfg., Co. The plumbing and heating department was discused by Mr. Shannon. Guns and wrenches were discussed by Messrs. Prescott and Robinson. Auto acessories and sporting goods by Mr. Maitland, shelf goods and other lines by Mr. Hutchinson; stoves, ranges and heaters by Mr. Fisher, Credits and collections by Mr. Pigott. The convention was concluded with an address by A. E. Dykes, general manager, giving a comprehensive survey of matters affecting business.

Hardware and Metal

The Only Weekly Hardware Paper in Canada

PUBLISHED EVERY SATURDAY SINCE 1888 BY

The MacLean Publishing Company, Limited

Montreal TORONTO Winnipeg

SATURDAY, JANUARY 14, 1922

1922 SHOULD be the greatest paint and varnish year in the history of Canada, so far as retail hardware sales are concerned. Business may be harder to get this year but it is available for those who will go after it in a big way.

A MERCHANT who carries good goods and sells them at a price which carries a fair and reasonable profit stands a much better hance of winning out than the man who is always trying to put over stunt sales on cheap goods.

THE SALE of household hardware, including enamelware, tinware, aluminumware, electrical goods, woodenware and dozens of other lines, has grown tremendously during recent years. In many hardware stores, household hardware has become one of the most important profit makers. Rapid turnovers on a reasonable investment are quite possible.

HERBERT N. CASSON briefly stated that if cheapness were so important, there would soon be nothing left but peddlers and post cards. Quality in the end conquers cheapness. The best goods demand a good price, and while some shops may hold the public for a time, by pretending to combine high quality and low price, in the long run they are found out. During the past two years a great deal of trash has been eliminated from our markets, we hope, never to return. The Canadian people are willing to pay a fair price for a good article.

THE COMING convention of the Ontario Retail Hardware Association to be held in Hamilton, Ont., on February 14, 15, 16 and 17, should be attended by every retail hardware merchant who can make necessary arrangements. A brief holiday from the daily routine will prove beneficial and the information to be disseminated by the speakers and members in convention will prove very helpful. Too much information cannot be secured in order to successfully meet the problems of the retail hardware trade of to-day, and it would indeed be a short-sighted policy which did not provide opportunity for going fully into matters of retail importance when occasion demands. The four days' convention in Hamilton will be four days well spent for any and every retail hardware merchant.

Encourage Harmonious Relations

IT IS WITH the idea of bringing about a closer understanding of industrial and retail problems that Hardware and Metal publishes in this issue considerable editorial data outlining the resources and activities of the Province of Quebec. No doubt there are many retailers in other parts of Canada as well as in Quebec who are not fully acquainted with the importance of the latter province and the figures showing the extent of the resources of the forests, mines, agriculture, etc., in that province, will be of interest. Furthermore there will be found in this issue articles setting forth the progressive selling methods adopted by Quebec retail hardware merchants.

These are days when co-operative effort is required to successfully meet the problems of the day. As one prominent retailer said in a recent interview with Hardware and Metal "no one trade factor can stand by itself to-day and successfully conduct business; each is dependent upon the other and only by co-operating can best results be achieved."

Extending this idea to the whole of Canada it is apparent that the best results will be secured by having a thorough understanding among business men of the problems of all the provinces. Only by such development will be brought about that harmony and unity of action which is necessary to progress.

Lights On Vehicles

WHAT THE sunken log is to navigation, the unlighted vehicle is to traffic at night. Hence the City of Toronto voted with a large majority for a by-law compelling all vehicles which use the road to carry lights after dark. Action is under way to extend this idea throughout the province of Ontario and other provinces. To date all such action in Ontario has been fruitless for various reasons but the overwhelming majority given the idea by Toronto voters shows where popular sympathy lies and other governing bodies may be influenced to some extent thereby. Lights on all vehicles provide an important safeguard against many of the accidents which now happen on the highways, and the significant fact is that the need is even greater in the country districts than in the city where all streets are well lighted, and yet the plan apparently gets more support in the city than the rural district. This would seem to indicate that many have the impression that it is burdensome legislation designed to penalize a certain class. This is not the case; on the other hand it is protective legislation which well repays any attention it requires. As such it should have the support of those whom it is going to benefit, including the retail merchant whose delivery wagons are subject to accident from not being lighted after dark. A big field will also be opened up for the retail hardware merchant in connection with the sale of lamps and care should be taken to see that lamps stocked are of the variety which will comply with the regulations, which will give good service and which will meet the particular needs of the community.

The lighting of all vehicles after dark is a progressive measure which has been proved of value in some of the older countries and national sanction should be given the plan in the interests of safeguarding those who use the highways.

Some Changes Needed

THE NEW government ot Ottawa is already giving attention to various regulations enforced by the late administration, and about which there has been much controversy. Two of these regulations, one concerning the marking of imported goods and the other concerning the valuation of goods imported from foreign countries at not less than 50% of the normal value of the country from which the goods have come, have a definite effect upon merchandising and as such the retail merchant is interested in seeing that any obstruction made effective by the government is minimized as much as possible.

As was to be expected there has developed a cross current of sentiment as between importers and manufacturers, the latter favoring the retention of the measures and the former oppposing them. It would appear to be a question of thoroughly sizing up the advantages and then establishing whether or not they outweigh the disadvantages. The view-

point of the hardware trade on the Marking regulations has been outlined fully in recent issues of Hardware and Metal, but the regulation governing depreciated currency is somewhat more involved. No doubt the latter would be an influence in preventing the "dumping" on this market of goods from European and other countries whose currency is much below normal value. Otherwise this would be very unfair competition for Canadian manufacturers, and the present "dumping" laws in effect in Canada are said to be inadequate protection against this situation. In some cases cheap goods from certain European countries are coming into Canada via the United States to escape this regulation, but in doing so they are forced to bear two customs imposts which makes the price in Canada almost prohibitive. Some governmental ministers are said to be opposed to the principle of declariing foreign money at fifty per cent. of normal value on invoices when in reality it is considerably below that.

With so much protest being made to these regulations the question of a suitable and adequate alternative must be considered. Already some of the protective provisions constituted by the last Minister of Finance have become non-effective through the gradual adjustment of the exchange situation. One of these, for instance, provided that duties should be charged not only upon imports, but upon exchange. Another provided that U. S. exporters could not absorb the exchange on behalf of Canadian importers to a greater degree than five per cent. It is evident therefore that changed circumstances increase the necessity of a thorough investigation of the subject in order that as little impediment as possible may be placed upon the channels of trade.

Do Your Men "Yes" You?

B. C. FORBES in a recent editorial dealt with the very unfortunate condition which exists in many organizations. He told how James B. McMahon, then general manager of the company making Gold Dust, demanded to know from John Lee Mahin, the noted expert who was then handling the company's advertising, "What's the matter with our advertising in Ohio?" Mr. Mahin replied that nothing was the matter with it. "There must be," snapped Mr. McMahon. "The proof is that our sales in that state have fallen off badly." Mr. Mahin said he would try to locate the reason, but that he knew the handling of the advertising was not to blame. And he forthwith proceeded to make exhaustive investigation of competitive conditions and so forth in Ohio. After gathering, compiling, and analyzing a mountain of data, Mr. Mahin notified the general manager that he was ready to take up the matter with him.

On a day named by Mr. McMahon, Mr. Mahin arrived with his data. Without examining it Mr. McMahon said, "Sit here while I call in our Ohio salesmen." Eight men trooped in. He asked them what the trouble was, and there was remarkable unanimity among them as to the cause. Then, Mr. McMahon began to address them. Before he got through he had them all assenting that the cause was something totally different from what they had declared—all except one salesman who ventured to disagree with the boss and insisted that in his opinion the trouble was what he had originally outlined. "That's all!" snapped Mr. McMahon, as he dismissed the salesmen.

Turning to Mr. Mahin, he said: "We don't need to go any further to find the trouble, eight so-called salesmen and only one man in the whole lot."

Are you executives quite sure that a lot of your people don't think it wisest to "Yes" you? And are you quite sure that you don't encourage them to agree with you rather than speak straight up to you when they think you are wrong?

There is a suggestion here, too, for those who weakly and meekly "Yes" the boss.

"Yes-ing" pays nobody in the end.

Courage

THE WORD of command given by an officer to his men is not to be questioned. It is to be obeyed. The men must go forward at the command into the situations from which they might flee if controlled by individual choice.

We speak of this because no quality is more essential now in handling credit than courage such as will stand up against criticism and against all unfair attacks and will not shrink when duty points the way.

At a time when business runs low, pressure is exerted upon merchants to grant special concessions. Here courage is required. If it is not right to grant a credit on the evidence obtained or submitted, then no amount of pressure should be allowed to alter the decision and cause undue chances to be taken.

We are seeing too many cases of real cowardice in the granting of credit in some lines of business; too many instances where the judgment of the merchant has been hasty, due to pressure.

It is bettetr to yield up a position than to yield up conscience and sound principles should guide the granting of credit, for only thus shall legitimate merchandising be defended and the honorable and efficient merchant protected against the unfair competition of the dishonest and incompetent.

HERE WE ARE AGAIN

On our way to the Seventeenth Annual Convention and Hardware Exhibition of the

Ontario Retail Hardware Association

to be held in Hamilton on

February 14, 15, 16, 17.

Keep these dates open and be sure and meet us there

Events in the Trade

BUSINESS CHANGES

F. C. McMaster, Brighton, Ont., has sold his hardware business to W. J. Gartshore of Sudbury, who is now taking stock.

Montreal, P. Demers & Fils, hardware, have dissolved.

FIRE LOSS

Fredericton, N.B.—The foundry plant of McLean, Holt & Co. was damaged to the extent of $20,000 by fire. The moulding shop suffered most, and the Glenwood stove patterns are believed to have been destroyed along with other patterns. J. L. McAvity states the damage was covered by insurance.

OBITUARY

The death occurred in Montreal of Thomas C. Gillies, manager of the Shell Company of Canada plant at Longue Pointe. During the war, Mr. Gillies, as manager of the Company, was engaged with the British Government in supplying fuel oil for the transports and other war vessels from Canadian ports, in which service he gained credit both for himself and the company.

The death is announced in Toronto of John O'Neill, M.P.P. for Southeast Toronto, who among his many industrial interests was head of the Toronto Laundry Machine Co., and the Union Iron and Metal Co., Toronto.

PERSONAL

D. Potter, Manager, The Consumer's Cordage Co., Toronto, Ont., has been confined to his home for the past three weeks through sickness.

W. S. Fallis, vice-president and managing director, Sherwin-Williams Co. of Canada, is now visiting offices of the company throughout the Western Provinces, and will be away from Montreal for the balance of the month.

J. G. Lewis, vice-president, Lewis Brothers, left last week for Aiken, South Carolina, and will be away for the remainder of the month.

The staff of the American Can Co., held their annual banquet on Thursday evening, January 5. E. L. Bell, general manager, presided and reviewed the year's business, followed by short speeches from other executives.

G. L. Cohoon, who has represented the Wilder-Pike Thermometer Co., Inc., Troy, N. Y., in Eastern provinces has now been appointed sole Canadian representative.

S. J. Rutherford, President Toronto Plate Glass Importing Co., Ltd., has been absent from his office this week through sickness.

T. B. Shilling of Blenheim, Ont., who was very painfully injured by falling through an open cellar door in the rear of his store is making good progress toward recovery.

ANNUAL CONVENTION C. M. A.

St. John, N. B.—Tentative arrangements have been made to hold the annual convention of the Canadian Manufacturers' Association beginning June 20, at St. Andrew's by the Sea, G. R. Thompson, secretary of the Maritime branch of that organization announced. He said after the meetings it was proposed to make a trip to this city, thence by boat to Digby, N. S., by train to Yarmouth and Halifax, and back by way of Moncton.

SYDNEY MILLS RESUME

Sydney, N.S.—The rod mill at the Sydney Steel plant has re-opened, also the wire mill, E. P. Merrill, general manager of the Dominion Steel Corporation, announces.

The nail mill and wire fence department are included in the order. Apart from the fact that the re-opened mills will employ 150 additonal men, the action of the company is taken locally as a sign of increasing activity in the steel business. The plant has been running on an average of three days a week here for the past year.

STEEL CO. AND WESTINGHOUSE EMPLOYEES PRESENT PLAYLET

"Watch Your Step" would be an apt title for a novel entertainment to be presented in Toronto on the afternoon and evening of Saturday, January 14. This entertainment, which is "safety first" propaganda in its most attractive wrapper, is being given under the auspices of the Ontario Safety League, and admission is free.

Employees of the Steel Company of Canada, the International Harvester Co., and the Canadian Westinghouse Co., will present a playlet in three scenes, entitled "Fixing the Responsibility for an Accident." This sketch was first produced at the National Safety Council's Milwaukee convention two years ago, and repeated before a large Hamilton audience recently.

STEEL CO. OF CANADA CONVENTION

The annual convention of the Steel Co., of Canada Ltd., was held on Wednesday, Thursday and Friday of this week at the Head Offices in Hamilton, Ont. All sales' representatives from coast to coast attended the gathering.

HAMILTON INDUSTRY RESUMES

Hamilton, Ont.—Aomng the plants resuming operations is the Burlington Steel Company. H. V. Hamilton, the manager, announced that it would operate for the rest of the month at about fifty per cent. capacity. Over one hundred men have been given employment there.

NEW PLANT FOR WINDSOR

Windsor.—This city is assured the construction of another plant by a United States firm. Dodd and Strothers, manufacturers of copper cable, etc., have arranged for the early erection of a modern plant, the location for which has already been selected. Former Canadian headquarters for the company was at Sherbrooke, Quebec, but in view of the fast growing importance of this district, the company opened a small branch in Walkerville in 1916. Increased Canadian business has decided the company that a larger plant is needed.

BRENNER TRIAL ON FEB. 6

The trial of Meyer and Nathan Brenner, officials of the defunct firm of N. Brenner & Co., Toronto, metal dealers, and of G. I. Blackford, bookkeeper, on a charge of defrauding the firm of considerable money, will open in Toronto on February 6. Details of this firm's failure were outlined previously in Hardware and Metal.

MEETS WITH ACCIDENT

London, Ont.—While on his way to this city on business William D. Yelf, hardware merchant at Ailsa Craig had a narrow escape when a passenger train crashed into his motor truck at a crossing at Ilderton. The truck was badly smashed and Mr. Yelf and his two daughters Ethel and Annie were thrown out. Mr. Yelf has his face badly cut and sustained severe bruises but examination proved that no bones were broken and that he had no internal injuries. The young women suffered mostly from shock.

APPOINT CANADIAN AGENTS

At the beginning of this year the Dominion Cartridge Co. Ltd., Montreal, was appointed exclusive Canadian sales agent for the Marlin Firearms Corp., New Haven, Conn.

WILL WANT HARDWARE

London, Ont.—The city of London, Ont., will shortly be in the market for a large quantity of supplies in which various manufacturers dealing with the hardware trade are interested. Among the items on which prices will be asked are 20,000 barrels of Portland cement, 200 tons of iron castings, for manhole coverings and gulley grates for sewers, 1,500 tons of refined asphalt and 150,000 gallons of road oil.

GALT PLANNING TO HOLD ELECTRICAL EXHIBITION

Galt, Ont.—Following the success of the recent Made-in-Galt show, the Public Utilities Commission announces that it has decided to hold an electric exhibition here next May, by which it is expected Galt's new utilities building will be completed and in use.

CLERKS MAY BRING HYDRO EXPERT

St. John, N. B.—H. D. Sullivan, president of the St. John Hardware Clerks' Association, states that the executive is considering bringing down a hydro expert, who will compare conditions here with those in various cities using hydro-electric current. The Hardware Clerks' Association has been very active in securing much valuable data, showing that with the proper method of distribution the consumer should receive a very substantial reduction in lighting and power charges.

Mr. Sullivan said that the expense of a survey would be borne partly by the association and partly by citizens who were demanding big reductions in light and power rates.

TORONTO MERCHANTS' ORGANIZATION MEETING TO BE HELD JANUARY 25

The retail hardware and paint dealers of Toronto will be the guests of the Paint, Oil & Varnish Club of Toronto at a dinner to be held Wednesday evening, January 25. Place of meeting to be announced later. The proposal is to form a Toronto retail hardware and paint dealers' organization or club for retailers. The Toronto Paint & Varnish Club which will act as hosts will open the meeting and then turn it over to hardware retailers, to enable the latter to arrange a tentative organization. A subsequent meeting will be held for the organization purposes and for drafting up a constitution, electing officers, etc.

Preparing Bill on Gasoline Tax

The Ontario Legislature will be asked to deal with a gasoline tax proposal at the coming session as outlined in a previous issue of Hardware & Metal. The impost suggested is that of one cent per gallon, the same as is in force in many of the States of the American Union.

Since the last announcement of an investigation regarding a gas tax by the Department of Highways, it is stated at the Parliament Buildings that interested opinion of such an overwhelmingly favorable nature has been secured as to warrant the drafting of legislation along that line. All the details have not been worked out for inclusion in the bill as yet, but it is probable that the proposal will be to collect the one cent per gallon tax at the gas stations, the motorist paying the gasoline vendor and the Government checking up and collecting from him.

The legal difficulty—that of the right or the jurisdiction of a Provincial Government to impose such a levy—has partially been cleared away, in the opinion of the department. It becomes merely a question of how to collect the tax without infringing upon the Federal Government's preserves.

The revenue from the tax, it is proposed, will be funded to meet Provincial road construction and maintenance costs.

ELECTRICAL FIELD MAY DEVELOP IN MARITIMES

St. John, N. B.—A fair volume of business was transacted in St. John during the Christmas season. The volume of business was partly due to the fact that prices were lower, and the buyers made smaller purchases. In some instances, the number of customers served was greater than last year, but the amount of their individual purchases was smaller. Buying did not start to any extent until a week or ten days before Christmas, but the stores were thronged with onlookers, for many days previous. Abundance of snow and ice boosted the sale of sleds, framers and skates. Silverware also sold well. The toy business was good so far as the lower priced articles were concerned, higher priced toys being slow sellers. There is a possibility of a big boom in electrical goods and appliances should the citizens receive cheap power from the recently built Hydro plant, now offering current to the municipality.

W. Walker & Son, Ltd., To Run Wholesale Business Only

Have Disposed of Retail End of Business—Some Additions Made to Warehouse—Some New Officials Appointed

ACCORDING to A. W. Walker, vice-president and general manager of Walker & Son, Ltd., Alcorn Ave., Toronto, the company has disposed of the retail end of its business to the North Toronto Hardware Company and the firm of Walker & Son, Ltd., will be conducted as a wholesale house, without any connection with the former retail business.

Vice-president A. W. Walker

The company has recently completed several additions to its warehouse, with modern shipping and storage facilities. Mr. Walker states that the company now has a staff of thirty-five including eight travelers.

Recent appointments in the Walker organization are W. A. Shaw as assistant manager, and O. C. James as sales manager, both of whom have had many years' hardware experience.

In addition to carrying a general line of shelf and heavy hardware, Mr. Walker states that the company will also push the sale of several brands under its own registered trade-marks in addition to acting as distributors for several Canadian, United States and British manufacturers. Mr. Walker states that the recent addition to their warehouse now gives them approximately 32,600 sq. ft. of floor space and that the company has four large motor trucks for delivering purposes and eight motor cars used by travelers.

Bigger Paint Sales

Will Flow To You

When you are stocked with Paint and Varnish products that the paint buying public have confidence in, when the line you carry is complete enough to meet every requirement of your trade, when behind that line is a widespread campaign of consumer advertising—then you can confidently anticipate bigger sales and better profits in your paint department.

The CANADA PAINT line offers you just such a selling combination. For the Canada Paint line is complete—Paints, Varnishes, Stains, Enamels, Insecticides—a quality product for every purpose, products known for over 50 years to the Canadian paint buying public as the best that science and manufacturing skill can produce.

News of Canada's Trade

Interesting Figures of Canadian Imports and Exports, Dealing Particularly With Hardware and Kindred Lines

AN improvement in the proportion of exports to imports was noted in figures of Canadian trade for twelve months ending September 1921. These showed imports in 1921 valued at $905,878,056 compared with $1,325,779,894 for the previous year, while exports for 1921 amounted to $976,060,660 compared with $1,208,919,175 for 1920. Seventy-one per cent of the Canadian imports came from the United States and 15 per cent. from Britain. These percentages compare with 69 per cent. from U.S. in 1920 and 16% from Britain. Canadian exports to U.S. in 1921 were 43 per cent. and to Britain 29%. In 1920 exports to U. S. were 42% and Britain 31%.

Imports to Canada of iron in the year ending Sept. 1921 from U.S. were valued at $150,956,378, non-ferrous metals $32,128,856.

Shipments of petroleum from The Tampico (Mexican) oil fields in October reached a total of 16,052,589 bbls. of 42 gals. each, a decrease of a million barrels from September due to restricted market and salt-water inroads in southern fields. Recent shipments represent largly oil taken from storage which was accumulated during July and August when shipments were cut to about two-thirds because of export taxes. Such storage stocks are said to be about exhausted and exportations in future months will more nearly parallel actual production.

In the month of October shipments of 251,872 bbls. of oil were made from Port Lobos, Mexico, to Canada.

Iron and Steel from U. S.

Production of all kinds of finished rolled iron and steel in the U. S. during 1920 amounted to 32,347,863 gross tons of which nearly 15 per cent. was exported, a large portion coming to Canada.

Importance of Canada's Linseed Oil Industry

Three Mills in Montreal Crush Over One And One Quarter Million Bushels of Flaxseed Annually—Oil Output Ranges From 250 to 280 Bbls. Per Day.

THE crushing of flaxseed for oil is an industry of vast proportions in the province of Quebec, and should not be overlooked in the list of important industries, not only in Quebec, but in the Dominion as a whole. To manufacture a product that is all important in the making of various staple commodities from the flax seed is the duty of the crushers. Producing linseed oil means more than pressing the seed by large crushers in the various mills throughout the country, the industry really commencing in the fields where the successful growing of flax must first be considered. This cannot be accomplished in all countries, but fortunately Canada is able to furnish her domestic markets, and supply other outside demand. Seed transportation is the next factor that adds to the importance of the industry and flaxseed is one of the chief grains furnishing cargoes from North-western Canada to the Eastern provinces. Both rail and steamship are employed, and the steamship lines of the Great Lakes transport most of the seed from the head of the lakes. When the eastern ports are reached, the question of storage must be considered and flax seed occupies no small space in the large elevators at the different harbors in most months of the year.

Montreal's importance as a centre in this industry lies in the fact that three large crushing mills are here located; Dominion Linseed Oil Co. Ltd., Canada Linseed Oil Mills Ltd., and the Sherwin-Williams Co. of Canada, Limited. The output of the three mills is from 250 to 280 barrels of linseed oil per day. This represents the crushing of from 5,000 to 6,000 bushels of flaxseed per day, or over one and one-quarter million bushels per year.

Apart from the export trade, which now shows signs of development, the total output from these sources is shipped on territory east of Kingston, Ont., and it is safe to say that a large percentage is consumed within the limits of Montreal. Paint and varnish manufacture, coupled with the large demands of oilcloth and linoleum manufacturers might be stated as one of the chief reasons why Montreal is an important factor in the oil industry, one of the basic ingredients in the products of both industries being linseed oil. With this large home consumption, and prospects of an export business being developed in territories now being covered by American interests, Montreal should

(Continued on page 108)

Twenty Years Ago

Following items are reprinted from Hardware and Metal of January 11, 1902:

"The death is announced of one of the best-known hardwaremen in Canada in the person of Henry George Rutledge, who was for many years buyer for M. & L. Samuel, Benjamin & Co., retiring from that position a couple of years ago when that firm sold out the hardware branch of its business and confined itself to metals."

"The Canada Paint Co., Ltd., record with deep sorrow the death of their esteemed representative, Mr. Gabriel Crawford, at St. John, N.B. His name was a household word throughout the Maritime Provinces and the Dominion Travellers' Association of Montreal lose an active worker and friend. Robert Munro, manager of the company, attended the funeral."

"By the death of the late Walter S. Lee, Toronto loses a good citizen. A. B. Lee, president of Rice Lewis & Son, Ltd., is a brother of the deceased."

"R. A. Baines, manufacturers' agent, has removed from 39 Scott Street to 124 Bay Street, Toronto. He has taken C. R. Peckover into partnership under the style Baines & Peckover. The firm will carry a larger stock of the lines it handles, with the addition of wood screws which are made by the Chalcraft Screw Co., Brantford, Ont."

"E. H. Cooper, who during the last 18 months has been a member of the editorial staff of Hardware and Metal in Montreal, has severed his connection with this paper to assume the secretaryship of the Montreal branch of the Canadian Manufacturers' Association."

"The firm of Lamplough & McNaughton, Montreal, has been dissolved and a new partnership registered. The business will be carried on as in the past by F. W. Lamplough and J. P. McNaughton under the same name as agents for Theile & Quack, Hamburg, and other European manufacturers."

"At the eighth annual meeting of the St. John Iron and Hardware Association the following officers were elected: President, S. Hayward; Vice-President, P. McMichael; Secretary-Treasurer, J. J. Barry; directors, W. H. Thorne, T. McAvity, R. B. Emerson."

"C. F. Grover, who has travelled in Western Ontario for H. S. Howland, Sons & Co. for some years, has accepted a position with the Dominion Wire Mfg. Co., Ltd., Toronto, and will represent that firm in Western Ontario."

"Winnipeg's first paint factory is in operation. The G. F. Stephens Co., Ltd., have built one at the rear of their wholesale warehouses and it is now in working order."

Big Program for O.R.H.A. Convention

Many Important Subjects And Able Speakers For Seventeenth Annual Convention

THE program for the seventeenth annual convention of the Ontario Retail Hardware Association is not yet complete, but a glance over the list of subjects and speakers already secured, as outlined on this page, indicates that a very interesting and highly instructive group of sessions will be held in Hamilton on February 14, 15, 16 and 17. The sessions will be held at the Royal Connaught Hotel and the exhibition will be held at the Armouries. The latter promises to be even more comprehensive than last year and some new features have been added, including the use of buyers' cards. Every buyer will be furnished with a card which he will present when making a purchase and a note of the name of exhibitor and approximate value of purchase will be entered. Cash and other awards will be made to buyers in two ways: (a) several graded awards to buyers of the largest aggregate purchases, (b) several graded awards to dealers who buy from the largest number of exhibitors. All cards to be turned in to the secretary at conclusion of the convention.

Perhaps the best indication of what the hardware merchants may expect at this year's convention is given in the message to the trade from President Nelson Mills as follows:—

The coming Convention in February at Hamilton, promises to be the most important ever held in our history.

Men! I urge you to lay aside your business cares and join us there.

The Association never was so valuable as it is at the present time, and a few days spent at the Convention will be handsomely repaid in learning what the other fellow has to say. You owe it to yourself. You owe it to your business. You owe it to the Association. Come prepared to do your part as the situation may require in the many important questions and topics which are sure to be presented. You will have the privilege of listening to talented speakers, men of ability, men of authority, men who have accomplished something

(Continued on page 108)

Program of 17th Annual Convention Ontario Retail Hardware Ass'n

February 14, 15, 16, 17th 1922, at Hamilton, Ont.

TUESDAY, FEBRUARY 14TH.

Royal Connaught Hotel.

8.30 a.m.—Secretary's office, located on mezzanine floor, open for registration of members and guests, distribution of badges and general information.

9.45 a.m.—Convention Hall on mezzanine floor, community singing.

10.00 a.m. (promptly)—Opening session, President Nelson Mills presiding.

Song, "God Save the King."

Invocation, Rev. Dr. W. H. Sedgewick, minister Central Presbyterian Church, Hamilton.

Annual Address, President Mills.

Civic welcome, Mayor of Hamilton.

10.30 a.m.—Question Box, Ed. Wanless, Chatham, presiding.

Special topics for the day, questions 1 to 5, inclusive.

11.00 a.m.—The maintenance of established resale prices on well advertised products, H. J. Haire, The Alabastine Co., Paris.

11.30 a.m.—How dealers may successfully advertise, L. R. Green, advertising manager Tucketts, Limited.

12.00 a.m.—Appointment of convention committees and introduction of new business by members.

12.30 p.m.—Adjournment.

1.00 p.m.—Opening of hardware exhibition at the Armouries, John St. North. Hours. 1 to 10 o'clock.

During the afternon, only merchants and ladies accompanying them will be admitted to the exhibition. These hours every day are reserved for business intercourse between exhibitors and those why buy to resell or use the products exhibited.

Members and their ladies require no admission tickets, their badges are credentials at all hours.

Non-members and other buyers will be provided with "Merchant Tickets" by exhibitors and by secretary.

7.00 p.m.—Exhibition open to the public. Children unaccompanied by parents not admitted. Music provided both afternoon and evening.

10.00 p.m.—Closing hour.

WEDNESDAY, FEBRUARY 15TH.

8.30 a.m.—Secretary's office open on mezzanine floor of hotel.

9.15 a.m.—Community singing.

9.30 a.m. (promptly)—Convention Hall, Question Box, George E. May, Toronto, presiding. Topics for the day, Questions 7 to 12 inclusive.

10.30 a.m.—Reports of officers and committees. Treasurer's report; Secretary's report; Auditors' report.

11.00 a.m.—The banker and the retailer, J. P. Bell, General manager Bank of Hamilton.

11.30 a.m.—Hardware mutual fire insurance, C. L. Clarke, Winnipeg, Canadian manager, Canadian Hardware & Implement Underwriters.

12 30 a.m.—Adjournment.

1.00 p.m.—Hardware exhibition at the Armouries. Afternoon for buyers and representatives of business houses. Evening open to the public.

7.00 p.m.—Association banquet for ladies and men, Royal Connaught Hotel. Tickets, $2.50 each. John D. Wells, Buffalo, managing editor "Buffalo Times", will speak at the banquet. Subject, "Whoa," (full of wit and humor.)

Tickets should be secured at secretary's desk not later than Wednesday noon, if possible.

THURSDAY, FERUARY 16TH.

9.15 a.m.—Convention Hall, Community singing.

9.30 a.m. (promptly)—Question Box, H. N. Joy, West Toronto, presiding. Topics for the day, Questions 12 to 18, inclusive.

10.00 a.m.—"Save the Surface" campaign and how to hook up with it, representative of campaign committee.

10.30 a.m.—Economics as applied to every day business.

11 a.m.—Business conditions and prospects—Our joint responsibility in building up and maintaining Canadian prosperity, Representatives of Canadian Manufacturers' Association and Thos. Birkett, president Wholesale Hardware Association.

12.00 a.m.—The association price book, introduced by secretary. Open discussion by members.

12.30 p.m.—Adjournment.

1.00 p.m. to 6.00 p.m.—Hardware exhibition at Armouries open to buyers and dealers.

6.30 p.m.—Complimentary banquet tendered by the Hardware Manufacturers of Hamilton.

7.00 to 10.00 p.m.—Exhibiton open to the public

FRIDAY, FEBRUARY 17th.

9.15—a.m.—Convention Hall Community Singing.

9.30 a.m.—Question box Topics for the day. Balance of Questions.

10.00 a.m.—Rrports of Committees.

Resolutions.

Nomination of Officers.

Election of Officers.

Unfinished business.

10.30 a.m.—Visit new factory of Libbey Owens Sheet Glass Co.

1.00 p.m.—Visit hardware Exhibition, finish buying and file buyer's cards with the Secretary at booth No. 99 or else mail it to him at Prescott, Ont.

QUESTION BOX DISCUSSION

1. How closely should we follow declining markets in adjusting our selling prices?
2. Are the Jobbers as prompt as they should be in meeting the declining market?
3. What shall we do with wage question as the high living costs decline.
4. How can the cost of doing business be cut, and maintain service.
5. What new lines did you add during 1921, that have proved profitable?
6. How many dealers present, pay a bonus on sales by Clerks?
7. Could not active steps be taken by this Association to prevent Wholesalers from doing a Retail business?
8. What is the best way to get results from advertising folders etc., as furnished by manufacturers?
9. How much should a dealer pay for goods he takes out of stock for his own use?
10. What should properly be included in over-head Expenses?
11. What is the average wage paid, Clerks, Tinsmiths, Plumbers? Have any reduced wages yet?
12. Has anyone definite information regarding workshop in connection with store? Does it pay?
13. What is the best way to handle slow accounts without offending customers?
14. What is the average percentage of loss on credit accounts?
15. Have any members successfully turned a credit business into a cash business? How was it done?
16. In changing credit to cash business would it be advisable to allow monthly accounts to telephone customers, and to customers who are building or painting?
17. How do you proceed to collect tough accounts?
18. What experience have dealers present had in handling auto supplies, tires, etc., in a small town? Do they find it profitable, or is most of the business going to garages. If Hardware dealers get bulk of the business, how do they do it?
19. What are the advantages or disadvantages of marking selling prices in private code?
20. Why are cheap platform scales still, many times the pre-war price?

F. E. MUTTON.

Salesmanship Now Being Subjected to the Acid Test

Many men have wisdom but don't know how to apply it—Industrial Activity directly dependent upon salesmen's efficiency—No use waiting for something to turn up."

By F. E. MUTTON
President and General Manager International Business Machines Co., Ltd.

ONE of the major problems facing sales managers today is building up an efficient sales force to secure orders. Sales organizations are being subjected to the acid test; some of them will fail to survive that test. We have passed through four or five years recently when men who were called salesmen did not have to sell at all; they became very soft in their ideas of work, yet they made wonderful sales records. Now times have changed; order-takers are of no use now.

We have seventy-two salesmen in our Canadian organization, we reach from one ocean to the other, and have offices and service stations in all cities and large towns.

Get Down To Hard Work

It has occurred to me during the last six months to a year, carrying our share of worry as to business conditions, that there are many men who have got a lot of wisdom but do not know how to apply it. They do not realize the vital application of it, and that is the hardest kind of work. Especially for salesmen who have had five years of easy going, it is hard to realize that they have got to get down to hard work or they will not stay in a sales organization very long.

Of course I recognize that a sales organization selling a specialty like Time Recorders or Scales is different from one selling a standard article, however. I believe the same fundamental principles apply, and that this matter of selecting and training salesmen is the most important factor facing executives of any concern to-day. It is the salesmen that keep the factory chimney smoking, and the amount of smoke depends on the efficiency of the sales-organization, absolutely.

The New Conditions

The quicker we all realize that prosperity depends on the action of our own self-starter the better. A good many people are just waiting for something to turn up, even sales managers. To my mind there is nothing "going to happen" until you make it. Instead of the men going out on the 9 o'clock train they will have to go on the 7 o'clock if they are to succeed, and instead of coming in Thursday night or Friday noon, they will come in Saturday morning—if they are lucky. Those are the new conditions that we are facing.

I want to convey this idea; it is not necessary to tell most men these things. it is necessary to "sell" them. In our organization we never tell a salesman to do something We "sell" the proposition. That is the only way to get the proper co-operation and spirit. The art of selling is the art of buying. What do I mean?—well, the amount you sell depends on the amount of confidence you can buy, the respect you can buy from the prospective customer.

"Prosperity depends on the action of our own self-starter; nothing is 'going to happen' until you make it."

"Salesmen should not guess, but know what they are talking about."

I think that it is an important principle to have the sales force memorize.

Obtaining Salesmen

Now where are we going to get our salesmen? Our experience is that we get our best men through our present sales force. Those men know the policy of the company, they have confidence in the company, they know the calibre of men the company want, and they have seen in action the men that they are going to send in to apply for the position. That is something you cannot do as a general proposition. They know whether he plays pool in the hotel until 2 a.m., or poker until daylight. They know his characteristics through working with him. I emphasize that, because looking back over my experience during the last thirty years I find that the best salesmen it has been my good fortune to secure came through the salesmen we already had.

You will not buy an automobile unless you try it out, but there are many hundreds of salesmen employed by sales managers who have never seen them in action. A man comes to your office, naturally he is at his best, but that does not tell you what he will look like in Peterboro or Montreal or Vancouver. His nails are clean and his shoes are shined. We did the same ourselves years ago. The important thing is to see the man in action in his regular working form, day in and day out, get a line on his characteristics, how he stands up under the test of the three a.m. bus, and the one old kind of pie and no cream.

The Other Fellow's Salesman

The next channel is from the salesmen that canvass you for orders; and that is a good channel. "Do you mean to tell me that you would deliberately employ one of my salesmen?" someone may ask; I certainly do. If you say that is not a fair proposition I do not get your point of view. If my salesmen can make more money with you they will go with you Therefore I am never too busy to see a canvassing salesman. The bank manager can wait but this man may be the one I need as the corner-stone to a certain portion of our sales force.

I believe the successful sales manager is the man who is never too busy to see a canvassing salesman. If I am in a conference which would make it necessary to keep him too long, I go out and see him for a moment and apologize and make an appointment.

I spent twenty years with the National Cash Register Co. Mr Patterson, the president of that company, is known as a wonderful leader. We were in a convention of the sixteen sales managers of the North American Continent. Mr Patterson came in and remarked: "These are the sales managers, yes; now just what do you gentlemen do for the high salaries you get?"

Well, it was kind of sudden. One chap stood up and said, "I keep my eye on the territory, I see that the offices are kept nice and clean."

"And you?"

"I check up the accounts and payments and consignments—"

Well, I was thinking fast, it was coming close to me, I said to myself, "these boys are not thinking right," so when he came to me I said, "I employ and train salesmen." I was with the N. C. R. for twenty years.

Looking Them Over

I would have lost the opportunity to secure excellent men if I had been to busy to see salesmen. Often a man has come in and although I did not need him at all, he made an impression. I talked to him fifteen or twenty minutes, asked if he would mind coming in again day after to-morrow—next week,—I wanted to get another slant on him. They never act exactly the same twice in succession. I asked him — "Now just tell me how much money you make and how much you would like to make. It may be that you are fitted for this business. I am going to find out in the next fifteen minutes if you are."

From the Retail Store

Another channel is the retail store. We have secured some excellent men who were retail store clerks. There is a field where you willl find ambition; also, it is a field where men are not over-paid. An illustration; we had difficulty in getting our devices in retail stores. Our time-recording division salesman had been trained to interview manufacturers and factory men, but they fell down on the stores. I discovered that they did not know the language of the retail merchant, they had never been in that atmosphere. I looked about and found a young man who was head clerk in one of the large hardware stores in Hamilton, snappy, well-dressed, knew his job or he would not have been head clerk. I brought him to Toronto and employed him. We had to teach him the time-clock business as it related to the retail store; I said to him, "Now you will have to go into the factory and put on a pair of blue jeans and work from 7 till 5.30 for two weeks, for which you will not get any pay."

"All right," he said, proving his mettle.

I was only testing him really, but this was his mechanical training. The first month that young man was out in quest of orders he sold eighteen machines to eighteen stores. That was good work. He knew the atmosphere and the language.

The weakest source is advertising for salesmen. I do not believe it is good business or sound policy to hire a man who is out of a job. That, perhaps, sounds severe, but there is generally some reason why he is out of a job, and it is difficult to get at the true reason. If you are going to put up a "Safety First" sign get a salesman who is in a position.

"The salesman keeps the factory chimney smoking and the amount of smoke depends on the efficiency of the salesman."

"Many men have a lot of wisdom but don't know how to apply it.

"The Bible"

Now, I want to put before you in this graphic way, these principles:

Get them clean —Mentally
—Physically
—Morally
—Spiritually

That to me is "The Bible" in hiring Salesmen. There is no one of those things that you can afford to overlook. And you can test them all out in your interviewing.

Mentally.—The salesman who will consume time telling those stories that we sometimes hear is not clean mentally. The results show physically and morally.

Spiritually.—This is very important. Sometimes we meet a man who does not believe in such things as churches. I am not preaching a sermon, but I know the value of that element, we all do.

Then I would like to add, Keep Them Clean as to the environment they live in.

Organization

In my opinion the following elements come under the head of organization in a sales force.

Employing Men
Training Men
Supervising Men
Promoting Men
Firing Men

If we are capable of the first four, we will not have to worry about the last.

CUSTOMS DEPT. ADVICE RE MARKING OF ALUMINUM WARE

The original regulations governing the marking of country of origin on imports made it appear as though tea strainers and percolators were the only articles of aluminum ware to be marked. On taking up this point with the Department of Customs and Excise, Ottawa, Hardware and Metal has received the following message:

"All articles of aluminum ware, including tea strainers and percolators, which are capable of being marked will require to have thereon an indication of the country of origin."

(Signed)
Commissioner of Customs and Excise.

As to qualifications, here they are:—

Health
Character
Deportment
Reputation in Own Neighborhood
Guarantee Bond
Manner
Ambition
Confidence in Himself

I have a chart on my desk and that is always ticked off 100 per cent. before a man is taken into our organization. Health is most important. If a man has not got 100 per cent. health he is anchored. A lot of talks have been made on Salesmanship; to me Salesmanship is the combination of a lot of qualities. Health is the foundation.

Our company spends a good many dollars a year in taking care of the health of our organization. We talk to them of what to wear, what to eat, etc. A lot is wasted but some gets home and it does a lot of good. I venture to say when you meet one of our salesmen you find he is "in the pink." If he is not, he will not go out, they are trained not to.

Foundation of Everything

When a salesman approaches a prospect, one of the most importants elements in getting that man's order is the salesman's health. Selling is largely a matter of domination. You need all the health and energy at your command to dominate some people; if you are only feeling about 70 or 80 per cent. fit, the buyer will do the dominating. Health is the foundation of everything. Take personality, the salespersonality, you just sense it. It is a thing you cannot define, and the greatest element of personality is health. His eyes are bright and his step springy and he thinks just a little faster than his prospect; he cannot do this unless he has 100 per cent. health.

Supervision

Then, supervision. I think lack of supervision is one of the weak links in our work. Every man needs it. Let me illustrate. The chain is—

Salesmen
Sales Agents
District Managers
Sales Managers
General Managers
President

Does it stop there? No, it goes on—

Executive Committee

Directors

Shareholders

I would like to make this subject clear.

Who supervises Salesmen? The Sales Agents.

Who supervises the Sales Agents? The District Managers.

(To be continued.)

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

Markets at a Glance

ANOTHER extensive budget of price changes on the current hardware markets includes reductions on building papers and sheathings, roofings, both Dominion and American ammunition, poultry netting staples, both white and colored cotton wastes. Through changing the discounts, easier quotations are noted on eavestrough, both ridge roll and valley, also conductor piping. The easier tone in corrugated sheets has produced a new discount in certain markets. The revised tack list about to be issued also entails new discounts on this line of products. Lower range boiler list prices have now been generally adopted, this being the result of price shading recently prevalent on these goods.

Higher prices have been announced on beaver, manila, sisal rope, and lathyarn. The advance is one cent per lb., and is attributed by the manufacturers to increased costs on the fibre markets, combined with a production tax on sisal. The sharp advance on turpentine levels is based on the situation at primary centres, where the producers are in a strong speculative position for the next few weeks owing to the absence of new receipts at this time of the year.

Other items included in the lengthy list of price reductions are, some lines of cultivators, sprayers and drills, glaziers' points, carpenters' tool baskets, certain makes of pruners, English tinned "S" meat hooks, one line of silverware, and some nail hammers. Reduced quotations for Spring delivery are also evident on a line of electric fans. Quietness is still evident in the sheet markets, with little current business reported in bar iron and steel. The dull session continues in scrap materials and also ingot metals.

Montreal Markets

MONTREAL, Jan. 12.—Following the long list of price recessions in the opening week of the New Year, many important hardware lines are again revised. There is an outstanding advance now recorded, on Beaver or New Zealand hemp, sisal rope and lathyarns showing a price increase of one cent per pound base. The undertone of the rope market has been firmer in past weeks, especially sisal hemp, and while pure manila remains unchanged, manila in primary circles is still in a strong position. Chief in the list or reductions are the new lower prices on many lines of building papers, all lines are reduced with the exception of No. 2 tarred fibre. White and gray sheathings are 25 cents per 100 lbs. less, spruce sheathing showing a more substantial reduction of $1.25 per 100 lbs.

Manufacturers of rubber roofing who had, up until the present, not reduced their quotations for the new season's business now announce lower prices on all weights of roll roofing, also shingles. New lower ammunition prices are now given, showing a reduction of approximately 20 per cent. from previous quotations. While new prices are not yet definitely reached, jobbing houses are issuing new discounts subject to a slight revision. Poultry netting staples are 25 cents per 100 lbs. less, and glaziers' points are reduced 2 cents per pound. Ingot metals are again easier, with lower quotations now recorded in some lines.

SHEATHINGS AND BUILDING PAPERS FURTHER REDUCED

Montreal.

Many lines of building papers and sheathings are reduced in price, immediately following the first of the year. With the exception of No. 2, tarred fibre, all lighter papers, (priced by the roll) show a price decline. In the heavier weights, white and gray sheathing and spruce sheathing, in 36 inch and 72 inch widths, is reduced. The former do not record as extensive a reduction as the latter, as spruce sheathing will now sell for $1.25 per 100 lbs. less.

The trend of the market on these products has been decidedly downward in the past twelve months, lower prices being annnounced on different occasions throughout the year. Manufacturers now state that a more settled situation may be looked for as existing price levels are within a more reasonable reach of pre-war prices, and with present productive costs, lower raw material costs cannot warrant the same marked trend that has been displayed in the past year. Revised quotations are as follows:

BUILDING PAPER—

	Per 400 ft. roll.
Dry Fibre No. 1 Anchor	$1 15
Do., No. 2 Anchor	0 65
Do., No. 2 Elephant	0 85
Tarred Fibre No. 1 Anchor	1 20
Do., No. 2 Anchor	0 85
Do., No. 2 Elephant	0 85
Surprise Fibre	0 70
Stag sheathing	0 70
Cyclone dry sheathing	1 15
Do., tarred	1 20
Joliette sheathing dry	0 65
Do., tarred	0 85
	Per 100 lbs.
Monarch sheathing, white	5 50
Do., gray	4 50
Straw sheathing, heavy dry	3 15
Red Star heavy tarred straw	3 40
Imperial white sheathing	5 50
Do., gray	4 50
Scythe brand dry straw	2 15
Spruce sheathing, 36" and 72" wide	6 00
Carpet felt	3 90
Tarred felt, 7, 10 and 16 oz.	3 45

LOWER ROOFING PRICES IN SOME QUARTERS

Montreal.

Current roofing quotations are now revised by some manufacturers, with a reduction, varying on the different brands and weights. The price decline now announced cannot be stated as being general among all manufacturers, as it will be remembered that certain makers announced a reduction in their lines on December 1st last, and in these cases prices now remain unchanged. Quotations have again been brought into uniformity in manufacturing circles, such not being the case previous to new prices now given. The undertone of the market is steady, with little further change thought likely for some time. Raw materials are continuing firm with

slight advances recorded in some instances. Manufacturers state they are convinced that the industry is now on a settled basis for earlier months of the year at least, this period covering the active business usual in the spring months. Following are revised quotations on certain lines:

ROOFING—	Per square
2 ply tarred ready roofing	1 85
3 ply tarred ready roofing	2 20
Everlastic 1 ply	1 70
Everlastic 2 ply	2 05
Everlastic 3 ply	2 49
Panamoid 1 ply	1 50
Panamoid, 2 ply	1 85
Panamoid 3 ply	2 20
Everlastic Multi-shingles (4 shingles in one) square	6 00
Everlastic (red or green) Mineral surface, square, 36" wide	2 85
Do., 18" wide	3 30

HIGHER PRICES ON BEAVER MANILA, SISAL & LATHYARN

Montreal.

The continued firm tone in raw materials is now reflected on the local rope markets, and Beaver or New Zealand Manila, Sisal rope and lathyarn are each quoted one cent per pound higher. Sisal hemp has for some time past been stiffening in primary markets, and prices have shown advances at different periods. Dealers pointed out a few weeks ago that a continuance of this would result in higher prices on the finished products, so that the present advance is not althogether a surprise. Pure manila is for the present unchanged, but the undertone of the market here is also firm, manila being improved in recent months. Pure manila is still quoted at 23 cents base; Beaver or New Zealand 20 cents; sisal 18 cents and lathyarn 18 cents basis.

NEW PRICES ANNOUNCED ON DOMINION AMMUNITION

Montreal

Although quotations for the new year are not definitely settled on Dominion ammunition, both paper shells and metallics, some jobbing houses are quoting the following discounts, subject to a slight revision in the near future:

AMMUNITION—
Dominion Shells, Loaded—
Crown, Sovereign and Regal, 50-2½ per cent.
Imperial and Canuck, 50-5 per cent.
Empties, Crown and Sovereign, 50-2½ per cent.
Metallics, rim fire and centre fire, 55 per cent.

WINCHESTER AMMUNITION

Montreal

As announced in last issue of Hardware and Metal, new lower prices were about to be announced on American ammunition. Following are discounts now given by some jobbing houses to a revision when new prices are definitely given out:

Winchester loaded shells, plus 7½ per cent on American list.
Winchester empty shot shells, plus 22½ per cent. on American list.
Winchester Metallics—
B.B. caps and rim fire ball cartridges, plus 2½ per cent.
Central fire, all blank and all shot cartridges, plus 15 per cent.
Primers and percussion caps, plus 15 per cent.

GLAZIERS' POINTS WILL NOW SELL AT 14 CTS. POUND

Montreal.

A reduction of two cents per pound has been made in the price of glaziers' points, and these will now sell at 14 cents per pound.

LOWER PRICES ANNOUNCED ON ALARM CLOCKS

Montreal.

Following is a more complete list of new lower prices on alarm clocks, according to the reduction announced last week:

ALARM CLOCKS—	
Big Ben	$3 43
Baby Ben	3 43
America	1 37
Sleep Meter	2 06
Lookout	1 88
Ironclad	2 40
Big Ben Luminous	4 80
Glo Ben	2 40
Pocket Ben Watches	1 37

LOWER WIRE SOLDER PRICES FOR QUANTITY BUYING

Montreal.

Current quotations on wire solder are recorded with a considerable reduction from those appearing in recent weeks The net price on this class of solder is really unchanged, but a larger differential buying is now given for quantity buying. Formerly the higher quotations were given, and concession made for orders of fair quantities, but because users of wire solder usually buy in large quantities, it is now thought best to use lower level, and charge the extra for small orders.

The undertone of the lead products market as a whole does not display the same amount of firmness that was evident a few weeks ago, metals in primary markets showing slightly weaker with lower quotations appearing on some lines. However, for the present, other lines are unchanged, with the demand still quiet. Following are present prices:

LEAD AND ZINC PRODUCTS

Lead pipe, per 100 lbs.	12 50
Lead waste, per 100 lbs.	13 50
Note—Lead pipe is subject to a discount of 10 per cent.	
Lead traps and bends	10% off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10½
Lead sheets, 3 to 3* lbs., sq. ft., lb.	$ 10¼
Do., 4 to 8 lbs., sq. ft.	0 09½
Cut sheets ¼c lb. extra, and cut sheets to size, ¾c lb. extra.	
Solder, guaranteed, lb.	0 28½
Do., strictly, lb.	0 26½
Do., commercial, lb.	0 23½
Do., wiping, lb.	0 24½
Do., wire, lb.	0 32½
Zinc sheets, casks	0 11½
Do., broken lots	0 12

P. N. STAPLES REDUCED 25 CENTS PER 100 POUNDS

Montreal

Poultry netting staples are reduced 25 cents per 100 pounds, and the galvanized are now quoted at $8.25, bright $7.-25 in 100 pound lots. Usual extras for smaller quantities.

MORE SETTLED SHEET MARKET LOOKED FOR

Montreal.

With current business in sheets now quieter, there is an effort being put forth to stabilize the market, and have quotations on a more uniform basis among the various jobbers and distributors. For some time past it has been necessary to show a range in quoting prevailing prices because of the variation existing in jobbing circles. Dealers admit that during the past few months competition was met, and in some instances orders have been taken at ridiculously low prices, in many cases showing little or no profit for the jobbing house.

It is now considered the opportune time to remedy this situation, and it is hoped that within the very near future an improvement will be noted, and prices set within reasonable reach of replacment values. Optimism is again expressed for the following months, and although sales are not at present over plentiful, the end of the month is looked upon by some as the close of the now more inactive period. Quotations are still nominally unchanged as follows:

BLACK SHEETS

10 gauge	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 40	4 70
16 gauge	4 50	4 80
18-20 gauge	4 55	5 20
22-24 gauge	4 60	5 25
26 gauge	4 65	5 25
28 gauge	4 75	5 35

Sheets 3 in. wide, 20 cents per 100 lbs. extra.

GALVANIZED SHEETS.

PIPE FITTINGS REMAIN AT UNCHANGED DISCOUNTS

Montreal

The various lines of pipe fittings remain at unchanged quotations, with little change also recorded in the market as a whole. Sales are of fair volume for this season, with a gradual improvement looked for now that inventories are taken and supplies will be required for the earlier spring work. Unchanged prices and discounts are as follows;

FITTINGS—	
Cast Iron fittings	25%
Bushings, cast	27½%
Do., malleable	25%
Flanges	37%
Plugs	27½%
Flange unions	22½%
Malleable unions	42½%
Dart unions, black	33%

Couplings, 4 in. and under	30%
Do., 4 in. and longer	10%

POUND GOODS—	Black.	Galv.
Class A	0 53	0 65
Class B	0 21½	0 28¼
Class C	0 14	0 21½

BAR IRON AND STEEL PRICES REMAIN UNCHANGED

Montreal.

Current business in bar iron and steel is still of a quiet nature, although not exceptionally so for this season of the year. Dealers look for a gradual improvement in the coming months, both stocks and prices being more favorable for increased trade than twelve months ago. There is yet little signs of construction requiring the larger supplies, but it is still early and it is thought that a decided turn for the better will be taken later in the spring months. Following are unchanged prices;

Common bar iron, 100 lbs.	2 90
Refined iron	4 40
Irish finish machinery steel	2 95
Mild steel	2 90
Single reeled machinery steel	4 75
Band steel	2 90
Spring steel	4 50
Sleighshoe steel	2 90
Tire steel	3 10
Toe caulk steel	3 80
Harrow tooth steel, per lb.	3 05
Mining tool steel per lb.	0 22
Black Diamond tool and cast steel, per lb.	0 22

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

EASIER TENDENCY IN CORRUGATED SHEETS

Montreal

Although there is a slightly easier tendency in the corrugated sheet market, due to the position of plain galvanized sheets at the present time, where lower prices have been made without any corresponding decline in corrugated, prices remain unchanged. Dealers are now mostly interested in bringing the local market to a more stabilized condition as regards prices. For some time past quotations have been more or less nominal locally, and certain price concessions have been offered to secure business. It is now felt that this should be remedied before the more active period in the following months, and an effort is now being put forth to improve this condition. For the present, following are list prices and discount;

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
SOIL PIPE—	
2 and 3 inch	47½%
4 inch	50%
5 and 6 inch	47½%
Fittings—	
2 to 6 inch	50-10%

NO CHANGE IN RANGE BOILER QUOTATIONS

Montreal

Although it was thought in some quarters that the standard list of prices on range boilers would be changed at the commencement of the new year, there is no indication at present that any change is likely to be made. Manufacturers are maintaining their prices, and state that it is only a question of depleted stocks with the distributors. When jobbing houses are forced to purchase at present levels they will necessarily have to raise their prices as existing quotations given by them show practically no profit. It would seem, however, that most jobbers are content with little or no margin as the lower list of prices is in effect in most quarters, even where new stocks have been purchased. Buying is very light at present, this no doubt being one of the chief reasons for dealers paying little attention to replacement figures. Following is the unchanged list:

RANGE BOILERS—	Standard.	Ex. Heavy
30 gallon	$8 75	$11 25
35 gallon	11 25	13 50
40 gallon	13,50	16 00
52 gallon	20 00	24 50
66 gallon	28 00	34 00
82 gallon	35 00	46 50
100 gallon	45 00	55 00
120 gallon	54 00	63 25

BRASS AND COPPER GOODS SHOW LITTLE CHANGE

Montreal

Prices on brass and copper goods are holding at previous figures, while the undertone of the market is little changed although metals in primary markets are again somewhat easier in some instances. This is said to be chiefly due to the seasonable slackening in volume of buying and the lesser interest accompanying the holiday season. The commencement of the new year may yield a return of activity shown in previous weeks. Unchanged quotations are as follows;

BRASS—	Base.
Sheets, base	0 25
Rods, base ½ to 1 in., round	0 23
Tubing, seamless, base	0 32
F. o. b. Montreal.	
COPPER—	
Rods, ½ to 2 in.	0 30
Soft sheets, plain, 16 oz. and heavier	0 34
Plain tinned, 16 oz. and heavier	0 39
Polished and tinned, 16 oz. and heavier, lb.	0 43
Tubing, lb.	0 34
Above prices are full sheets and bars. Cut sheets and bars are 5c per lb. higher.	

LITTLE IMPROVEMENT IN BOILER TUBE MARKET

Montreal.

Boiler tubes are still displaying very little activity on the local market, sales are small and cover supplies for repair work only. Quotations remain unchanged as follows;

METAL MARKETS ARE AGAIN SOMEWHAT EASIER

Montreal

Metal markets generally have been somewhat easier during the past week, and prices have receded slightly. There is no marked weakness, but the market has been sagging and it would not be surprising if lower prices were registered in some lines.

TIN.—Owing to heavy shipments from the Straits the London market has been easier in tone, and from all appearances will be lower still. Available supplies are very heavy and demand is not very great at present. Quotation is slightly easier at 38 cents.

COPPER.—Producers' prices in U. S. A. are still nominally unchanged, but business may be done at a shade less. The London market is also lower on both standard and electro. Locally prices are unchanged at 17¾ cents for electro, 17 cents for casting.

LEAD.—The American market is firm and as the local market is based on American prices, the situation here is firm. London is steady but prices have only a nominal bearing locally. It would not be surprising to see higher prices in the near future. Local price unchanged at 7 cents.

SPELTER.—This metal is considered fairly cheap to-day and higher prices are anticipated over the next few months. The London market is slightly easier, but this is only considered temporary. Local price 7½ cents.

ANTIMONY.—There is nothing new to this metal, but prices, if anything, are slightly easier, especially for import lots. Chinese is quoted at 6¾ cents high grade English 7¾ cents.

ALUMINUM.—This metal continues to show an easier tendency, and while quotations are for the present unchanged, ower prices would not be surprising in the near future. Present quotation, 26 cents.

Toronto Markets

TORONTO, Jan. 12.—Another extensive budget of price developments is apparent on the current markets. Building papers and sheathings are recorded with easier price levels, these changes bringing all grades to a more uniform basis. The anticipated declines on roofings have now been announced, this revision following the reduction in one line of these products made a few weeks ago. The new discounts, outlined in last week's report, are now effective on ammunition, showing an approximate recession of 20 per cent. Other decreases noted this week are on cotton waste prices; range boilers; eavestrough and conductor pipe; poultry netting staples, glaziers' points; corrugated sheets and fuel oil.

The advance of one cent per lb. in quotations on beaver manila, sisal rope and lathyarn, attracts special attention. This change is attributed by the manufacturers to higher cost levels on the fibre markets, together with a production tax on sisal.

Some easier prices are recorded on various models of Winchester rifles; while a revised tack list is about to be issued which also entails changing discounts on this line of products. The dull session continues in scrap materials, with slackness in demand still featuring the current ingot markets.

ANOTHER REVISION ON SHEATHINGS AND PAPERS

Toronto.

Sheathings and building papers have experienced another downward price revision. The current change averages between 10 and 12 per cent, and places the market on these products on a thoroughly stabilized market for 1922 business, according to the manufacturers. These products have experienced a number of similar revisions during the past year, the total extent of the declines being of a fairly substantial nature. The new quotations are contained on the current market pages.

PREDICTED DECLINES NOW ANNOUNCED IN ROOFINGS

Toronto.

As pointed out in previous issues of Hardware and Metal, easier price levels on roofings are involved for the current year's business. This change has now materialized on other products of this nature, manufacturers generally having followed the lead set by one producer last December. The revised prices are found in the current market quotation pages.

REVISED DISCOUNTS NOW EFFECTIVE ON AMMUNITION

Toronto.

As pointed out in last week's issue of Hardware and Metal, revised lower quotations are now to hand on ammunition. The changes in discounts are evident on both Dominion and American cartridges, and following are the revised levels now being quoted locally:

AMMUNITION—

Dominion Metallic, "B.B." caps, $3.15 per thousand; "C.B." caps, $3.95 per thousand.

Dominion, rim fire, centre fire, blank and shot cartridges, discount 55 per cent.

Dominion, brass shot shells, discount 55 per cent.

Empty Paper Shells, discount 50-2½ per cent.

Loaded shells—Crown, Sovereign, Regal, discount, 50-2½ per cent.

Imperial and Canuck, discount 50-5 per cent.

American Metallic Cartridges— Rim fire, list, plus, 2½ per cent. Centre fire, list plus, 15%.

All blank and shot cartridges, American, list, plus 15 per cent.

Primers, American, list, plus 15 per cent.

Add to Dominion List—Primers, No.'s 1, to 3A, $3.45 per thousand; No. 3B, $5.25 per thousand.

COTTON WASTE PRICES REVISED TO LOWER LEVEL

Toronto.

Easier prices have now been announced on both white and colored cotton wastes in all grades. The decline varies between one half and one cent per lb. on the different grades, with a similar half cent decrease on cream polishing waste. While the raw cotton markets are temporarily fairly steady, they have recently been in a more or less unsettled condition, and the easier trend of quotations on cotton wastes is attributed to the lowering of costs in the various contributory elements in these markets. Following are the current revisions:

WASTE—Cream, polishing, 19c per lb.; white, cotton, XXX, 18c; XX, 16c; X, 15c; XC, 14c; XXX extra, 16½c; XX, grand, 15½c; XLCR, 14½c; X empire, 13c; X press, 11½. Colored, cotton, Fancy, 13½c; Lion, 12c; Standard, 10½c; Popular, 9c; Keen, 7½c; No. 1, 13c; No. 7, 12m; No. 1A, 11c; No. 1B, 10c.

Above lines subject to trade discount for quantity lots.

ANOTHER SLIGHT DECREASE IN FUEL OIL QUOTATIONS

Toronto

Another slight reduction has been announced in fuel oil quotations, following on the recent easier trend in the primary oil markets. Prices on crude oil at production centres in the south have receded from the higher levels attained a short time ago. The current demand is also stated to be disappointing, with large buyers being reluctant to contract at prevailing price levels. Gasoline is also described as steadily weakening, due to the slackening in demand for this product which is usual at this season of the year. No price changes have been reported on the domestic markets, however, quotations on both coal oil and gasoline remaining at the nominal figures contained on the current market pages. Following are the revised levels on fuel oil:

Fuel oil, bbl, net	$0.10.90
Do., tank wagons, net	0.09.90
Do., tank cars, net	0.08.90

HIGHER PRICES ANNOUNCED ON ROPE AND CORDAGE

Toronto.

An advance of one cent per lb. has been announced by local rope manufacturers and distributors in the base prices on beaver manila, New Zealand hemp, sisal, single lath yarn and also double lath yarn. This change is attributed to the improvement in basic conditions at the primary markets. Manila fibre has been in moderate demand during recent weeks, but the exchange situation has tended to maintain costs, with the Philippine peso increasing in value after the recent depression. Stocks on hand are described as low in comparison with similar quantities at this time in previous seasons. In the case of sisal, a production tax, imposed by the Mexican interests, is reported to have advanced the cost of this product. Following are the new higher base quotations:

ROPE—	
Pure manila basis	0 23
Beaver manila basis	0 20
New Zealand hemp basis	0 20
Sisal basis	0 18
Single lath yarn basis	0 18
Double lath yarn	0 18½

EASIER PRICE LEVELS ON WINCHESTER RIFLES

Toronto.

Reduced prices are now recorded on Winchester rifles. Following are the revised quotations on various models:

WINCHESTER RIFLES—Model 1890, $27.75 each; 1892, $35.70; 1894, 30 and 32 round, $42.40; 1894, 30 and 32 octogen, $45.50; 1895, $55.50; 1902, $8.35; 1904, $10 20, 1905, $53.65; 1906, $24.05; 1906, Expert, $27.75; 1907, $64.75; 1894, Carbines, with sling and strap, $46.65; 1912, guns, $61.00.

PRICE DECLINE RECORDED ON GLAZIER'S POINTS

Toronto.

A downward revision in glaziers' points has been announced, the decline amounting to one cent, thus bringing the price on the ½-lb package to 7 cents. This revised quotation is f.o.b. Montreal, Hamilton and Toronto.

QUIETNESS STILL EVIDENT IN SHEET MARKETS

Toronto

Business on the current sheet markets is of a quiet nature, with a more settled condition becoming evident as regards prices. One dealer described the situation as "there being nothing to shade prices for, trade being very dull at present," and in his opinion price developments would not uncover any improvement in this situation. While it is yet early to determine future prospects, there is a fairly hopeful attitude among dealers generally.

BLUE ANNEALED—		
10 gauge, base	3 75	4 50
12 gauge	3 80	4 55
14 gauge	3 85	4 60
16 gauge	3 90	4 65

16	5 10	5 85
12 and 14	4 95	5 70

An extra 40c per 100 lbs. is charged for Keystone and Premier brands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10 3-4 oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds.

PLATES, CANADA—	
Dull 60 sheets	$5 65
Ordinary, 52 sheets	5 60
PLATES, COKE TIN—	
I.C., 20 x 28, 112 shets	13 50
IX, 20 x 28, 112 sheets	16 50
IX, 20 x 28, 56 shets	9 00
PLATES, CHARCOAL TIN—	
1X, 20 x 28, 56 sheets	14 00
1XX, 20 x 28, 56 sheets	16 00
PLATES, TERNE—	
1C, 14 x 20, 112 sheets	12 00

REVISED DISCOUNT ON CORRUGATED SHEETS

Toronto.

As pointed out in recent market reports, an easier tone has developed in corrugated sheets, especially since the last downward revision in quotations on flat sheets. This trend has resulted in a change in discounts on the corrugated, the level being 10 per cent., compared with the previous discount of 7½. The list prices are unchanged, as follows:

Corrugated—	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 00

Less 10 per cent.

Lighter than 24 gauge and wider than 2½ ins., 75c a square extra.

REVISED TACK LIST ABOUT TO BE ISSUED

Toronto.

According to information received by Hardware and Metal, a new tack list is about to be issued. This will also entail the changing of the present discount quotations.

LOWER RANGE BOILER LIST NOW GENERALLY ADOPTED

Toronto.

As pointed out in previous issues of Hardware and Metal, there has recently been a tendency to drop back to the $8.75 level on the 30-gallon standard range boiler. With this situation being generally evident, a new lower list has been adopted by some distributors, showing an easier range of prices on these products. There is stated to be only a small sale for boilers during the current season, but the movement to shade the nominal levels has been evident for some weeks. Following is the list now being generally recognized as the prevailing market values:

RANGE BOILERS— Size.	Stand.	Ex-Heavy
30 gallon	8 75	11 25
40 gallon	13 50	16 00
52 gallon	20 00	24 50
66 gallon	28 00	34 00
82 gallon	35 00	46 50
100 gallon	45 00	55 00
120 gallon	54 00	63 25
144 gallon	78 00	93 00

DOWNWARD REVISION IN EAVESTROUGH AND PIPE

Toronto.

Revised discounts are now quoted on both eavestrough and conductor pipe. The revision is approximately a decline of 10 per cent, this quotation having been added to the current figures. This change applies to both ridge roll and valley eavestrough, and conductor piping, but quotations on elbows remain unchanged. Following are the list prices and discounts:

TROUGH (Eave)—

O. G. Square Bead and half round. Size in girth:	Per 100 ft.
8 in.	15 90
10 in.	17 70
12 in.	21 20
15 in.	28 80
18 in.	36 50

Less 70 and 10 per cent.

PIPE (Conductor)

Plain, round or corrugated.

	Per 100 ft. in 10 ft. lengths.
2 in., in 10 ft. lengths, list	18 40
3 in. in 10 ft. lengths, list	22 80
4 in. in 10 ft. lengths, list	29 60
5 in. in 10 ft. lengths, list	40 00
6 in. in 10 ft. lengths, list	49 00

Less 70 and 10 per cent.

ELBOWS (Conductor)

2 inch, list	5 25
3 inch. list	6 00
4 inch. list	10 50
5 inch, list	24 00
6 inch, list	29 00

Less 60 per cent.

QUOTATIONS ON POULTRY NETTING STAPLES LOWER

Toronto

New quotations have been announced on poultry netting staples, the revised levels being lower than formerly. Prices for the bright are now quoted at $7.25 per 100 lbs, and for the galvanized at $8.25. This is for kegs. The discount to the trade on these revised levels is 10 per cent.

The net extras not subject to discount are as follows: Coppering, $0.60 per 100 lbs. 10-lb wooden boxes ,$1.50 per 100 lbs. 25-lb. wooden boxes $1.00 per 100 lbs. 50-lb wooden boxes, $1.00 per 100 lbs. F.o.b. Toronto, Hamilton, London, Montreal.

LITTLE BUSINESS REPORTED IN BAR IRON AND STEEL

Toronto.

Orders for bar iron and steel are admittedly not very numerous at present, but the general situation is described as in fairly good shape considering the present season of the year. Quotations on the local markets are practically unchanged from former levels, while reports of pending reductions in bar prices by leading producers in the southern primary centres have been strenuously denied. New business for 1922 has not opened up to any extent, as yet. Following are local nominal quotations:

IRON AND STEEL—		
Mild Steel bars, base	3 00	3 25
Mild steel bands, 3-16 in. base	3 50	3 75
Bar iron, base	3 00	3 25
Angle iron, base	3 10	3 35
Horseshoe iron	3 75	4 10
Tire steel	3 50	3 75
Spring steel	5 50	6 00
Sleigh shoe steel	3 00	3 25
Hoop steel	3 75	4 25
Norway iron	12 50	15 00
Toe caulk iron	4 00	4 50
Crucible cast sheet steel	30 00	.35 00
Mining drill steel	.. ..	18 59
Cast tool steel, high grade	20 00	23 00
Cast tool steel, medium	30 00	36 00

DULL SESSION CONTINUES IN SCRAP MATERIALS

Toronto.

Consuming demand in waste material markets continues to remain at a very low ebb. There has been no improvement recorded during the past week, with prices generally stationary on both foreign and domestic centres. Non-ferrous scrap metal is relatively the most active division of the waste materials, while other metals have been steady but slow. The following levels remain the current average of dealers' nominal buying prices for fairly large quantities.

Gross Tons— Scrap Iron		
Heavy melting steel (Hamilton)	$11 50	$12 00
Borings and turnings	2 50	3 50
Rerolling rails	10 50	11 50
Scrap pipe	6 00	7 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	6 50	7 50
Agricultural malleable	10 00	11 00
Railroad malleable	11 00	12 00
Net tons—		
No. 1 cast	18 00	19 00
Stove plate	12 50	13 50
Grate bars	11 50	12 50
Standard car wheels	13 50	14 00
Scrap Metals.		
Heavy copper and wire	10 50	11 50
Light copper	8 00	9 00
No. 1 composition	9 00	10 00
No. 1 comp. turnings	6 00	7 00
Light brass	3 25	3 75
Heavy yellow brass	5 50	6 50
Heavy lead	4 00	4 50
Tea lead	2 00	2 50
Scrap zinc	4 00	4 50

SLACK DEMAND FEATURES CURRENT INGOT MARKETS

Toronto

Slackness in general remains the current feature of the ingot metal markets, with local quotations holding unchanged at previous levels. Some slight developments, however, have been recorded in primary centres, notably in copper, where smaller producers are reported to be shading the recent higher quotations on this product owing to the absence of demand.

COPPER.—Copper prices on the primary markets have eased slightly from the higher levels recently recorded. This movement, however, is not yet general, being chiefly of a temporary nature owing to the relatively small demand for copper from either domestic or foreign sources. The larger producers are reported to be maintaining their quotations, but some of the smaller selling interests, being anxious for orders, are making concessions in prices. The local market remains quiet with quotations at 17½ to 18 cents.

TIN.—On the whole the tin markets retain their recent degree of improvement, and the undertone is steady to firm. The current activity in this metal is not quite so marked as during the closing weeks of the past year, for the consuming demand is still dull. These conditions are more or less customary at this season of the year. The local prices remain at 30 cents.

LEAD.—Like most of the other metals, lead has been quiet during the week. The buying is now of a moderate nature, and the market has receded somewhat from the brisk activity recorded during the latter part of December. The undertone is considered still sound, however, but it is stated that current conditions in primary centres does not warrant any further price increases at present. Quotations on the domestic market are unchanged from the level of $6.75.

SPELTER.—Conditions are quiet in this market, and the tone is slightly easier. Very little business was naturally placed by consumers during the inventory period. The local quotations are generally holding at $7.25.

ANTIMONY.—This market remains dull and uninteresting. Prices are holding unchanged on both foreign and domestic markets. The current local quotations remain between 8 and 10 cents.

ALUMINUM.—There has been no change of any importance in this market, the recent apathy still being evident.

The previous easier level of 27 cents continues on local circles.

EASIER TONE IN LEAD, WITH SOLDER PRICES STEADY

Toronto.

While some higher prices are now quoted in certain quarters on solders, yet this change applying to such grades as strictly, commercial and tinkers. Quotations on basic markets, however, while maintaining the recent increased levels, show a tendency towards a slightly easier undertone. This development is also noted in lead. Generally, however, the following are the average local prices at present in effect:

LEAD AND ZINC GOODS—	
Lead pipe, list, per lb.	0 12½
Lead waste pipe, list, per lb.	0 13½
Do., over 8 in., list, per lb.	0 14½
Lead pipe is subjected to a discount of	10%
Lead traps and bends	10%
Lead sheets, 4 to 6 lbs. sq. ft. in rolls, lb.	09½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, per lb.	0 32½
Do., strictly, lb.	0 24½
Do., commercial, lb.	0 22½
Do., guaranteed, lb.	0 27½
Do., wiping, lb.	0 22½
Zinc sheets, per lb.	0 12

London Markets

LONDON, Jan. 12.—Price revisions to lower levels are again numerous this week, including new quotations on shells and cartridges; Colt's automatic pistols; the Eureka line of sprayers, drills and cultivators; Rochdale pruners; the English line of carpenters' tool baskets; and also tinned "S" meat hooks. Lower prices have been announced on some makes of electric fans for spring delivery, while a sharp advance has appeared in turpentine levels.

Other price developments are noted on the Nevada line of Silverware, quotations having been reduced. Easier price levels are also recorded on the Maydale nail hammers. There has been a fifty-cent decline in poultry netting staples; while Snap cleaner; single barrel guns; cut nails; Winchester arms; iron rivets and burrs; and practically all bolts and nuts, are other lines with reduced quotations.

REDUCED PRICES NOTED ON ELECTRIC FANS

London, Ont.

New lower prices for Spring delivery have been announced on the Polar Club line of electric fans. The easier quotations follow:

ELECTRIC FANS—	Single lots.	Doz. lots.
6 inch, each	5 75	5 25
8 inch, each	8 00	7 50

TINNED MEAT HOOKS RECORD PRICE DECLINE

London, Ont.

New prices which are slighty lower have been announced on the English tinned "S" meat hooks. Stocks of these products are generally of a very moderate nature. Following are the revised prices:

Size ¼ ins. x 4 in. $4.75 per gross.
Size, 5/16 ins. x 5 ins. $7.50 per gross.

ROCHDALE PRUNERS SHOW EASIER PRICE LEVELS

London, Ont.

A reduction of approximately 10 per cent. has been recorded in quotations on the Rochdale pruners. The revised quotations are as follows:

No. 35, $10.55 per dozen.
No. 38, $25.20 per dozen.

EUREKA CULTIVATORS AND SPRAYERS ARE REDUCED

London, Ont.

The Eureka line of sprayers, drills and cultivators, are now quoted with lower prices, the decrease averaging from 10 to 20 per cent on the various products. Following are some of the revised quotations:

EUREKA—
Seed Drill, No. 1, $9.00 each; No. 2, $11.00.
Cultivator, No. 4, $4.50 each; No. 8, $6 each; No. 10, $6.50 each.
Compressed Air Sprayers, No 110 galvanized, $7 each; No 111, brass, $10.
Sprayers, No 112, tin, $5.50 doz.; No. 113, glass jar, $8; No 114, glass jar, $9; No. 115, continuous, $10; No. 116, continuous, $10.50.
Dry Sprayers, No. 108, $9 doz.

FIRMER TENDENCY SEEN IN LINSEED MARKETS

London, Ont.

While local prices are nominally unchanged on linseed oil, yet the market is reported with a firmer tendency. The current price levels follow.

LINSEED OIL—	Raw.	Boiled.
1 to 2 bbls, per gal	0 84	0 87
3 to 5 bbls., per gal	0 83	0 86
6 to 9 bbls. per gal.	0 81	0 84

Less barrels, add 15 cents gal.

SUBSTANTIAL REDUCTION IN COLTS' AUTOMATIC

London, Ont.

A reduction in prices has been noted on Colts' automatic pistols. The revised levels are approximately 20 per cent. lower. Following are new net prices:

COLT AUTOMATICS—25 calibre, $17.25 each; 32, $20.85; 380, $20.85; 38, $38.85.

DOWNWARD REVISION IN CARPENTER TOOL BASKETS

London, Ont.

A downward revision in prices has been recorded in the English line of carpenter tool baskets. The new quotations are as follows:

No. 4 Bound and Lined $13.75.
No. 5 Bound and Lined $15.50.

SHARP ADVANCE APPEARS IN TURPENTINE QUOTATIONS

London, Ont.

After remaining practically stationary for several weeks, turpentine quotations on the primary markets registered a substantial advance. This rise is naturally reflected in local price levels, an advance of 5 cents per gallon having been recorded. Following are the new quotations:

TURPENTINE—	Imp. Gal.
1 bbl lots	1 25
2 to 4 barrel lots	1 24
5 gallon lots	1 40

REVISED DISCOUNTS NOTED ON AMMUNITION LISTS

London, Ont.

As pointed out in last week's issue of Hardware and Metal, lower prices have been announced on ammunition. This revision in discounts applies to both the Dominion and American makes. Following are the new quotations:

AMMUNITION—
Dominion Cartridges—All metallic ammunition, rim and centre fire, blank and shot cartridge and primers, list, less 42-2½-20 per cent.
Dominion Loaded Shells—
Crown, list less 40-20 per cent.
Sovereign, list less 37-2½-20 per cent.
Regal, list less 37-2½-20 per cent.
Canuck, list less 42-20 per cent.
American—
Rim Fire Cartridges, list, plus 5 per cent.
Centre Fire Cartridges, Pistol and Sporting, list, plus, 15 per cent.
Primers, list plus 15 per cent.

REDUCTION RECORDED ON MAYDALE NAIL HAMMERS

London, Ont.

Easier price levels have also been announced on the Maydale nail hammers. The revised quotations are approximately reduced 10 per cent. from the former levels:

NEVADA SILVERWARE ALSO REGISTERS PRICE DECREASE

London, Ont.

New lower prices have also been recorded on the Nevada line of silverware. The extent of the decrease is approximately 10 per cent. Following are some of the new net quotations in effect locally:

NEVADA SILVER—
Tea Spoons, No. 9, $8.40 gross or 75c doz. No. 10, $9.80 gross or 85c doz.; No. 11, $11.25 gross or $1 doz.
Dessert Spoons, No. 12, $1.70 doz.
Table Spoons, No. 13, $1.95 doz.
Dessert Forks, No. 14, $1.70 doz.
Table Forks, No. 15, $1.95 doz.
Jumbo Dessert Forks, $2.20 doz.
Jumbo Table Forks, $2.40 doz.

FIFTY-CENT DECLINE IN POULTRY NETTING STAPLES

London, Ont.

The new prices on poultry netting staples are 50 cents per 100 lbs. lower than previously. The revised quotations follow:

In 100 lb. kegs, $7.50 per cwt.
In 25—lb. boxes, $8.50 per cwt.
In 10—lb. boxes, $9.00 per cwt.

SNAP HAND CLEANER AT SLIGHTLY EASIER LEVEL

London, Ont.

Makers of Snap hand cleaner announce new lower prices. Three dozen to a box will now sell for $4.50 a case, and $1.90 is the revised level for one dozen tins.

EASIER PRICE LEVELS ON SINGLE BARREL GUNS

London, Ont.

Easier prices are now recorded on single barrel shot guns. The revised prices vary on the different styles, the reduction averaging around 15 per cent.

SUBSTANTIAL PRICE DROP NOTED ON CUT NAILS

London, Ont.

Following the recent decline in prices on wire nails, a fifty cent decrease is now recorded in quotations on cut nails. The revised level is $4.35 base.

PRICES ON WINCHESTER ARMS SLIGHTLY REDUCED

London, Ont.

Rifles and guns of the Winchester make show a revision on the various models, with a slight reduction in most numbers. The reduction carries, but includes new lower quotations on all models.

IRON RIVETS AND BURRS HAVE NEW DISCOUNTS

London, Ont.

A slight reduction has been made in quotations on iron rivets and burrs. Discounts in each case have been changed from 50 per cent. to 52½ per cent. off list prices. Extras remain as formerly.

LOWER QUOTATIONS ALSO APPEAR ON STOVE BOLTS

London, Ont.

Quotations on stove bolts are also revised in the downward direction, in conjunction with changes which appear on other makes and styles of bolts. The new discount is 72½ per cent., compared with the previous figure of 67½. This reduction, therefore, is in the neighborhood of 15 per cent.

Winnipeg Markets

WINNIPEG, Jan. 12.—Several important reductions in prices on hardware commodities have been recorded this week. Among those featuring the current markets are reductions in prices on all wire products; affecting bright and annealed wire; barbed and fence wire; stove pipe wire; bale ties and wire nails. All kinds of bolts have also been reduced. Gasoline is down one cent. It is expected that on account of an export duty being placed on sisal fibre by the Mexican Government that rope prices may be higher in the near future.

SLIGHT REDUCTION NOTED IN GASOLINE QUOTATIONS

Winnipeg.

A decrease of one cent per gallon on all grades of gasoline is now effective. This change applies to all territories west of the Great Lakes. The new price will be charged at filling stations and supply centers.

EXPECT ROPE PRICES WILL BE INCREASED

Winnipeg.

The rope manufacturers advise that the Mexican Government has placed an export duty on sisal fibre, and this has had the effect of forcing up prices on all hard fibres. They further state that the market is quite strong and that they would not be surprised to see higher prices ruling on cordage. Following are the prices now in use.

ROPE—

British Manila—¼ in., 5-16 in., 22½c; ⅜ in., 22c.; 7/16 in., ½ in., 9-16 in., 21½c.; ⅝ in., 21c.; ¾ in., and larger, 20½c.

Pure Manila—¼ and 5-16 in., 26½c. ⅜ in., 26c.; 7-16, ½ and 9/16, 25½c.; ⅝ in., 25c.; ¾ in., 24½c.

Sisal—¼ and 5/16, 20½c.; ⅜", 20¼c.; 7-16, ½ and 9-16", 20c.; ⅝". 19½c.; ¾", 19c.

DECREASE IN PRICE ON WIRE NAIL BASE

Winnipeg

The base price on wire nails is now reduced to $4.55 at Fort William and $5.15 at Winnipeg. The extra for blued and coated nails has also been revised downward, from 50 cents to 35 cents.

LOWER PRICES ON WIRE AND WIRE PRODUCTS

Winnipeg

Lower quotations are given this week on coiled spring, annealed, bright market and stove pipe wire. Following are the prices now in effect:

WIRE—

Coiled Spring.

Galvanized.

No. 9	$5.65 per 100 lbs
12	5.85 per 100 lbs.

Plain

No. 9	5.60per 100 lbs.
12	5.80 per 100 lbs.

Annealed Wire

0 to 9	$5.00 per 100 lbs.
10	5.06 per 100 lbs
11	5.12 per 100 lbs.
12	5.20 per 100 lbs.
13	5.30 per 100 lbs.
14	5.40 per 100 lbs.
15	5.55 per 100 lbs.
16	5.70 per 100 lbs.

Bright Market Wire

0 to 9—$5.25 per 100 lbs.; 10, $5.31 per 100 lbs.; 11, $5.37 per 100 lbs.; 12, $5.45, per 100 lbs., 13, $5.55, per 100 lbs.; 14, $5.65 per 100 [illegible]; 15, $5.80 per 100 lbs.; 16, $5.95 per 100 lbs.

Stove Pipe Wire.

18, $9.05 per 100 lbs.; 19 $9.55 per 100 lbs.

REVISED LOWER PRICES NOTED ON BALE TIES

Winnipeg

Lower prices have been announced this week on bale ties. This revision corresponds with the changes effective on other wire products. The latest quotation F.O.B. Winnipeg is 6.50 per 100 lbs.

EASIER PRICE LEVELS NOTED ON BARBED WIRE

Winnipeg

Lower prices are recorded this week on barbed wire Following are the revised quotations.

Lyman $4.60 per spool.
Glidden $4.30 per spool.
Baker $4.20 per spool.

CARRIAGE AND MACHINE BOLTS NOW COST LESS

Winnipeg

Lower prices are in effect this week on carriage and machine bolts, and following are the new discounts:

CARRIAGE BOLTS—⅜ inch and smaller, 6 inch and shorter, 37½ per cent.
⅜ inch and smaller, over 6 inches, 30 per cent.
7-16 inch and larger, 30 per cent.

MACHINE BOLTS—⅜ inch and smaller, 4 inch and shorter, 47½ per cent.
⅜ inch and smaller, over 4 inch, 32½ per cent.
7-16 inch and larger, 32½ per cent.

LOWER PRICES APPEAR ON FENCE STAPLES

Winnipeg

A reduction is made this week in the price of fence staples. Following is the new price on bright iron fence staples.

At Fort William $4.85 per 100 lb. keg.
At Winnipeg $5.45 per 100 lb. keg.

REVISED DISCOUNTS ON STOVE AND PLOW BELTS

Winnipeg

In keeping with reductions on carriage and machine bolts, other lines of bolts such as stove, plow, tire, and sleighshoe, have also been reduced and following are the revised discounts:

MISCELLANEOUS BOLTS—
Stove Bolts, 70% off; Plow Bolts, 20% off; Tire Bolts 42½% off; Sleigh Shoe Bolts, [illegible] off; Shaft Bolts, 15 per cent. off; Step bolts, 15 per cent. off; Coach Screws, 45 per cent. off.

Pittsburg Markets

PITTSBURGH, Jan. 9, 1922—The outstanding feature of the steel situation this week is that the mills are operating at a better rate, and have more business on books, than would be expected from the reports given out quite universally in December of there being a very dull market in steel products. Production and shipments, of course, constitute the crucial test of conditions in steel. Sometimes mills are disposed to paint the picture of their condition in colors that are somewhat too bright, but now it appears they have been selecting more sombre colors than were justified. Perhaps the explanation is the highly competitive market that has existed for months, the individual mill now being fearful lest its competitors think it has acquired more business than its share, and accordingly turn in and compete more strenuously still.

There has been very little closing of mills over the holidays, not enough to make any material difference in a month's production of the industry, and there is a distinct possibility that mills will be operated at a higher rate at the middle of this month than they were at the beginning of December. If this occurs it will be due to buyers having started to replenish stocks, which they reduced to the absolute minimum, far below normal, as the old year closed.

At the beginning of 1921 many buyers had stocks of no small importance and some buyers added to stocks in January and February, not slowing down mill deliveries to them in keeping with the decrease in their actual consumption. Afterwards there were the most strenuous efforts to liquidate stocks. It was during this process of liquidation that steel production, at the middle of July, fell to a rate of no more than 20 per cent of capacity, represented by a rate of steel ingot production of barely over 10,000,000 tons a year. So low a rate could not possibly be representative of actual ultimate consumption, even if business generally was decidedly dull.

Reduction in Price

The American Steel and Wire Company has reduced its price on cold rolled strip steel from 3.75c to 3.50c, on account of continued cutting of the 3.75c price by independents. Otherwise nothing at all has occurred in the matter of steel prices in the past week. The market is really quite steady, both in that few changes are occurring in quotable prices from time to time, and in that the ordinary market prices are subject to much smaller concessions, for large and attractive orders, than was the case a few months ago.

To illustrate, the open or regular prices on bars, shapes and plates last August were several dollars a ton higher than regular prices now, yet a very large order could possibly be placed at as low a price then as now. The great increase in market steadiness is likely to encourage buyers to take hold in a broader way, instead of doling out orders for single carloads each at the last minute.

Gets Helpful Ideas From Complaints

Frequently Complaints Regarding Paint And Varnish Contain Some Suggestion Which Can be Turned to Good Advantage--- Worth While to Keep Record of Jobs Done And Analyze Complaints Carefully.

A GOOD RESOLUTION to make in connection with the paint department at the commencement of another year is that complaints made by customers will receive adequate attention and steps taken toward improvement wherever such can be achieved as result of the complaint. It will surprise the merchant just how many good ideas can be brought out in analyzing customers' complaints. They happen in the best stores, for it is not always easy to handle a large group of customers who may represent greatly varying types of temperament. So, as they are bound to come, some fixed policy should be adopted in handling them.

True the majority of complaints can be based upon the abuse of the paint, varnish, etc., rather than upon any defect in the goods, but the unusual will sometimes occur and it is safe to be prepared for any eventuality. The tendency of some merchants to immediately blame the goods is one which should be changed because it is frequently doing the manufacturer an injustice, and both the merchant and the customers will benefit if the matter is fully explained to the latter and directions given concerning the application of paint so that the difficulty can be overcome in future.

Roughly there are three classes of complaints, one where the trouble is in the goods, secondly where the fault is not in the goods, and thirdly where it is not easily apparent where the trouble lies. Unfortunately the largest percentage of complaints belong to the latter class. In some cases where poor grades of paint are used the fault lies with the goods and unfortunately people who find trouble with such paints cast aspersions upon all brands. The necessity of studying the question is therefore apparent.

To Study Complaints

Each retailer should have in his employ at least one man who will make a study of the practical paint problems. He should know what conditions produce bad jobs and how to detect them, if they may be detected.

Many "bad jobs" can be avoided by a little care in making the sale, being sure that goods adapted to the existing conditions are sold. It is always advisable in selling an "outside house job" to keep a record of the sale, which should show type of building, elapsed time since it was last painted and kind of paint used at that time (if new it should state nature of lumber). It should show also the size of building, colors and brand and amount of paint sold and, if possible name of painter who did the work. If oil or other thinners and dryers, etc., were sold at same time to the same buyer, such note should show kind of oils, etc., and amount sold.

"Too much trouble," says some merchant. Just a little, it is admitted, but this will save you "troubles galore" and save many an unjust demand in the future. It will be a basis for a great "follow up" sales campaign after five or six years, if you sold good paint the first time.

Given this record to start with your "adjuster" has at least a fair chance to change what probably would be No. 3 type complaint, to one which can be more easily settled.

Investigate Promptly

Each complaint should be investigated as promptly as possible. The investigator should get all possible evidence at the "job," making pencil notes at the time, but reserving any decision or explanation until he has given the problem careful thought after weighing all evidence. This method usually convinces the customer that his problem is considered important, and if a decision, contrary to his ideas, is given, he is more easily convinced that it is just. After all, justice must be the keynote of any settlement. Avoid saying at once, "This paint (or varnish) must have been an 'off lot,' I will at once put it up to the

(Continued on page 102)

Rapid Growth In Canada's Paint Industry

Industry Was Represented With 26 Plants in 1910 And Now There Are 45 Plants—Importance of Quebec Province in Paint and Varnish Industry

"IT WOULD possibly be a conservative statement that from seventy to seventy-five per cent. of the total capital invested in Canadian White Lead, Paint and Varnish undertakings is employed in Montreal. Moreover its executives, staffs and work people are employed in similar ratio at the metropolis," said George Henderson, President of Brandram-Henderson, Ltd., Montreal, in discussing with Hardware and Metal the paint and varnish industry of Canada.

"The dominating position of Montreal as a manufacturing centre is recognized to be due in very large measure of course, to geographical reasons, and this is undoubtedly the chief explanation for its situation in relation to the manufacture of paint products; but we are bound up with the activities of other provinces not only because large quantities of some of our most important raw materials are derived from them, but also because some of the Montreal establishments have branch factories at other points in the Dominion, and one or two manufacturers with headquarters elsewhere have branch factories in Montreal.

"The following are some particular reasons why Canada's commercial capital occupies such a favorable position for our trade. From our national resources we are now able to secure two of the most important of our raw materials in very considerable quantities, and were lead and linseed oil the only materials necessary, the western prairies or British Columbia might be the natural locations for our manufactories, but large quantities of these and other products are imported from Europe, South America, the Eastern States and elsewhere, so that Montreal's advantage as a port and railroad centre is very great. As the centre of many large industries and population there is also a large consumption of paints in the vicinity, and the facilities for distribution to all other parts of the country, or to export markets, are of great advantage. The availability of skilled and unskilled labor is also a point of no mean consideration.

"The paint and varnish industry in Canada is represented by about 45 establishments with an investment which in 1918 amounted to $15,784,610. The total value of the output of these factories for that year was officially computed by Dominion Bureau of Statistics to be $17,678,049, and were considered conservative by the trade. It is likely that total value of upwards $25,000,000 was represented by production of 1920. Considerable decrease in values and the contraction of business during 1921 will account for a reduction from these figures, but it is yet much too early to secure reliable data.

"The growth of the industry computed by actual quantities of output in the last decade has been great, and competition has been one of its healthiest aids; for in 1910 there were only 26 establishments actually producing paint materials, and the estimated 1920 output of upwards of 30,000,000 gallons of paints

(Continued on page 102)

Paint Display for Farmers' Exhibition

One of the novel ideas employed by Em. Rousseau and File, hardware merchants of Nicolet, Quebec, in connection with paint business is the use of a booth at the local farmers' exhibition. The booth arranged on the occasion of the exhibition of the Farmers' Club of Nicolet is shown herewith. It will be noted that a small desk and chair has been provided on which color panels and samples of various paints are arranged within easy reach. This enabled the firm's representative to discuss paint matters in comfort with prospects. Such educational work has been found effective in bringing farmers to a realization of the value of paint for use on farm buildings, implements, etc.

SERVICE

CONFIDENCE

FAIR DEALING

Friendship Scores Again

WHILE it would be interesting to know how Mr. H. S. Osborne of the Osborne Hardware, Galt, felt when his opening order for Paints and Varnishes, amounting to several hundred dollars, was unloaded at his door—it is of greater moment to know just what his attitude *now* is toward "Those people whose reputation and proposition was so enticing."

Mr. Osborne has this to say after almost two years of experience—"We are delighted to tell you that we practically doubled our Paint business since taking on your proposition, and find your Products, Service and Relationship perfectly satisfactory in every respect."

Among other expressions was this one—"We can say no more of our satisfaction as your representatives than this—'if our best friend were starting in the Paint Business we would recommend your Agency.'"

"Doubled his Paint business." "Perfectly satisfied." With our Ideals justified and our Reputation established by faithful and satisfied associates—we *must* set the pace and maintain it. We have no alternative.

"Business is principally a matter of Principles."

Weekly Paint Markets

Montreal

MONTREAL, January 12,—Although no actual price change can be recorded on any product in the local paint markets this week, the continued strong position of turpentine and linseed oil attracts attention. The fact that current quotations on turpentine show a recession in other domestic markets is sufficient proof that the continued lack of buying is a strong factor to be overcome in the maintenance of a steady to firm market. However, local prices are unchanged, with the position of this product at production centres strong enough to offset any weakness through quiet demand. Linseed oil is also quiet but with inventories now taken and stocks in most cases found low, an increased volume of buying is now anticipated. Local dealers look for the remaining weeks of this month to mark the close of the inactive period.

Little change has yet taken place in window glass, and the market is in practically the same position as last week. Although there is no immediate sign of higher prices, distributors are convinced that any price development will be in the nature of an advance. An improvement in the Belgium market and higher transportation rates is still firming the situation. Paint manufacturers are unanimous in their opinion that a steady market will continue on paint, varnishes, and sundry lines, throughout the active spring season. With salesmen again on the road, increased buying is again looked for after the quiet period of the past week owing to the holiday and inventory season.

INCREASED DEMAND REQUIRED FOR TURPENTINE IMPROVEMENT

Montreal.

Turpentine prices locally are unchanged and the quiet market for some time past has failed to cause any easier tendency up to the present. Although this is a strong factor pulling towards a downward trend, the position of this product of primary centres is strong enough to offset any sign of weakness.

Stocks locally are still very light and any tendency displayed at productive centres has a direct bearing on this market. As increased demand is all that is required for the continuance of a firm tone in the market, this is expected to improve in coming week. Dealers have now taken inventories, and in most cases they have found small stocks on hand, and buying should be more active to take care of the earlier spring demand.

In Southern markets there is already a slight improvement in this direction and although purchases are on the whole of a hand to mouth nature, there is every reason to believe that sales will become larger from now on. Quotations locally are as follows:

TURPENTINE—	Imp. gal.
1 barrel lots	$1.17
2 to 4 barrel lots	1 15
Broken lots	1 27

LINSEED OIL PRICES UNCHANGED: MARKET FAIRLY FIRM

Montreal.

With a quiet demand still prevailing, linseed oil remains much in the same position as in the past few weeks. Current quotations are unchanged at 81 and 83 cents for raw and boiled oil respectively in one barrel lots, with a price one cent in advance quoted in some quarters. The undertone of the market again shows a fair amount of firmness, notwithstanding the continuous lack of interest on the part of consumers. In outside markets there seems to be a fluctuating tendency in oil prices, although reports in general indicate a slightly better demand, and every indication that it will improve as the weeks pass. Locally, much the same is anticipated and the remaining weeks of the month are expected to close the inactive movement to a great extent. Local quotations are the following:

LINSEED OIL—

	Raw.	Boiled.
1 to 2 barrel lots, per gal	0 81	0 83
3 to 5 barrel lots, per gal	0 79	0 81

Less barrels, add 10 cents per gallon.

Toronto

TORONTO, January 12.—The rapid increase in turpentine prices, both on the primary and domestic markets, provides the feature event in the current paint markets. From showing easier levels on the local report last week, prices have recovered the drop then recorded and have jumped another ten cents per gallon. These revisions bring the average quotations to $1.30 for one barrel quantities.

The reason for the spurt in southern prices is attributed to the fact that current requirements are absorbing the new receipts, which are seasonably restricted at this time of the year. Calls for supplies from stocks on hand, therefore, are stated to be creating the present firm situation.

RAPID ADVANCE IN TURPENTINE QUOTATIONS

Toronto.

The sudden spurt in turpentine quotations attracts special attention, due particularly to the extent of the increases. As pointed out in last week's report, a strong upward tendency was noted on the primary markets, and the local drop of 5 cents per gallon was due to easier exchange rates and the current dullness. Towards the end of last week this price was recovered, to be followed by another increase of 5 cents per gallon locally, thus directly reflecting the higher levels in southern production centres. This increased tendency continued, and nominal prices have generally been further advanced to the level of $1.30 per Imperial gallon in one barrel lots.

Quotations at Savannah rapidly advanced more than ten cents per gallon, and the market is described as of a speculative character with producers at present in a statistically strong position. This firmer trend may be in evidence for several weeks, until new receipts will be available in March. Sales have been heavier in the south than receipts, thus increasing the value of producers' holdings. Local enquiries for turpentine are more numerous than at this time last year. There is also very little on hand at local distributing points, but fresh supplies are expected.

TURPENTINE—	Imp. gal.
1 barrel lots	$1 30
2 to 4 barrel lots	1 29
5 gallon lots	1 45

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $15 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph Windsor, or Montreal but freight may be equalized from any of these points.

Car load lots of 70 bbls. Price on application.

Less than 1 barrel lots—15 cents per gallon additional.

MAINTAIN CURRENT PRICE LEVELS ON LINSEED OIL

Toronto.

There is little new to record in linseed oil as far as prices are concerned, the current levels still being maintained generally. The paint and varnish trade, however, reported as showing a keener interest in oil in certain quarters than has been recently apparent. Stocks of linseed on hand are described as moderate. Buyers however, are not disposed to break away from the hand-to-mouth policy which has characterized purchases in recent months.

LINSEED OIL—	Per Gallon.	
1 to 2 barrel lots	0 84	0 87
3 to 4 barrel lots	0 82	0 86
6 to 9 barrel lots	0 81	0 84

Less barrels, add 15 cents per gallon.

BOSTON VARNISH CO.

The annual Christmas Tree Party, which for several years has proved an enjoyable affair for the employees of the Boston Varnish Co., this year took on an unexpected significance to the factory and office organizations. The affair was bristling with Christmas spirit and when all gathered around the tree considerable amusement and pleasure was derived from the exchange of gifts, both useful and comic. F. V. Bray, Assistant Advertising Manager, acted as Santa Claus and distributed the gifts accompanied by many humorous and appropriate remarks. The climax came at the height of the festivities when James B. Lord, President of the company, announced that the company would pay to all the employees their regular bonus as heretofore, based on a percentage of each individual salary on the ratio of one per cent. per year, according to term of service.

PRATT & LAMBERT SALESMEN MEET

To make 1922 a big year for the paint and varnish industry generally, and for Pratt & Lambert Inc., specially, was the inspiring slogan of the Salesmen's Convention.

President J. H. McNulty, in discussing general conditions, predicted a successful year for the industry, emphasizing the constructive work of the "Save the Surface" campaign. He stated that today dealers appreciate, as never before, intelligent co-operation.

Other speakers included, A. D. Graves, General Manager; R. W. Lindsay, Manager Industrial Sales; F. W. Robertson, General Superintendent; W. P. Werheim Advertising Manager. Salesmen in Canadian territory assembled with the Central Division men at the Buffalo plant, January 9-10.

C.P.O. & V. ASS'N AND LEAD ASS'N ANNUAL MEETINGS ON FEB. 9

The annual meeting of the Canadian Paint, Oil & Varnish Ass'n. will be held February 9th. The Lead Ass'n. will hold a meeting on the same date.

CANADA'S LINSEED INDUSTRY

(Continued from page 94)

continue as one of the largest centres in the Dominion.

By-Products

When the oil is pressed from the seed, there are two by-products entering into the industry which find a ready market in stock raising circles. These are oil cake and linseed meal, both considered second to none as fat producing foods for live stock. The market for these is wide and export markets consume about 75 per cent. of the total year's run. Here again is where Montreal's geographical location is advantageous, many ocean going steamships calling at the port and conveying supplies to practically every other port in the world.

ONTARIO RETAIL HARDWARE ASSOCIATION PROGRAM

(Continued from page 93)

in life and men who will inspire you with higher ideals, the kind that help everybody and hurt nobody.

The foundation and structure of our Association is based upon increased numerical strength, retaining membership already obtained, having members grow and broaden through mixing with others at Conventions, and rising with the experience gained in their daily business.

The exhibition this year will absolutely eclipse any ever held in former years. There will be thirty more exhibitors. The Retailers' Banquet and entertainment on Wednesday evening will be a big feature of the Convention.

I am sure you will find a trip to Hamilton this year both pleasant and profitable, and I take pleasure in extending to each and every hardware man in Ontario a sincere and cordial invitation to "come."

Nelson Mills, President.
Hamilton, Ont., January 14, 1922.

GROWTH OF PAINT INDUSTRY

(Continued from page 104)

and varnishes is probably twice or thrice that of 1920.

"As a result of the co-operative educational effort conducted by the trade in the "Save the Surface" Campaign, the business of 1921 has unquestionably been better than could otherwise possibly have been the case because the reasonableness of arguments used has assured their active acceptance. It is confidently expected that this improvement will become much more accentuated during 1922, since an outstanding characteristic of the campaign is its cumulative value. Along with this it must be realized that Canada will attract a large immigration for many years to come and will also take a growing place in the great export markets of the Atlantic and the Pacific, all of which must spell unlimited opportunity for our own and other industries which are built up and maintained on a quality basis."

EXPLANATION AND CORRECTION

In the Christmas Greeting advertisement of The Coleman Lamp Company, on page 39, December 17 issue of Hardware and Metal, two illustrations appearing inadvertently may have caused a misapprehension. Owing to an error in our mechanical department two illustrations of lamps belonging to another firm were wrongly inserted in place of two illustrations which should have featured Coleman products. The announcement was one in which the Coleman Lamp Company, Limited extended seasonal greetings to the hardware trade of Canada but the inclusion of the two cuts as shown was not intended by the Company, and as previously stated was due to an error. "Advertising Department, Hardware and Metal."

HELPFUL IDEAS FROM CUSTOMER'S COMPLAINTS

(Continued from page 103)

manufacturer." After such a comment it is almost impossible to convince a customer that any paint you sell is not an "off lot."

It often is advisable to have the manufacturer send an expert to look over the job with the dealer's paint man, but it is bad judgment to have this man do all the investigating and adjusting. You or your man may learn a lot from each bad job. This knowledge is valuable.

Many dealers believe the customer must be satisfied regardless of the justice of the claim. If it is impossible to prove where the fault lies, forget not that ninety-nine times out of a hundred the fault is not in the goods and if you make allowance, be sure to convince the customer that you believe the goods are right, but as the truth cannot be shown, you give him the benefit of the hundredth chance even though it be a probable injustice to the goods and manufacturer and yourself.

To sum up, you want, first a record of the sale and conditions at time of sale; second, a careful investigation at time of complaint by competent man; third, a little detective instinct to "smoke out" the truth if dishonesty was mixed with the goods; and finally, a diplomatic way to refuse when you must refuse, and perfectly honest admission when the goods show faulty without due cause.

It is wise to give the customer the benefit of the doubt. With the majority of manufacturers you will find this same spirit shown, but don't be unjust to the manufacturer because you think he is easier to handle than is an irritable customer. It will pay you to be fair to both.

No customer will respect you or trust you if you don't believe in your own goods and the men who make them.

Roofing Nails — American, large head, keg, $10.50. Less quantities, $12.50.

Brush Up!

There's a big trade waiting for the man who brushes up his paint department and decides to feature Simms Paint and Varnish brushes. These brushes are known by name and they're known by the work they do.

Most painters are familiar with this trade mark.

TRADE SIMMS SET IN RUBBER MARK

It is a name that means that the brush on which it is stamped is everything that a good brush should be. It means that the bristles will never budge from their vulcanized rubber setting, that the bristles, the handle, the ferrule and the setting are of irreproachable quality, and that the brush is perfectly balanced to do the most work without tiring the wrist.

Feature Simms and build a permanent trade.

TINKER TOM'S TALKS.

No. 343.

(Say, that's a lot of Talks! Almost as garrulous as McClary's Wireless. T.T.)

BACK ON THE JOB!

Some of the "old boys" in the sheet metal line are due for a shock in 1922—They're going to find that it will be a "Happy New Year" compared to old 1921—

PROVIDED——?

Well—if they wake up and go after the jobs for one thing, and then don't forget that **good galvanized sheets** to a tinsmith or metal worker are as fine woolen cloth to a tailor! There may be other good makes, but why take a chance when the world's best is made in Canada and

PREMIER

is yours for another year.

TINKER TOM.

DOMINION SHEET METAL CORP. LTD
MADE IN PREMIER CANADA
HAMILTON, CANADA.

CURLING STONE

Headquarters

Mac's Special

Specially designed for us to suit our hard, keen ice. The weight is distributed in such a way as to give the running surface sufficient grip to hold whatever turn may be given, without any tendency to rock or roll.

Kay's Excelsior

Manufactured by Andrew Kay & Co., this stone has a world-wide reputation. An absolutely first-class stone that has given satisfaction wherever the game is played.

ACCESSORIES—We carry a full line of Accessories, Brooms and Boxes

BUILDERS' HARDWARE SPECIALISTS

Winnipeg Paint & Glass Co. Limited

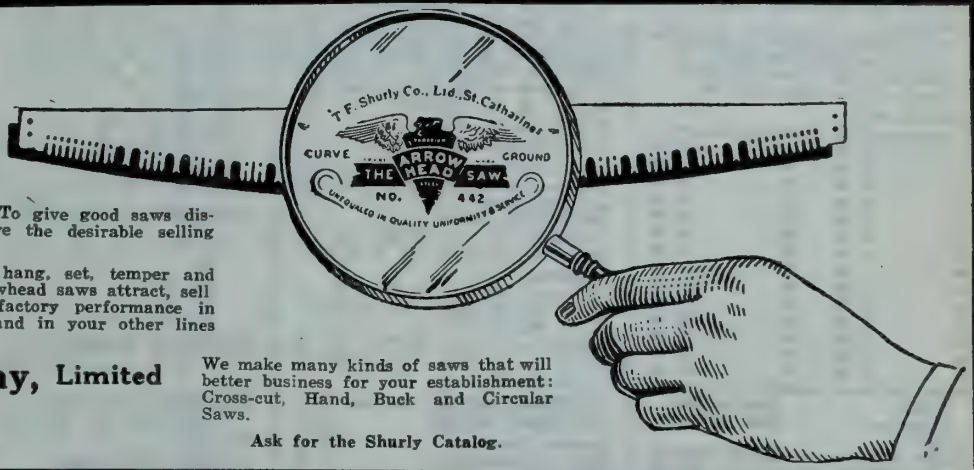
WINNIPEG CALGARY SASKATOON

Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.



T. F. Shurly Company, Limited
St. Catharines
Ontario

We make many kinds of saws that will better business for your establishment: Cross-cut, Hand, Buck and Circular Saws.

Ask for the Shurly Catalog.

Lay Flat Poultry Fence

Lay Flat Poultry Fence is a comparatively new feature of the wire netting and fencing trade. It is a great advantage to users of these goods. The feature that pulls is, that it is made on the same lines as farm fence. It is a perfect fabric with hinged joints. It is strong, stiff, and straight; when unrolled it lies flat and straight. This requires no toprail, base-board or extra posts.

Let People Advertise Know! and Display Goods

No. 1

Galvanized Poultry Netting Staples

Effective, reliable staples in galvanized, No. 1 size, 13 gauge. These are conveniently packed in 10-lb. boxes and 100-lb. kegs. Also barbed, blind staples, No. 2 size. In ½, ⅝ and ¾. Packed in 10-lb. boxes.

"L" Union Lock Poultry Netting

This is a handy, convenient netting that shows to advantage and sells well. The spacing of horizontal, or line, wire is: First six wires 1¼ inches apart; next three spaces are each 1½ inches apart; the next six spaces are each 2 inches apart. All spaces above 15th bar are 4 inches apart. There are ten rods in a roll (165 feet.) Bring this to your customers' attention now with good displays.

THE GENDRON MFG. CO. LTD., Toronto, Canada

Here's a Money Maker!
MAPLE EVAPORATOR
and
WELDED STEEL SAP PAN

This evaporator fills the popular demand for a handy, efficient, up-to-the-minute machine at a reasonable price.
It is specially made to meet the requirements of the small farmer who wishes to get all the money profits out of his maple bush without too heavy an outlay for apparatus.

Welded Sap Pan—no solder about it to melt or leak—a pair of handles on each side and heavy angle steel around top.
Standard sizes: 6″ x 24″ x 5′ ; 6″ x 36″ x 7′ ; 6″ x 24″ x 7′ ; any size to order.

Placed on market last year and proved a great success.

Write us for trade prices and further particulars regarding these two money makers — we also manufacture steel baths, tanks, sanitary closets, dairy equipment, etc.
Send list of prospective buyers and we will mail literature to them.

The Steel Trough and Machine Co., Ltd.
Tweed, Ontario, Canada

WIRE WORKING MACHINERY
of Every Description

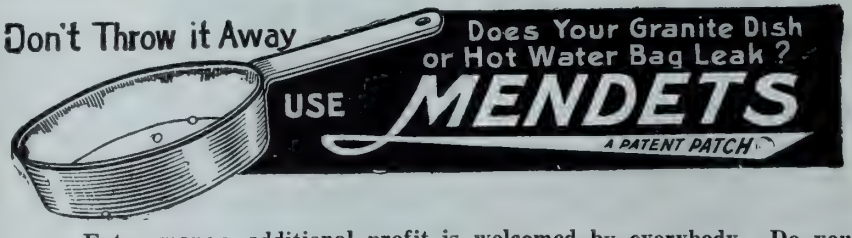
Spring and Wire Coiling Machines, Nail Machines, Staple Machines, Lock Washer Equipment, Flexible Shaft, Tubing and Casing Machines.

SLEEPER HARTLEY, INC.
WORCESTER, MASS.

K—T
Clothes Line Pulleys or Well Wheels

Roller Bearings and a positive rope guide make them good sellers. They are lighter, and stronger, and don't squeak. We also make K-T Cobbler Sets, Coal Chutes, Clean Out Doors, Well Wheels, Window Weights, Horse Weights and Builders' Castings.

The Katie Foundry
Galt Ontario



Extra money, additional profit is welcomed by everybody. Do you know that Mendets are selling by the millions of boxes? Do you know that you have only to put a display package on your counter and they'll sell while you're busy? You might as well have this extra profit coming in.

Barrett Roofings, Cements Industrial Paints etc.

IT is *repeat* sales, not *first* sales, that keep business going and growing. That's why successful dealers like to handle Barrett products. They know from experience that these products make satisfied customers and that satisfied customers make profits.

Elastigum Plastic Patching Cement

A tough, elastic, waterproof cement for general repair work and waterproofing purposes. Known as "The Plastic Cement of a Hundred Uses." Unequalled for patching holes in roofs, repairing flashings, gutters, etc., etc.

Comes ready for use in 1-lb. tins (24 to the case); 5-lb. cans (12 to the case) and larger packages up to barrels of about 600 lbs.

Plastic Elastigum being applied to make a water-tight joint around a ventilation pipe. It sticks to any surface.

Everlastic "Rubber" Roofing

The fastest selling roll roofing on the Canadian market and the first choice of experienced buyers for all steep-roofed farm and factory buildings. Everlastic is a safe roofing for you to sell and a safe roofing for your customers to buy. It sells at a low price, is easy to lay, and gives unfailing satisfaction.

Everlastic "Rubber" Roofing comes in three weights; light (1-ply), medium (2-ply), heavy (3-ply). Rolls of 108 sq. ft. Nails and cement for laying are packed with each roll.

Everlastic Liquid Roofing Cement

The greatest material in the world for resurfacing worn-out prepared and "rubber" roofs. Comes all ready for use, is easy to apply and forms a smooth, durable, weather-proof coating which adds years of service to the old roofing, at very small cost.

Put up in all sized packages from 1-pint tins to barrels of 40 gallons.

HOYT METALS

PROOF!

Hoyt Metals are used by every shop and factory that prides itself on maximum production. That the sales of Hoyt Metals amount to $10,000,000 annually is convincing proof of the satisfaction in using or selling these efficient metals. Always cool running. Anti-friction quality and unequalled endurance are superior features of these popular metals.

"Use the Bell to Sell" —and to Buy

Hardware dealers carrying small stocks who re-order supplies from wholesalers by Long Distance obtain shipment the same day and are able to give the kind of service that quickly becomes popular.

They do not have to lock up so much capital in stock.

An increasing number of firms credit their customers' accounts with the cost of Long Distance messages when ordering goods. It pays .

The British Government

(Department of Overseas Trade)

Announces that the Eighth Annual

British Industries Fair

will be held at

LONDON AND BIRMINGHAM

from

27th February to 10th March, 1922

All Canadian buyers are cordially invited to attend.

A particularly fine and comprehensive range of

Builders', Marine and Household Hardware

Metals and Brushware

Colours and Varnishes

will be shown in addition to many other lines of manufactured goods.

Goods can be examined, values compared and contracts concluded at the Fair with the minimum of trouble and the greatest saving of time.

Full information and complimentary admission cards are obtainable from:

H. M. Senior Trade Commissioner,
248 St. James Street, Montreal.

H. M. Trade Commissioner,
260 Confederation Life Building, Toronto.

H. M. Trade Commissioner,
610 Electric Railway Chambers, Winnipeg.

If interested tear out this page and place with letters to be answered.

JARDINE
Pedestal Blower

A new, simply designed blower with only two pairs of gears which, because of scientific designing, run practically silently, without friction. The gears are flooded in oil; the fan shaft runs in ball bearings. Superior design gives the Jardine No. 14 a superior blast pressure for the power applied, and straight into the air pipe without the loss, by faulty direction, as in many ordinary blowers.

Ask for Catalogue No. 18 of our full line of Blacksmiths' Tools and Machines.

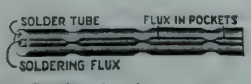
KESTER ACID CORE WIRE-SOLDER

FLUX IN POCKETS

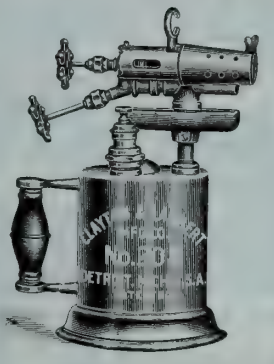
— a self-fluxing solder for automotive and general work. Flux and solder are applied in one operation, because the flux is contained inside the hollow wire of genuine tin-and-lead solder. In great demand by all solder users because it saves two-thirds of the workman's time and gives a strong bond the first time. Comes in convenient packages and spools that are easily stocked. Write for free sample—investigate this easy-to-sell, easy-to-use, easy-to-stock solder.



Sectional view. Note flux in pockets.

Kester Rosin-Core Wire Solder is also manufactured for delicate electrical work.

Chicago Solder Co.
4225 Wrightwood Av. Chicago, U.S.A.



No. 208 Torch
List price each $17.00. Ask for Discount.

A FEW WORDS ABOUT DOUBLE NEEDLE TORCHES

They have wonderful generating power. Produce 300 degrees more heat. Burn Gasoline or Kerosene. Upper Needle has wire tip that cleans orifice, lower regulates flame. Both Needles are blunt, making it impossible to ruin the Burner by enlarging the orifice as in old style Burners with Sharp Pointed Needles. Double Needle Torches give perfect satisfaction. Jobbers supply at factory prices. Catalogue mailed upon request.

STAR HACK SAWS

Your Reputation— What is it Worth to You?

One dealer told us recently: "Why should I stock Star Hack Saws. I can sell my customers any blade that I happen to have in stock."

"True," we said, "you can sell your trade the hack saws you recommend. But if you recommend a blade that is unknown, the customer is going to watch it critically. If it isn't quite up to the mark, he will blame you for the poor choice.

"Put your recommendation behind the Star Saws, and you have our reputation added to yours. Our 38 years of success as manufacturers added to your years of successful selling."

Star Saws are now sold direct from the factory in Middletown, New York, where they have always been manufactured.

An Axe is as Strong as its Handle

STILL'S

—will give you a stronger working tool, for **STILL'S HANDLES** are made from the best of Canadian woods.

The sale of

STILL'S HANDLES

far exceeds all other makes.
There's a reason.
Axe, Pick, Sledge and Hammer Handles, Cant Hook and Peavie Handles.
It pays to sell **STILL'S.**

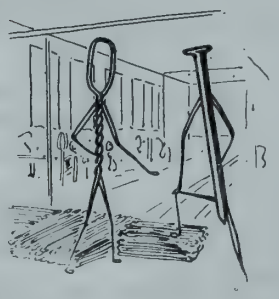
LAIDLAW'S WIRE BOYS

Their chat No. 13

Wire ½ to 5/1000 of an inch



"We've got lots of latitude, B.T., in selling wire, for the Laidlaw people turn out wire ranging in gauge from 1-2 in. to 5-1000 of an inch in diameter.

"They supply wire for practically every purpose, for any kind of a special machine, any strength, any shape, any finish."

"Say, that's going some, W.N., and they are all up to the Laidlaw standard too—that's the best part of it."

Wire's not always wire— there's wire and *wire*.

Laidlaw Bale Tie Co. Ltd.
Hamilton - - Canada

MYERS POWER PUMPS

Are designed and built for home, farm, factory, mill, mine and similar services. Standardized, simplified, modernized, operation and power, they can be depended upon for uniform and lasting service. Many styles and sizes meet capacity requirements. Operation any power.

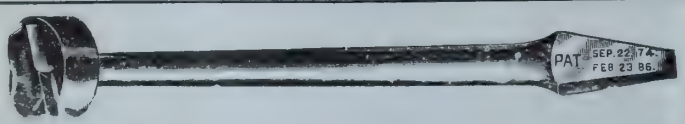
A CHANCE OF A LIFETIME

HARDWARE AND FURNITURE BUSINESS in best town in Canada to-day stock between five and six thousand would reduce. Average turnover since June 1st, five thousand. November sales seven thousand two hundred. Sold over two hundred stoves. Brilliant future. Big building contracts let for next year. If interested write for particulars, Box 98, Hardware and Metal.

MISCELLANEOUS

NICKEL PLATING — ORDERS EXECUTED promptly. Prices on application. Communicate with F. W. Higginson, 173 William St., Montreal. Telephone Main 8144.

HARDWARE & METAL is the only weekly hardware paper in Canada and is read by practically every worthwhile buyer, both wholesale and retail, in Canada. HARDWARE & METAL is the logical medium to use if you have a message for the Canadian hardware trade.



THE PROGRESSIVE MANUFACTURING CO.
Torringto, Counn., U. S. A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

TRADE MARKS

Any trade-mark shown on this page, when stamped on an article of hardware, is the manufacturer's personal "O.K.," guaranteeing the quality of the product.

Metal Stamping and Press Work to Order

Also name plates, embossed trade checks, time checks, badges, steel stamps and stencils or anything in steel or brass lettered or embossed to order.

TRADE MARK ARMCO REG. U.S. PAT. OFF.

PURITY THE BASIS FOR RUST-RESISTING IRON

ARMCO Ingot Iron, is the **only pure iron** manufactured in commercial quantities by the Open Hearth furnace process. Pure Iron of the ancients after hundreds of years of service under the most severe conditions has demonstrated that purity is a fundamental requirement of a long lived ferrous metal. ARMCO Ingot Iron is even more pure than these ancient irons.

ARMCO Ingot Iron contains in the aggregate not more than sixteen one hundredths of one per cent. of the impurities—manganese, carbon, copper, phosphorus, sulphur, silicon and the gases, oxygen, hydrogen, and nitrogen, common to other ferrous metals. Such an extreme purification results in a dense homogeneous iron that will resist rust and give long service.

Elimination of impurities in iron is highly important because the presence of such substances as manganese and copper, as well as excessive gases, accelerates electrolytic action which has been found by eminent metallurgists to be the cause of rapid corrosion.

The artificers of old could not have been any more careful or painstaking in their crude processes than are the highly skilled workmen in Armco's modern plants, who, today are responsible for the purity and service giving qualities of rust-resisting ARMCO Ingot Iron, Sheets and Plates.

B-H "ENGLISH" PAINT

CANADA'S FAVORITE

FOR upwards of five decades we have been engaged in the manufacture of B-H "English" and other Paint and Varnish products of such a high order that every sale has resulted in repeat business for all our agents.

However, the best paint in the world cannot sell itself unaided, so we go even farther and ensure a regular and handsome profit for the B-H Dealer by constantly increasing the demand for our products.

How? — by our regular advertising programme, which is the most extensive of its kind in Canada.

Write us for full particulars of our Agency Proposition

Send for these Attractive New Window Cards

Up-to-date, fresh and bright store or window cards, such as we show above, will add punch to February sales in Pearl and Diamond Ware. They are finished in red, green and black, and are yours for the asking. Be sure and specify, however, whether you are featuring Pearl Ware or Diamond Ware, so that the proper cards will reach you.

Push Diamond and Pearl Ware

Last week we told you that during 1922, SMP had pledged itself to assist you in selling goods more than we have ever in the past. These attractive window cards are part of our campaign to this end. Use them to help sell Pearl and Diamond Ware at profitable prices.

'RICE LEWIS' NEWS

IF you are doing business on a third smaller stock, as most hardware dealers are, you will find it to your advantage to allow us to help keep your stocks assorted with seasonal lines.

Your inventory will show you the weak spots in spring stocks.

Write to us and make known your requirements, whether in staple, household or specialty hardware or sporting goods and we will give your needs our prompt, careful attention.

RESISTAIN STEEL CUTLERY

STAINING, rusting and spotting are as natural to ordinary steel cutlery as buzzing to a bee. "Universal" Resistain Steel Cutlery is a joy to the housewife as it does away with the three S's—Scraping, Scrubbing, Scouring. It makes an outright pleasure of what has been a downright nuisance as it is cleaned merely by washing with soap and water.

"UNIVERSAL" Resistain Steel blades neither rust, tarnish, nor acquire acid stains. They cannot be surpassed in smoothness of finish, temper, flexibility, keenness and wearing qualities. They cannot be equalled in stain-resisting and rust-proof features.

RESISTAIN Steel is produced exclusively by "Universal" patented formula. It can be had only in "Universal" Carvers, Kitchen Cutlery and Silver Overlaid Table Service.

TELL your trade the advantages of "Universal" Resistain Steel Cutlery. It is a line with which to build increasingly paying business.

Write for Bulletin showing complete "Resistain" line.

TRADITIONS

Sixty five years has passed since James Smart founded on the banks of the St. Lawrence River the business which still bears his name. Dedicated to the ideal that the people of Canada should be furnished with products of wood and metals high in quality and fair in price, this institution has grown and prospered. Throughout the years that have gone and in the years that are to come, fair dealing is the corner stone of this business. Such traditions handed down make us very proud to mark "SMART" on these products of proven worth.

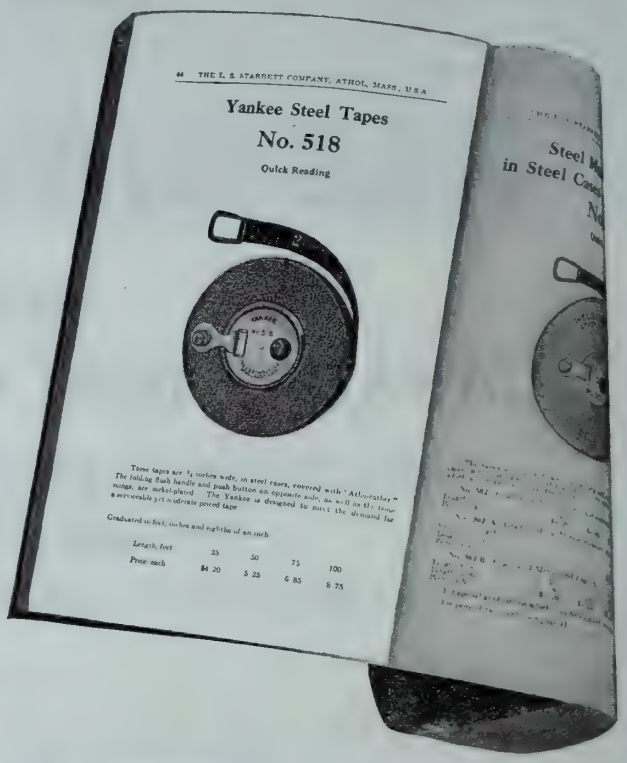
New Tools You Should Know



YANKEE STEEL TAPES

No. 518
With Quick
Reading
Features

Starrett quality—Starrett accuracy and service—yet moderate in price. There's a demand for a line of tapes like that, and "Yankee" tapes were made to meet it. This new Starrett line is illustrated and described on page 44 of the new Starrett Catalog No. 22 "MA." Note that these tapes have the Starrett "quick reading" features, and are equipped with nickel-plated folding flush handles with the handy Starrett "push-button" handle opener. Get the data on this and other new additions to Starrett Tools. And write for the Starrett booklet—"The Tools Mechanics Buy."

"New Century" Horizontal Double Acting Force Pump

With Cog Gear Action

An efficient, easy-working house force pump designed to give satisfactory service and guaranteed to do so.

The cylinder is brass lined and is fitted with brass valve seats and rubber valves. They are easily accessible by removing the individual cap which is fitted over them.

The cog gear action considerably reduces the power necessary to operate the pump, thus making it ideal for use in any home.

We carry a complete line of all styles of pumps in stock and McDougall products are so well and favorably known from coast to coast that they sell themselves and are an excellent line to carry.

Write us for price list and general catalogue and always consider our services at your disposal in solving any pumping problem.

"STERLING"

Oil Stove Ovens

A THOROUGHLY reliable oven, and, on account of the Davidson quality, always a ready seller. This "Sterling" line is made of heavy gauge blued steel, strong and durable. For two burners and is protected by a heavy asbestos lining, which also prevents waste heat. Japanned with a rust-proof combination which adds to the life of the oven. Cold handles at side and a door knob which locks in three places—heavy panel glass in door. Illustration shows oven closed and open.

Get your share of this good will

Hardware dealer, the farmer and the manufacturer are "all in the same boat!"

All over the country the land is covered by Frost Fences set up many years ago and still standing tight and tidy. The Special Frost quality wire (drawn and annealed in the Frost factory) is still braving the storms, its extra heavy galvanizing preventing rust and the waved lateral wires recovering their original tautness over and over again after unusual strains.

FROST

FENCE

No wonder those farmers feel good towards the dealer

who sells them Frost fence—the fence that stands up years after ordinary wire fences have to be replaced. And it explains why the Frost organization enjoys the biggest fence business in Canada to-day.

By selling Frost fence you can deserve your share of this good will earned by Frost quality and reliability. This good-will makes the farmer a steady customer for you in all your lines.

Again in Demand

The wooden tub is back—the high cost of the metal is largely responsible, but a wooden tub has other advantages.

There is no galvanizing or plating to fall off. No rust to spoil clothes, and hot water retains its heat longer.

Cane's wash tubs will be favored. They last a lifetime and are built with the workmanship that has made Cane's Woodenware popular for over thirty-five years.

Order a supply of Cane's Tubs from your dealer for a source of Good Revenue

Why has Hardware and Metal Such a Large Western Canada Circulation?

There are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Winnipeg.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London and Pittsburgh — and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the *only* hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 33 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

HARDWARE AND METAL

"Canada's National Hardware Weekly"

LAIDLAW'S WIRE BOYS

Their Chat No 14

The fellow with wire shoe-laces

"Say! B. T., I stumbled into a funny one the other day—a fellow with wire shoe-laces—some laces though, handy, unbreakable, neat, always tied. The part that interested me most was the fact that he was having trouble to get imported wire to meet the requirements, I had a sample turned out for him in our plant—the proper shape and quality and got the order in competition with other manufacturers."
"That just proves my contention W. N.,—Laidlaw Service is a winner."

Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.

Anticipating Trend of Hardware Prices

Letters From Hardware Manufacturers in Connection with Campaign of Canadian Wholesale Hardware Association for Stable Price Basis, Reveal Interesting Facts Concerning Industrial Conditions and the Probable Price Trend on Hardware Commodities.

A NUMBER of interesting comments in regard to price tendencies on hardware lines, of interest to the retail hardware trade, were made to the Canadian Wholesale Hardware Association, by manufacturers in letters just received. These letters were in response to a letter from the association which is outlined on this page, and the comments of manufacturers are dealt with in the following:—

Advancing Market in Cordage

A cordage firm states. "In our mind rope prices have reached the bottom for the present period, and any changes will be upwards. Our raw material, which is approximately about 60% of the cost of our finished article, has advanced several cents per pound in the last few weeks, which has necessitated a slight advance in some of our lines, with the prospect of further advances in the near future. While we are anxious to keep our prices at the lowest possible point, in order to help out the demand for lower prices, we are compelled to base our selling figures, to a large extent, on the cost of our raw material."

Wire Cloth and Matting

A wire manufacturer says: "We have gone very carefully into the matter of prices and we do not see that there will be any further reduction either in Black Wire Cloth or Netting for the coming season."

Aluminum Ware

An aluminum ware manufacturer: "A substantial reduction was made on all our lines on December 1, and no further decline is anticipated for some months at least."

Tools

A tool manufacturer: "We do not contemplate any change in the price of our goods in the near future. Our prices are based on the present cost of raw material with the present cost of manufacturing added. This has been our practice and as our present prices are based on our present costs, we cannot make any further reduction or any change in our prices until we find a change in our cost of manufacture."

LETTER TO MANUFACTURERS FROM CANADIAN WHOLESALE HARDWARE ASSOCIATION

Toronto, December, 1921.

To Manufacturers:—

(Contemplated Price Changes)

Our conferences and correspondence with members indicate that there is an almost unanimous opinion favoring the completion of downward price revision by manufacturers before the end of this year and it is the opinion of this Association that manufacturers would serve the best interests of the trade:—

"If they would make any contemplated price reductions by the 31st inst., so as to establish a more correct inventory basis and also to reach stable conditions in their respective lines."

We are therefore presenting this suggestion for your consideration in order that you may be advised as to the opinion of our members regarding contemplated price changes being made before the 31st inst.

This is felt to be particularly desirable to prevent the payment of taxes on an incorrect, inflated basis, and also so that when business becomes more active the price position on your merchandise may be such that the trade and the ultimate consumer will have confidence in its fundamental soundness and safety.

In order that our members may be fully informed, will you kindly tell us what action along this line you have already taken, and your present expectation in the matter.

(Signed) JAMES HARDY & SON,
Secretary-Treasurer.

Weakening in Roofing

A roofing manufacturer: "Prospects are, prices for Roofing Felt and Building paper will weaken by the end of the year (1921).

"Anyone interested along these lines of your suggestion would do well to communicate with manufacturers, shortly after the beginning of the year."

No Change in Stoves Before End of January

A stove manufacturer: "In so far as the firm is concerned there will be no further revision in prices this year and it is not likely that the prices of stoves or furnaces will be reduced before the end of January."

Screws, Nuts, etc.

A manufacturer of screws, nuts, etc.: "Regarding a revision of discounts on our line we would advise that this matter is having our careful consideration, and we will probably be able to make an announcement to you in regard to this matter about the middle of next week.

" You may be assured that as a manufacturer of milled screw products in Canada, we are very anxious to stabilize business by creating confidence in the minds of purchasers that our discounts are as low as they can be made having due regard to the cost of material and labor."

Wire Cloth, Rope, etc.

A manufacturer of wire cloth, wire rope, etc.: "We quite appreciate your comments on the subject, and wish to advise you that we have already anticipated your wishes in this respect. Effective December 20, we issued revised prices covering Shelf Grades of Japanned Wire Cloth to the members of your association."

Bicycles, Skates, etc.

A manufacturer of bicycles, skates, etc,: "We are selling our goods for a reasonable profit on replacement value. When prices for this year were fixed last January on skates, it was on the replacement value then, and when we are fixing them for next season, it will be on the very latest costs for labor and material. Bicycle prices have also been fixed on the same basis. We have taken a very heavy loss on Inventory reduction, but we have worked along the lines suggested in your circular, believing this to be the only business policy."

No Changes Before July on Floor Coverings

A manufacturer of cocoa mats, jute carpets, rugs, etc.: "We quite agree with your views in this matter and are pleased to be in a position to say that we have been working along the lines which you suggest for some time. As conditions now stand in regard to both raw materials and labor, there is no possibility of lower prices on our lines for some time to come but it would be impossible to state what period this will cover as no person knows definitely what is going to happen in regard to price of either raw material or labor in the next few months. We endeavor to avoid making too many changes in our prices. Any changes that are necessary we make either on the first of July or the first of January and as it is not possible to make and change now, we are practically prepared to guarantee our present prices until 1st of July, 1922."

Farm Implements, etc.

A manufacturer of farm implements, springs, steel troughs, post hole augers, snow shovels, barrows, etc.: "As far as we are concerned our prices were made out at the lowest possible figure during this year, when canvassing for merchandise for spring delivery, which we have to do quite early in the fall. We believe we have submitted to the jobbing trade prices on all of our goods at the lowest figures possible for spring delivery, and if orders are not placed pretty soon, and any large quantity of goods is required we believe there will be an advance in prices. If orders were received at the present time, help could be secured during the dull season and the rate of wage paid the workmen would be more reasonable than will take place if orders are left until the actual spring requirements are made known. A scramble will then take place to secure workmen and an advance in wages will then take place."

Fans, Heaters, etc.

A manufacturer of fans, heaters, engines, pumps, etc.. "As far as this firm is concerned we have endeavored to do our share toward getting business on a stable basis by very radical price changes the last of which took place on Sept. 1, and our prices at the present time are practically what we were selling the same goods for in 1915 and 1916. Moreover, we are not taking advantage of the protection afforded us by duty on goods which we manufacture, but are at the present time selling at an advance of 10 or 15% higher than prices of the same goods in the United States, which, we think the wholesale hardware dealers will agree with us, is all that can be asked of us under the present conditions.

"It is hardly necessary for us to enter into a discussion covering the duties of the manufacturer and dealer, but we think that part of the responsibility should rest on the latter as well as on the manufacturer who in most cases has done his share and it is up to the dealer to reduce his prices to a replacement basis, which we feel a number of them have not done."

Woodenware

A manufacturer of woodenware: "While we are not hardware merchants, we take pleasure in advising you that we at all times as nearly as possible follow the market up or down, and all of our stock at stock-taking, will be taken as at replacement value, as near as we can estimate, and we prefer to estimate under rather than over."

Tools, Shovels, Unchanged Before May

A manufacturer of tools, shovels, etc.: "We do not contemplate making any reduction in prices for some time to come, unless something unforeseen turns up to make this action necessary. As you are aware, we made substantial reductions in our prices on June 1 and again on October 25 so that figuring costs on replacement values, our selling prices are now on a very low level, in fact some of our lines actually show a considerable loss.

"Our prices are guaranteed until May of next year, and in our opinion, taking everything into consideration, prices should remain stationary during this period at least, although you can understand it is a difficult matter in these days to forecast the future correctly."

Shovel Prices Unchanged Before May 31

Another shovel manufacturer: "As we now understand the situation the shovel makers do not contemplate any change in price before the 31st of May, 1922. prices being guaranteed against all decline up to this date."

Brushes Unchanged Before July

A brush manufacturer: "There will be no changes in the price of brushes until July 1 next. Our new materials were lower last June than they have been since and if there is any change it will be upwards."

Refrigerators, Screen Doors, etc.

A manufacturer of refrigerators, screen doors, etc: "Our prices for season of 1922 were issued in October and were based as close to actual cost as we could possibly make them. Since our prices were made some grades of lumber and some other raw materials have advanced, so that it would hardly be possible to make as close prices as we are now using, if they were based on to-day's cost."

Washers, Pumps, etc.

A manufacturer of washers, pumps, woodenware, grain grinders, etc.: "We went into our costs very carefully at the end of September and made prices at that time which we hoped would hold good for a year. Changed conditions may require certain revision but on the whole we believe there will not be very much change."

Saws and Other Tools

A saw manufacturer: "We have gone over the matter of prices, pretty care-

(Continued on page 52)

Pittsburgh-Base Case Now Being Heard

"Greatest Law Suit Ever Tried in U. S." Says Judge Gary—Further Readjustment of Selling Prices on Iron and Steel May Take Place

THE "PITTSBURGH BASE" or "Pittsburgh plus" case now being heard in Washington is said to be the most important ever before the Federal Trade commission Judge Gary has stated it is the greatest lawsuit ever tried in this country. It involves an annual amount of $75,000,000 now being received by the steel mills, as well as a readjustment of the entire steel industry, beyond that which has already occurred through the voluntary action of steel manufacturers.

The case was filed before the Federal Trade Commission on July 21, 1919, on the complaint of the Western Association of Rolled Steel Consumers and grew out of the trade practice which prices all rolled steel "f.o.b. Pittsburgh." That is, no matter where the steel is made or shipped from "it is priced at the Pittsburgh mill price plus the freight from Pittsburgh to the point of destination."

The original complaints, jointed by many steel, civic and commercial organizations throughout the south and west, claims that the practice discriminates against western and southern industry. According to them the Pittsburgh manufacturers, due to this practice, compete with them on equal terms, but when they desire to sell their products in an eastern market they are compelled to pay two freights, "the imaginary freight," as it is termed by the Federal Trade Commission, and the actual railroad charge to the eastern point of destination.

Farmers claim this practice has increased prices of steel articles used on the farm. They complain that the "Pittsburgh base" practice deprives them of the advantages of a wider home market and compels them to ship farm products to distant points to their economic disadvantage.

Retailers Discuss Important Topics

Fourth Annual Convention of Eastern Ontario and Ottawa District Retailers Indicates Much Progress—Increasing Importance of Retail Merchants is Emphasized

By Special Correspondent Hardware and Metal

KINGSTON, Ont.—Many important resolutions relating to the retail trade were passed at the fourth annual convention of the Retail Merchants' Association of Eastern Ontario and Ottawa district which convened in this city on Tuesday and Wednesday of this week. The sessions were held in the Y. M. C. A. hall, and President Henry Watters of Ottawa, presided. Delegates were present to the number of about 250, representing points as far west as Trenton, and points in the east as far as Cornwall and Ottawa.

Mayor Corbett's Address

Addresses of welcome were given by Mayor S. S. Corbett on behalf of the city of Kingston and W. Y. Mills on behalf of the Kingston branch. The place the retail merchants hold in business is well known, and all appreciate the splendid work it is doing in the interests of legitimate business throughout Canada, said he.

W. Y. Mills, in welcoming the convention on behaf of the local branch, said:

"Gentlemen, in extending to the members of the Retail Merchants' Association of Canada a very hearty welcome to the city of Kingston, I do so in the pleasurable knowledge that it is to a great extent a fraternal return for the hospitality the Kingston retailers received in other centres where our conventions have been held, and the pleasure is much increased by the thought that many friendships formed on those occasions will now be strengthened and renewed."

President Watters Replies

President Watters replied on behalf of the officers and thanked the Mayor and President Mills for the warmth of the greeting which was fully reciprocated by all. The convention gave them a splendid opportunity to see Kingston, a city of great historic importance in Canada, and the privilege would be availed of to the fullest extent, when the business of the sessions permitted.

The report of the secretary, J. C. Campbell, of Ottawa which followed, showed the membership of the district to be 1,550, and this was regarded as a most gratifying report.

T. W. Collins, the treasurer, of Ottawa, also submitted a report, and it showed that the association had a surplus of $1,785.98.

An eloquent plea for a united Canada was the feature of an excellent address by Major-Gen. Sir A. C. Macdonell in proposing the toast to "Canada" at the banquet given to the Retail Merchants' Association by the Kingston branch in the Y. M. C. A. assembly rooms on Tuesday evening.

W. Y. Mills, president of the Kingston branch, occupied the chair and fully 400 merchants representing all lines of trade, 100 of whom were from outside points, attended. Besides Major-Gen. Macdonell the other speakers were Brig.-Gen. A. E. Ross, M. P.-elect, Henry Watters, district president of the association, R. J. Rodger, Major S. S. Corbett, B. W. Ziemann, Preston, Ex-Mayor Patterson, Brockville, W. C. Miller, provincial secretary, Toronto, and Bryan White, Ottawa. A splendid musical programme was rendered by the Kiwanis quartette.

Major-Gen. Macdonell described Canada as the greatest country in the world, and the present century was certainly her century.

Brig.-Gen. Ross' Address

Dr. Ross received a warm greeting when he rose to respond. He congrat-

Improving Prospects for Accessory Sales

WHILE official figures of total registration of motor vehicles in Canada are not yet to be had, summaries compiled by various organizations indicate that there were registered at the end of 1921, 459,818 *motor vehicles in Canada. By provinces the approximate number is as follows:—Ontario,* 204,455; *Saskatchewan,* 60,836; *Quebec,* 56,400; *Alberta,* 39,835; *Manitoba,* 38,195; *British Columbia,* 32,136; *Nova Scotia,* 14,050; *New Brunswick,* 12,160; *Prince Edward Island,* 1,751. *These figures show comparatively high increase in a number of provinces and indicate the extent to which the field for automobile accessory sales developed during the year. With lower prices now being made on practically all models of cars and with legislation under way making necessary the use of lights on all vehicles, etc., prospects for accessory sales during* 1922 *are good. Displays such as the above will help stimulate early interest in this line.*

ulated Gen. Macdonell upon the profession he represented, "for, said he "without people of his kind the world would have been confined within very narrow limits indeed."

Toast to Association

Albert Patterson, ex-mayor of Brockville, proposed the toast to the Retail Merchants' Association which he described as the greatest organization in Canada. He complimented the merchants upon such a fine gathering which gave an impression of what Canadians should be, for here we learn what it is to be a good Canadian. He told of the early efforts to form the association which were not always encouraging, but to-day the membership is 1,500 and it is soon to be 2,500. This depends upon the men who are now members. Some say, "How does it benefit me?" To that I say we help to extend its usefulness by being members working together.

Henry Watters, district president, responded and gave an exhaustive review of the association including its organization and work, since it last met in Kingston twenty years ago. "I am glad Dr. Ross is here as he may be of some help to us if he is a member of His Majesty's loyal opposition."

We look forward to a return to parliamentary government as many enactments affecting business have been the work of officials governed by regulations of the departments. Many factors of our business cannot be made problems of politics. We are not looking for special favors, but we are a part of the industrial system of this country as distributors. We must recognize this for our class is not organized politically. The arguments of agriculture, labor and transportation apply equally to distribution without which agriculture would be of little use. There is no more reason for an agricultural political party than for a distributing, a transportation or other occupational party.

OFFICERS ELECTED

The convention of the Retail Merchants was concluded at noon Wednesday after dealing with twenty-seven resolutions of great importance to the trade and electing officers. Henry Watters for several years president was re-elected and the other officers are: First vice-president A. Goulet, Bourget; second vice-president, W. Y. Mills, Kingston; third vice-president, A. Sweet, Winchester; treasurer, John Collins, Ottawa; auditor, Alexander Phillips, Ottawa; delegates to the provincial board: Mr. Patterson, Brockville; B. G. Crabtree, Ottawa. The executive will elect the secretary. The date and place of the next convention was left to the decision of the executive.

To Help Promote Trade

We shall endow our new-comers with all the privileges of citizenship. We believe that the Retail Merchants' Association is just as important as any other branch and must insist upon recognition of our interests and we are obliged to go to the government from time to time and press our claims for amelioration of the conditions of which we complain. We hope by means of organizations of this kind to promote everything in the interest of the best methods and measures in trade, and to eliminate undesirable tendencies on the part of merchants such as cut-rate tendencies prevalent at the present time. We are against such methods as a matter of self-defence as well as in the interests of society which should take these things to heart as things which affect its interests. It is a problem in economics as expressed by a noted economist at Harvard University when he said "overhead expense must always be considered," and before all other elements of cost, must always be considered. Week-end sales at cut rates are not sound economics. They are a loss to society. We must transform unsound thinking into sound thinking. There is no gain to business by the practice of methods that are costly and wasteful.

The toast of "Our guests" was proposed by R. J. Rodger and responded to by Mayor S. S. Corbett, Bryon White, Ottawa, Mr. Zemann, Preston, W. C. Miller, provincial secretary, Toronto. Mr. Ziemann told of the benefits of the association to the retail merchants who represented more capital and paid more taxes than any other business in Canada to-day. Mr. Miller spoke on legislation and Mr. White invited all to attend the Ottawa winter carnival.

Resolutions

Fol'owing resolutions were passed.

Asking the legislature to give an interpretation act defining the different trade sections.

That before any manufacturer fixes a retail selling price he should submit a copy to a committee of this association in order that the interests of the retailers may be considered.

That retail merchants report the operation of Suit Clubs in any town, city or district in order that action may be taken again their illegal operation.

That Armistice Day be observed on November 11th regardless of Thanksgiving Day.

Recommending the registration of manufacturers' liens which apply to contracts for goods bought on the instalment plan.

That the executive oppose attempts to carry the eight-hour day in the Ontario and Dominion parliaments for all manufacturing, producing and distributing classes.

Tht any attempt to make the workmen's compensation act applicable to the retail trade be opposed.

Asking the government to omit the retail trade from the operation of the minimum wage act.

That the Dominion board watch attempts to establish investigation into the profits of retail merchants as existing in the United States.

That the matter of smuggling be brought to the attention of the government in order that methods be devised to stop the practice.

Regarding collection of income taxes, asking that the executive study the matter to eliminate duplication.

Expressing disapproval of manufacturers holding retail sales.

Endorsing the action of the Dominion board regarding the manufacturers and wholesalers selling to retailers' customers.

Asking that all false advertising be sent to the secretary to be dealt with by the Dominion board.

(Continued on Page 48)

HERE WE ARE AGAIN

On our way to the Seventeenth Annual Convention and Hardware Exhibition of the

Ontario Retail Hardware Association

to be held in Hamilton on

February 14, 15, 16, 17.

Keep these dates open and be sure and meet us there

Patterns for Making of Spiral Elbows

Written for Hardware and Metal by O. W. Kothe, Principal St. Louis Technical Institute, St. Louis, Miss.

SPIRAL elbows like spiral pipes are considerably stronger than the ordinary cross-seam riveted pipe.

The spiral seam is continuous wrapper around a cylinder and also allows for expansion and contraction.

We first consider the spiral elbow as in any ordinary elbow. In this case we have a six piece elbow if it were made in gore pieces.

So, miter lines are drawn as X-9', x-h; x-D; x-C, etc. Divide the heel lines as 9-9' in the same number of parts as are in the half section.

The full gores as 9'-h, etc., are divided in twice as many spaces as are in the half section. Observe elevation lines are continued from miter line to miter line parallel to the heel lines of elbow.

Now by drawing each of the divisional lines to the center X we are able to trace the spiral line as shown.

When this is drawn, then erase the surplus lines, holding only the intersections of the spiral and elevation lines as 8," 7", 6", 5", 4," etc.

This enables you to reconstruct the elevation lines as 8-8," 7-7," 6-6" 5-5" etc. Also 8-g, 7'-f, 6'-e, 5'-4, etc.

To set out the pattern, observe the first half revolution is set out the same as any ordinary elbow by picking the lengths as 1-2'-2'; 3-3'; 4-4' etc., to 9-9' and set them off as shown.

Now when we take in the other half revolution, notice that the lines incline toward the throat.

This is to take in that slant in the throat and permit the wrapping of the flat metal.

Now in setting these spaces over use space 9-8' as girth and strike arc as 8."

Next sweep arc 7 and then pick line 9-8" and set in diagram of true lengths as 8."

Notice we reach over one line, and so we pick sectional line 8 and set it as 8 in diagram.

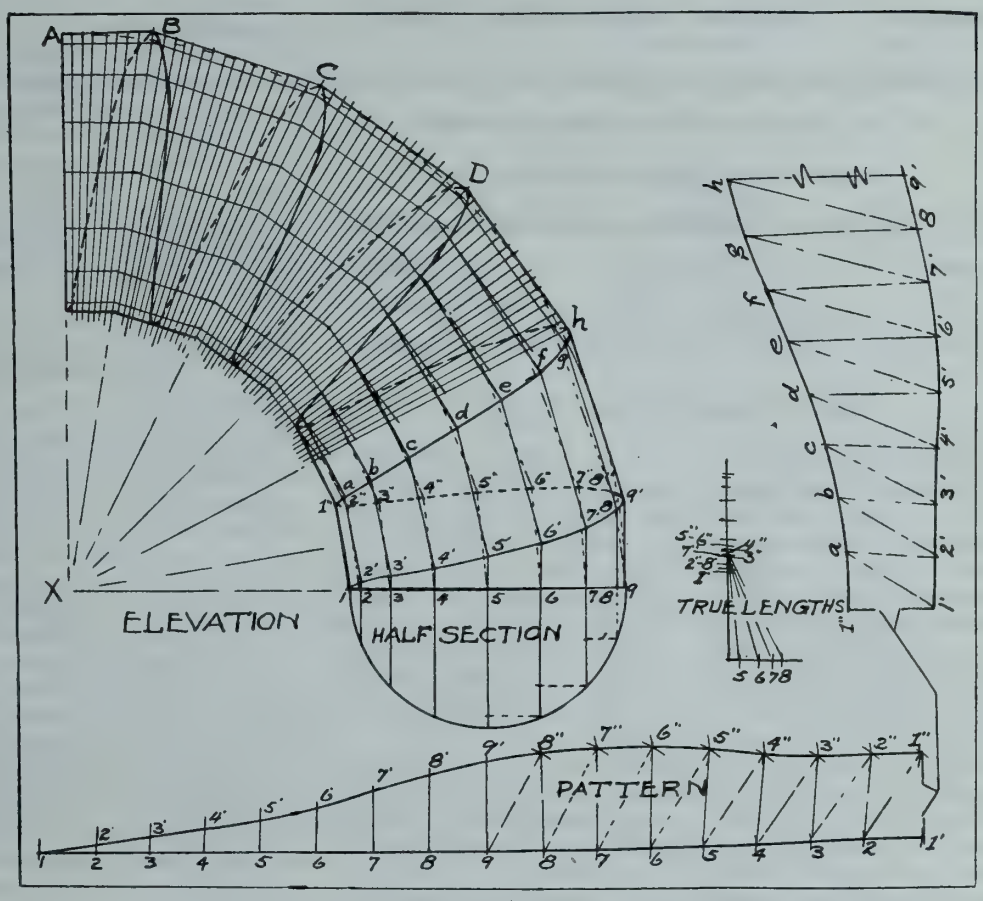
Then 8-8" is our true length. Set this in pattern as 9-8."

Then pick elevation line 8-8" and from 8" in pattern cross lines in point 8.

Strike arc 7" equal to 8'-7' of pattern, and strike arc 7.

Then pick distance 8-7" from elevation and set in diagram as 7".

Then pick the difference between sectional lines 8 and 7 and set this in diagram as 7.



Patterns for spiral elbows.

Then 7-7" is the true length.

Set this as 8-7 in pattern.

Then pick 7-7" from elevation and set as 7"-7 in pattern.

Repeat this process until two revolutions are developed.

Allow laps for riveting.

Note—' ft.; " in.

HON. F. C. BIGGS FAVORS LIGHTS ON ALL VEHICLES

Legislation providing for the carrying of lights on all vehicles, on a province-wide basis, may be submitted by Hon. F. C. Biggs for the consideration of the Ontario Legislature this session, but the matter is not in such shape as to permit the Minister to make any definite statement.

"The subject is one for the Legislature to deal with," he said, but he made it clear that personally he believed thoroughly in the value of such legislation as a factor in safeguarding the users of horse-drawn vehicles.

"So far as the Government bringing in legislation is concerned, the matter has not been considered," he stated. It is realized that such a move, while certain of approval by motorists generally might face considerable opposition from rural members, whose constituents would find such a requirement irksome in many cases.

HARDWAREMAN SPEAKS ON OUTLOOK

London, Ont.—Speaking on "What are we going to do to make 1922 a Successful Year?" before the Rotary Club at its regular meeting this week, C. A. Whitwam emphasized especially the importance at the present time of maintaining a spirit of optimism and of backing it up with hard work.

"It is up to me and every one of us," he said, "to look on the bright side for the future and to boost with all our might. There is no doubt at all that stocks in a great many lines are low, very low. Prices of many lines of hardware are at pre-war levels. Other lines are coming down more slowly owing to the fact that wages much higher than those of pre-war days are being paid. Reports we receive from our travelers, from other travelers and from inquiries in letters from retailers indicate that stocks are low. This will mean a good deal of replacement business soon in order that even ordinary trade be carried on."

Need Accurate Inventory

IT IS ADVISABLE that the annual inventory, as compiled by hardware merchants at this time of year, should be closed up promptly and not allowed to drag along unfinished. Stocktaking is never a likeable job, but if the real importance of the information set forth in an accurate inventory is appreciated, the work will be carried out as diligently as possible. Allowing this operation to remain in an uncompleted condition after the allotted time only tends to becloud the actual condition of the business, and in times like the present the merchant cannot have too much detailed information of an accurate character at his disposal.

Conditions vary among hardware stores, as to the amount of work to be done, the plan followed, and the help with which to accomplish it, but in every case attention should be given to see that some plan is evolved whereby the inventory is closed up definitely within a reasonable time so that the merchant may know exactly where he stands. A number of suggestions have been outlined in recent issues of Hardware and Metal by which the work may be materially reduced and specific information of a valuable nature secured. Where there are merchants who have not a regular bookkeeper or accountant, temporary assistance might be secured at small expense to assist in completing the inventory.

While it is important for the merchant to have accurate knowledge of the condition of his business, it is also important at present to have such information for the guidance of bankers, insurance companies, wholesalers, tax collectors, and others, with whom the merchant has dealings. While money rates continue high great care will be taken by such organizations to know exactly the standing of retail firms with whom they do business. Thus it is that from several standpoints the securing of accurate inventory records at the earliest possible time is of vital necessity.

Iron and Steel in 1921

RECORDS of the world's iron and steel industry for the year 1921, which are just now being completed, indicate that production last year fell to very low levels. For instance, the world's output of pig iron last year is estimated at thirty-five million gross tons with steel ingots amounting to forty million gross tons. These figures represent a decrease of approximately 65 per cent. on pig iron and 70 per cent. on steel ingots compared with production in 1920 and in 1913 the world produced almost twice as much pig iron as last year.

It must be remembered, however, that even if current demand required it, the world could hardly produce as much pig iron now as was the case in 1917 due to the destruction of plants and the dispersal of organizations in central and eastern Europe. It is estimated by an authority that the present world's pig iron capacity is about seventy million tons and the possible steel output about eighty million tons.

From these figures it is evident that last year's production throughout the world was about on the basis of 51 per cent. of capacity. Records of U. S. mills show 43 per cent. production in 1921 thus indicating that the United States mills curtailed production of this primary metal more severely than the rest of the world. In fact it may be significant that whereas U. S. production of steel amounted in 1918 to sixty per cent. of the world's consumption, and amounted to sixty-three per cent. in 1919, it dropped to sixty-two per cent. in 1920 and dropped to 49 per cent. of the world's total last year. A close survey of the world's figures shows that Germany, Austria, Poland, Russia and Hungary increased production last year.

May Make a Record Year

IT IS ESTIMATED that ninety per cent. of the men unemployed this winter are ordinarily associated with some branch of the building industry. This indicates another phase of the importance of this industry in the general prosperity of the country. Various organizations and other influences are at work to bring about a resumption of building on a broader scale in the coming Spring. Secretary George Gander, of the Toronto Builders' Exchange, has stated that building costs are now 35 per cent. below the peak so there should be some encouragement on this score. It must not be thought, however, that building has fallen off to any great extent, for building to a value of $240,000,000 was done in Canada during 1921, which, taking into consideration the decline in prices as compared with 1920, revealed a bigger volume of building last year than in the immediately preceding years. The anticipated increase in building this year, if it materializes, will not have to go far to create a record.

Briefs

WITH THE passing of W. H. Dalton, head of the wholesale hardware house of W. H. Dalton & Sons, Ltd., Kingston, Ont., at the ripe age of seventy-eight years, Canada loses another of the veterans of the hardware trade.

THE IMPROVEMENT of foreign exchanges is pointed to by economists as a definite indication of improvement in fundamental conditions. The sooner every nation realizes that it cannot gain by isolating itself, but that its problems are the problems of the world and must be solved by international co-operation, the sooner will definite and lasting improvement be noted.

THE ANNUAL inventory has been likened to the physical examination a man must undergo for insurance. Many men will prefer to take a chance on death from some unknown disease rather than attempt to cure a known one. The inventory this year may have revealed a condition in the business which needs righting. If so, now is the time to carry it out, despite the cost, and business will reveal improvement in 1922 for so doing.

FEW CANADIANS realize that Canada's waterpower development represents an investment of $475,000,000 while the power produced would otherwise require 18,000,000 tons of coal yearly. The electrical industry in Canada, extensive as it is, is yet in its infancy in regard to power development and the uses to which this energy may be put. With its development there comes additional business for the hardwareman.

News of Western Canada

WESTERN CANADA NOTES

A. H. Fraser, Winnipeg, is on a business trip to Eastern Cities.

William H. Barber, president of the W. H. Barber Co., Minneapolis, Minn. was a business visitor to Winnipeg.

F. Morton Morse, President Miller-Morse Hardware Co., Ltd., Winnipeg is on a business trip to Toronto and other Eastern cities.

W. S. Fallis, Vice-president of the Sherwin-Williams Company of Canada Ltd., spent a few days in Winnipeg on his trip to the Coast.

Sidney Littlewood of Miller-Morse Hardware Co., Ltd., Winnipeg has been elected on the executive of the Paint, Oil & Varnish Club of Winnipeg for the year 1922.

Charles Beck, Jr. who is associated with his father in the hardware business at Yorkton, Sask., is on a business trip to Winnipeg. Mr. Beck's father is one of the pioneers of the hardware trade in Western Canada.

Miller-Morse Co., Ltd., is making an extensive enlargement in sporting goods and automobile accessory lines and they are making additional space in the warehouse for these departments.

S. K. Gryde, hardware merchant, Leader, Sask., has sold part interest in his business to H. A Stone, a brother-in-law who has been associated in the business for the past three years. The name in future will be Gryde & Stone.

C. M. P. Fisher of the Enterprise Foundry Company, Limited, Sackville, N. B., while on a business trip to Winnipeg gave a brief address to the traveling salesmen of the J. H. Ashdown Hardware Co., Ltd., attending the annual sales convention.

Fifteen companies with a total capitalization of $500,000 have been granted incorporation in Victoria, B. C. this week. Included in the number are Stork's Hardware Limited of Prince Rupert with capital of $10,000 and the "J. E. Battery Company of British Columbia," whose capital is also $10,000.

TO OPEN WINNIPEG BRANCH

The Canadian Asbestos Co., announce that they will shortly open a Winnipeg branch to take care of their Western business. Officials of the company are now on their way to arrange the details.

Letters to the Editor

SECRETARY MACPHERSON REPLIES TO ALBERTA HARDWARE MERCHANT

Editor "Hardware and Metal,"
Toronto:—

In your issue of 7th inst., I note a letter from a Mr. Dutil of Blaimore Hardware Co., Alberta, in which he expresses disagreement with my article on "Making the Inventory tell the truth" as published by you on Dec. 24th last.

Mr. Dutil in this letter inadvertently, but quite clearly, substantiates the truth of the position I have taken. He states that his practice has been to cost his inventory at replacement values (regardless of cost), as nearly as possible. This means that on a rising market, through his inventory, he took his profits before he earned them—that he inflated his net profits during the years of rising values and in consequence paid Income Tax, etc., on profits which were only on paper.

Mr. Dutil mentions a $5,000 lot of builders hardware in stock, bought before the war at 50 per cent. of present value—as if he still had that stock at the pre-war price. He has no such value in builders hardware. He has the stock at exactly the price (replacement value), at which he entered it on his last inventory. He has sold these goods to himself, taken the advance as a profit, paid his Income Tax on this profit, and still has the goods, but now on a declining market. Is profit figured this way, true profit? My advice was to price Inventory "at replacement value or cost price, whichever is lower." This means don't figure a profit till you get it, but if you have to take a loss, take it now.

I further advised the re-marking of retail prices on basis of inventory. This did not for a moment imply that costs lower than replacement value should be used in marking resale prices. A dealer is entitled to any benefit secured in this way necessary to offset declines in values.

Regarding insurance adjustment, and the use of inventory in connection therewith, I do not profess to be an authority on this matter, but I take it that fire insurance is an indemnity against loss by fire. This would imply a replacement of the goods destroyed, or a cash payment to that extent. There is no question in my mind, that when an appreciation in value is shown that same would be allowed by adjuster, but it would be well to note such lines on inventory, in red ink, showing present values and amount of appreciation over prices shown in inventory, but not to be added to inventory, which is being taken to ascertain one's true financial position.

A merchant cannot afford to fool himself by inflating his inventory. If he does, it will recoil some day like a boomerang. Then—

"To thine ownself be true,
And it must follow, as the night the day,
Thou canst not then be false to any man." (Hamlet)

Signed W. F. Macpherson,
Sec., Ontario Retail Hardware Ass'n.

On page 46 will be found a write up of interest to Western readers concerning the affiliation of paint clubs in Western Canada.

WOOD VALLANCE LTD., ANNUAL CONVENTION

Winnipeg.—The Wood Vallance Ltd., Sales Convention was held in a specially appointed room in the Hammond Building with the following salesmen in attendance: R. A. Grant, J. P. Wing, H. A. Sutherland, J. A. Jack, F. J. O'Neill, A. H. Davidson, R. M. Pritchard, F. B. Stott, C. A. Pole, H. S. Spencer, J. S. Bates, H. A. Bestall, M. P. Barnes, A. H. Jackson, J. J. Sullivan, Geo. H. Henty, H. L. Huyck, W. Dawson, A. F. McDermid, H. S. Martin, A. T. Redmond, W. Wilson, Alex. Gordon, R. K. Newport.

Several factory representatives addressed the Convention and outlined some very practical and instructive sales campaigns for 1922.

The Wood, Vallance Social Club entertained the traveling salesmen to an informal dance in the Oddfellows Hall McMillan Ave., on Tuesday evening and a most enjoyable time was spent. The orchestra was composed of members of the staff known as the "Homophonous Six" under the direction of R. K. Newport. Most of the salesmen have returned to their territories very optimistic about the outlook for the coming year.

Events in the Trade

BUSINESS CHANGES

Montreal, Dominion Sheet Metal Works has dissolved.

Belmont, Ont.—Orville Reid, hardware has sold to E. J. Grant who will take possession on March 1.

FIRE LOSS

Hull, Que.—The hardware store of F. E. Tremblyn was destroyed by fire.

Dresden, Ont.—The Meredith foundry was completely destroyed by fire.

Gravenhurst, Ont.—J. E. Clipsham & Sons hardware, suffered fire loss.

London, Ont.—Cowan Hardware Company's store and stock suffered by fire with an estimated loss of $250,000, all covered by insurance. Spontaneous combustion among inflammable materials on the second floor of the hardware store is said to have been responsible. The fire spread to two adjoining stores which also suffered considerable loss.

INCORPORATED

Montreal, Omer De Serres, Ltd., have received incorporation.

PERSONAL

W. P. Biggs, manager of the Canada Tack & Nail Co., Morrisburg, Ont., visited the Montreal trade this week.

N. O. Hynes has joined the sales force of Lewis Brothers, Ltd., and will call on the trade in the city of Montreal.

N. Parent of Canadian Yale & Towne Co.; D. S. Laughlin of Thomas Laughlin Co., Portland; R. M. Cruise of Corbin Cabinet Lock Co., and Morris Wheeler of Sargent & Co., New Haven were among those calling on the Montreal trade this week.

R. P. Dickson, vice-president and managing director of Sumner Co., Ltd., Moncton, N. B., was elected president of the Moncton Canadian Club at their annual meeting. Mayor A. C. Chapman, Sec.-treasurer and manager, N. B. Wire Fence Co., says he does not intend to be a candidate for re-election this spring.

E. G. Brousseau, of Brousseau and Frere, hardware, Quebec City was a visitor to Hardware and Metal office in Toronto this week on his way to attend the conference in Hamilton of the Association of Canadian Building and Construction Industries. Mr. Brousseau is secretary of the Quebec Builders' Exchange.

DEATH OF JOHN HEPNER

John Hepner, of the firm of Stevens-Hepner, Ltd. Port Elgin, brush and broom manufacturers, died in Toronto in his 73rd year. Mr. Hepner was one of the group of manufacturers who, from small beginnings, built up the industries which now dot the western part of Ontario. He was born in Napanee, and went to Port Elgin when a young man. He was engaged in the old Port Elgin Brush Works, controlled by the late Col. B. B. Boyd.

With H. H. Stevens, he secured control of the firm, with the firm name of Stevens & Hepner. The business prospered under the guidance of these two men and has developed into the present firm of Stevens-Hepner Ltd.

THE LATE JOHN HEPNER

Mr. Hepner was concerned mostly with the practical end of the business, and during his long connection with the firm was held in high esteem by his employees. Three years ago ill-health forced him to refrain from active work, and since then he had travelled considerably. His illness, however, did not become serious until a few weeks ago.

R. CHESTNUT & SONS LTD. ERECT NEW BUILDING

Fredericton, N. B.—Preparations for the erection of a new brick building on York street for mercantile purposes was revealed in an application made to the City Council by R. Chestnut & Sons.

VETERAN HARDWARE MERCHANT DIES

Kingston, Ont.,—A veteran hardware merchant passed away here on Thursday in the person of William B. Dalton, head of the wholesale hardware firm of Dalton & Sons Ltd., after ten days illness. Deceased was in the hardware business for over fifty years and was a life long resident of Kingston. He was seventy-eight years of age and had been a prominent Mason and official of St. Georges Cathedral. He is survived by his wife, two daughters and four sons. A brother at the age of eighty-four years, died but three weeks ago.

OPEN OFFICE IN TORONTO

Canada Foundries & Forgings Ltd., have opened an office at 186 Bay St., Room No. 5, Toronto. This is Toronto headquarters for the Welland and Brockville plants of the firm. Tim W. Rogers, notice of whose appointment appeared in a recent issue of Hardware and Metal, will be in charge of this office.

NEW MARLIN FIREARMS COMPANY FORMED

The Marlin Firearms Corporation has been organized with offices and works at New Haven, to make Marlin sporting firearms. The new company has acquired the land and buildings of the original Marlin Firearms Company, and the good-will of the Marlin firearm business. It has also purchased the assets of the Hopkins and Allen firearms business.

John F. Moran, who has been made president of the company, was for twenty years assocaited with the Marlin Firearm and Marlin-Rockwell interests as sales manager of the sporting firearms and machine gun division, and as general manager of the Mayo Radiator division. The other officers are: Reuben Hill, first vice-president and secretary; Thomas Mr. Steele, second vice president; Robert C. Ogle, treasurer and Robert G. Baird, assistant treasurre.

W. W. Neff, who for several years was with the advertising department of the Winchester Repeating Arms Company, has been appointed advertising manager of the new Marlin company.

As announced in last week's issue of Hardware and Metal, the Dominion Cartridge Co., Montreal, has been appointed Canadian representative of the Marlin Firearms orp.

WORK COMMENCING ON NEW HARDWARE STORE

C. G., Bailey, 1958 Queen Street East, Toronto, is commencing the erection of a new hardware store a few doors west of his present location. The new store will be 30ft. by 60 ft., thus giving more than double the present facilities for displaying goods. Modern counters, fixtures, etc., will be installed and special attention will be given to the display and sale of household lines. The new store will be ready for occupation by April 15.

HOWARD CANE

of Wm. Cane and Sons Co., Newmarket, Ont., who as announced in a previous issue of Hardware and Metal, was elected mayor of that town for 1922

Cowan Hardware Will Rebuild After Fire

Disastrous Fire to Cowan Hardware Co. store in London, Ont., causing loss of $250,000—Will rebuild as Quickly as Possible said James Cowan to Hardware and Metal Representative during Progress of the fire

LONDON, Ont.—Just as quickly as stock can be secured the Cowan Hardware Co., will be open for business again following the fire which completely destroyed the firm's store on Wednesday morning, causing a loss of $250,000.

"We will rebuild as quickly as possible" said James Cowan to Hardware and Metal "as he watched the flames sweeping through the building "I am at a loss to account for the cause of the fire. The only thing I can possibly attribute it to is spontaneous combustion. The building we occupied was fifty years old. As soon as possible we will commence work on a large new thoroughly modern store."

When Charles McKerlie the assistant manager came down at 7.45 to open the store he was met by a rush of smoke that forced him out of the building. In the meantime some one had noticed the flames shooting through the rear windows and called the fire department. The three upper storeys and basement were filled to capacity with merchandise and only the afternoon before a car load of roofing had been unloaded and stored on the second floor. The fire had apparently been burning for some hours and crept up the elevator shaft finally breaking out in a dozen places at once. It had made such progress that the firemen could do little to check it. The building is completely gutted the second and third floors falling in and the roof burned off. Mr. Cowan stated to Hardware and Metal that the loss is fully covered by insurance.

CONVENTION OF STEEL CO STAFF

The tenth annual sales convention of the Steel Co., of Canada, was held at the Royal Connaught Hotel in Hamilton, the sessions being attended by a fully representative gathering of the entire sales organization, with works managers and superintendents from the various plants.

Plans for the ensuing year, the problems of salesmanship under changing conditions, the business outlook for 1922, and many similar topics were dealt with at the sales conferences which were in charge of H. T. Diplock, Eastern Sales Manager, Montreal, and George Spence, Western Sales Manager, Hamilton.

Robert Hobson, President of The Steel Co., presided over the banquet, which was held on Wednesday evening.

A. H. MACLAUCHLAN IS ADVERTISTISING COUNSELLOR

In giving the names of officials associated with W. Walker & Sons, Toronto, in last weeks issue, the name of A. H. Maclauchlan, advertising counsellor was inadvertently omitted.

Organization of Toronto Hardware Retailers

Dinner at Carls-Rite Hotel on Wednesday, January 25th, to Discuss Plans For Organization of Toronto Retail Hardware and Paint Dealers

TORONTO retail hardware and paint dealers will be the guests of The Paint Oil and Varnish Club of Toronto at dinner at the Carls-Rite Hotel on Wednesday, January 25, when a proposal for organization will be discussed and it is hoped, carried out.

While the suggestion for organization has come from the Paint, Oil and Varnish Club it is intended that the Association of the retail trade shall be independent and free to deal with all other organizations towards which their interests lie.

The purposes of the organization are fraternal and to also deal with questions and problems of mutual interest.

Lack of organization in the past has retarded concerted action on the part of retailers in matters that individuals could not very well deal with alone. Co-operation in the advancement and extension of their business is one of the objects hoped for in getting the retail dealers together and there is no doubt that there is much to be undertaken and accomplished in Toronto along this line.

Considerable interest has been developed already in the retail trade and many are taking the question up enthusiastically.

It is the intention of the Paint and Varnish Club, as hosts, to announce the object of getting the retailers together after which the meeting will be handed over entirely to the trade.

Invitations have already been sent out and indications are that a record meeting will be held.

It is hoped that every retail hardware and paint dealer will respond by attendance and will do his share in the discussion and completion of the organization.

W. J. McCULLY

A Merchant of Stratford, Ont., who is the new president of the Ontario Retail Merchants' Association

Another Test As To Retailers' Status

Classing of Certain Retailers as Manufacturers Continues Despite Previous Rulings—Another Test Case Instituted at Ottawa—To Get Definite Ruling on Tinsmiths

THE CASE which was instituted against the government by the Dominion Board, Retail Merchants' Association of Canada to determine as to whether retail confectioners could be classed as manufacturers, came before the Exchequer Court, Justice Audette presiding, on January 12. This case, which also has some bearing on the status of other retail merchants, including tinsmiths, was taken against William Karson, of Sparks street, Ottawa, and was defended by the Retail Merchants Association, through their counsel, T. A. Beament, K.C.

E. M. Trowern, secretary of the Board, was present on behalf of the Association, and gave evidence to show that at no time could the provisions of the Act be interpreted as meaning that merchants selling direct to consumers, were liable for the payment of the three per cent tax levied against manufacturers. Mr. Bodley, secretary of the Canadian Association of Confectioners, gave evidence for the Crown, which defended its case through Messrs. Hogg & Hogg, barristers, Ottawa.

This case has created considerable interest, owing to the fact that a similar case was fought out and judgment was rendered in favor of the retail merchants by the late County Judge R. D. Gunn, of Ottawa. An appeal was taken by the late government, but was eventually dropped, a new suit being instituted under the amended Act. When judgment has been rendered in this case, it is the intention of the Retail Merchants' Association to secure, through the courts, if necessary, a definite understanding as to the status of tinsmiths and merchants in other lines of trade. It has already been definitely ruled by the courts that merchant tailors, making clothing for sale direct to the consumers, are not liable for the tax, and in a general way this ruling was understood to include tinsmiths and others doing business in a similar manner, but time and again since the original ruling, officials of the department have seen fit to place interpretations both upon the Act and the court ruling which have been anything but satisfactory to the retail trade.

This particular case, it was pointed out by Mr. Trowern in his evidence, was not a matter of whether small retail confectioners should pay a tax because large confectioners were paying it, but rather a case where the law clearly stated that only wholesalers and manufacturers who make up goods for sale to retailers, are called upon to pay the tax provided by the Act. "We are endeavoring to see that the government lives up to the provisions of its acts, irrespective of whether they are logical or not," said Mr. Trowern. "The tax was never intended to be collected by retail merchants and we object to having them placed under the provisions of the Act."

WORKING FULL TIME IN GANANOQUE

Gananoque.—Both the spring manufacturing plants here of the Ontario Steel Products Company, Ltd., are being operated to their full capacity to fill orders. The company is also sending a few skilled men from here to its Oshawa branch, which is to be opened again.

PERSONAL

Councillor C. Fingland of Blyth, Ont., has been returned for 1922 by acclamation.

John A. Brownlee of London, Ont., who has been ill for some months, shows little improvement.

W. A. Barr, hardware merchant at Merlin, Ont., headed the polls in the election for trustees.

Councillor W. G. Lochead of Forest, Ont., has been selected as chairman of No. 1 Committee for the year.

Frank Gingerich has taken a position as salesman in the new store recently opened by R. B. Waddle of Woodstock, at Tavistock, Ont.

At the annual installation meeting of Saugeen Masonic lodge at Walkerton, Ont., S. W. Vogan took over the office of Junior Warden.

The wedding was solemnized at Sarnia recently of John H. Fairbank, son of Col. C. O. Fairbank of the Fairbank & Van Tuyl hardware, Petrolia, and Miss Aileen Richardson. Mr. and Mrs. Fairbank have gone to San Louis, California.

HARDWARE STAFFS UNITE FOR SOCIAL

St. John, N. B.—Several hundred happy young men and women took the Y. M.C.A. building by storm the occasion being the joint social of the employes of the firms of T. McAvity & Sons, Ltd., and the W. H. Thorne & Co., Ltd. The latter won the basketball contest by 32-0. McAvity's won both women's and men's bowling matches. Thorne's had a small lead for the entire sporting program.

NEW FIRMS

George Faulds is making preparations for opening a hardware store at Wardsville, Ont., shortly.

MERGER OF TWO PLANTS WITH WARREN TOOL AND FORGE CO.

Negotiations extending over the past nine months have culminated in the purchase by the Warren Tool and Forge Co. of Warren, Ohio, of the plants and properties of The American Block and Manufacturing Co. and The General Malleable Co., which in future will be operated under the name of The Warren Tool and Forge Co.

CATALOGS AND BOOKLETS

Whites Limited, Collingwood, Ont., is sending out one hundred and fifteen revised pages for the general catalog, thus bringing it up to date according to a statement made to Hardware and Metal by J. F. Zimmerman, Manager of the company.

Twenty Years Ago

Following items are reprinted from Hardware and Metal of January 18, 1902:

J. H. Ashdown Hardware Co., Ltd., Winnipeg, has obtained incorporation as a joint stock company with a total capital of $1,000,000.

Readers will remember that some two months and a half ago we mentioned that W. S. Fallis of The Sherwin-Williams Co. had sailed on a voyage of trade discovery to the British West-Indian Islands. Mr. Fallis has for two years had charge of The Sherwin-Williams' interests throughout the Maritime provinces, and his selection as an ambassador of the firm in the colonies to the south was a fitting tribute to the success which has crowned his efforts.

There was a fire in the hardware store of Magnan Freres, Montreal, this week. The loss of $1,000 is covered by insurance.

The many friends of J. Johnston who for many years has been representing Dominion Wire Mfg. Co., Ltd., Toronto and Montreal, will regret to hear that he has been granted leave due to ill health and is to spend the winter in the south.

The boom in Sydney of the last two years consequent on the introduction of the Dominion Iron and Steel Co.'s works has been extensive but it has remained for the closing days of 1901 in which to produce the first steel. The following message was sent to the directors of the company by Mr. Moxham, the manager, "Poured first heat of steel at 8 o'clock tonight. Everything worked well. Steel made by ordinary pig and scrap process. Sixty per cent. Bell Island pig and 40 per cent. scrap. Quality of steel is excellent."

Already the new foundry of K. C. Beach & Co. at Winchester, Ont., is ready for business. Much larger than the old establishment the facilities for turning out modern work have been much increased, and nickel plant has been installed.

It is expected that the blooming mill of the Dominion Iron and Steel Co. at Sydney, C.B., will be ready between the first and 15th of the month when the manufacture of steel will be commenced.

Mr. Hiram Miller of the firm of Miller Morse & Co., Winnipeg, has returned from an extended eastern trip.

There is a big strike in Moncton, N.B., about 40 moulders and apprentices employed in the Record Foundry and Machine Works going on strike on Jan. 10.

Will Help Every Hardware Merchant

Knowledge Necessary to Combat Problems of Present Day Merchandising Will be Dispensed

MOST RETAILERS in the last year or two have faced situations in connection with their business which indicate the true importance of having an accurate knowledge of basic conditions and the means which other retailers are employing to meet the difficulties.

The program for this year's convention of the Ontario Retail Hardware Association in Hamilton, has been planned with this idea in view and every effort has been made to have something of a really helpful nature for the delegates during every minute of the convention. The revised program is shown on this page, some additions having been made since last week. This program will be shown in each issue of Hardware and Metal prior to the convention and readers are asked to follow it closely for new subjects introduced from time to time as arrangements are completed.

The morning sessions will be sent under way with community singing for the purpose of creating a good spirit and to help get the proceedings started promptly on time. The sessions will be held at the Royal Connaught Hotel thus avoiding the long walk to the Armories each morning which has been necessary on previous occasions. The singing will be followed each morning with a short session devoted to the Question Box, in which the particular problems of the various retailers will be dealt with. The questions already suggested are noted in connection with the program and the numbers of the ones to be dealt with on the various days are noted throughout the program.

Each afternoon will be left free for delegates to visit the hardware exhibition at the Armories. Here a large number of attractive booths will be found, each occupied by firms interested in selling to the retail hardware trade, and representatives will be in attendance to supply retailers with information concerning the various lines. Buying cards are being provided to retailers. In the afternoons only merchants and ladies accompanying them will be admitted to the exhibition, thus providing an opportunity for uninterrupted discourse with exhibitors. Non-members of the association will be provided with "Merchant's Tickets" to enable them to visit the exhibition in the afternoon. Every evening the exhibition will be open to the public, though children not accompanied by parents will not be admitted.

There will be a larger representation of firms at the exhibition this year than was the case last year, and confining the afternoon visitors to merchants and friends is expected to greatly enhance the value of the session to all concerned.

Program of 17th Annual Convention Ontario Retail Hardware Ass'n

February 14, 15, 16, 17th 1922, at Hamilton, Ont.

TUESDAY, FEBRUARY 14
Royal Connaught Hotel.

8.30 a.m.—Secretary's office, located on mezzanine floor, open for registration of members and guests, distribution of badges and general information.

9.45 a.m.—Convention Hall on mezzanine floor, community singing.

10.00 a.m. (promptly)—Opening session, President Nelson Mills presiding.
Song, "God Save the King."
Invocation, Rev. Dr. W. H. Sedgewick, minister Central Presbyterian Church, Hamilton.
Annual Address, President Mills.
Civic welcome, Mayor of Hamilton.

10.30 a.m.—Question Box, Ed. Wanless, Chatham, presiding.
Special topics for the day, questions 1 to 5, inclusive.

11.00 a.m.—The maintenance of established resale prices on well advertised products, H. J. Haire, The Alabastine Co., Paris.

11.30 a.m.—How dealers may successfully advertise, L. R. Green, advertising manager Tucketts, Limited.

12.00 a.m.—Appointment of convention committees and introduction of new business by members.

12.30 p.m.—Adjournment.

1.00 p.m.—Opening of hardware exhibition at the Armouries, John St. North. Hours, 1 to 10 o'clock.

During the afternon, only merchants and ladies accompanying them will be admitted to the exhibition. These hours every day are reserved for business intercourse between exhibitors and those why buy to resell or use the products exhibited.

Members and their ladies require no admission tickets, their badges are credentials at all hours.

Non-members and other buyers will be provided with "Merchant Tickets" by exhibitors and by secretary.

7.00 p.m.—Exhibition open to the public. Children unaccompanied by parents not admitted. Music provided both afternoon and evening.

10.00 p.m.—Closing hour.

WEDNESDAY, FEBRUARY 15

8.30 a.m.—Secretary's office open on mezzanine floor of hotel.

9.15 a.m.—Community singing.

9.30 a.m. (promptly)—Convention Hall, Question Box, George E. May, Toronto, presiding. Topics for the day, Questions 7 to 12 inclusive.

10.30 a.m.—Reports of officers and committees. Treasurer's report; Secretary's report; Auditors' report.

11.00 a.m.—The banker and the retailer, J. P. Bell, General manager Bank of Hamilton.

11.30 a.m.—Hardware mutual fire insurance, C. L. Clarke, Winnipeg, Canadian manager, Canadian Hardware & Implement Underwriters.

12 a.m.—F. J. Penberthy, Lowe Bros., speaking on "Business Disease."

1.00 p.m.—Hardware exhibition at the Armouries. Afternoon for buyers and representatives of business houses. Evening open to the public.

7.00 p.m.—Association banquet for ladies and men, Royal Connaught Hotel. Tickets, $2.50 each. John D. Wells, Buffalo, managing editor "Buffalo Times", will speak at the banquet. Subject, "Whoa," (full of wit and humor.)

Tickets should be secured at secretary's desk not later than Wednesday noon, if possible.

THURSDAY, FEBRUARY 16

9.15 a.m.—Convention Hall, Community singing.

9.30 a.m. (promptly)—Question Box, H. N. Joy, West Toronto, presiding. Topics for the day, Questions 12 to 18, inclusive.

10.00 a.m.—H. E. Mihell, executive member "Save the Surface" Campaign.

10.30 a.m.—Prof. W. C. Clark, director of courses in commerce, Queen's University.

11 a.m.—J. R. Shaw, Vice-President Canadian Manufacturers' Association.

12.00 a.m.—The association price book, introduced by secretary. Open discussion by members.

12.30 p.m.—Adjournment.

1.00 p.m. to 6.00 p.m.—Hardware exhibition at Armouries open to buyers and dealers.

6.30 p.m.—Complimentary banquet tendered by the Hardware Manufacturers of Hamilton.

7.00 to 10.00 p.m.—Exhibition open to the public.

FRIDAY, FEBRUARY 17

9.15—a.m.—Convention Hall Community Singing.

9.30 a.m.—Question box. Topics for the day. Balance of Questions.

10.00 a.m.—Reports of committees.
Resolutions.
Nomination of Officers.
Election of Officers.
Unfinished business.

10.30 a.m.—Visit new factory of Libbey Owens Sheet Glass Co.

1.00 p.m.—Visit Hardware Exhibition, finish buying and file buyer's cards with the Secretary at booth No. 99 or else mail it to him at Prescott, Ont.

QUESTION BOX DISCUSSION

1. How closely should we follow declining markets in adjusting our selling prices?
2. Are the Jobbers as prompt as they should be in meeting the declining market?
3. What shall we do with wage question as the high living costs decline.
4. How can the cost of doing business be cut, and maintain service.
5. What new lines did you add during 1921, that have proved profitable?
6. How many dealers present, pay a bonus on sales by Clerks?
7. Could not active steps be taken by this Association to prevent Wholesalers from doing a Retail business?
8. What is the best way to get results from advertising folders etc., as furnished by manufacturers?
9. How much should a dealer pay for goods he takes out of stock for his own use?
10. What should properly be included in over-head Expenses?
11. What is the average wage paid, Clerks, Tinsmiths, Plumbers? Have any reduced wages yet?
12. Has anyone definite information regarding workshop in connection with store? Does it pay?
13. What is the best way to handle slow accounts without offending customers?
14. What is the average percentage of loss on credit accounts?
15. Have any members successfully turned a credit business into a cash business? How was it done?
16. In changing credit to cash business would it be advisable to allow monthly accounts to telephone customers, and to customers who are building or painting?
17. How do you proceed to collect tough accounts?
18. What experience have dealers present had in handling auto supplies, tires, etc., in a small town? Do they find it profitable, or is most of the business going to garages. If Hardware dealers get bulk of the business, how do they do it?
19. What are the advantages or disadvantages of marking selling prices in private code?
20. Why are cheap platform scales still, many times the pre-war price?

Weekly Hardware Market Reports

STATEMEETS FROM BUYING CENTRES

Markets at a Glance

ADDITIONAL price reductions are evident on the current hardware markets. The new hardware tack list, referred to in last week's issue of Hardware and Metal, is now available, and records a decline of approximately 10 per cent., including the discount adjustment. Various lines of Miller padlocks are now revised in price, some numbers recording substantial reductions, and others only a minor change. A marked decrease is announced by the manufacturers on the Universal line of food choppers, and a similar change is recorded on the Enterprise make of products, including food choppers, coffee mills, presses and pumps. Following the recent easier price levels on eavestrough, conductor piping and corrugated sheets, manufacturers of galvanized products have announced price reductions on metal ceilings, the discount being changed from 10 to 12½ per cent. New season's quotations appear on sap buckets, spouts and square syrup cans, these being considerably lower than the previous prices.

Other price reductions include metal spoons and forks, stub end turnbuckles, certain makes of shears, and the Hudson line of apple parers, while in certain quarters local distributors have recorded easier prices on English galvanized sheets, Welsh Canada plates and tin plates. A steady tone is reported in the primary sheet markets, with improved spring buying looked for in iron and steel bars. An easier tendency is noted in southern crude oil centres, but no price developments have been recorded on the domestic markets. A reaction has appeared in demand for some of the ingot metals, while scrap materials are still awaiting an improvement in demand. There is at present a steady undertone in brass and copper products, with the trend in lead materials depending upon basic market developments.

Montreal Markets

MONTREAL, January 19.—Another long list of price revisions attract attention in the hardware markets. Changes, all in the downward direction, cover a wide range of commodities this week, one of the premier developments being the new hardware tack list, which shows a reduction of approximately 10 per cent. on all lines. Another important change is in the announcement from manufacturers of galvanized products that eavestrough and conductor pipe, corrugated sheets, metal ceilings and walls, are now at easier price levels. Eavestrough and pipe are reduced 10 per cent. while the other lines show a minor decline. English galvanized sheets, tin plate, terne plate and Welsh Canada plate are terprise line of food choppers, electric coffee mills, lard presses are also reduced. New cotton waste prices are announced; and the Enmolasses pumps are all quoted lower in price. A reduction is made in the No. 900 line of metal spoons and forks, also stub end turnbuckles.

The various lines of Miller padlocks are revised in price, some numbers showing a substantial decline while others are only slightly reduced. New season's quotations are now given on sap buckets, spouts and square syrup cans. These are considerably lower than last year, and jobbers are convinced that this will greatly assist this year's trade. Ingot metals are now easier, and lower prices appear on most lines on the local market.

REVISED HARDWARE TACK LIST NOW ISSUED

Montreal

The new revised hardware tack list is now issued to the trade and shows a reduction of approximately 10 per cent. on the various kinds. Revised list is published elsewhere in this issue with new discounts 65/25 per cent. off.

EASIER PRICE LEVELS ON COTTON WASTE

Montreal.

New lower prices are now announced on all grades of cotton waste, both white and colored, also on the different qualities of wool packings. The decline varies between one-half and one cent on whites, with a reduction of one cent on cream polishing. Wool packings show a more substantial price decline, ranging from two to five cents per pound. Wipers remain at former quotations. The raw cotton market in past weeks has not been displaying its former strength, and although it is now in a fairly steady position, lower waste prices were predicted in the past few weeks, owing to this easer tendency. Following are revised quotations:

	per lb.
COTTON WASTE—	
Cream polishing	0 19
WHITE—	
XXX Extra	0 16½
XX Grand	0 15½
XLCR	0 14½
X Empire	0 13

Lion	0 12
Popular	0 09
Keen	0 07½
WOOL PACKING—	
Arrow	0 25
Axle	0 22
Anvil	0 18
DOMINION WIPERS—	
White cotton	0 20
Colored cotton	0 14

Subject to trade discount for quantity.

NEW LOWER PRICES ON MILLER LOCKS

Montreal.

The Miller Lock Company announce a revision in their prices on padlocks, effective from January 3rd. The reduction varies to a great extent on the various lines, some showing a substantial price decline while others are only slightly reduced.

DISCOUNT CHANGED ON CORRUGATED SHEETS

Montreal.

The easier tendency displayed in the corrugated sheets, owing to the softer tone in the plain galvanized sheet market, has resulted in slightly lower quotations. The discount is revised from 7½ per cent. to 10 per cent. off list prices, the latter remaining as formerly. Little improvement is yet shown in the movement of these sheets, the season still considered ear'y for any active sales to commence. Following are unchanged list prices with revised discount.

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins., 75c a square extra.

Do., Table Spoons ... 5 50

$15 90 $17 70 $21 20 $28 00 $36 80

REVISED PRICE LEVELS ON ENTERPRISE PRODUCTS

Montreal

Slghtly reduced prices are given in the revision on the Enterprise line of Food choppers, lard presses, electric coffee mills, molasses pumps, etc.

REVISED DISCOUNT ON METAL CEILINGS AND WALLS

Montreal.

Metal ceilings and walls, for inside work, are slightly reduced through the change in discount from 10 per cent. to 12½ per cent. off list prices.

NO. 900 SPOONS AND FORKS NOW LOWER IN PRICE

Montreal.

A reduction has been made in the No. 900 metal spoons and forks in all sizes. Following are the new quotations:

	Gross.
No. 900 Teaspoons	2 80
Do., Dessert spoons	5 40
Do., Tble Spoons	5 50
Do., Dessert Forks	6 25
Do., Table forks	6 40

EAVESTROUGH & CONDUCTOR PIPE ARE REVISED DOWNWARD

Montreal

Revised discounts are now quoted on both eavestrough and conductor pipe, while elbows and sundries remain unchanged in price. Square bead, round and half round trough are now quoted less 70-10 per cent., a reduction of approximately 10 per cent. The same reduction is recorded on round conductor pipe, both plain and corrugated, while p'ain and corrugated square, and octagon pipe is now quoted less 70 per cent. on their higher list prices. Fol'owing are list prices and discounts.

EAVESTROUGH—

O. G. round and half-round, per 100 ft.

8 inch	10 inch	12 inch	15 inch	18 inch
$16 90	$18 70	$22 20	$29 80	$37 80

3 inch	6 00
4 inch	10 50
5 inch	24 00
6 inch	29 00

Discount 60 per cent.

ENGLISH GALVANIZED, WELSH CANADA PLATES AND TIN PLATE LOWER

Montreal

Reductions of varying ex'ent are recorded in the general sheet market this week. English standard galvanized sheets are reduced 50 cents on all gauges in both Queen's Head and Fleur-de-lis. Bright tin plates in full boxes are $1.00 per box lower, while the 56 sheet boxes show a decline of 50 cents a box. Terne plates will now sell for $16.50 box, former price being $17.50. Welsh Canada plates are 25 cents lower in both 52s and 60s.

Black sheets and American ga'vanized sheets remain unchanged, prices on these now considered at a very low level in comparison with replacement costs. The reductions on the other lines now recorded are said to be entirely due to local distributors, as no change in particular has developed in the English market recently. Business locally continues rather dull, although slightly improved over the quiet weeks at the close of last year. Dea'ers are still convinced that sales will gradually increase as the weeks pass, and it is hoped that a much steadier market will prevail locally than has been the case in the past twelve months. Fol'owing are revised quotations:

STUB END TURN BUCKLES REDUCED IN PRICE

Montreal

New lower quotations are given on the various sizes of stub end turn buckles. Following are the new prices:

STUB END TURN BUCKLES—½ in., $4.50; ⅝ in., $5.10; ¾ in., $6.20; ⅞ in., $7.20; 1 in., $9.80; 1⅛ in., $10.60; 1¼ in., $16.80; 1½ in., $25 doz.

NEW QUOTATIONS ANNOUNCED ON SAP BUCKETS

Montreal

The new seas n's prices are now announced on sap buckets, spouts and syrup cans. These are much lower than the opening quotations last year, and jobbing houses are convinced that the reduced prices will assist towards a good season in these lines. It is yet early in the season for these supplies, but buying is expected to commence in the following weeks New quotations are as follows:

SAP BUCKETS—

Straight Pattern—Per 100, No. 7, $13.80; No. 8, $15; No. 9, $16.80; No. 12, $18; No. 16, $21.60.

Galvanized straight—No. 9, $23; No. 12, $27; No. 16, $31.

Western (flaring) pattern—6 qt., $13.50; 10-qt., $18.

Frontenac—10 qt., $19.

Galvanized Western—10 qt., $27.

Spouts—Sterling, $20; Eureka, $15 per 1000.

Square one gal. syrup cans, $16.75 per hundred.

MORE ACTIVITY REPORTED IN BOILER TUBES

Montreal.

During the past week a noticeable improvement was felt in the movement of boiler tubes. This is termed as only seasonable as boilers are now undergoing repairs before the open weather of Spring. Distributors look for a continued improvement in the next few months. Quotations are remaining unchanged for the present as follows:

BOILER TUBES—	Seamless	Lapweld
1 inch	24 70	.....
1¼ inch	24 50	.....
1½ inch	24 00	.....
1¾ inch	26 00	26 00
2 inch	24 50	20 50
2¼ inch	27 75	23 50
2½ inch	32 50	24 50
3 inch	40 00	34 75
3½ inch	52 50	34 75
4 inch	65 00	44 00

QUIET BUSINESS PREVAILS IN BAR IRON AND STEEL

Montreal

Orders of the larger nature still fail to make an appearance in bar iron and steel. Fair sales are reported, but entirely of the small sorting order from outside retail dealers. Quotations on the local market are practically unchanged although one local jobber is quoting at a slight reduction. This clearly states the condition locally, price concessions being offered especially for fair-sized orders. As far as a general reduction is concerned, distributors state that there is little indication at present of this, and if same were made, it would in a'l probability be of a minor nature as present levels are thought to

be well down to bottom. Also with increased business anticipated at any time, this alone would tend to stiffen present quotations. Following are unchanged prices:

Common bar iron, 100 lbs.	2 90
Refined iron	4 40
Irish finish machinery steel	2 95
Mild steel	2 90
Single reeled machinery steel	4 75
Band steel	2 90
Spring steel	4 50
Sleighshoe steel	2 90
Tire steel	3 10
Toe caulk steel	3 80
Harrow tooth steel, per lb.	3 05
Mining tool steel per lb.	0 22
Black Diamond tool and cast steel, per lb.	0 22

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

RANGE BOILERS REMAIN AT UNCHANGED QUOTATIONS

Montreal

Although there is an effort now being put forth locally to stabilize the range boiler market, nothing definite has yet been reached, and quotations remain unchanged. The price shading, apparently on the part of all dealers, has reached the point that little or no margin is left for distributors in many cases, and manufacturers, along with some jobbing houses, are endeavoring to reach a price satisfactory to all concerned. Whether new quotations will be the outcome cannot yet be determined, but it is thought that some decision will shortly be reached that will at least remedy the situation to an extent. Following are unchanged quotations:

RANGE BOILERS—	Standard.	Ex. Heavy
30 gallon	$ 8 75	$11 25
35 gallon	11 25	13 50
40 gallon	13 50	16 00
52 gallon	20 00	24 50
66 gallon	28 00	34 00
82 gallon	35 00	46 50
100 gallon	45 00	55 00
120 gallon	54 00	63 25

LITTLE BUSINESS REPORTED IN SCRAP METALS

Montreal

Quietness still prevails in the waste material markets, ferrous scrap being particularly dull. There are a few small deals in non-ferrous metals, but here also the business is of a spasmodic nature. Consumers are apparently not interested at all, regardless of the extreme low prices quoted by dealers in the hope of obtaining business. Dealers state that little improvement may now be expected until the earlier Spring months when the weather opens. Following are local nominal quotations:

Automobile tires		0 75
Rubber shoes		0 03
Yellow brass		0 05
Red brass		0 09
Light brass		0 03¼
Scrap zinc	0 03	0 03¼
Lead, heavy		0 04¼
Lead, tea		0 02½
Light copper		0 08
Heavy copper		0 10½
Wrought iron, R. Rd., No. 1 per gr. ton		10 50
Malleable scrap (ton)		8 00
Pipe scrap (ton)		6 50
Heavy melting steel	7 50	8 00
No. 2 busheling,		4 00
Boiler plate		8 00
No. 1 machinery cast		21 50

SUBSTANTIAL REDUCTION ON UNIVERSAL CHOPPERS

Montreal

A reduction of substantial proportions is recorded on "Universal" food choppers. The new prices are approximately 40 per cent lower than formerly, and the various sizes will now sell as follows:

FOOD CHOPPERS—No. 0, $1.50; No. 1, $1.75; No. 2, $2.15; No. 3, $2.90 each.

INGOT METALS SHOW EASIER TENDENCY

Montreal

Metal markets have all shown an easier tone during the week, both in London and New York, and naturally the volume of business has suffered accordingly. The decline is rather disappointing as it was thought the lowest point had already been reached.

TIN.—This metal has now declined £10 per ton from the high mark reached last month, and this should be considered as a fair re-action. Prices however may go somewhat lower before any recovery is seen. Local quotations are somewhat easier at 37 cents.

COPPER.—The American market holds fairly well but London is weak and unsettled with Standard reaching the lowest point since the early days of the war. Until the European situation is more settled there cannot be much recovery. Electro is still quoted at 17¾ cents, casting at 17½ cents.

LEAD.—Southern lead markets are practically unchanged, although the tone is no firmer. London is, however, decidedly easier and has shown a considerable decline since last week. The market there has been considered too high and the decline is not surprising. Quotation is unchanged at 7 cents.

SPELTER.—This metal is disappointing as prices are easier both in London and East St. Louis. Local price, 7½ cents.

ANTIMONY.—There is no change in price locally, but higher prices are asked for import, and production is being curtailed in China. Stocks are still quite high, however, in the U.S.A. Chinese is quoted at 6¾ cts., high-grade English at 7¾ cts.

ALUMINUM.—Quotations locally in aluminum are unchanged with the tone of the market showing little change in the past week. This metal has been very dull now for some time. Quotation, 26 cents.

Toronto Markets

TORONTO, January 19.—Reductions in prices continue to be the feature of current hardware market reports. The list of revisions, however, is not so numerous as during the past two weeks. Following the recent downward change in corrugated sheets, eavestrough and conductor pipe quotations, manufacturers of galvanized products now announce easier price levels on metal ceilings and walls for inside work. The new hardware tack list, referred to in last week's issue of Hardware and Metal, is now available. A revision is also made in the tack discounts, the average reduction being approximately 10 per cent. Lower quotations are also noted on the Universal line of food choppers, while certain makes of shears have been reduced around 15 per cent.

An easier tendency has developed in primary crude oil centres, and domestic prices on gasoline and other oil products are remaining unchanged, as yet. There is a steady undertone in copper and brass goods. Dealers report a little more inquiry in scrap materials, but the general situation is still dull. A reaction is noted in the demand for some ingot metals, but prices, with the exception of tin, remain steady. The sheet markets continue quiet but firm, while improved Spring buying in bars and similar steel goods is looked for.

EASIER PRICE LEVELS NOTED ON SHEARS

Toronto.

Reductions are also announced this week in the quotations on the Wiss line of shears. The extent of the decline is approximately 15 per cent. A similar change has also been made on the Heinish make of these products.

PRICE DECLINE APPEARS ON METAL CEILINGS

Toronto

Following the reductions noted last week on conductor pipe, eavestrough, and corrugated sheets, manufacturers of gavanized products have announced a similar recession in quotations on metal ceilings and walls for inside work. The discount is revised from 10 per cent., to 12½ per cent. off list prices.

STEADY TONE REPORTED IN SHEET MARKETS

Toronto.

Current quotations on the sheet markets are generally being maintained at previous levels, with business of a moderate nature. The primary steel centres report a firm undertone, with orders now accumulating and production being a little more active. Demand during the Spring months is expected to revive slowly but surely, and any marked in-

crease in the volume of steel business generally is expected to be sufficient not only to steady the market, but to strengthen it. Sheets have been in better demand by automobile and metal furniture manufacturers in preparation for renewed activity in these industries.

EASIER TENDENCY NOTED IN PRIMARY OIL CENTRES

Toronto

The crude oil markets have softened again, this being attributed to the falling off in demand. It is claimed in some quarters that primary crude oil prices are out of proportion with the prevailing market for petroleum products, this factor being likely to lead the way towards easier price levels The export demand is described as dull.

Current requirements for gasoline are seasonably moderate for this time of the year, and the domestic demand for coal oil is about normal. Requirements of gas and fuel oils are now of a light nature, with lubricants not being absorbed at the same rate as previous years, owing to decrease in industrial inactivity. Local quotations on all refined oil products are being maintained at the levels quoted on the current market price pages.

IMPROVED SPRING BUYING IN BARS LOOKED FOR

Toronto.

Recent reports from the primary steel centres indicate that car builders are requiring more bars and shapes, as well as plates, but while a hopeful attitude is generally maintaned, and the prevailing tone is of a steady nature, the trade in general does not anticipate any marked activity in buying until March or April. Current orders for rails and tin plates, however, attract attention, and reflect a more optimistic note in bar iron, hoops, bands and strip circles. Conditions on the domestic are quiet, but described as in fairly good shape, both stocks and prices being low. Prices are generally fairly steady, at the following levels.

IRON AND STEEL—

Mild Steel bars, base	3 00	3 25
Mild steel bands, 3-16 in. base	3 50	3 75
Bar iron, base	3 00	3 25
Angle iron, base	3 10	3 35
Horseshoe iron	3 75	4 10
Tire steel	3 50	3 75
Spring steel	5 50	6 00
Sleigh shoe steel	3 00	3 25
Hoop steel	3 75	4 25
Norway iron	12 50	15 00
Toe caulk iron	4 00	4 50
Crucible cast sheet steel	30 00	.35 00
Mining drill steel	.. ..	18 50
Cast tool steel, high grade	20 00	23 00
Cast tool steel, medium	30 00	36 00

SUBSTANTIAL REDUCTION ON UNIVERSAL FOOD CHOPPERS

Toronto.

Substantial declines from the previous price levels have been announced by the manufacturers on the Universal line of food choppers. The following are new quotations:

FOOD CHOPPERS—No. 0, $15.50 per doz.; No. 1, $20.40; No. 2, $24.80; No. 3, $43.

LITTLE MORE INQUIRY IN SCRAP MATERIALS

Toronto

While there have recently developed a few more inquiries in the scrap material markets, on the whole the situation shows little variation. Dealers state that current prices are as low as freight rates and cost of handling will permit, and generally look for a revival of interest in the near future. Meanwhile, non-ferrous scrap is moving fairly steadily, but the higher range of prices are not so frequently in evidence. The following are the average of dealers' local buying prices for fairly large quantities.

Gross Tons— Scrap Iron		
Heavy melting steel (Hamilton)	$11 50	$12 00
Borings and turnings	2 50	3 50
Rerolling rails	10 50	11 50
Scrap pipe	6 00	7 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	6 50	7 50
Agricultural malleable	10 00	11 00
Railroad malleable	11 00	12 00
Net tons—		
No. 1 cast	18 00	19 00
Stove plate	12 50	13 50
Grate bars	11 50	12 50
Standard car wheels	13 50	14 00
Scrap Metals.		
Heavy copper and wire	10 50	11 00
Light copper	8 00	9 00
No. 1 composition	9 00	10 00
No. 1 comp. turnings	6 00	7 00
Light brass	3 00	3 50
Heavy yellow brass	5 50	6 50
Heavy lead	4 50	4 75
Tea lead	2 00	2 50
Scrap zinc	4 00	4 50
Scrap Rubber		
Boots and shoes	2 50	3 00
Lumbermen's rubber boots	1 50	2 00
Auto tires	0 50	1 00
Solid tires	0 75	1 25

LITTLE VARIATION NOTED IN PIPE FITTINGS

Toronto

Quotations on pipe fittings are generally being maintained at the revised levels recently effective, with little variation having been recorded in the market for these products. While some slightly easier levels were looked for in some quarters on wrought nipples and couplings owing to the reduction which occurred in wrought piping, such a change has not yet materialized. Similar downward revisions have been announceed concurrently on previous occasions, but it is stated that present discounts remain unchanged, as follows:

PIPE FITTINGS—

	Per cent.
Cast iron fittings	25%
Plugs, cast iron	28%
Do., solid	28%
Do., cortntersunk	28%
Bushings, mall	28%
Bushings cast	28%
Unions ¼ in. to 2 in.	45%
Unions, ⅛ in., 2½ to 4 in.	45%
Flanged Unions	25%
Dart Unions, blk., ⅛ to 2 in.	33½%
Do., ⅛ in., 2½ in. and larger	23%
Do., galv., add to black	30%
Nipples, blk., and galvd. ⅛ to 4 in., close and short	50%
Do., 4½ in. and larger	40%
Do., long, ⅛ in. to 4 in.	60%
Do, 4½ inch and larger	50%
Do., running thread	30%
Couplings, 4 in. and under	30%
Do., 4½ in. and larger	10%

MALLEABLE FITTINGS—

	Black	Galvanized
Class A	0 54	0 67
Class B	0 22	0 32
Class C	0 14	0 22

REVISED HARDWARE TACK LIST NOW AVAILABLE

Toronto.

As pointed out in last week's issue of Hardware and Metal, a new revised tack list is now effective. The complete new list is shown elsewhere in this issue. The discounts are also revised to 65 and 25 per cent., compared with the previous quotation of 70 and 15 per cent.

REACTION NOTED IN INGOT DEMAND: PRICES STEADY

Toronto.

Developments in the ingot markets have been of a moderate nature. Copper has remained fairly steady in spite of a falling off in demand. Both tin and spelter record a reaction, but the undertone is described as fairly firm. Some recovery in aluminum is looked for in the near future, the automobile industry having registered increased interest in this poduct.

COPPER.—Conditions are quieter in the primary copper markets, but prices have remained fairly steady. The industry is still feeling the affects of the holiday period, and trading is of a moderate nature. The domestic markets remain unchanged, with prices hovering between 17½ and 18 cents. One distributor stated that had the firmer tendency continued it's strength on the primary ingot markets, this quotation would have generally evened up to 18 cents.

TIN.—This market has slightly reacted from the higher levels reached during the past few weeks, but the hopeful outlook for improvement still remains. Domestic quotations are generally unchanged at the 39 cent level.

LEAD.—While there has been no changes in price, a decidedly firmer feeling is reported from primary ingot

circles. The local situation finds the prices unchanged, and the demand low. The undertone to this market however, is good. The quotation of $6.75 remains in evidence locally.

SPELTER.—The situation in spelter shows little variation. Buying continues light, which is stated as reflecting the lack of activity in consumers own individual lines of trade at this season of the year. Quotations, however, are being maintained at recently improved levels. The local price is $7.25.

ANTIMONY.—This market is dull and slightly lower. General developments however, point towards little variation in prices. The local range remains between 8 and 10 cents.

ALUMINUM.—The aluminum market is displaying a firmer tone, and the viewpoint has been expressed that a recovery may develop in the near future. A better demand for this product from the automobile industry has tended to strengthen the current situation. Local prices remain at 27 cents.

London Markets

LONDON, January 19.—Price recessions continue to feature the current hardware market reports, although the list of developments is not so numerous this week. Changes noted include easier prices on fence wires, a reduction in glaziers' points, while the new tack list is now effective with revised discounts. Some scrap and strap hinges are lower, and a reduction is noted in the add for tinning iron, rivets and burrs. Prices have also declined on one line of apple parers, and easier quotations have been announced on tinned spoons and forks.

Higher prices are effective on some grades of rope, while the strong undercurrent in turpentine has resulted in a further increase. Business is described as seasonably fair, with buying generally of a light nature.

ANOTHER PRICE REVISION ON YALE PRODUCTS

London, Ont.

The quotations given on the Yale line of padlocks and night latches, which appeared in the January 7 issue of Hardware and Metal, have since been changed, and the previous levels again prevail on the London markets. These lower prices, however, were in effect at the time this report was forwarded, having been announced by a wholesale house in this city.

This wholesaler now advises, however, that an error was made by them in figuring their costs, a price sheet having been used which was primarily intended for United States trade only. The new lower scale has therefore been withdrawn.

ANOTHER PRICE INCREASE IN TURPENTINE MARKETS

London, Ont.

Another advance has been recorded in turpentine quotations, thus bringing the prevailing level to $1.30 per Imperial gallon in one barrel lots. This upward tendency is chiefly accounted for by the strong trend in southern primary sources, the current demand having drawn upon present holdings, while the absence of new receipts at this season of the year, create a strong speculation. Following are the new quotations:

TURPENTINE—	Imp. Gal.
1 bbl. lots	$ 1 30
2 to 4 barrel lots	1 29
5 gallon lots	1 45

HIGHER QUOTATIONS NOTED ON ROPE AND CORDAGE

London, Ont.

An advance of one cent per lb. has been announced by rope manufacturers and distributors in the base prices on beaver manila, New Zealand hemp, sisal and lathyarn. This change is attributed to the improvement in basic conditions at the primary markets. Following are the revised prices:

ROPE—	
Pure manila basis	0 23
Beaver manila basis	0 20
New Zealand hemp basis	0 20
Sisal basis	0 18
Single lath yarn basis	0 18
Double lath yarn	0 18½

IMPROVED DEMAND FOR SKATES & HOCKEY STICKS

London, Ont.

The past week witnessed good sales for the ice skates, hockey sticks and straps. These products are now enjoying a seasonable demand, with ideal weather conditions for the winter pastimes of hockey and skating.

Quotations are unchanged from previous levels.

PRICE DECLINE RECORDED ON GLAZIERS' POINTS

London, Ont.

A downward revision in glaziers' points has been announced, the decline amounting to one cent, thus bringing the price to 14 cents per 1-lb. package. This revised quotation is f.o.b. Montreal, Hamilton and Toronto.

REVISED DISCOUNTS GIVEN ON NEW TACK LIST

London, Ont.

As referred to in market reports contained in last week's issue of Hardware and Metal, the new tack list is now available. This is reproduced on another page in this section. The discounts are also revised being 65 and 25 per cent. as compared with the previous quotation of 70 and 15 per cent.

FENCE WIRE QUOTATIONS ARE ALSO REVISED

London, Ont.

New prices on fence wire are now effective in this district. The revisions are as follows:

BARB WIRE—	
2 point x 5, in 80 rod spools, each	3 65
4 point x 6, in 80 rod spools, each	3 90
4 point x 4, in 80 rod spools, each	4 25
Catch weights, per 100 lbs.	4 00
Galvanized wire No. 9, per 100 lbs.	4 10
Do., No. 12, per 100 lbs.	4 25
Coiled spring wire, No. 9, per 100 lbs.	4 15

SOME LOWER QUOTATIONS ON STRAP HINGES

London, Ont.

A lower range of quotation is now effective locally on screw and strap hinges. The difference is approximately 6½ per cent. The list prices remain unchanged, as follows:

SCREW AND STRAP HINGES—6 in., list, dozen pairs $4.30; 8 in., $4.80; 10 in., $6.40; 12 in., $7; 15 in., $7.50; 18 in., $11; 21 in., $12.40; 24 in., $16. Less 30 per cent.

PRICE REDUCTION ON HUDSON APPLE PARERS

London, Ont.

A reduction of approximately 15 per cent. has been announced in price on the Hudson line of apple parers. The revised quotation on these products is now $15.50 per dozen.

EASIER PRICE LEVELS ON SOME TABLEWARES

London, Ont.

Included among the recessions announced this week are quotations on tinned spoons and forks. These products are now priced as follows:

TINNED TABLEWARE—	
No. 900 teaspoons, gross	2 85
No. 900, dessert spoons, gross	5 60
No. 900, table spoons, gross	5 80
No. 900, dessert forks, gross	6 25
No. 900, table forks, gross	6 50

LIGHT MOVEMENT IN WHITE LEAD IN OIL

London, Ont.

Quotations on white lead in oil at present remain unchanged, with only a light movement being recorded in this product. Following are the current levels.

WHITE LEAD IN OIL—	Tons.	Less Tons.
Pure, per 100 lbs.	13 30	13 65
Elephant	13 80	14 15

SEASONAL SALE FOR CUT AND WIRE NAILS

London, Ont.

The current demand for nails is described as fair for the present season of the year. Prices on these commodities are remaining at the recently revised levels, which are as follows:

Wire nails, ... $3.90 base.
Cut nails, ... $4.35 base.

IMPROVED SALE FOR WASHING MACHINES

London, Ont.

Some improvement has been recorded recently in the volume of sales for washing machines and wringers. There has been no change in price on these products, the quotation remaining at list less 30 per cent.

Winnipeg Markets

WINNIPEG, January 19.—Several important price changes are recorded this week, and for the most part are substantial reductions. Among the declining price items are wire nails, barbed wire, coiled spring wire, alarm clocks, and linseed oil. Besides these developments, advanced prices are reported on turpentine, and sisal and British manila rope.

ANOTHER REDUCTION IN BARBED WIRE QUOTATION

Winnipeg

The prices of barbed wire are reduced again this week. Following are the new prices:

BARBED WIRE—

Lyman—Winnipeg, $4.20 per spool; Fort William, $3.75 per spool.

Glidden—Winnipeg, $4. per spool; Fort William, $3.55 per spool.

Baker—Winnipeg, $3.90 per spool; Fort William, $3.45 per spool.

EASIER PRICE LEVELS ON LINSEED OIL

Winnipeg

A reduction in the price of linseed oil is recorded, and is now quoted at 92 cents per gallon for raw and 95 cents for boiled. This is a reduction of 3 cents per gallon.

PRICE RECESSION ON WIRE AND CUT NAILS

Winnipeg

Although wire nails were recently reduced, another downward change is recorded this week. The revised prices are $4.20 base at Fort William and $4.80 at Winnipeg. Extra for coating and blueing nails are reinstated back to 50 cents per keg. Extra for coated box, 50 cents.

Cut nail price is reduced to $6.50 base, per keg, F.O.B. Winnipeg.

COILED SPRING WIRE ON EASIER PRICE LEVEL

Winnipeg

A further reduction has been announced in the quotations on coiled spring wire both plain and galvanized. The revised price leve.s follow:

COILED SPRING WIRE—	Galv.	Plain.
No. 9, per 100 lbs.	4 75	4 70
No. 12, per 100 lbs.	4 95	4 90

REVISED DISCOUNTS NOTED ON AMMUNITION LISTS

Winnipeg.

Revised discounts on both American and Dominion ammunition are daily anticipated. It is stated that these revisions have been under discussion for some time, but uniformity as regards the new levels is not evident. It is understood however, that the reduction is approximately 20 per cent.

RAPID ADVANCE IN TURPENTINE QUOTATIONS

Winnipeg

The price on turpentine has been advanced this week 10 cents per gallon. The price now quoted is $1.45 per gallon in barrel lots.

LOWER QUOTATIONS APPEAR ON ALARM CLOCKS

Winnipeg

New lower prices are now evident on alarm c.ocks. Following are the revised quotations:

ALARM CLOCKS—	
Big Ben, each	3 43
Baby Ben, each	3 43
Sleepmeter, each	2 06
America, each	1 37

HIGHER PRICES ON MANILA SISAL AND LATHYARN

Winnipeg.

The continued firm tone in raw materials it now reflected on the local rope markets, and Beaver and New Zealand Manila, sisal rope and lathyarn are each quoted one cent per pound higher.

Following are the new prices:

ROPE—

Sisal—¼ and 5-16, per lb., 21½c; ⅜, 21c; 7-16, ½ and 9-16, 20½c; ⅝, 20c; ¾ and larger, 19½c.

British Manila or African Hemp—¼ and 5-16, 23½c; ⅜, 23c; 7-16, ½ and 9-16, 22½c; ⅝, 22c; ¾ and larger, 21½c.

Pure Manila—¼ and 5-16, 26½c; ⅜, 26c; 7-16, ½ and 9-16, 25½c; ⅝, 25c; ¾ and larger, 24½c.

Sisal Lariat—3 x 7-16, 24½c; 4 x 7-16, 25½c.

Manila Lariat—3 x 7-16, 29½c; 4 x 7-16, 30½c.

Lath Yarn—19½c.

Pittsburg Markets

PITTSBURGH, January 19th.—The point as to how much slowing down there was in steel demand and production towards the close of the old year is now settled by the appearance of the monthly report of the American Iron and Steel Institute for December. While the report gives the production only of 30 steel companies, there is information whereby the report can be interpreted, and an estimate made for the industry as a whole. The rate of steel ingot production in October was 23,000,000 gross tons a year, against scarcely over 10,000,000 tons at the middle of July, the low point, and a rate of 42,000,000 tons in the first nine months of 1920, when there was heavy pressure for deliveries, but when output was at only 80 per cent. of capacity because there were physical restrictions, particularly an insufficiency of train transportation accommodations.

In November the rate was about the same, a trifle over 23,000,000 tons. Now it turns out that the average rate in December was about 20,000,000 tons. Probably the rate was about 22,000,000 tons December 1st, tapering off sharply in the last week or two to about 19,000,000 tons, possibly a trifle less.

Average for Industry

An interesting point in connection with mill operations in December is that the Steel Corporation operated to much better advantage than the independents, doing about 48 per cent. of capacity, while the independents did about 30 per cent. This made an average for the whole industry of between 37 and 38 per cent. Frequently, and particularly in 1921, the corporation has had this advantage, not because it undersells the independents, since usually it is the other way, but because they get the preference from many buyers on account of the steadiness of its prices and the regularity of its deliveries. In the high pressure period of 1920, when independents were securing much higher prices than the corporation, the percentage rates of operation were practically even.

The slowing down in production towards January 1st does not indicate any change in fundamental conditions of trade affecting the demand for steel, being simply a reflection of the time of year. Frequently the mills are sold up so well ahead that the natural decrease in demand in the winter, and the withholding of orders just prior to the inventory period, does not materially affect the production, but this time there was a condition of buyers having been ordering from hand to mouth, makir a sensitive condition whereby the rate of production reflected the time of year.

Steel Prices Steady

The steadiness in steel prices noted recently becomes more impressive as time passes. Since the reduction of the American Steel & Wire Company on December 21st, caused by independents having shaded the prices previously held by the leading interest there has been no appreciable change in the general market price of any important steel commodity. Thus, there is steadiness in point of time, and there is also steadiness in point of tonnage, for nowadays large and small orders go at almost the same prices. Last August there was a big difference in some commodities between carloads of 2,500 or 10,000 tons.

Channel of Demand

There is such a widespread popular misapprehension about the quantity of steel used by the automobile trade that it may be well to set down some facts. Leonard P. Ayres, who is an authority on this subject, forecasts the 1922 production of passenger vehicles at 1,100,000 Ford, and 700,000 all other types, representing a considerable increase over 1921 production. The production of trucks in 1921 is stated by another authority to have been 145,000. A fair estimate is that in such production about 700,000 gross tons of steel is involved. Those who think of the automobile industry using large quantities of steel probably overlook the oil industry, which has been using about 1,000,000 gross tons a year of steel tubular goods alone, besides steel of other descriptions, as in tanks.

Selling "Surface Protection" in 1922

Basis Of Greater Paint And Varnish Sales This Year Will Be Co-operative Effort With Educational Work Showing Economic Necessity of Protecting Surfaces as Outlined in "Save The Surface" Campaign

IT IS fundamental to a truly great increase in the sale of paint and varnish products that the surface protection idea be emphasized in selling these lines. The adoption of this plan has taken paint and varnish out of the luxury class and is making them regarded as prime economic necessities. Salesmanship that overlooks surface protection as a prime reason for the existence of the paint and varnish industry is short-sighted indeed. Pretty colors, sanitation, owner's pride, have always sold paint and varnish and always will. Important as their appeals are, surface protection, because it is an economic necessity is far more effective. The selling done by the retailer, who does not use surface protection as the chief weapon of attack is not deriving the benefit which is to be had from the influence being exerted by the "Save the Surface" idea.

The new year is now under way and the detail work in the paint department which must be done each year at this time has now been cleared up. There is no better time therefore than now for the merchant to size up the situation with a view to making plans which will bring the maximum volume of paint and varnish trade from his community and so help to make 1922 the greatest paint and varnish year. Every constructive argument that can be thought of should be summarized under the headings of industrial finishes, shelf goods lines, specialties and bulk goods. A conference with the salesmen of the paint department might well be held at this time to discuss such sales arguments and see that every man is provided with plenty of sales ammunition for this year, not overlooking the emphasis which should be placed upon arguments bearing out the surface protecting value of paint and varnish.

Exposing Neglected Surfaces

This is the time of year when surfaces which have not been adequately protected are showing the effects of neglect. Verandah floors, house floors, other exterior and interior woodwork in homes and industrial plants, automobile bodies, implements, vehicles of other kinds, etc., will now be showing plainly the signs of neglect if they were not adequately painted before the destructive elements of fall and winter commenced their work. Within another few weeks the Spring thaws will be here and then the work of destruction goes on apace. Not only does this affect exteriors, but the tracking into the home of water and slush will soon ruin floors that are not protected. This situation might be anticipated and effective window displays arranged by the merchant showing the protection which a coat of varnish will give to interior woodwork, what a coat of enamel will do to the automobile body or other vehicle, what paint will do to the exposed surfaces of the house, barn or implement, etc. Now is the time for property owners to give thought to such protective measures in view of the approach of spring and effective displays should arouse a good deal of attention.

Impressing on housewives the necessity of protecting woodwork against elements of approaching Spring.

Adequate Stocks

Then in order to be in position to take advantages of such business as is created by these plans, the merchant should give attention to having adequate stocks of paint on the shelves. Adequate stocks are an important part of the trade for several reasons. There is a psychological effect on customers from seeing a well kept, complete range of colors and quantities. Full, clean, well arranged shelves, properly laid out impress the customer with the fact that he is dealing with a real merchant who himself believes in his goods to the extent of a genuine investment in them. The customer will then be more likely

(Continued on Page 48.)

Royal Cluxton.

What the "Save the Surface" Campaign will do for the Retail Hardware Merchant

Written for Hardware and Metal by Royal Cluxton, Manager Canada Paint Company and a member of the Executive of the Save the Surface campaign committee.

FOR THREE years you have been a partner in a big enterprise that you are not yet fully conscious of. You have been picking up a few apples that dropped over your back fence without realizing that you have a flourishing orchard in your own back yard which only needs a little cultivating to make it a big producer. You have been raking in a few profits here and there from a nation-wide campaign without realizing that if you put your heart and soul into the enterprise your profits would increase three-fold.

Not long ago in talking to an up-to-date hardware merchant, the talk drifted to the "Save the Surface" Campaign. By the way, this man considers his paint and varnish business as one of the big profitable departments of his store, not as a side line. "Are you tying up with the "Save the Surface Campaign?" I asked, "Why,—just what do you mean?" he stammered. "Somebody sent me a big colored poster not long ago and I hung it up in the store. I've seen the big ads. the paint and varnish manufacturers are running in the papers showing a paint brush painting a broad streak across house, silos, and bridges. It's good stuff and it has helped me to bring in a few big paint accounts. If that's what you mean I guess I've tied up with it alright."

That answer nearly knocked me cold. Here was an up-to-date hardware man who had been presented with stock in a nation-wide institution, picking up a few profit crumbs from the efforts of others but not realizing that he was an honest-to-goodness partner in the firm. The "Save the Surface" Committee began to realize that this man was only one of hundreds of hardware dealers all over the country who were silent partners in this great movement and not cooperating as they should. After giving this man an explanation of the whole campaign he became an enthusiastic "Save the Surface" booster. Doubtless there are hundreds of dealers all over Canada who have the same hazy idea of the campaign as this man.

The "Save the Surface" Campaign represents a great industry on the move. It is a national effort to increase the use, and consequently the sale of paint and varnish in this country; not some particular manufacturer's brand but any and all brands. It is not a one man or one group idea, but represents a great big partnership which takes in the manufacturer, the merchant, the painter and the public with clean cut dividends for each. The finances of this big movement are provided by voluntary subscriptions by paint, varnsh, linseed oil, tin can, and brush manufacturers, etc., to educate the public mind to the great value of paint and varnish products as a profitable investment and insurance aganst loss of property, by rust, decay and wear.

There is an active working headquarters in Montreal putting across this million-dollar idea, working out new methods of publicity and real tangible means for the dealer in cashing in on the results of this big campaign.

Has it been a success? Decidedly so! A few years ago the paint and varnish manufacturers got together and decided that if we all boosted the same idea it would have more effect than each man boosting his own particular brand. We decided to address our message to the general public, for if the public were educated to use more paint and varnish you dealers would gladly form the connecting link between the manufacturer and the consumer.

Up to this time the public had been thinking of paint and varnish in terms of decoration only. The decorative feature is important but is certainly secondary to protecting, preserving and prolonging the life of the property. When these facts are carefully considered it is hard to think of a more appropriate slogan which could have been adopted than the well-known "Save the Surface and you Save All." A purely selfish idea, you will say. Yes, undoubtedly selfish but a type of selfishness which is generous in the extreme, for no matter how much money is made in the sale of paint and varnish the buyer and user profits much more through its purchase than does the seller, in the fact that it also enhances the value of his property many times the paint and varnish investment.

The Appeal to the Public's Pocket

But it is a long reach from the manufacturer to the public, and a more personal touch must be applied to the campaign if its full potentialities are to be realized, and the only man who can add this personal touch is yourself, you know the condition of their property, bridges, buildings, fences and floors which could be rendered more valuable by the application of paint and varnish. You are the man on the firing line. Your campaign is mapped out for you, your share of the profits is limited only by the effort and interest you put into the work.

The "Save the Surface" Campaign means a great deal to you, as every purchase as a result of this educational campaign is first made from your store or your competitor's. Therefore, you realize how necessary it is for you to utilize the slogan as a part of all your newspaper advertisements and keep the "Save the Surface" poster in a prominent place in your window, also the transparency slogan on the glass of your entrance door, and in other ways keep your store tied up to the big Campaign throughout the year.

A great big Campaign is planned for this Spring and Summer; get your clerks together and appoint a "Save the Surface" committee with yourself as chairman and identify your store as one of the big headquarters for "Save the Surface" products. Make the year 1922 the greatest paint and varnish year in your history.

This is the objective of the Manufacturers. Make it yours—Plan now.

"Save the surface and you save all" Paint & Varnish

As an outcome of reductions of wages and railway rates, the Cleveland iron masters are enabled to reduce the price of pig iron 10 shillings a ton.

It is now anticipated that the importation of foreign iron will largely, if not entirely cease, as, under the new quotations the home-produced iron is the cheaper.

There is therefore a hope that the idle blast furnaces will be restarted at once.

To Stimulate Paint Trade in the West

New Organization Takes Place of Winnipeg Paint Club—Planning Propaganda To Help Toward Increased Use of Paint And Varnish—Affiliation of All Western Canada Paint Clubs is Planned

WINNIPEG.—At a general meeting held at the St. Charles Hotel, here, the annual reports of the president and secretary treasurer of the Winnipeg Paint Club were read and approved. At the same time the name of the organization automatically ceased and was replaced by that of the Paint, Oil and Varnish Club of Winnipeg. New by-laws have been evolved which will govern the newly formed club faithfully and to the fullest interest of the Paint, Oil and Varnish industry in general and to the dealer in particular.

The late President, A. J. Webb, in commenting on the past year's activities of the club referred to the excellent work that had been accomplished since its inception in the year 1912 and right up to the present time. During the intervening nine years the Winnipeg Paint Club devoted its time and attention exclusively to furthering the use of paint, varnishes, and allied products to the conserving of properties and in short to the general and increasing developing of sales for the dealer. Many thousands of dollars subscribed by members of this club have been expended cheerfully and willingly to further the objects of this club, while the members themselves have devoted a considerable portion of their time to the work necessary in these undertakings.

The present standing of the Paint, Oil and Varnish Club consists of twenty-seven firms, all interested in paint and varnish industry, and which meet at least monthly during the year to discuss the problems that arise from time to time and to co-operate in full with the developing of the sales of paint and varnish, and to educate the public of Canada to the unquestionable benefits derived from the proper use of paint and varnish as a conserver of property.

A. J. WEBB

Late president of the Winnipeg Paint Club, now known as the Paint, Oil and Varnish Club of Winnipeg, who is now in charge of the Publicity Department of the club's activities.

During its activities the club has interested itself in many Paint-Up campaigns and other propaganda, all tending towards the increased use of paint, varnish, etc., and to improve and beautify our cities, towns and all other property in the Dominion. The dealer has, in many cases reaped the benefit of the meritorious work which has been accomplished and which is being accomplished in co-operation with this club, but, while much progress has been made, there is a large field for the future endeavors of the organization.

The Executive elected at the meeting of January 12 and who are to guide the destinies of the club during the forthcoming year of 1922, are as follows: J. L. Paul, President; I. T. Peacock, Vice-President; N. E. Horton, Secretary Treasurer; W. Pottruff, S. Littlewood, C. V. Saunders, Executive.

A very ambitious program of collective effort and co-operative work has been laid out by the incoming President, J. Leonard Paul, among which may be mentioned, the spreading of the "Save the Surface" propaganda to the full.

The Paint, Oil and Varnish Club of Winnipeg wish to drive home to the dealer and to the consumer, the excellent economy underlying this slogan of "Save the Surface and you Save All." More and more are the people of Canada coming to realize the truth of this phrase, and it is evident that if the public of this Dominion can be made to realize to the full that it is but "horse"

FAIR DEALING

The Science of Business.

"Business is principally a matter of principles."

ELBERT HUBBARD — Business Genius — Author of "Carrying the Message to Garcia," and Constructive Thinker—writes:—

"Business claims the best that is in us. Business is the reflex of ourselves. The limitation of a man's business depends on his own capacity. Character is the father of reputation. The reputation of a man's business depends on the quality of his goods. *The quality of the goods depends on the man's character.*

"To realize that he is in business for the public good is to make good. His goods become part of himself. They are himself—they have personality. Lowe Brothers' "High Standard" paint is an example of what I mean. Apart from the appropriate name—which in itself is a true index to its quality—*it has behind it, in it and on it,* the stamp of integrity, intelligent research and fair dealing."

Elbert Hubbard was not a Hardware Merchant, but he did have, perhaps, as broad an acquaintance in the field of industry and as great a knowledge of business principles as any other man. That he should use our organization as his example of an ideal business establishment is a great tribute to the late Mr. Houston Lowe, its founder, and those who are left behind to uphold its character.

The Brush Department

Studying Tendencies of Brush Buyers

The Housewife Differs From the Male Buyer in Tendencies Displayed When Buying Brushes—Showing The Wide Range of Brushes Under Various Headings

IN a great many cases sales of brushes are made direct to the housewife, and therefore some study of her likes and dislikes should be made by salesmen in this department. It is one of the rules of salesmanship to find out what motive actuates the purchaser so that steps can be taken to arouse a similar motive in others. It will be found in dealing with women that it is frequently not the article itself that makes the sale, but the exposition of the reasons for its use and how it might be used to advantage in the home. A man will be interested in the strength of the article, the material it is composed of and its finish, but the housewife will be more interested in sizing up the article from the standpoint of its usefulness for the particular job it is intended for.

There are a very large variety of brushes available to-day for the housewife, for the mechanic and for the handy-man. A long list of important uses could be compiled covering each one of these. These uses should be made readily apparent to prospects by the salesman. For instance under the heading of "scrubbing" brushes might come anyone of the following; bath tub brush, the one with a raised handle for various household uses, the laundry brush, the "deck" scrub brush, the brush for cleaning animals, etc. Few housewives will appreciate that such a range of brushes are provided under the one heading, and a little salesmanship will result in greatly increasing sales when introducing these lines.

CARPENTER-MORTON CO. OFFICIAL STAFF

At the annual meeting of stockholders of the Carpenter-Morton Co., Boston, the following officers were elected: George C. Morton, president; M. E. Vose vice-president; W. E. Gilmore, treasurer. Directors include the officers and A. I. McLaughlin, J. B. Lord, J. W. Campbell and Eugene E. Morton.

ODD DAMAGE ACTION AGAINST HARDWARE FIRM

Ottawa. —The inspection of a razor in a local hardware store the day before Christmas has led to a five hundred dollar action for personal damages being entered by a party who sues W. G. Edge, Limited, and two of the store clerks for five hundred dollars. The writ mentions that damages are asked for because of false accusations, false impressions, and unlawful detention.

The circumstances leading up to the issuance of the writ as alleged by lawyer for appellant are that his client went into the Edge store on December 24th, to look at a razor. One of the clerks showed him one, and shortly after it was missed, and, it is claimed, intimations were made that Mr. Rainey had the razor. The defence of the action is that Rainey became indignant on being asked by the clerk where the razor had gone to, and refused to leave the store until he had been searched. It was at the customer's request the defence says, that the searching took place.

THE BOECKH CO. LTD., APPOINT QUEBEC REPRESENTATIVE

Montreal.—H. E. Smith Sales Co., 130 Craig Street, West, were appointed distributors of Boeckh's Brushes for the Province of Quebec in order to facilitate service to Quebec customers.

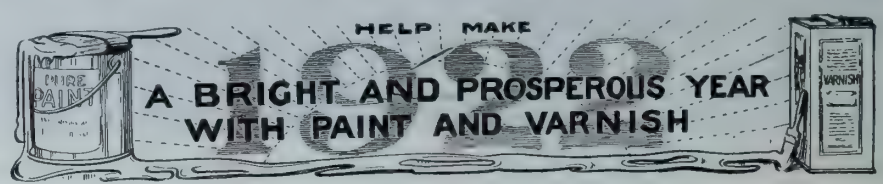
ONTARIO COMPANIES AMENDMENT ACT

All incorporated companies, whether Federal or Provincial, are notified that at the last session of the Legislature, the Ontario Companies Act was amended as follows: "On or before the first day of February, in each and every year, every corporation, whether incorporated under the laws of Ontario or otherwise, which has its head or other office, or is doing business, or any part thereof, in the Province of Ontario, and not being a corporation liable to payment of taxes under The Corporations' Tax Act, shall, without notice or demand to that effect make out, verify and deliver to the Provincial Secretary on or before the 8th day of February each year, a detailed statement or return containing certain information as of the 31st day of December, next preceding."

SELLING SURFACE PROTECTION IN 1922

(Continued from page 44)

to place faith in the merchant's recommendations. If the merchant has a fair investment in his paint and varnish stocks he is likely to pay more attention to them. He will therefore sell more and will be better satisfied with this department. Adequate stocks also help the merchant to retain customers. Even old customers will go elsewhere if they cannot get the selection they want. New customers are also made who were formerly customers of competitors who have probably not realized the value of adequate stocks. Perhaps he could not give them service. His stocks were too low. The customers of the store will be better satisfied as a result of adequate stocks, for if a person starts a painting job with a certain brand of gray and buys three gallons he may decide to go ahead and to do the entire house. He wants to match the color exactly when he comes back and cannot wait. The merchant if he has a full stock can serve the customer. This means good assortment, plenty of each color and size, with a study made of fast sellers, next best sellers, etc. taken from the sales records. Adequate stocks will enable the merchant to sell quantity lots where he formerly sold small lots. It will help him to think big and consequently sell big. He can land house



Boeckh's Brush News

This Boeckh Brush Display Is A Big Business Bringer

DEALERS who put in this display find that it not only helps to increase their volume of brush sales, but also increases their sales of the higher-priced brushes. People who come in to buy a 25-cent brush to do a bit of painting around the house will nearly always buy a better brush if you can show them something better.

The display board shows your line at a glance. It is a silent but effective salesman.

The Board Is Supplied Free

We charge only for the actual stock displayed. When ordering it is your privilege to say what brushes go on the board and the usual practice is to make the display fully representative of all the types of brushes you carry in stock.

Send us your order for a board now. Get ready for the big annual "paint-up" and "clean-up" drive. A brush display in your window will bring you a gratifying increase of business.

Weekly Paint Markets

Montreal

MONTREAL, January 19.—The outstanding feature of the paint markets this week is the advance of from 6 to 8 cents in local turpentine quotations. This product is now being quoted at $1.23 in most quarters although a further advance of 2 cents has been made by a few jobbers. Turpentine has been steadily gaining during the past week, and according to those well informed, a further advance in quotations would not be surprising. There is now an improved demand, particularly from Europe, and with producers' offerings none too large from now until the new crop in April and May next, a steady to firm market is looked for. Linseed oil prices remain unchanged with the tone of the market fairly firm, although not to the extent that is shown in turpentine. One large crusher stated he would not be surprised if a slightly easier tendency developed in linseed oil because of certain crop reports, but if such did occur it would not be for long standing and the market would soon regain its former level.

Window glass is now recorded somewhat easier than in the past few weeks, owing to revised prices from Belgium manufacturers. There is no weakening in the situation on this account, but local distributors state that the former strength is merely diminished. Paint manufacturers, without exception, still maintain that paint and varnish prices will remain steady throughout the active Spring season, and although this question will in all probability be thoroughly discussed early next month, it is apparent from present indications that the chances of a recession in prices are very remote.

TURPENTINE MARKET VERY FIRM: PRICES ARE ADVANCED

Montreal.

Recording an advance of from 6 to 8 cents per gallon on the local market and now remaining firm at its higher standing, has been the development in turpentine within the past week. Towards the latter end of the week the strength became more marked, and Savannah markets then recorded considerably higher figures. Since the close of the holiday season turpentine has been displaying a firm tone, to be followed by a continued gain of somewhat more intensity, which passes the market nearly 10 cents higher in the course of two weeks.

The interest shown in this product in the South, has improved appreciatively since the turn of the year, and while buyers on this side are still exercising care in their purchases, the European demand has been much greater in recent weeks. Although this demand is not expected to be of very long standing—at least not to the same proportion as in recent weeks, there will—according to local distributors—be a gradual improvement in home consumption, and this should tend to maintain the present higher standing for some time. In fact dealers locally look for little recession now until the new crop in April and May next, basing their opinions on reports from the South where it is claimed producers' offerings from now on will be small and the demand will increase.

Locally current demands are small, and little increased activity is looked for until next month as the active season here does not usually commence until the end of February or even March. Increased quotations are as follows:

TURPENTINE—	Imp. gal.
1 barrel lots	$1 23
2 to 4 barrel lots	1 21
Broken lots	1 33

LITTLE EASIER TENDENCY IN WINDOW GLASS

Montreal.

Although the improvement in the Belgian mark and the increased transportation rates since the close of navigation, are still factors that must be considered in determining the tone of the window glass market, there is now a somewhat easier tendency because Belgian manufacturers are meeting the situation with revised quotations. In other words, slightly lower prices are now given by these manufacturers to meet competition, because import prices were increased by the two above mentioned factors. With the active season now passed for another year, local distributors do not anticipate any marked change for the present. The market has been considerably firmer in recent weeks and the action on the part of manufacturers abroad will only be the means of steadying the situation.

CURRENT LINSEED OIL PRICES ARE MAINTAINED

Montreal.

Quotations on linseed oil are unchanged for the week, and the market is again more or less uncertain. This has been the state of this product for some time, although remarkable strength for this season has been displayed in the closing week of the old year and up until the present. There is little reason to believe, even now, that a recession of any extent will take place, but a slight reduction, owing to crop reports, would not be surprising to some well informed on the situation. If such did occur in the near future it is not expected to be for long, and the market would soon regain its former level and remain fairly firm for some time. According to local crushers flaxseed is steady and the by-products, cake and meal, are not as firm in price as was the case a few months ago. Both these factors are assisting in holding oil prices at present levels. Increased sales, usually apparent after the close of this month, will also tend to stiffen prices. With present levels holding, there seems to be every likelihood of a steady to firm market for the earlier purchases of this product. Unchanged local prices are the following:

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrel lots, per gal	0 81	0 83
3 to 5 barrel lots, per gal	0 79	0 81

Less barrels, add 10 cents per gallon.

ROSIN QUOTATIONS ARE SOMEWHAT STEADIER

Montreal

In sympathy with turpentine, rosin is now said to be slightly improved, although local prices are unchanged with no immediate sign of a revision to higher prices. The tendency of this product has been decidedly downward in the past twelve months and quotations to-day are just a little over one half of prices one year ago. The reason for rosin not showing the same amount of strength as turpentine is attributed to the fact that much larger supplies are available, while the demand remains very quiet. In the Savannah market, sales are gradually improving, but it is noticeable that most of the supplies are being sold to foreign buyers. Following are local prices:

RESIN—	bbls.	100-lb. kegs	Less quantities per 100 lbs.
G., medium grade	3 00	4 50	6 00
Water white	4 75	6 25	7 75

PAINT AND VARNISHES AGAIN MORE ACTIVE

Montreal.

The movement of paint and varnishes becomes more active as the weeks pass. Salesmen from some houses did not recommence their trips on the road until the middle of the month, but with all

The Canada Paint Co. Limited,

Montreal, Que.

Gentlemen:- For about THIRTY years, we have been distributing ELEPHANT GENUINE WHITE LEAD with the greatest satisfaction to our dealers and ourselves.

Although ELEPHANT GENUINE WHITE LEAD costs more than practically any other White Lead, our sales have steadily increased from year to year.

Its popularity, we attribute to the high standard of quality and fine grinding that you have always maintained, and the fact that painters find from experience that although GENUINE ELEPHANT costs more by the pound, it costs less by the job.

The year just ended has been a most satisfactory one indeed.

Yours very truly,

THE HOBBS HARDWARE CO. LIMITED

C.A. Whitwam

Vice President.

CAW/HV

Painters find by experience that although Genuine Elephant costs more by the pound, it costs less by the job.

MONTREAL PAINT MARKETS

(Continued from page 50)

sales forces again engaged, a continued increase in business is now looked for. Reports from all quarters are that a satisfactory volume of earlier Spring business has been secured, and the following weeks should further increase these records over last year.

Witnout exception, the opinion among manufacturing circ es is that little or no change will take place in the prices of paint, varnishes or sundry lines for the active Spring season. Raw material costs are in many cases higher now than when the reduction was announced last Fall, and according to manufacturers there is no existing factor that would warrant lower prices at the present time.

Toronto

TORONTO, January 19.—While actual price developments on the paint markets are absent this week, yet the interest in current paint circles is firmly maintained. Turpentine continues to manifest strength at the recent advanced levels, with domestic quotations unchanged and present supplies low. On the primary markets, there has been a slight easing from the higher levels recently recorded.

Whether these conditions indicate another resumption of the see-saw tactics which have been recently prevalent, or constitute the commencement of another upward development at production centres, is difficult to ascertain until the cause for the change is analyzed.

The demand for turpentine during the ensuing weeks of the year is expected to be larger than receipts in southern markets. Such a condition would tend to enable the marketing of stocks now being held by producers. Consumers' supplies on practically all centres are considered low.

There is little change to record in the linseed oil markets, the recent extreme dullness still being evident, with flax seed prices remaining fairly steady. Some recession in quotations on cake and meal have tended to maintain the current levels on oil.

Paint and varnish manufacturers are engaged upon preparations to make this year the record season in the history of the industry, and the current interest is centered more upon prospects for attaining this objective than in the prevailing volume of business.

MAINTAIN HIGHER PRICE LEVELS ON TURPENTINE

Toronto.

The recent rise and maintenance in turpentine prices are attributed to the operation of supply and demand, coupled with the skilful manipulation of available supplies in the hands of southern producers. Whi'e the domestic prices are unchanged, this week, due to the absence of any local stocks, quotations at Savannah eased off slightly from the higher levels, recently attained. This is not of sufficient extent, however, to affect the domestic levels, but indicates the natural reaction from the sudden advances. With the prevailing demand in excess of receipts being marketed, a firm tone in this product is generally looked for until the new crop is available. Following are current prices:

TURPENTINE—	Imp. gal.
1 barrel lots	$1 30
2 to 4 barrel lots	1 29
5 gallon lots	1 45

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $15 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph Windsor, or Montreal but freight may be equalized from any of these points.

Car load lots of 70 bbls. Price on application.

Less than 1 barrel lots—15 cents per gallon

MORE INQUIRY NEEDED TO STRENGTHEN LINSEED

Toronto.

The situation in linseed oil has recorded very little variance during the past few days. Prices on the domestic markets are holding unchanged, and while some dealers are evidently looking for slightly easier levels, the opinion is expressed in other quarters that with a recovery in demand for linseed during the next few weeks, the situation should develop a firmer tendency in the near future. Prevailing quotations are as follows:

LINSEED OIL—	Per Gallon.	
1 to 2 barrel lots	0 84	0 87
3 to 4 barrel lots	0 82	0 86
6 to 9 barrel lots	0 81	0 84

Less barrels, add 15 cents per gallon.

STIMULATING PAINT TRADE IN WESTERN CANADA

(Continued from page 46)

sense to protect their property, then indeed a long step forward towards the realization of what the paint and varnish industry in Canada should be, will have been taken.

The club has been associated with a considerable number of Paint-Up campaigns, all of which have proven very successful, and the club is convinced that through their efforts during the past years the sales of paint and varnish and allied products have been considerably increased in Western Canada.

It is desired to enthuse the public of Canada in the very necessary work of painting up annually and keeping their homes spick and span with the resultant increase in value of property—the immeasurably better appearance—the beneficial effect it has on the community in general and finally the enduring protection against the attacks of the elements which are always present and ready to attack an unprotected surface.

Affiliate Western Clubs

Other plans are in process of maturity, which will tend towards the affiliation of the various Paint Clubs of Western Canada, so that concerted effort can be applied to the sole object for which the club was formed, namely the development and increasing of sales of paint and varnish in Western Canada.

The present executive are men who have been connected with the paint trade for many years and are widely known for their enthusiasm and interest in this work. The newly named Paint, Oil and Varnish Club of Winnipeg will carry on the work of the late Winnipeg Paint Club with enthusiasm. There will be no change in the policy of the club, but a steadfast ever-present effort will be made in the interests of the paint and varnish trade in general.

The Paint, Oil and Varnish Club of Winnipeg wish to co-operate with the dealer and to support him to the fullest extent and will be at all times glad to consider any suggestions that might emanate from these dealers or from any other sources.

A publicity department has been created and placed in charge of the late president, A. J. Webb, who will conduct this particular feature of the club's work and endeavor to spread the gospel of "Save the Surface and Paint-Up" in the interests of the club and of the dealers who are served by its members. The year 1922 is in its infancy and many prophecies are rife as to just what will be in store. The Paint, Oil and Varnish Club of Winnipeg are approaching the forthcoming season of 1922 with confidence that the period of depression recently experienced has now spent its force and that better times are ahead. They feel however, that it is time for action—a time for co-operation and a time to put every effort behind the developing of ever increasing sales, and the spreading of the knowledge and benefits of the use of paints, varnishes and allied products in the interests of conservation, and they have faith that if this is done that the year 1922 will indeed be the greatest paint and varnish year in the history of Canada.

ANTICIPATING TREND OF PRICES

(Continued from page 28)

fully, and considered present cost of manufacturing and condition of business, and we do not contemplate any great reduction in prices, on hand saws, small goods, trowels, and carpenters' bit braces, beyond the reductions lately made, and these present prices are very likely to rule for the ensuing months, probably up to Mid-summer, before we will take another careful survey of the costs, of all the lines, to consider any further reduction.

"There is a misapprehension on the part of the hardware buyer, in regard to saw prices. Saws, and like tools, made by the saw makers, did not start to advance until many other kinds of goods had made very substantial advances, and the whole range of advances in saws, average less than 100%, so their recession is necessarily slower.

"You can safely advise members of your association, to inventory present stocks at present replacement values, as this would be very close to what they will have to pay for the ensuing few months. There are some small exceptions to this, but they are unimportant, and of these, we are advising our customers immediately."

How About Your I.Q.?

An I.Q. is an abbreviation for "intelligence quotient" and is the basis on which psychologists, doctors and teachers are estimating how Canadians rank, all the way down the line from genius to morons and idiots.

Dr. C. K. Clarke, noted Canadian alienist, says that not more than twenty per cent. of Canadian children have more than average intelligence. Is your child one of the average sixty per cent.? one of the twenty per cent. above this line? or one of the twenty per cent. below? How do you rank yourself?

Perhaps you think you are normal, but an investigation of this article of Dr. Clarke's may give you a rude shock. Get your family and friends studying it and see where they rank.

This remarkably timely article appears in

MacLean's Magazine *for* JANUARY 15

The West Is Still There!

By Charles Christopher Jenkins

A staff writer of MACLEAN'S MAGAZINE was sent West a few weeks ago to find out what there is to these 'blue ruin' stories. He returns with a huge grist of facts, and reports that, although hard hit in many ways, the West is, as everyone who knows it would expect, breathing the virile and vigorous spirit of constructive optimism.

Included in this article are striking and timely messages to the readers of MACLEAN'S from Hon. T. C. Norris, Premier of Manitoba; Hon. W. M. Martin, Premier of Saskatchewan; and Hon. Herbert Greenfield, Premier of Alberta.

"Have confidence in us; we'll come through!"—this is the key-note of an article for which Mr. Jenkins travelled nearly ten thousand miles to get definite and accurate facts for MACLEAN'S readers.

Other Big Fact and Fiction Features in this issue of MacLean's:

CANADA'S CARIBOU CROP—Vilhjalmur Stefansson argues that reindeer-steaks will soon find their place on the menu of thousands of Canadian families.

WHAT CAN THE MOVIES TEACH?—Nicholas North's investigation of the "Menace" of the movies; they should be excellent educators.

THE SAIL DRAGGER—by Frederick William Wallace. The first installment of a three-part novelette written by a Canadian who knows, loves and understands the sea and can tell a vigorous, dramatic tale.

THE PIPES OF DEATH—an exotic and thrilling story of a little-known country by "Sapper"—H. C. McNeile.

THERESE AND GERMAINE—An Arsene Lupin detective-mystery story, from the fertile pen of Maurice LeBlanc.

CONVERTIN' ELDER HAWKINS—Archie McKishnie returns with the first of a new series of Lenix Ballister negro stories.

MOSTLY SALLY—Pelham Grenville Wodehouse's cheery, rollicking serial.

And in this issue there is a particularly strong Review of Reviews Department

LET'S GO!

for the Greatest Paint and Varnish Year

DO YOU understand why Paint and Varnish products have weathered the depression of 1921 with such success?

There is only one big, rational, national reason. It can be stated in seven short words—"Save the Surface and You Save All."

In three years these seven short words have lifted Paint and Varnish out of the luxury class and spread them into the pores of public consciousness as the greatest conservers of property.

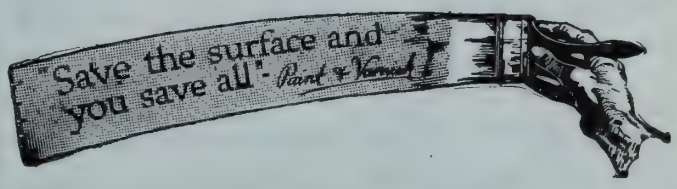
This priming coat of "Save the Surface" educational propaganda and publicity, participated in by every factor in the industry, saved the Paint and Varnish Industry last year—nothing else.

Conditions are now ripe to make 1922 the greatest Paint and Varnish year. Big plans are under way to achieve this great objective and to help you achieve your share in it.

Get in line. Order the slogan cut to-day and use it in your newspaper advertising.

Save the Surface Campaign

509 Royal Trust Chambers
107 St. James Street
MONTREAL



Electros of this slogan cut suitable for newspaper advertising will be supplied at forty-eight cents each.

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

Stop Motorists

And Bring Them Into Your Store by Displays of

Diamond "A" and Kyanize

KY-AN-IZE

Diamond "A" is an Ashdown item, up to the Ashdown standards in every way; a pure, rich line of paints of exceptionally good quality, spreading and covering to the perfect satisfaction of every paint user, professional or amateur.

Ashdown's Diamond "A" Paints are good to the last drop. A satisfaction to advertise, display and sell. They are dependable and reliable and a "booster" for the Paint & Varnish Department of the hardware store.

Kyanize will make floors and furniture look like new, and a cloth, with warm water, will keep them looking spick and span. Kyanize is the most durable finish ever made. Can be supplied in clear, and eight popular colors.

Kyanize Motor Car Enamels are easy to apply, dry hard in a short time, with a beautiful lustre that lasts. Made by the celebrated Kyanize Process, they color and varnish in one operation. Nine beautiful, permanent colors, also a rich, lustrous black.

The Ashdown Organization backs it.

Barrett Roofings, Cements Industrial Paints etc.

First Sales *Easy*—Repeat Sales *Sure*

When you handle Barrett Products you are aided by two strong selling forces:

(1) Our big national advertising campaign in the leading newspapers, farm journals and technical magazines. This advertising is creating new business for Barrett Dealers in every city, town and village throughout the Dominion.

(2) The high quality of the products themselves. This *keeps* the business. The railroads, the large industrial concerns, and many thousands of individual users know from their own experience that the Barrett trade-mark stands for sure dependability and sound economy.

Are you carrying *all* these famous Barrett Products? If not place a trial order to-day.

Everlastic "Rubber" Roofing
Everlastic Multi-Shingles
Everlastic Single Shingles
Everlastic Liquid Roofing Cement
Plastic Elastigum Patching Cement
Liquid Elastigum
Everjet Carbon Paint
Creonoid (Fly Oil) Lice Destroyer and Cow Spray

The demand for these products far exceeds the demand for any similar products on the Canadian market. Their sale is increasing by leaps and bounds. Don't miss the opportunity to cash in on this big and growing demand.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

ABRASIVES
Canadian Hart Products Ltd., Hamilton, Ont.

AIR COCKS
James Morrison Brass Mfg. Co., Ltd., Toronto.

TRADE CHICAGO MARK

SPRING HINGES

The "Reliance"

The Door Spring is unusual. It has a **Ratchet Tension Adjustment** and a very powerful and efficient spring.

It is profitable to the dealer.

The "Chicago"

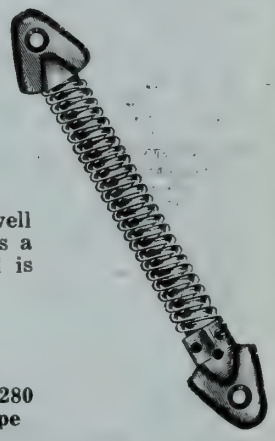
Type No. 280 Door Spring is well known as a **profitable seller.** It is a durable and attractive article and is made in four sizes.

Is your stock complete?

Chicago Spring Butt Company.

Type No. 270 — CHICAGO — NEW YORK — No. 280 Type

Send for Catalogue 36



THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U. S. A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.

Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

Subscription price of HARDWARE and METAL is $4.00 per year or less than six cents per issue.

A PIECE OF TABLEWARE

may be solid silver without the "sterling" stamp, the accepted "Hall Mark" of quality.

But you don't know.

A Bank might be honest and efficient without Government inspection.

But you don't know.

A business concern may be absolutely responsible without a commercial rating.

But you don't know.

A publication may have the circulation it claims without verification by the Audit Bureau of Circulations.

But you don't know.

Better be sure.

The circulation of Hardware and Metal is verified by the A. B. C. Hardware and Metal is the only hardware publication in Canada that will supply an A. B. C. Audit.

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

SITUATIONS WANTED

HARDWAREMAN 21 YEARS OF AGE WITH 5 years' retail experience, desires position; State salary. Best of references. Box 172, Hardware and Metal.

SALESMAN AND HARDWAREMAN WITH both Canadian and American experience, as manufacturers' salesman for hardware and mechanics' tools, also long experience in retail trade, wants employment. Box 104, Hardware and Metal.

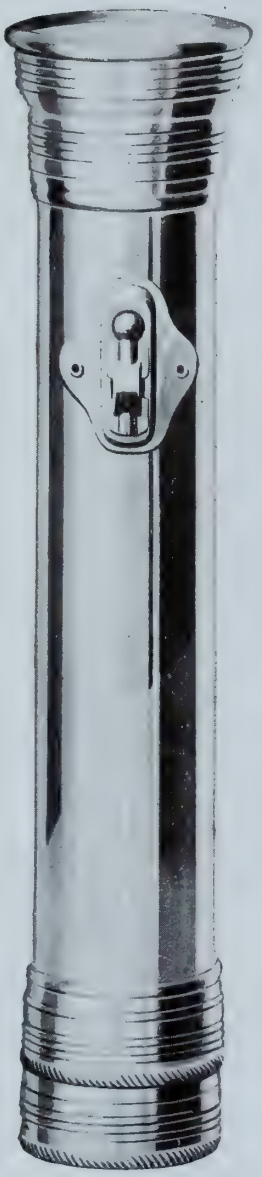
EVEREADY SPOTLIGHT

—with the 300-foot range



Exclusive Features of the Eveready Spotlight

1. Focusing device.
2. Special Eveready Mazda Lamp.
3. Parabolic Reflector.
4. Shock Absorber.
5. Chamber, holds 2 extra Eveready Mazda Lamps.
6. End cap stamped with battery and lamp renewal numbers.

EVEREADY was the first Flashlight made

—it established the industry

FROM the beginning the Eveready laboratories have worked patiently, earnestly, unceasingly, to make Flashlights still more useful; yielding a still more powerful light; having still longer life.

All this has involved much more than the betterment of design and construction in the Flashlight itself. It has called for laborious and costly research to create a Flashlight Battery that generates more electricity for a longer time. For, after all, the Battery is the power house of the Flashlight.

The Eveready Flashlights in use today flash the story of our success in every quarter of the globe. Eveready Flashlights are the acknowledged standard Flashlights of the world. Eveready Flashlight Batteries are universally demanded as the best Batteries for every type of Flashlight. Every improvement ever made in Flashlights was made by Eveready. The latest are—

The Eveready Spotlight with the 300-foot range.

The Eveready Unit Cell for tubular flashlights. This assures fresher and longer-lived batteries for the flashlight user, because the dealer can fit all tubulars with this one type of battery and he therefore carries a minimum of stock.

Eveready advertising throughout the year will tell the story of Eveready Flashlights as used in the Home, in the Office, in the Factory—the thousands of uses wherever safe, portable lights are needed to serve humanity.

The

"SUPERIOR"

Parlor Door Hanger

The "Superior" works on the simplest adjustment principle known. The adjustment screw is absolutely reliable—it never fails to operate.

This noiseless parlor door hanger has the simplest adjustment principle known. The adjustment screw is fully dependable and reliable—it always works.

This effective hanger is fitted with fibre wheels operating on case-hardened roller bearings. The bumpers are specially manufactured, they are bound with rubber of extra heavy thickness.

They are packed complete with screw, stops, and guides; 14 feet of track with double sets; 8 feet of track with single sets.

If you are not already enjoying the excellent sales of this hanger—investigate now!

RELIABLE

Round Track Door Hangers

These are strong, sound, substantial hangers that can be depended on for hard wear and use. They will stand up and give satisfaction under the severe test of winter weather. Ice and snow never trouble owners of these effective hangers.

The No. 1 and No. 2 hangers are shown. These effective, "Reliable" Round Track Hangers are made of the best grade malleable iron frame, with upper and lower rollers. The upper roller has hardened steel bearings. The malleable iron frame is unbreakable and the upper and lower rollers prevent the hanger jumping the track.

The "Perfect" Curry Combs

We make twelve varieties of Curry Combs, four of which are here illustrated. They're all made of No. 1 Grade Curry Comb steel which is a special stamping steel made for this purpose.

All wired combs are made with coppered steel wire which is rust-proof and durable. The wire extends right through the handle and forms an eye at the end making a very rigid and permanent construction.

The mane comb attachment which is on some styles is made of annealed malleable iron. This is indestructible. Combs are all finished with black Japanned handles and varnished.

The teeth are even and regular and are so made as to prevent tearing the hide.

We make two styles of cattle combs.

Curry combs are packed one dozen to the cardboard box in 12 dozen cartons.

FOR EXPORT

Cartons are specially packed in strong wooden boxes for export.

For Domestic and Export Trade.

Get after your local Painter and sell him

Decorative Wall Burlaps

The painter, Mr. Hardware Merchant, is the logical buyer of Decorative Wall Burlaps in a big way. That is to say, he needs large quantities within a few weeks' or a few months' time. As a prospect, therefore, he is the man to get after. If properly cultivated he will buy.

Decorative Wall Burlaps—
The Wall Coverings Yielding Profit

By all means carry these in your paint department. Many times your customers will respond to your suggestion to cover a new wall, or an old one, with decorative wall burlap. It is easy to apply, convenient to handle, makes an excellent finish, and is not expensive.

Get this Little Sign; Place it on the Counter; Sell directly from it.

Frost FENCE

Sell the Fence the Farmer Wants

A big slice of your farm fence trade this season is composed of farmers who must practise economy whether they want to or not.

At the same time these men—knowing the many exclusive features of Frost Fence by seeing it everywhere giving **satisfaction,** by reading our persistent advertising—**want Frost Fence.**

You can bring in this big slice of trade **this** season. Our

Prices do not stand in the way

You can easily convince these men they need wait no longer for a real fence. Frost prices are down to meet the farmers' ability to pay, at present low prices for farm products. The quality remains the same.

You can clinch the sales with such extra advantages as the famous Frost-Hold-Tight Lock and extra quality wire, drawn and annealed in our own factory specially for fence.

Sell the fence that gives extra years of service. Why not write us for quotations?

A Spramotor in the Hand is worth Two in the Factory

You wouldn't find a hardwareman so neglectful as to be without a spade or rake in stock—there's too much demand for them.

Yet—there is a garden and farm implement every bit as much in demand, that some hardwaremen don't keep in stock—or don't offer to send away for for their customers—that's the

Spramotor

It isn't a SPRAMOTOR unless we made it

Every grower of fruit and vegetables has a need each year for the Spramotor. The Spramotor way is the only effective way to spray—the farmer has had that told him by his farm papers for years, and he has the word of his fellow farmer to back it.

Every farmer and gardener sprays — more and more each year are spraying the right way—the Spramotor way—and it is up to you, Mr. Hardwareman, to see that you get in on the profit of the Spramotors sold in your district.

We have an attractive agency proposition for the livest men in many districts.

Write to-day.

Meet The Demand With Bowser Pumps

In every locality there is a certain store which serves more gasoline and oil to customers and gets more profits than competitors. Usually Bowser Piston-Type Measuring Pumps will be found in front of those stores. That's because motorists have been learning for 35 years that Bowser Pumps give clean, power-*full* gasoline accurately and quickly.

The Bowser Centrifugal Separator positively extracts all water from gasoline before it is discharged. Clean, dry gasoline burns better, makes more power and less carbon.

By installing Bowser Gasoline and Oil Handling Equipment, you, too, will get into the class of dealers who make big profits from the motor trade.

Bowser Equipment is MADE IN CANADA by

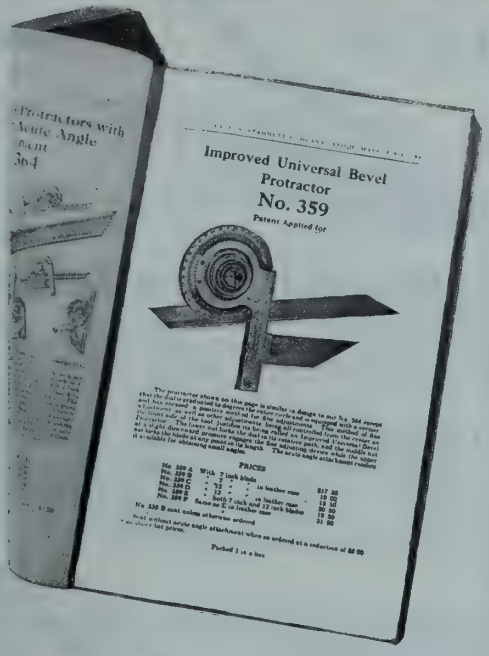
New Tools You Should Know



Improved Universal Bevel Protractor No. 359

A protractor that will interest every top-notch machinist. Graduated to degrees throughout the entire circle of its dial, equipped with a vernier and a new positive device for fine adjustment, and so arranged that all adjustments may be centrally controlled from the front side of the tool. The superior convenience and wide range of measurement afforded by this No. 359 Starrett Protractor will be much appreciated by all your customers who know and use fine precision tools. Consult your copy of the new Starrett Catalog No. 22 "MA," see page 83 for full description and illustration. If you haven't a copy handy, write for it now, and also get the Starrett booklet—"The Tools Mechanics Buy."

"Self-Fluxing"

—a feature that appeals to every class of hardware trade—

Manufacturers use Self-Fluxing solder because it speeds production—repairmen, garagemen and tinsmiths, because it is convenient, rapid and certain—householders, because it is the only solder for the layman. And all of these customers are impressed by the remarkable work it does, and therefore continue to buy—

KESTER ACID CORE WIRE SOLDER (FLUX IN POCKETS)

You, too, will like this Self-Fluxing, genuine tin-and-lead solder. First, for the same reason your customer likes it; because it will enable you to do your own work better—second, because it is easy to handle. It stocks two items in one—flux and solder. It's easy to sell; easy to *keep* sold.

Satisfaction all along the line! Why? Simply because fluxing, the hard part of soldering, has been eliminated by putting the flux in the solder. Note that the flux feeds out before the solder melts, insuring a perfect bond; no chance of faulty fluxing; soldering time cut in half!

Try it on your hardest job. If you like it, you can buy it in one pound cartons and on one, five and ten pound spools.

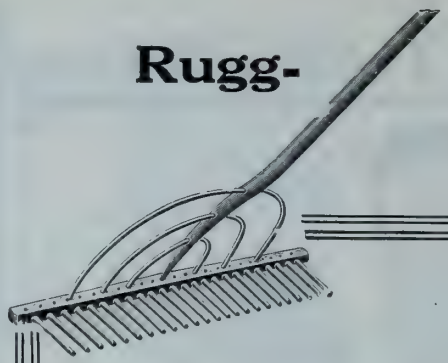
Rugg-Ball



Hay and Lawn Rakes

These beautiful, well-made rakes are made of the best White Ash and Maple stock. The teeth have no shoulder; each tooth is pinned in place, which makes the lightest, strongest rake made.

Steel Tube Bow Rakes

are made with bows of light, cold rolled steel tubing ¼ inch in diameter, bent the same shape, and fastened in the same way, as the common wood bows, the weight also being practically the same. They are varnished to prevent rusting and are warranted never to break. Especially desirable for export, as they can be easily set up without breaking the bows.

Good Tools —— make Better Sales

YOUR customers will appreciate the good points of Williams' Superior Drop-forged Nail Hammers, for they mean efficient service.

Their heads are hard, dense and tough. The special split and pitch of the claws give a fast, powerful draw; nails can be drawn **point** first. The tapered eye and special wedges anchor the handle permanently. Its flared grip prevents all hand-slip. Their perfect balance assures increased striking power.

One good tool sells another and Williams' Hammers–made in Canada—will help to move other lines. All patterns and sizes. Catalog on request.

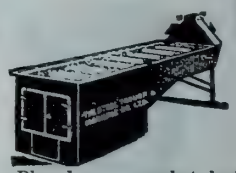
Here's a Money Maker!
MAPLE EVAPORATOR
and
WELDED STEEL SAP PAN

This evaporator fills the popular demand for a handy, efficient, up-to-the-minute machine at a reasonable price.
It is specially made to meet the requirements of the small farmer who wishes to get all the money profits out of his maple bush without too heavy an outlay for apparatus.

Welded Sap Pan—no solder about it to melt or leak—a pair of handles on each side and heavy angle steel around top.
Standard sizes: 6″ x 24″ x 5′ ; 6″ x 36″ x 7′ ; 6″ x 24″ x 7′ ; any size to order.



Placed on market last year and proved a great success.

Write us for trade prices and further particulars regarding these two money makers — we also manufacture steel baths, tanks, sanitary closets, dairy equipment, etc.
Send list of prospective buyers and we will mail literature to them.

STAR HACK SAWS

Your Reputation—
What is it Worth to You?

One dealer told us recently: "Why should I stock Star Hack Saws. I can sell my customers any blade that I happen to have in stock."

"True," we said, "you can sell your trade the hack saws you recommend. But if you recommend a blade that is unknown, the customer is going to watch it critically. If it isn't quite up to the mark, he will blame you for the poor choice.

"Put your recommendation behind the Star Saws, and you have our reputation added to yours. Our 38 years of success as manufacturers added to your years of successful selling."

Star Saws are now sold direct from the factory in Middletown, New York, where they have always been manufactured.

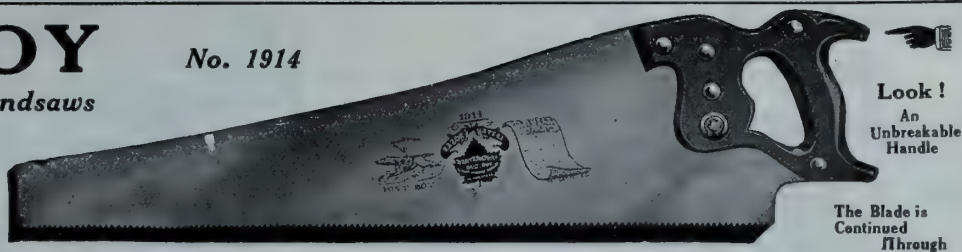
Something New in Handsaws

—Patented—



Look! An unbreakable handle. The Blade is continued Through.

Notice the design of the handle. Observe how it is attached to the blade. The handle is slit at top and bottom. The blade is so designed that it extends through the slit the entire length of the handle, and projects beyond the point at the horns, protecting the handle from damage.

Advantages:
Unbreakable handle.
Perfect balance.
The "right hang."
Comfortable grip.

The Blade:
Made of Jessop's highest grade steel; taper ground; tempered by our secret process; highly polished.

The Handle:
Mahogany finished and fastened with three screws at top and two below, located at scientifically correct points.

Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.

ORDERS

IS the machinery you have been using for the past 3 or 4 years to get orders—is it getting rusty?

Are you satisfied you have the harmony in your organization that you should have?

Do you feel that your salesmen are fighting every inch of the way for business and as happy in their work as you would like to see them?

Is there the proper co-operative fighting spirit?

The Fault May be Yours?

Your salesmen, and wholesalers who help sell your goods, have a right to expect co-operation. They have a right to expect that the house they are selling for really believes that good business is to be secured. They have a right to question if the whole responsibility of selling should be placed on them. Advertising is the strongest co-operation you can give them to show that you believe in your business. Powerful copy consistently running in your dealers' specialized business paper, will stimulate dealers' interest in your goods; will encourage the salesman in his work; will help to make him a fighter, —and to sell more goods. And you know when you can get the influence of the progressive dealer behind your goods you have the biggest merchandising force in the country working for you.

Let HARDWARE AND METAL help you get the fighting spirit in your sales organization and help you line up 4,000 progressive merchants behind your goods.

MILLERS FALLS TOOLS
SINCE 1868

Announcing a New Finish for Millers Falls Tools

Millers Falls Breast Drill No. 97—the most complete breast drill on the market. 5 distinct actions. No workman can see its beautiful new finish without being impressed.

Length, 17½ inches

MILLERS FALLS tools have been giving a good account of themselves for two generations. We now take pleasure in announcing a new finish for our tools which will make it possible for you to obtain a greater turn-over on Millers Falls products.

We have adopted an attractive red finish for prominent parts of our tools. This is applied by a new process which gives a smooth, glossy, enamel finish. On the gears of our breast drills is placed a gold-leaf decalcomania. On the handles of other tools is placed a small transfer which is a reproduction of our trade mark. Frames are treated with a new japanning process. All nickel parts are polished and nickeled with greater care than heretofore.

The new finish adds wonderfully to the physical appearance of the tools and makes them a better selling proposition than ever before. It protects and prolongs the life of the tools—tools already remarkable for their long life and durability.

WE feel sure this new Millers Falls finish will be greeted with enthusiasm by everybody who in any way is concerned with the sale or use of Millers Falls tools. Your customers will see in it greater usefulness, longer life, more impressive value. They will turn with greater interest to the Millers Falls Tools displayed in your store, because of the attention-compelling value of our new finish.

Millers Falls Hand Drill No. 2—the finest hand drill made. Used by skilled workmen all over the world. Finished throughout in the new Millers Falls Finish.

Length, 14½ inches

Our good friends, the dealer and the jobber, will see in it greater display value, faster turn-over, quicker and more frequent profits.

Changes Suggested in Sales Taxation

Wholesale Hardware Merchants Want Manufacturers to Alter Method of Charging sales Tax on Invoices to Protect them Against Loss—Where Resale Prices Are Standard This May Mean the Absorption by the Retailer of the Whole 3 Per Cent. Tax

A CONSIDERABLE division of opinion seems to exist as made apparent by recent efforts of certain branches of the hardware trade to alter the present basis of charging sales tax on the invoicing of goods from manufacturer to wholesaler, to retailer. At a recent meeting of the Canadian Wholesale Hardware Association a discussion took place on this subject and it was apparent that where manufacturers fix the resale prices, the wholesaler is in many cases unable to obtain any reimbursement of the 1½ per cent. sales tax charged him by the manufacturer. He invoices the goods and charges the retailer 1½ per cent., which he collects and pays to the government, but he does not get any repayment of the 1½ per cent. tax which he pays the manufacturer, and even where the manufacturer does not fix any resale price the sales tax is almost invariably omitted in making up cost. A loss to wholesalers follows such practice and Hardware and Metal was advised that one hardware wholesaler lost in the neighborhood of $12,000 last year in this way. Any alteration of this plan with the idea of protecting the wholesaler against loss through absorbing the tax on goods on which the resale price is fixed, will affect the retailer as he will then either have to absorb the whole amount of the sales tax of 3 per cent. or else alter the fixed resale price of the article. At present in many cases hardware merchants are absorbing the 1½ per cent. tax on fixed price lines.

The Canadian Wholesale Hardware Association is asking that all manufacturers include in the price of the goods the sales tax, showing the same on the invoice as follows:

"This price includes Sales Tax of 1½ per cent., amounting to $———."

Plan Agreeable to Government

A meeting with the manufacturers brought out the fact that the latter were agreeable to the plan provided the Government would make a ruling on the matter, it being assumed that it was the government's intention that the salestax should be passed on to the consumer. A letter from R. R. Farrow, Commissioner of Customs and Excise, pointed out that the Department of Customs and Inland Revenue had no authority to sanction the request but indicated that no objection could properly be taken to the proposition where-by the wholesaler is invoiced by the manufacturer at a price inclusive of Sales Tax provided that a statement appears as a separate item on the face of the invoice showing the amount of tax collectible on the sale represented by the invoice. (As per suggestion).

Certain manufacturers have agreed to allow an extra discount of 1½ per cent. to wholesalers to reimburse them for the amount which they are called upon to pay. Certain other manufacturers are inclined to refrain from any declaration of policy until the new government has announced its plans in connection with taxation. In other cases price lists now in use make difficult the adoption of the suggested plan, but promises have been made that when new lists are being issued the plan will be incorporated of including the 1½ per cent. tax in the price quoted. A stove manufacturer thinks there will be some confusion in cases where certain lines are being sold where discount applies, owing to the fact that it would be difficult to show the discount on the invoice and then include the sales tax in the total. He points out that if it is satisfactory to just show the net price with the sales tax included this plan will be followed. Another manufacturer draws attention to the fact that it was the government's intention that the sales tax should be levied without pyramiding same and that the consumer was expected to pay the whole 3 per cent. which would not be achieved by the plan outlined. Another firm draws attention to the fact that the suggested change would provide opportunities for misunderstandings of customers and an inducement for salesmen to make use of same to the detriment of the friendly feelings of manufacturers.

WHAT IS YOUR EXPERIENCE?

Certain cases have come to the notice of Hardware and Metal where retail hardware merchants have found it necessary to bear the cost of the sales taxation passed on by manufacturers and wholesalers, especially where resale prices are more or less generally standardized. The action now suggested, as outlined on this page, may alter somewhat this phase of the situation from the retailers' standpoint.

In order to uphold the retailers' position Hardware and Metal wants evidence of how the present system of charging Sales Tax is working out. Your complaints or suggestions are wanted.

Drop a line to The Editor who will be glad to have your views on this subject.

Doesn't Want to Raise Price to Dealer

A saw manufacturer who is unwilling to adopt the suggestion points out that prices on this firm's lines are all fixed and published and it would be quite a complicated matter to try to protect the wholesaler on the 1½ per cent. tax by raising the price to the dealer.

A tool manufacturer points out that it would not be practicable to change the sales tax to the wholesaler from the present practice to the one suggested because it would be necessary to include the tax in each item of an invoice which, it is pointed out,

would not be practicable and would be very confusing.

An Eastern manufacturer of hardware points out that from January 1 this firm has been absorbing the sales tax. They state that this tax should have been absorbed by manufacturers since its enforcement so as not to confuse matters.

A manufacturer of refrigerators, screen doors, etc., states that unless the law governing sales tax is changed in the meantime, when making new price lists this firm will act on the suggestion outlined. This not having been done on the last price lists which were for the spring booking, it was impossible to act on the plan in invoicing these goods and they will be invoiced after the manner on which the prices were based.

Need Revision

Dealing further with taxation matters this firm states, "We think some strong action should be made towards having Sales Tax regulations remodelled and remedied. As they stand now they are a perfect nuisance; some goods subject to one tax, some another, some none at all and the option of absorbing part of same or not leads to all kinds of confusion, and is a handicap and a drawback to legitimate business. The sooner we get some clear concise method of applying this tax the better for all. We think the quicker manufacturers, wholesalers and retailers get together and try and work out a suitable solution of this problem and present it to the Government, the better it will be."

A manufacturer of polishes, etc., points out that from January 1 the Sales Tax of 1½ per cent. has been absorbed in its manufactured cost and not passed on to the wholesaler. This firm's invoices will bear the suggested statement concerning the amount of the sales tax included in the price quoted.

Complications

A manufacturer of silverware points out that inasmuch as business is done with many other classes of trade than the hardware, they could hardly make up price lists to meet the peculiar requirements suggested. They advise that consideration will be given any suggestions from customers as to the way they wish to be invoiced. "We cannot help but feel," they continue, "that this would be rather awkward and possibly costly to the jobber as the sum total of the odd cents on individual items which we should be obliged to charge them would undoubtedly total up to more than the flat 1½ per cent. sales tax on the total."

A woodenware manufacturer points out that recently wholesalers asked for an increase in the margin on their lines in order to pay for the sales tax. This was granted at the time and the firm state that the present suggestion would mean a further spread between the wholesalers' price and the trade price and they do not consider it justified.

A manufacturer of interior decorative finishes points out that the change could not be made without much expense to the manufacturer through the necessity of employing additional billing clerks. "If we were to make a new price list to include the Sales Tax in round numbers we would be inclined to add the fraction which would decrease the jobber's margin," he says.

A manufacturer of electrical equipment states: "We do not believe such action on our part is warranted as we have the retail price established on our equipment which is sold through jobbers and it is not feasible for us to reduce our discounts to them to allow the amount of the sales tax in our prices to them. Our methods are well established and we have no difficulty or complaints."

Hydro Shop Not Opposed if Treated Same as a Private Dealer

A number of merchants in Stratford, Ont., who handle electrical goods recently addressed the following letter to the editor of the local newspaper concerning the competition of a Hydro-Electric shop:.

Sir.—A big question, perhaps the biggest in the present municipal election, is the question of the establishment of a Hydro-Electric Shop in Stratford. Many wild statements have been made and the electrical dealers of Stratford wish to make their side plain to the citizens.

In the first place, we the undersigned dealers do not object to the competition of a Hydro Shop working on a self-sustaining basis. We are all interested in extending the use of the electric power and realize that the Hydro Commission has a large surplus of power to place. But we do object, and rightly, to a policy of using the money of all the citizens, ourselves included, to sell electrical appliances below the cost of handling them and so taking the business away from us. If the Hydro Shop purposes to retail electrical appliances at a price which will allow for the necessary cost of doing business, if it does business on a self-sustaining basis, in other words, we welcome it.

Since the bringing of the Hydro power to Stratford, the electrical dealers have installed hundreds of electrical ranges, washing machines and other appliances; have wired the great majority of the houses in Stratford and have furnished the necessary equipment to many manufacturers. In all these twelve years, we know of no case where a definite complaint of overcharging has been made.

Now the Hydro cannot buy from the manufacturer any cheaper than the regular dealer. If, then, a charge is made to cover the absolutely necessary cost of handling the goods, the Hydro Shop will be in the same position as any private dealer and we have absolutely no objection to such competition.

In conclusion we would like to point out that we dealers have been at least as good citizens of Stratford as any other body of men, that we have been heavy tax payers and have provided employment to many clerks and electricians. All we ask is a fair deal.

How Welsh Mills Got Canadian Plate Business

IN AN interview of Hardware and Metal with H. M. Trade Commissioner, Toronto, it was pointed out that a great improvement is observable in the British tinplate trade and it is estimated that the present output is about 75 per cent of the normal pre-war capacity. The number of mills now in operation is said to be sufficient to absorb all the available labor and quite a number of works have enough orders to last them for a few months. Buyers are showing much greater confidence in the market and a feature of the last few weeks has been the number of option contracts placed by merchant firms for forward deliveries.

It is thought very gratifying to record as evidence of the improved position of Welsh tinplate makers that they were recently able to secure, in the face of American competition, an order for 150,000 boxes of tinplates for the British Columbia packing industry. Their success was in no small measure due to the low freight rates now ruling direct from Swansea to Vancouver, which show the advantage of co-operation between producers and transport undertakings. The British Columbia market has practically been a preserve of the U.S. tinplate manufacturers for the last ten years.

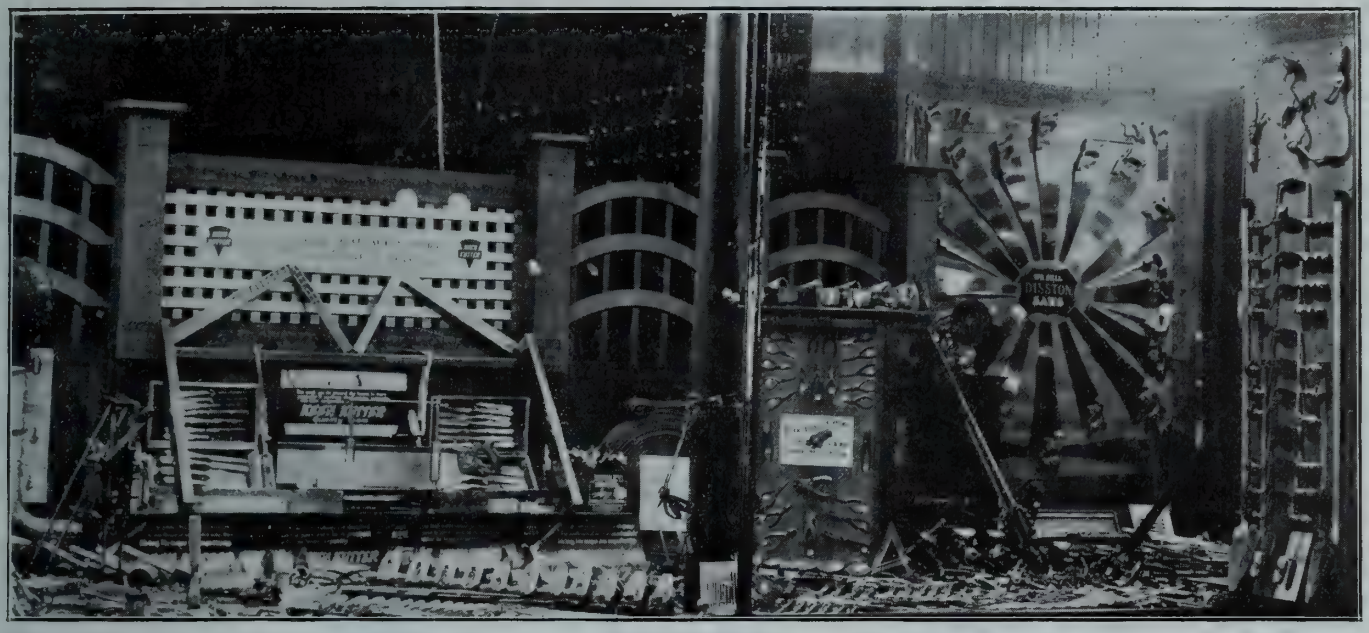
Stainless Iron

Referring to developments regarding stainless iron, it was pointed out that experiments have for some time past been conducted with the object of producing material possessing the rust and stain resisting properties of stainless steel, but so ductile that it can be employed for purposes for which stainless steel by reason of its hardness is unsuitable, especially for cold working in articles of intricate shapes, and for articles where, although they may lend themselves to manufacture in stainless

(Continued on page 64)

Modern Equipment Helps Tool Sales

Hardware Merchant Finds Attractive Wall and Floor Fixtures Give Customer More Confidence in the Store and the Merchandise Besides Attracting Many New Customers—Tools Given Prominence—Bringing Business From Outlying Districts



The hardware merchant whose store is illustrated herewith is a firm believer in the necessity of using up-to-date store fixtures to display his stock. Particularly valuable has he found it in connection with the display of tools. It will be noted that an extensive range of hammers, saws, hatchets and workmen's tools such as trowels, planes, etc. Supplementing the fixtures a modern glass showcase contains an attractive display of smaller lines required by the tradesman and mechanic. Such equipment not only assists in effective display but it lends a tone to the business which gives the customer confidence in the quality of the goods which he buys. The tool department in this store is right up at the front near the door. Frequent displays such as the above are used.

MONTREAL.—A visit among the hardware merchants in the province of Quebec causes one to wonder just how prominent a part mechanics' tools play in their daily turnovers. In cities, towns, and even in the smaller centres these tools are displayed extensively in store windows. In most cases, on entering the store, one is confronted with a display representative of the window trim. Stocks are usually of a large and varied character, showing that tools of many descriptions, and for all classes of mechanics, are carried. The stock too is generally kept well to the front of the store and in many cases constitutes the most attractive display in the establishment.

Upon investigation it will be found that the average merchant does not consider this line one of the most important that he carries. Dealers who spend time and money on window trims, many forming a display that is more or less permanent for the background, claim almost without exception that the outlay is well spent. They also state that the business they now enjoy in tools is, for the most part, because this attention is given.

Builders' hardware, which can be termed an allied line, is worked to success in conjunction with tools. It is not unusual to see one window devoted to tools, and the other to builders' hardware, or if space will not permit together in one display, periodically shown in almost all months of the years. Even in the past year when building has not been carried on as extensively as was hoped for, especially in the earlier months, merchants never ceased displaying these lines to the public, and from information given, many stores enjoyed a good year in the necessities of the builder and mechanic.

Codere & Fils, Limited, Sherbrooke, Que., have in use four silent salesmen on the floor and a large wall case for their display. Tools, from the small nail set to the cross-cut saw are behind glass, the large wall case at the rear having large sliding glass doors. One of the silent salesmen carries the larger tools, such as planes, breast drills and mitre boxes, the glass shelves not being in use because of the height necessary for the display. Two other cases show tools of a smaller and flatter nature, consisting of pliers, wrenches, chisels and the many other lines in this class. The glass shelves are used to further the display in this case. The smallest one shows the smaller line of tools, nail sets, punches, files, reamers, pointers, etc., etc. The wall case displays hammers, hand saws, planes, cross-cut saws and tools that can be shown to better advantage in a case of this kind.

The department itself is situated just inside the front door, and Mr. Coderre is convinced this is responsible for a good many of the sales made. Sherbrooke, like all other towns, did not have an active year in building, but the turnover in the tool department was encouraging.

Apart from the window and store displays, S. Bourgeouis & Co., St. Hyacinthe, increases his sales among contractors and builders by working from the outside. This is carried out with equal success in the sales of both tools and builders' supplies. In 1921, notwithstanding the quiet period in building, sales can be favorably compared with previous years. Close track is kept of all buildings at the early stage of construction, or even before the excavation is commenced, and the parties interested are solicited. Two or three times a week visits are paid to buildings being erected when at least an invitation can be given to visit the store if there is no business forthcoming at the moment.

Arguments For Rural Merchants

Hardware Prices Show Up Favorably When Compared With Field Crops—In Last Two Years the Decline on Hardware Has Been in Greater Proportion Than on Farm Produce

THE FOLLOWING outline of arguments for rural hardware merchants in connection with a comparison of the trend of hardware and farm produce prices, should be read in conjunction with the chart which appeared on page 35 of the January 7 issue of Hardware and Metal. The following explanation reveals some important arguments which might be overlooked from a casual survey of the chart.

The comparative values of all these crops for the five year period, 1909-13 inclusive, represent an average price level to which the index figure of 100 is applied. The Government reports indicate that farm produce quotations commenced their ascension in the year 1914; an important factor which seems to have been overlooked in many instances.

Referring to the chart, it is noted that for six years,—1914-19 inclusive—the compound values of farm produce show a greater degree of inflation than the average cost of hardware. This is the period which is commonly referred to as the years when prices reached the peak in many trades and branches of commerce. It is particularly true of field crop prices, but it is not applicable to hardware as a unit. All price tables representing hardware lines indicate that quotations attained their zenith in 1920, and therefore more fully reflect the results of war-time advances. During 1920 and also 1921, farm produce prices have been a little nearer the pre-war standards than have hardware values. But this situation has only been evident during the last two years, whereas the positions were reversed for the six years prior to 1920, thus on the average placing hardware as a whole in the most favorable light.

Bigger Drop in Hardware

Going back to earlier days and compiling an average standard over the last twelve years, reveals further interesting data. All the seasons listed on the chart referred to, indicate an average of 123.5 on field crops; whereas the hardware average over the same period is only 116.6. Another method of illustration of these comparative values is to give hardware quotations the index figure of 100. In this case, the average field crop prices over the same period of years reaches 106. And if figured out on a percentage basis it then shows hardware levels to be only 94½ per cent. of the average farm produce costs. There has also been a bigger drop in comparison on hardware commodities during the past year. Having attained the peak in 1920, compared with the field crop pinnacle of 1919, hardware prices had a much further decline to negotiate.

The fact that both field crops and hardware goods are now generally found on fairly equal levels, is yet another indication of the substantial recessions made in hardware prices during 1921. The column representing field crop averages for the last year have been estimated from market reports covering these various products compared with the unit base of 1909-13. The official government figures are not yet available, but the method of computation shows very little variation. One important factor in any price chart of this nature is the difficulty of obtaining true values of both raw materials and finished products at the same time. The fluctuations do not occur simultaneously, for the rising cost of the raw goods is only reflected in prices on the manufactured article, when the circle of stocks, distribution and markets has been repeatedly readjusted.

Other Primary Materials Equal Farm Produce

Field crops are therefore in a similar class as raw materials. There is a minor proportion of labor in securing the products to be taken into account, but in considering hardware prices, transportation rates, labor charges—especially the latter—overhead and distribution costs, all tend to show a higher current price level on the manufactured hardware goods than would otherwise be apparent. The average cost of farm produce may show a greater ratio of decline when raw materials are considered. The spread between the cost of the raw product and the prevailing quotation on the finished articles is generally admitted to be largely composed of high labor charges and other incidental production expenses. If the raw materials in the steel industry—which form the basis of numerous manufactured hardware lines—are tabulated directly with farm products, the comparison would be very favorable because such materials have been well liquidated, and not only individually but also collectively are now well back to the standards of former years. Such vital cost elements as freight rates, and labor, however, are still substantially above their pre-war indexes, and it is these contributing factors which tend to elevate the present average hardware quotations.

ROOFING FACTORY FOR OTTAWA

The Hamilton Tar Products Company, of Hamilton, is locating a branch factory to take care of Eastern Canada business, at Ottawa, according to a recent announcement. A site has been obtained on the old incinerator property, Lee avenue, with adequate railway facilities. About $50,000 will be spent on new buildings, in which will be manufactured an extensive line of tar products, including pitch and road materials, tar and felt paper, etc.

HARDWARE ASSOCIATION ADOPTS CODE OF BUSINESS ETHICS

The Congress of the National Retail Hardware Association approves of the adoption of a Code of Business Ethics to guide transactions within the commercial sphere of its members, the following specific principles reflecting the attitude of this body:—

"It is not within the wholesaler's function to quote prices to consumers. All sales to consumers should be made through the legitimate retail merchant.

"Hardware jobbers should not sell to merchants not engaged in the retail hardware business, merchandise not intended for regular resale purposes.

"Price reductions by manufacturers should be promptly passed to the retail merchant and by him to the public.

"Cash discounts should be taken only within the specified time.

"Bills should be paid promptly according to specified terms. In no case is the retail merchant justified in delaying his remittance for a longer period, except by special agreement, in which case he should be willing to pay a legitimate interest charge for the accommodation.

"Merchandise shipped on regular order should not be returned without permission from the seller. Such permission should not be requested after the lapse of a reasonable period, and in no case should such return shipment be made 'freight collect.'

"The retailer should accept railroad responsibility for goods delivered by the shipper to the railroad in good order. Deductions should not be made from the invoice to cover damage for which the shipper is not responsible."

Profit By Unseasonable Weather

While Sales of Certain Lines of Hardware Have Fallen Off Due to Mild Weather Retail Hardware Merchants Are Pushing Other Lines and Turnover Has Been Well Maintained—Some Novel Window Display Suggestions

UNUSUALLY mild weather which is interfering with the sale of seasonable lines in certain districts is not causing London hardware merchants any worry. They are taking advantages of the spring-like weather to boost their turnover in other merchandise and report that as a result of their efforts their volume of sales is being maintained nicely. Window displays that are perhaps a little unusual for the middle of January have been arranged and offer a variety of suggestions for other hardware merchants who may be facing a similar problem.

In one of his windows W. A. O'Dell, whose store faces the market which is crowded with farmers three days a week, is showing an incubator and various lines of poultry netting. An adjoining window is arranged to attract the housewives and is filled with a very attractive showing of aluminum ware.

Another hardware firm has two mixed windows. In one a display of shaving brushes occupies the centre of the floor. Close by on a neatly arranged glass shelf is a showing of safety razors and blades. In one corner set out attractively on a board covered with green baize is a display of table knives. In the centre of the window right at the front is a neat circle of pocket knives, many of them opened. In the far corner are several sleds and behind these on green baize panel boards are hockey skates. At various points on the floor are arranged such lines as electric irons and toasters, several selections of cutlery including carvers, and also kitchen sets.

In the adjoining window the entire center is occupied by a pile of corn husk mats. On either side are pyramids of toilet paper, one grade priced at 15 for a dollar and the other at 20 rolls for a dollar. Both of these windows have been big producers of business.

In one of the large display windows of John A. Brownlee's store a circular

(Continued on page 64)

A wide range of electrical goods can be featured at this time of the year. Electric fixtures come in for more use now than in the summer season. In the chilly days an electric heater is welcome in any home, and light, warming luncheons can be prepared hurriedly with a grill, toaster, percolator, etc. The value of these facilities can be set forth effectively in the advertising and display.

Where the Farmer Comes in

THE REDUCED buying power of the average farmer is to some extent reflected in the hardware and other trades of the rural districts of Canada. The situation in these districts presents a problem which requires some consideration and in the solution of which the retail merchant may play a part. In the agricultural sections as a whole we see the farmer battling against indebtednes with reduced ability to buy for home and farm, and we see him when he is forced to buy for his needs, paying, as a rule, prices much out of proportion to those which he secures on what he has to sell. There must be some concentration upon measures for improvement and the farmer should realize that there will be little relief, from discussing tariffs and trying to effect changes through the administration of the country. Progressive farmers to-day realize that sound progress and lasting prosperity is bound up in the land itself; intensive scientific cultivation is what is needed.

The intelligent attention of everyone must be given both to the development of industry and agriculture. True, the latter has undergone more severe liquidation recently than the former, but both will reach their proper proportion in short time and each will have to effect bigger production on an economical basis so that consumption and production will be in sufficient volume to carry the business of the country along on the crest of the wave of progress.

Accelerated business conditions cannot be expected until conditions in the agricultural sections as well as the industrial sections, improve. The farmer, like the industrial worker, must come to a realization that happiness and prosperity is not bound up in governmental action but depends upon the skill, attention and aggressiveness of the individual in his immediate task.

Changes Needed in Sales Tax

DISSATISFACTION with the present method of handling the Sales Tax is being expressed in several quarters of the hardware trade. Little fault is found with the principle of this form of taxation, in fact, it has been so highly thought of that business men of other countries are here to study it, but there is undoubtedly room for improvement in the method of handling it as between manufacturers, wholesalers and retailers. The root of the trouble seems to lie in the fact that no general plan is laid down to be followed, and there may be some justification for this because of the wide variation in the problems of various manufacturers and wholesalers. However the present plans adopted by various members of the trade indicate about as wide a range of ideas as could possibly be secured, and the sum total is that wholesalers are finding it difficult to keep accurate records and many retailers are dissatisfied by finding it necessary to bear part of the cost of the Sales Tax, particularly on lines where the resale price is more or less standard.

A situation whereby one hardware wholesaler reports that he lost $12,000 in one year through the lack of a definite system on the part of manufacturers of handling the Sales Tax, and whereby the margin of profit to the retailer on many lines has been necessarily reduced, calls for a remedy. The new government at Ottawa will shortly be preparing its budget and now is the time to make suggestions for any desirable changes.

Wholesale hardware merchants have made representations to manufacturers for a change of policy which will give them more protection against loss, and this in turn will mean an aggravation of an already undesirable situation for the retailer. It will be noted in an article in this issue that many manufacturers are against the suggestion made by the wholesalers, one saw manufacturer pointing out that it would be a complicated matter to try to protect the wholesaler on the 1½ per cent. tax by raising the price to the dealer.

No doubt hardware merchants have had some diversified experiences in connection with the Sales Tax, and undoubtedly many have found difficulty in passing on to the consumer the amount of this tax as passed on to them by the manufacturer and wholesaler. The government intended this tax to be passed on to the consumer but no provision was made for protecting the retailer in the case of fixed price goods and the result has been that many varied policies have been followed, some manufacturers absorbing 1½ per cent. of the tax as they are allowed to do, some wholesalers overlooking or purposely absorbing the other 1½ per cent. and the retailer paying it out of his margin on some lines while passing it on to the consumer on other lines. Now that the other branches of the trade are taking steps to protect their interests it is time for the case to receive a thorough airing from the standpoint of retailers. Hardware and Metal will be glad to publish information or suggestions from any retail hardware merchants in the interests of more equitable taxation.

Briefs

THESE ARE the days of organized effort. Merchants and others are realizing that effective action is secured through co-operative effort. The formation this week in Toronto of a local club of retail hardware and paint dealers, as outlined elsewhere in his issue, is a progressive step in a direction which will not only benefit local merchants but strengthen the hands of the provincial and national organizations of retailers.

LATEST TRADE figures indicate that Canada's position in world trade is improving from the standpoint of a better ratio between imports and exports though the total value of trade indicates a falling off. Much of this, however, is due to the declining prices which are being experienced and which should in turn be reflected in reduced revenue requirements of the government.

THAT IRON AND steel prices have reached the level on which more orders will be encouraged, is indicated by the recent repetition of larger projects and the number of inquiries recently foreshadows an increased volume of construction work. The structural markets reflect numerous inquiries for shapes for large dwellings and apartment houses indicating that renewal of building construction is anticipated for Spring.

Says Deflation Not Yet Completed

W. S. Fallis, Speaking to Gathering of Credit Men in Vancouver, Calls for Calm Confidence to Overcome Present Difficulties

W. S. FALLIS, managing director and vice-president of the Sherwin-Williams Co., of Canada, Ltd., Montreal, reached Vancouver this week on a trip of inspection. Before the members of the Canadian Credit Men's Trust Association (the largest attendance in a year), he spoke on business conditions as he found them, taking occasion to refer to the pronounced periods of business depression which had come within his own experience.

The speaker outlined the trade slump of 1893, the year of the world's fair in Chicago, a year noted by the demonstration of Cox's Army. Seven years later had come the depression of 1900-01 which was followed by the serious financial crisis of 1907 when almost overnight large banks and financial institutions and industrial undertakings in the United States found their cheques dishonored. While this period was bad in Canada, it was not as serious as across the line due to the more conservative manner of Canadian business.

The next serious time in Canada had come in 1913 following the prosperity of 1912. This condition existed until the harvest of the following year. Munition activity had then provided industrial plants with orders during the war. Then following the armistice in 1918 prices had risen to top figures, the peak having been reached in December of 1920.

Any period of prosperity, the speaker said, always brought selfishness, inefficiency, discontent of labor and crime and this was true in Canada.

In December of 1920 the peak had been reached and this was followed by feverishness in everything. Excessive prices of stocks had brought ruin to many. Trades people had been loaded up with goods bought at high prices. The excessive profits of that year had been largely fictitious.

Mr. Fallis said that he believed deflation had not been concluded. Prices in some lines were still above those of 1918. He suggested that in some businesses efforts had been made to keep prices up. He advised the retail trade to make greater efforts to dispose of their old stocks, take their losses, necessary, and get back to a normal basis.

The credit men were told that there was nothing alarming in the present condition. Periods of depression came regularly about every seven years and would continue. While he considered it unwise to be too optimistic, he thought it necessary to exhibit calm confidence in the country. Every citizen of the nation should ask himself what he could do to bring about better conditions and work toward that end.

Mr. Fallis said that he found conditions in Ontario and Quebec much improved, being back almost to normal but on the prairie they were not so good due chiefly to bad harvesting. Dealers would be well advised to go forward cautiously, adopting safe, sound business lines.

WINNIPEG AUTOMOTIVE EQUIPMENT SHOW, FEB. 6 TO 11

Winnipeg.—Coincident with the Winnipeg Winter Carnival, the Winnipeg Automotive Equipment Association will hold its annual show in the Board of Trade building, Feb. 6 to 11. This is the association's second annual show, the only one of its kind ever held in the west. Judging by the demand for space for exhabits, this year's show will excell that of last year, indicating the growing importance of accessories from the standpoint of both dealers and consumers.

The show executive expects between fifteen hundred and two thousand country dealers will come to Winnipeg during the week of the exhibition, and a big programme of entertainment is being prepared. "Ray" Sherman of continent-wide fame as a salesman of auto accessories, will be here, accompanied by N. H. Oliver, the great Chicago accessory salesman. "Ray" will give a lecture in Columbus hall on Thursday, Feb. 9, in the morning to dealers, and in the afternoon to jobbers; this lecture is illustrated with four thousand feet of moving picture film, specially taken by Mr. Sherman for his lectures.

Thursday's lectures will be followed up Thursday night by a dance and miniature Mardi Gras at the Royal Alexandria.

WESTERN MERCHANT PRIZES HARDWARE AND METAL

Hardware and Metal, Toronto.

Leader, Sask., Jan. 10--22.

We never miss a copy of Hardware and Metal and we find it the best hardware magazine published. We keep three different copies. Even though the crops have been poor here we are pleased to report a fairly good turnover the past year. Have gone on a cash basis here outside of a few local 30-day accounts and we think the majority of Western merchants are doing likewise.

I find that several hardware merchants here are discounting and remarking their stock at present market prices and have taken stock on the same basis. We are firmly convinced that this is the only way to keep our prices right.

Thanking you for your interest and wishing Hardware and Metal success in the coming year,

(Signed) S. K. Gryde.

WESTERN CANADA NOTES

Vancouver.—The hardware firm of Wagstaff & Vestrup of Nakusp and Trail, B. C., has been dissolved.

Vancouver, B. C.—In the recent civic election for Vancouver, C. E. Tisdale, sporting goods, was elected mayor, and W. R. Owen, retail hardware merchant, headed the poll (P. R.) for alderman.

Vancouver.—The Mongolian Prince which docked here early this week, brought 2,900 tons of tin sheets for British Columbia canners. Of this amount 2,500 tons will be made up into cans for the salmon canners. Another shipment of 700 tons left Wales this week for the coast. Formerly this tin was supplied by the United States mills. This year will be the first in which British tin will be used by the packers, and it was made possible by the lowering of ocean freight rates.

Vancouver.—The sales and office staff of the Gutta Percha & Rubber Co., Ltd., was held this week in the Hotel Vancouver. This is an annual affair of the company's British Columbia branch and is one of the features of the year's activities. W. G. Fowler, the manager, delivered the main address, dealing with the progress of the company since its inception in 1883. Following the meeting the company entertained the staff at dinner.

Events in the Trade

BUSINESS CHANGES

Grand Valley, Ont.—James Duke, hardware, has sold out.

Kitchener, Ont.—K. E. Bornhold & Co., announce that they have taken over the hardware business of Geo. B. Bucher & Son at 57 King street east.

NEW FIRMS

Ottawa, Ont.—J. Le Blanc has commenced the hardware business at 1109 Wellington street.

Ottawa, Ont.—About the first of March the Somerset Hardware will commence business at 686 Somerset street with H. Sparks as proprietor.

PERSONAL

J. Brosseau has been appointed to the territory east of Quebec city by Lewis Bros., Ltd.

W. H. Newton, manufacturing sales manager, Canada Paint Co., Montreal, is visiting Toronto branch this week.

Herbert B. Seybold, Sales Manager of Starke-Seybold, Ltd., Montreal was this week elected alderman for Notre Dame de Grace ward, Montreal, by a large majority.

E. G. Brousseau, of Brousseau & Frere, hardware merchants, Quebec City, was elected chairman of the Trade Section of the Association of Canadian Building and Construction Industries at the convention in Hamilton.

W. W. Head succeeds Chas. H. McGibbon as Eastern Ontario representative of Lewis Bros., Ltd. Mr. McGibbon has associated himself with Carter Bros., retail hardware at Picton, Ont.

Senator John Milne attained the age of 84 years this week. Despite his advanced years the senator enjoys good health, and is actively engaged in many business enterprises.

Of the self-made men among the manufacturers of Ontario, Senator Milne occupies a foremost place. After coming to Hamilton in 1854 he served his apprenticeship with the firm of E. & C. Gurney. Shortly afterward he launched into business for himself. His enterprise was the establishing of the Hamilton Malleable Iron works. A few years later he became associated with William Burrow and Charles Stewart, and became a partner in the firm now known as Burrow, Stewart & Milne. This was the beginning of a remarkably successful business career, which is the result of keen energy and enterprise.

CHANGES IN IMPERIAL OIL CO. STAFF

George W. Mayer, formerly vice-president of the Imperial Oil Company of Canada, has been elected to the board of the Standard Oil Co. of New Jersey. An appointment to this board is recognized as the "blue ribbon" of honors in the oil world. Victor Ross, of the company, has been promoted to the vice-presidency, succeeding Mr. Mayer.

F. J. WOLFE

General Sales Manager, Toronto, of Imperial Oil Ltd., who has been elected a Director of the Company.

F. J. Wolfe has been elected a director of the company after winning his way from the post of an office clerk. Mr. Wolfe, who was born in Brantford, Ont., became a junior clerk for the Queen City Oil Co. in Toronto in 1901, and after serving in various capacities became assistant sales manager for the Ontario Division in 1914. Other promotions followed and in 1921 he was appointed general sales manager in the Toronto office.

OWEN SOUND COMPANY WILL RESUME BUSINESS

Owen Sound,—The Northern Bolt, Screw & Wire Co., which has been idle for the last several months, will resume operations almost immediately. D. W. Armstrong, the Manager, announced that the company would take on a staff of men immediately, and this number will be gradually increased until the whole staff is again employed.

WESTERN ONTARIO NOTES

The Hobbs Hardware Co., London, Ont. was awarded contract for hardware in connection with new $250,000 Children's Memorial Hospital.

At the annual meeting of the members of Trinity church at Norwich, Ont., W. W. Morgan was elected as people's warden.

H. L. Martinson, hardware merchant at Cottam, Ont., made a fine showing with his prize chickens at the big winter show.

George Douglas of Palmerston, Ont., who recently purchased the Red Hardware at Atwood from Mrs. Stockford will take over the business shortly.

Reeve J. E. Harrison of Parkhill, Ont., is very prominently mentioned as the new warden of the Middlesex County council.

T. Dodds of Watford, Ont., who recently sold his hardware business and is leaving shortly for California, was pleasingly surprised a day or so ago to receive a letter signed "Customer" and enclosing a $5 bill to settle an "old account."

HARDWARE MERCHANT IN PROVINCIAL BY-ELECTION

Kingston, Ont.—At one of the most enthusiastic gatherings ever held by the Liberal party here, Robert Fawcett Elliott, a member of the firm of Elliott Bros., hardware and tinsmiths, was selected as the Liberal standard bearer in the coming by-election for the Ontario Legislature, to fill the vacancy caused by the election of Dr. A. E. Ross to the federal house. The contest will be a straight party fight between Mr. Elliott and W. F. Nickle, a former member of the Legislature and house of commons on the Conservative side. Mr. Elliott was the unanimous choice of the meeting for candidate, and was tendered an ovation.

Mr. Elliott, who is one of the city's most prominent business men, has a splendid record of public service in the interests of Kingston. For twenty-one years he has taken a prominent part in public life, and for forty years he has been an active worker in the Liberal ranks. He served the city for twenty years as an alderman, as mayor, and a member of the civic utilities commission, of which he was chairman for two years.

ALEX. MACKENZIE PROMOTED

Alexander MacKenzie has been appointed general sales manager Canadian National Carbon Co. Ltd., and Prest-O-Lite Co. of Canada, Ltd.

Mr. MacKenzie joined the staff of the Prest-O-Lite Company in 1917. After some months in the head office in Toronto, he took charge of the Montreal office and service station of the Prest-O-Lite Company and built up a branch business in Quebec. On August 1st, 1920, Mr. MacKenzie was made sales manager

ALEXANDER MACKENZIE

Appointed General Sales Manager Canadian National Carbon Co., Ltd., and Prest-O-Lite Company of Canada Ltd.

of Canadian National Carbon Co. Ltd. His work for this company earned for him the promotion to general sales manager of both companies.

KINGSTON HARDWARE TEAM MAKES GOOD SHOWING

The firm of Edwin Chown & Sons have a hockey team in the wholesale league that is worthy of special note. In their last game, the hardwaremen put it over Macnee & Minness' wholesale dry goods team, by a score of 12 to 6. The winners showed bursts of speed that made old timers in the game sit up and take notice, and the hardware team will make a strong bid for the championship in this league. The team is composed of Messrs. Karl, Simmons, Dodd, Doyle, Shea, Chown, Wormington and Lascelles.

KINGSTON HARDWARE MERCHANT HONORED

Kingston, Ont.—A Kingston hardwareman, Percy B. Chown, has the honor of being elected chairman of the civic fire and light committee for a third term. It is an unusual thing for an alderman to be given a third year as chairman of a committee, and the fact speaks volumes for the worth of Mr. Chown as head of this important committee.

Ald. Chown has been a member of the city council for several years, and prior to being elected to the council, served on the Board of Education. While on the board he rendered valuable service as chairman of the property committee.

BRITISH MANUFACTURERS MAY OPEN CANADIAN PLANTS

Woodstock, Ont.—A proposed campaign to secure branches of British industries for Western Ontario was the cause of a long discussion at the fourth annual meeting of the Western Ontario united boards of trade held here. The matter was brought up by a report of a committee appointed to deal with the matter. The feature of the discussion was an address by Major C. Snell, representative of the Birmingham Small Arms Company, who has been investigating in Canada on behalf of nine firms who are considering locating in this country. He said that the British manufacturers were convinced that the time was opportune to handle their Canadian trade with Canadian branches.

HARDWARE AND OTHER FIRMS CONTRIBUTE TO PUBLICITY BUREAU

An organization known as the Toronto Publicity Bureau has been formed in Toronto to carry out proposals for united action to advertise the natural and acquired advantages of the city wherever that action will bring increased trade, population, and prestige. The idea received the unanimous sanction of five hundred of the city's business men and the sum of $16,400 per year for three consecutive years was voted to cover the next three years' work. Among the contributors were the following associated with the hardware trade:—Gurney Foundry Co.; H. S. Howland, Sons & Co.; Walker Hardware Co.; Gutta Percha & Rubber, Ltd.; British American Oil Co.; Dominion Rubber System; The Boeckh Co., Ltd.; Canadian Oils, Ltd.; Rice Lewis Sons & Co.; Thermos Bottle Co.

ONTARIO INCORPORATIONS

Kroch Brothers Ltd., capital of $40,000 head office in Toronto to manufacture and distribute hardware tools, leather goods, etc.

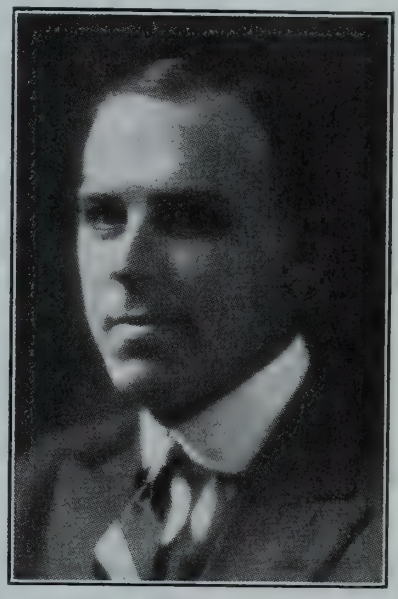
Canadian Show Case and Mfg., Co., Ltd., capital of $40,000 head office in Windsor, Ont., to manufacture show cases and store equipment.

Beacon Tire and Rubber Co., Ltd., capital of $50,000, head office in Toronto, to manufacture rubber goods including auto and bicycle tires, belting, hose, packing, etc.

J. A. FRASER TAKES OVER NEW POSITION

Montreal.—John A. Fraser announces that on February 15 he will sever his connection with Lewis Bros., Ltd., to become vice-president of the H. R. Wood Company, bondbrokers of this city, his new duties bringing him in charge of sales for the above firm.

Mr. Fraser's hardware career has been a wide one, extending over a period of twenty-eight years, serving with Canadian and United States firms. In 1913 he came to Montreal, joining the



JNO. A. FRAUER

Sales manager of the wholesale hardware firm of Lewis Bros., Ltd., Montreal, who on February 15 will become Vice President of H. R. Wood Co., bond brokers of Montreal.

James Walker Hardware Co., where he was later promoted to manager of the retail store. Resigning his position with this firm in 1918 he was appointed sales-manager of Lewis Bros., Limited, the position he now holds. Apart from his duties in the hardware field he is actively connected with the Kiwanis Club and the Montreal Publicity Association, being president of the latter organization.

PAY TRIBUTE TO LATE W. B. DALTON

Kingston, Ont.—No finer tribute to a man from the people amongst whom he had lived his life, could have been given than that paid to the late W. B. Dalton, hardware merchant here for fifty years, at St. George's Cathedral last Sunday morning. On the altar were flowers sent in his memory, and on the pulpit a cross in St. George's red and white, sent by the cathedral, and other wreaths and flowers were about the chancel. The choir was out in full force, to do honor to an old chorister, whose son is one of its most faithful members, and the singing of the psalms and hymns chosen for the occasion, were reverent and beautiful.

Toronto Retailers Form Organization

Gathering of Toronto Retail Hardware Merchants Under Auspices of Paint, Oil and Varnish Club, Develops an Organization Known as the Retail Hardware and Paint Dealers' Club of Toronto—Important Plans for Educational and Social Activity

PRELIMINARIES having for their object the forming of an organization of retail hardware merchants of Toronto and suburbs, as outlined in recent issues of Hardware and Metal, materialized into a definite plan at a banquet tendered by the Paint, Oil and Varnish Club of Toronto at the Carls-Rite Hotel on Wednesday evening. After considerable discussion sentiment was unanimous among the merchants represented that they should be organized, and it was unanimously agreed to form the Retail Hardware and Paint Dealers' Club of Toronto. The plan was supported by about sixty of the city's hardware merchants who pledged their support to bring additional members to the subsequent meetings and it was felt that with their endorsation the organization would be away to a good start. The list of officers elected pro tem for organization purposes is shown elsewhere; another election will take place at the first regular meeting.

The gathering was under the chairmanship of F. J. Penberthy, Manager Lowe Bros. Ltd. who welcomed the retailers as guests of the Paint, Oil and Varnish Club pointing out that since this club was formed it had been the ambition to meet the retailers collectively and put before them plans for creating and maintaining greater sales in the paint and varnish industry. The idea in having retailers form a local association of their own was so that matters pertaining to paint and varnish and other lines in which they are interested, could be readily placed in the hands of the retailers through the officers of such an organization. In addition it was suggested that such an organization would create a feeling of good-will toward manufacturers, jobbers, etc. The harmonious and helpful relations which had been encouraged among members of the Paint, Oil and Varnish Club was pointed to as an example of what the retailers' club could achieve.

H. N. Joy, West Toronto, was voted to the chairmanship of the gathering to proceed with organization. A brief address followed in which he thanked the paint and oil and varnish manufacturers for the interest taken in the retailers. The proceedings of the previous meetings were outlined and the history of the preliminary plans traced.

Nelson Mills Speaks

Nelson Mills, President of the Ontario Retail Hardware Ass'n., who along with Secretary W. F. Macpherson were guests at the banquet, pointed out that what was required to lift retail hardware merchants higher was to get out of the rut, and to do that organization was necessary. He pointed out that the Ontario association was but one link and what was needed was local associations to strengthen the hands of the larger organization. "We need local associations in every city and town and later on we must have a national association, these are the three necessary links," said Mr. Mills, who extended a suggestion that the organization be called a club and not an association, and that a definite objective or code of ethics be established as soon as organization was completed. He added a note of warning that if one of the objects of the club was to fix retail prices on hardware, or to discuss what competitors are doing or methods used by department stores or the question of wholesalers selling to consumers, that the club had better not organize. It was his opinion that a club of service planning socials, picnics, etc., to get better acquainted was the most effective basis of organization.

H. N. JOY

Hardware merchant of West Toronto, elected first president of the newly-formed Retail Hardware and Paint Dealers' Club of Toronto.

Secretary W. F. Macpherson spoke of the improved feeling existing among the trade in smaller centres where every merchant knew the other, and thought this sentiment could be extended to the merchants of the city. "By getting more intimate, business comes easier, more profitable and trade abuses are more easily overcome." It was his opinion that the trade was ripe for concerted work and mentioned the fact that men as a rule do not want to meet the man they don't know, but they are anxious to meet the men they do know.

Loyalty of Hardware and Metal

G. D. Davis, Manager and Editor of Hardware and Metal was to be the next speaker on the program, but through illness he was unable to be present. This was unfortunate from more than one standpoint as Mr. Joy stated that had Mr. Davis been present he would have told a story about something which occurred at the last convention of the Ontario Retail Hardware Association which pointed emphatically to the loyalty of Hardware and Metal to the interests of the retail hardware trade. H. L. Southall, Managing Editor of Hardware and Metal outlined something of the influence and value of local organizations in benefiting local merchants and strengthening the hands of provincial and national associations, and pledged support to the new organization.

At this stage F. R. Jackson announced the resolution which brought the organization into being, as follows:—"Be it resolved that the retail hardware and paint dealers of Toronto organize a club to be known as The Retail Hardware and Paint Dealers' Club of Toronto. The objects of this club to be the cultivation of friendly relations among its members; to advance the interests of its membership through the discussion of matters of common interest; to co-operate among themselves and with other associations and trades that may have objects in common with this association so their business and interests may be advanced; to promote honesty in competition, trading and advertising and to correct, in a lawful and proper manner, any such evils as may exist or arise in their business in every reasonable, lawful and proper manner."

The resolution was seconded by John Caslor who referred to the organization which was formed twenty years ago consisting of forty members, and which progressed until it became amalgamated with the Retail Merchants' Association after which not a meeting was held. "It is seventeen years since the Ontario Association started and I would not take the money it has cost me and lose the friends I have made in that association," said Mr. Caslor.

Other speakers included W. Wrigley, J. C. McFadden, M. Phillips, J. H. Sinclair, F. McNichol, J. Boyd, A. Staples, J. M. Boyd, Geo. Garrett, S. Hobbs, S. Cutts.

The plan received hearty endorsation from all speakers, and the details were then considered. Fees were set at $3 for a member and $1 for each associate member, the latter not having voting privileges. The membership fee would be paid by one member of each firm and the associate members would represent other members of the same firm. It was also decided to include the suburbs of the city in the territory represented.

The proposed slate of officers was then outlined and the entire group elected on the motion of C. G. Bailey and S. Hobbs. It was pointed out that these officers were elected pro tem for organization purposes and another election would be held at the next meeting.

Forty-five Join

Before the conclusion of the meeting forty-five of those present had signed for membership and paid their fees. Others who wish to join are requested to send their fees to A. H. Lake, the treasurer, at 608 Queen St., W., Toronto.

The Executive Committee will work out a constitution for the organization and will call the next meeting. On the motion of Mr. Phillips, Nelson Mills and W. F. Macpherson were made honorary members and the trade press were made eligible as associate members by unanimous vote. George May, West Toronto, has the honor of holding the first membership card in the new association. On his motion a vote of thanks was extended to the hosts of the evening. Mr. Penberthy replied, stating that the Club was interested in selling more paint in Toronto and other industries were equally interested. It was his opinion that educational work along these lines would work out to general advantage. He pledged the support of the members of the Paint, Oil and Varnish Club and offered to provide speakers or extend other assistance at any time.

T. Moneypenny, Imperial Varnish & Color Co., spoke briefly emphasizing the fact that organization gives protection, and urging all to work hard in the interests of the new organization. "The paint trade throughout Canada is back of you, and the manufacturers want to sell you not paint alone, but service that will enable you to sell more paint and make bigger profits in your business."

Among those present were the following:

Members of the Paint, Oil and Varnish Club—T. Moneypenny, F. J. Penberthy, J. Anthony, S. Armstrong, Benjamin Moore & Co., J. F. Paton, J. F. Smith, The Boeckh Co., G. Cooke, H. E. Mihell, J. Sturgeon, J. D. Craig, W. M. Burden, J. R. McKeown, A. S. Boulton, a representative of Canada Linseed Oil Mills, R. Pinchin, Ontario Oil & Turpentine Co., C. E. Paton.

Retailers present included: T. Barker, A. Levin, G. W. Garrett, J. Ritchie, J. Wickham, V. Mathewson, T. H. Boyd, J. W. Jackson, J. Adams, J. Jolly, J. Peacock, W. Fleming, J. E. Hewitson, H. Smith, M. Phillips, R. W. Smith, W. J. Robinson, J. H. Sinclair, S. Caplan, F. Caplan, R. D. Blackmore, J. McFadden, A. R. Hamilton, B. J. Hobbs, A. B. Gowdy, Hobbs Hardware, M. Freek, C. McFarland, G. Wallace, J. N. Rush, E. McNichol, J. Harding, A. Staples, G. H. Cutts, H. E. Groom, Prince & Co., J. M. Boyd, G. Pearsall, N. G. Leslie, W. J. Merrill, C. G. Bailey, J. Heideman, W. E. Platt, B. Stainton, R. Edwards, W. Kirkland, W. Kinnear, R. D. Ross, J. D. Anderson, S. Hobbs. A. Lake, G. D. Mathewson, John Caslor, H. L. Southall, Hardware and Metal, W. F. Macpherson, N. E. Mills, H. N. Joy, W. Wrigley, G. E. May, F. R. Jackson.

OFFICERS

Officers elected pro tem by the Retail Hardware and Paint Dealers' Club of Toronto are as follows:—

President, H. N. Joy,
Vice-president, F. R. Jackson,
Secretary, Geo. Mathewson,
Treasurer, A. H. Lake,
Executive Committee:—W. Platt, W. V. Pritchard, O. Morrison, H. Dowe, G. Pearsall.

Two Methods Of Displaying Aluminum Ware

A RATHER interesting comparison showing the results obtained by different methods of display, was noted in an Ontario city this week in connection with a sale of aluminum ware. One firm with a large show window in one of the best locations in the city simply placed various pieces of aluminum with no special regard to arrangement and a bare announcement that a sale was being held. Another firm in not so good a location and with not nearly so large awindow at its disposal filled its window with saucepans and other articles. There was not any particular attempt at arrangement but a number of price cards was used and special show cards and banners announced that a sale was being held. In addition announcement was made in the lacal papers about the sale and prices of many articles were given. A third firm in a good locationand with a fine window at its disposal for display purposes went about attracting trade by arranging a window that not only attracted but held attention. In the centre on a table were shown various sauce pans, each one bearing a neat price card. On each side were arranged boards similar to ironing boards on which were shown various smaller articles. Neatly arranged were articles large and small and at vantage points were placed specially colored show cards pointing out that not only a sale was on but the advantages of aluminum and the fact that for the week prices were much below the regular quotations. The firm backed its window display by advertisements in which the sale and prices were featured, prices being given especial prominence. The three window displays attracted attention and brought business but the two in which some care was shown and in which prices were featured and the lines advertised caught the women. Many of them came in fifty miles to take advantage of the chance of securing some piece they had wanted. The two firms which advertised and which put in really nice window displays report sales as being among the best ever recorded.

HERE WE ARE AGAIN

On our way to the Seventeenth Annual Convention and Hardware Exhibition of the

Ontario Retail Hardware Association

to be held in Hamilton on

February 14, 15, 16, 17.

Keep these dates open and be sure and meet us there

Department Stores Business Showed Increase At End Of Year

Getting Business Because They Go After It—Kept Up Their Stocks and Could Fill Orders—Claim That Department Stores Record Trend of Business Six Months in Advance.

DEPARTMENT Stores, says the writer of an editorial in "Printers' Ink" have been running up a satisfactory volume of sales right along during 1921. According to the Federal Reserve Bank, of 372 such stores reporting, there was a decrease of only 6.7 per cent. in October sales compared with October, 1920. In New York and also in northern New Jersey, October showed not only an increase in sales as measured by volume, but also a substantial increase in the dollar value of the merchandise sold. Since prices are considerably lower than last year, this, of course, means that their actual increase in business is much greater than the figures reveal. New York department stores show an increase in sales during December in dollar value of 3 per cent. compared with December, 1920.

Many persons are unable to reconcile this increased department store business with the slackened pace of industry as a whole. But there is nothing mysterious about it. Some authorities claim department store sales, as well as Stock Exchange trends, record the movement of business six months in advance. If this theory is true, it is another good sign that the business revival is on in full force.

But, regardless of this theory, we think it is self-evident that the department stores are getting the business to be had for the very good reason that they are going after it. Never have we witnessed better retail advertising than the big stores have been running for six months. These stores advertised in generous volume and most of them filled the space with real sales-impelling copy. It is axiomatic that business gravitates to those who ask for it the most persuasively. The big stores have been recognizing this axiom.

There is another reason why department stores have been doing so well. They had the goods. They kept up their stocks. Strange as it may seem, thousands of small stores are trying to do business without merchandise. Their stocks are poorly assorted. They are constantly out of the commonest staples. People, tired of going from store to store and being told that the article they wanted was not in stock, have finally gone to stores where they can always get what they need. Anyone who spent much time in the shops before Christmas and kept his ears open, would have got some first-hand information as to how badly understocked many small merchants are.

Another Record to Beat

The Editor of Hardware and Metal,
Toronto.

Dear Sir:

We notice in your December 17th issue, page 58, the question, "What wholesale hardware firm can beat this record? As we are rather proud of our own employes' record, we submit it for publication. WHO CAN BEAT IT?

Yours truly,
WM. STAIRS, SON & MORROW, Limited,
Halifax, N.S.

1810—1922

Twenty Years Ago

Following items are reproduced from Hardware and Metal of January 25, 1902:—

A petition is being signed at Sydney, C.B., and will be forwarded to the directors of the Dominion Iron & Steel Co. praying them to put a stop to all unnecessary Sunday work.

* * *

F. F. Quinn, of the firm of Geo. Stephens, Quinn & Douglas, hardware merchants, Chatham, Ont., has retired from the business, which will be continued by Stephens & Douglas.

* * *

The tender of $17,500 made by the Canadian General Electric Co. for the assets of the Diamond Machine & Screw Co., Ltd., Toronto, in liquidation, has been accepted by the Master-in-Ordinary.

* * *

The Batty Stove & Hardware Co., 279 Queen St. W., Toronto, have succeeded to the wholesale business in stoves and ranges formerly conducted there by a branch of the Copp Bros. Co., Ltd., Hamilton.

* * *

The Francis-Frost Co., Ltd., Toronto, has made wonderful strides in placing its "Ark" brand paint. Last fall they established a warehouse in Vancouver and now they are placing a warehouse in Winnipeg.

* * *

W. P. Miller, manager of the stove and furnace department of the James Smart Mfg. Co., Brockville, since August, 1895, has resigned to accept the position of superintendent of agencies for the China Mutual Insurance Co., of Shanghai, China.

* * *

In connection with the proposed new Exhibition buildings at Toronto it is announced that Gouinlock & Taylor have been invited to tender for the Main Building for $106,000; Beaumont Jarvis for the Art Gallery for $10,000, and Grey & Gregg for the Dairy Building to cost $14,000.

* * *

The art of glass-bending is one which of past years has been rather behind the times, so far as Canada is concerned, the imported article being largely required to fill the demand. The Toronto Plate Glass Importing Co. have lately changed the aspect of affairs, however, by installing a large and most efficient bending plant sufficient to supply all the bent glass required in Canada for some time to come.

* * *

The meeting of the Board of Trade of Toronto to nominate officers was distinguished by the official farewell given to Edgar A. Wills, who for over 20 years has been secretary but is leaving to fill a more important post at Windsor. The nomination of officers was proceeded with as follows: President, A. E. Ames; first vice-president, J. F. Ellis; second vice-president, J. D. Allan; treasurer, E. R. Wood. Nominations for council: Messrs. J. W. Woods, H. N. Baird, T. G. Brough, R. J. Christie, Noel Marshall, Edward Gurney, W. A. Warren, Miles Vokes, W. J. Gage, A. E. Kemp, M.P., W. F. Cockshutt, Peleg Howland, C. J. Marlatt (Oakville), J. L. Spink, C. W. Woodland, P. R. Miller.

What is Your Particular Problem?

Delegates to O.R.H.A. Convention Will Put Their Problems Before the Gathering for Solution

IT IS everywhere accepted as a principle underlying all development and progress that "knowledge is power." The hardware merchant wants specific knowledge appertaining to the questions of special interest to his trade for he has not the time to weed out points of value from the great mass of general information available. This is the reason why conventions such as the forthcoming one to be held in Hamilton by the Ontario Retail Hardware Association, are so valuable to the retail hardware trade, and another reason why every merchant in this line of business should meet with his fellow merchants for the four-day convention.

The officials of the association in planning the programme have kept in mind the present day problems of the retailer and have secured authoritative speakers on subjects of vital interest, such as "the maintenance of established re-sale prices on well-advertised products;" "how dealers may successfully advertise," "the banker and the retailer," "mutual fire insurance," "business disease." Other authorities, including Prof. W. C. Clark, director of courses in commerce at Queen's University, and J. R. Shaw, vice-president Canadian Manufacturers' Assn., will speak on topics of current interest.

In addition to these addresses, and the discussion which follows them, there will be the question box. This is to be made a more important feature this year than ever before, and an interesting list of questions has already been compiled in order to lead off the discussion. Any other questions which retailers may have in mind can be placed before the convention for open discussion.

What retail hardware merchant is there who is not interested in such topics as the policy to follow in adjusting selling prices on a declining market, the jobber's position today, the wage question, cutting the cost of doing business, new lines that might be added, method of paying clerks, preventing wholesalers engaging in retail business, getting results from advertising, folders, etc., payment by retailer for goods he takes out of stock for his own use.

These and other questions enumerated in the programme on this page represent a group of subjects of importance to the trade at the present time and with every delegate entering into the discussion and giving the benefits of his experiences, it should be possible to establish a helpful line of action.

Program of 17th Annual Convention Ontario Retail Hardware Ass'n

February 14, 15, 16, 17th 1922, at Hamilton, Ont.

TUESDAY, FEBRUARY 14
Royal Connaught Hotel.

8.30 a.m.—Secretary's office, located on mezzanine floor, open for registration of members and guests, distribution of badges and general information.

1.00 p.m.—Visit Hardware Exhibition, finish buying and file buyer's cards with the Secretary at booth No. 99 or else mail it to him at Prescott, Ont.

QUESTION BOX DISCUSSION

1. How closely should we follow declining markets in adjusting our selling prices?
2. Are the Jobbers as prompt as they should be in meeting the declining market?
3. What shall we do with wage question as the high living costs decline?
4. How can the cost of doing business be cut and maintain service?
5. What new lines did you add during 1921, that have proved profitable?
6. How many dealers present, pay a bonus on sales by Clerks?
7. Could not active steps be taken by this Association to prevent Wholesalers from doing a Retail business?
8. What is the best way to get results from advertising folders etc., as furnished by manufacturers?
9. How much should a dealer pay for goods he takes out of stock for his own use?
10. What should properly be included in over-head Expenses?
11. What is the average wage paid. Clerks, Tinsmiths, Plumbers? Have any reduced wages yet?
12. Has anyone definite information regarding workshop in connection with store? Does it pay?
13. What is the best way to handle slow accounts without offending customers?
14. What is the average percentage of loss on credit accounts?
15. Have any members successfully turned a credit business into a cash business? How was it done?
16. In changing credit to cash business would it be advisable to allow monthly accounts to telephone customers, and to customers who are building or painting?
17. How do you proceed to collect tough accounts?
18. What experience have dealers present had in handling auto supplies, tires, etc., in a small town? Do they find it profitable, or is most of the business going to garages? If Hardware dealers get bulk of the business, how do they do it?
19. What are the advantages or disadvantages of marking selling prices in private code?
20. Why are cheap platform scales still, many times the pre-war price?

Letters to the Editor

Sumner Company, Limited.
Moncton, N.B., Jan. 12, 1922.

Editor, Hardware and Metal,
University Ave.,
Toronto.

Dear Sir:—There might be an opportunity for a short article on the following under the heading, "American Editor Says the Canadians Are Poor Advertisers." Some time ago an American Hardware Journal ran a picture title competition and in speaking of the widespread interest which had been aroused said that they had received answers from New Brunswick, Nova Scotia, to Mexico. The writer took the matter up with them pointing out that New Brunswick and Nova Scotia are two separate provinces and the position in which they stood in regard to the other parts of the Dominion laying the blame for the error not at the door of the editor personally but to their family education in history and geography in the public schools. In his reply among other things, he said:

"Sometimes we wonder just how much of this (referring to ignorance on matters Canadian) is the fault of the Americans themselves and how much is due to the fact that Canadians are very poor press agents. England, France, Mexico and lots of other countries have made it a point to spread knowledge in the United States stating their various achievements et al., but Canada never seems to have taken the trouble. We are quite sure the average American does know something at least about most of the European countries as well as something about the South American countries in spite of the fact that his schooling in geography has been almost totally neglected."

Is it not almost time that something was done to advertise our country more extensively among our nearest neighbors?

(Signed) G. V. WHITE.

Trade Enquiries

Names and addresses of enquiries can be obtained only by those interested in such lines upon application to Department of Trade and Commerce, Ottawa, Canada. Please quote reference number when requiring addresses.

3448. **Hardware.**—A Cape Town firm of manufacturers' agents with branch offices in Johannesburg and Durban, are prepared to take up Canadian agencies in any line of goods for the hardware trade, seeking in a special way a full line of brushware.

3452. **Piping and nails.**—A large firm of general merchants established in East London, Durban, and other centres, ask prices on galvanized iron piping and fittings, wire nails, and horse-shoe nails. Prices to be f.o.b. Montreal, or St. John, N. B.

3453. **Binder Twine.**—A Durban firm buying binder twine in large quantities requires immediately prices and samples from Canadian makers.

3454. **Toys.**—A Natal toy house is open to receive catalogues and prices of cheaper quality Canadian-made toys; also special lines.

3455. **Handles and woodenware.**—Heavy importers of handles and wooden-ware, established at Durban, request samples and f.o.b. Canadian port prices.

3456. **Roofing felt, etc.**—A Cape Town manufacturers' agent, with branch office in Johannesburg, and regularly visiting the whole South African territory, desires representation of Canadian manufactures of roofing felt and building paper.

3477. **Fibre flax**—A Belgian cotton spinning mill is interested to receive quotations on Canadian fibre flax.

3478. **Steel wire**—A Johannesburg firm are making inquiry for supply of steel wire for nail making.

3480. **Building material.**—A Cape Town company of manufacturers' agents, with engineering department, request correspondence from exporters of asbestos, tiles and structural steel.

3481. **Rails, bar iron and steel.**—A Cape Town company of manufacturers' agents, with engineering department, request correspondence from exporters of rails, all sizes, bar iron, and steel.

3535. **Iron bars for making chains.**—A British firm in Kobe, of good repute, are desirous of entering into communication with Canadian manufacturers of the above in a position to export same to Japan. Correspondence is solicited and full particulars—i.e., catalogues, prices, specifications, delivery, etc.—should be furnished.

3536. **Ice-making plants.**—A firm in Barbadoes desire to get in touch with firms in Canada manufacturing machinery for making artificial ice.

3553. **Metals and ores.**—A London metal merchant is open to undertake the agency of Canadian producers and shippers of metals, ores, etc.

3554. **Engineering lines and labor saving devices.**—An electrical and mechanical engineer in Bristol, England, is desirous of securing the representation of Canadian manufacturers of engineering appliances and apparatus, and labor saving devices.

3554a. **Bright steel shafting.**—A London firm who occasionally receives inquiries for bright steel shafting required in Australasia would be glad to hear from Canadian manufacturers interested.

3562. **Agencies.**—A manufacturers' commission agent, covering the Orange Free State, with headquarters at Bloemfontein, is prepared to take up Canadian agencies for this territory, and requests immediate correspondence from interested Canadian firms.

3563. **Agency in Belgium.**—A Belgian firm desires to represent Canadian manufacturer of hardware, and tires. Guarantees supplied against consignments.

3564. **Agency in Brazil.**—A Brazilian firm of commission agents wishes to hear from Canadian exporters of cement, general hardware, paints, varnishes, electrical equipment, including motors, and chemicals.

3579. **Agency for Hardware.**—A London merchant firm with connections in most overseas markets, is prepared to undertake the selling agency for the United Kingdom and elsewhere of Canadian manufacturers of hardware, paints and engineering supplies of real merit.

3580 **Household Appliances, etc.**—A Glasgow firm who are importing agents and buyers of household labor-saving appliances, hardware, glassware and kitchenware, are willing to represent in Scotland any sound Canadian firms with good selling lines; they are also willing to act as purchasing agents on this side.

3581. **Glassware, Brushes**—A London company are open to undertake the agencies of Canadian manufacturers of glassware and brushes.

3582. **Ice Crushers.**—A London engineering company could handle a good Canadian-made ice crusher of small or medium size.

3583. **Representation in Glasgow.** — A firm in Glasgow are in a good position to represent Canadian firms desirous of securing an agent in Great Britain in building materials, iron and steel, and other metals, wire, box shooks, box strapping, barrel staves, barrel hoops; oils, paints, cordage, binder twine, leathers, wood manufacture, machinery.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

DIE CASTING.

The Nineteen Hundred Washer Company, Toronto, Ont.—Will you kindly furnish us with the addresses of concerns in Eastern Canada who do die casting?

Answer—The Tallman Brass & Metal Co., Limited, Hamilton, Ont.

AUTOMOBILE CLOCKS

The Sumner Company, Limited, Moncton, N.B.—Can you please give us a list of either Canadian or American manufacturers of Automobile clocks?

Answer.—New Haven Clock Co., New Haven, Conn.; Waterbury Clock Co., Waterbury, Conn.; Stewart-Warner Speedometer Co., Chicago, Ill.; Waltham Watch Co., Waltham, Mass.; Western Clock Co., La Salle, Ill.

BABY PLAY PENS

Iroquois Falls Merchandising Company, Iroquois Falls, Ont.—

A Baby Play Yard, manufactured by The McFarlane Mfg. Co., of Toronto, Ont., to the description contained in your communication. This Baby play enclosure, however, is merely four walls or sides, with hinges at each corner, so that the articles can be folded and placed out of the way when not in use. The manufacturers state that this has no floor, and it is only made in the one size, 48" x 48".

Another product along these lines is the "Kiddie-Koop" manufactured by the Lee-Trimble Company, also of Toronto. This enclosure has wire sides and wooden floor, but is placed upon wheels. It is produced in three sizes and is non-collapsible.

The Rock Island Manufacturing Company of Rock Island, Que., are the makers of the collapsible baby gates.

ORNAMENTAL IRON CHAIRS

C. M. Howell, Brantford, Ont.—

In connection to your inquiry pertaining to Iron Chairs, which was referred to in Letter Box, of previous issue of Hardware and Metal.

We have since discovered that the name of the Atlas Iron, Wire & General Works, of Toronto, Ont. was accidentally omitted from the list of firms engaged in the manufacture of ornamental iron work.

"DANGLER" GASOLINE COOK STOVES

The Reilly-Allard Hardware Company, Haileybury, Ont.—Would you please give us the name of the makers of the "Dangler" gasoline cook stoves?

Answer.—The Dangler Stove Company, Cleveland, Ohio, U.S.A.

"CLIPPETTE" LAWN MOWERS

C. B. Brown & Company, Aylmer, Ont.—Your description with regard to a certain make of lawn mower. The name of this machine is the "Clippette," and the name and address of the manufacturer is as follows: The Southern Electric Steel Company, Inc., of Lynchburg, Virginia, U.S.A.

GREEN TOW

La Compagnie, Martineau Ltee, Ferronneries, En Gros, Quebec, P.Q.—Kindly state where we can secure a supply of green tow.

Answer—This is manufactured by the Arthur Flax Mills Company, Arthur, Ontario.

Indispensable to Hardware Merchants

Is Hardware and Metal, According to Letter of Appreciation From E. Sauve, President Montreal Hardware Section R.M.A., and 2nd Vice President of Quebec Provincial R.M.A.—Aiding Harmonious Interprovincial Relations

ENGLISH VERSION

Montreal, January 17, 1922.

Hardware and Metal, Toronto.

What pleasure I experienced this morning in opening my copy of Hardware and Metal, to see that you have followed out the happy idea of including in its columns an important write-up of the province of Quebec (Quebec, the Province of Prosperity.) This coincides exactly with the excellent prospects which exist for hardware trade in the Dominion. The year 1922 opens for our trade an opportunity such as Canada has never before experienced. It has been predicted that the 20th Century would be Canada's century. This seems about to be realized if the capitalist, workman and merchant all give a hand, and if the province unites and works in a spirit of harmony Canada will shortly be the richest country in the universe. We possess the finest resources in the world.

The notable part which Canada took in the great war has made our country known. Unfortunately it was unknown before in several countries. But to-day, with a United Canada, and providing the people understand how to choose good administrators, our country will be admired by the whole universe.

Hardware and Metal, in rendering homage to the province of Quebec gives this province her due, and I know that I am expressing the general thought of the Quebec trade in congratulating your journal (the most important in the hardware trade) from the bottom of my heart. Your journal has had an excellent idea in writing in French this survey of the Province of Quebec. I thank you in the name of the retail merchants whose language in our province is almost entirely French. I invite you for the benefit of your journal and also for that of the retail trade, to continue to interest us by writing an article in French each week. Our prosperity will go on increasing only if we leave on one side all questions of dispute and work in harmony, which, I am sure, the province of Quebec would be the first to put in practice.

Nothing could have expressed with greater reality the importance of the province than the photographs which you have used in this issue. No doubt this will do a great deal for the advancement of our commerce in general.

As president of the hardware merchants section in Montreal, treasurer of the Montreal district and second vice-president for the province of Quebec of the Retail Merchants' Association of Canada, I am doubly interested in your article. Our association has always an experienced representative with the government at Ottawa and with all the provincial governments to watch the legislation, for the benefit of our trade.

Thank you for your fine write up and continue it for the good of our beautiful country. Thank you for the reproduction in your journal of the account of what our association has done for the good of our trade. Your journal is in my opinion, indispensable for every retail hardware merchant. We get information from day to day on prices and we benefit by the good advice which you place at our disposal.

Kindly accept once more the congratulations of your devoted,

(Signed) E. Sauvé.

E. SAUVE

President Hardware Section, Montreal Branch R. M. A., and Second Vice President Quebec Provincial R. M. A., who expresses his appreciation of Hardware and Metal in his letter herewith.

FRENCH VERSION

17 Janvier, 1922.

Hardware and Metal, Toronto.

Toronto.

Quelle joie j'ai éprouvée ce matin en ouvrant mon journal "HARDWARE AND METAL" lorsque j'ai constaté que vous aviez eu l'heureuse idée d'inclure dans ses colonnes l'importante réclame de la Province de Québec (Québec the Province of Prosperity). Ceci coincide très bien avec les beiles apparences pour le commerce de ferronnerie dans le Dominion. L'année 1922 ouvre à notre commerce un élan comme le Canada n'en a jamais eu. Il a eté prédit que le 20 iéme siècle serait le siècle du Canada. Ceci semble se rêalisersi le capitaliste, l'ouvrier et le détaillant se donnent la main et si les Provinces s'unissent en laissant de côte tout esprit de haine. Le Canada sera sous peu le pays le plus riche de l'univers nous possédons les plus belles ressources du monde entier. La part généreuse que le Canada a prise á la grande guerre a fait connâitre notre pays qui malheureusement était inconnu dans plusieurs pays et dans d'autres mal connu, mais aujourd'hui avec un Canada uni et si le peuple sait se donner de bons administrateurs notre pays sera un point de mire pour tout l'univers entier.

Le "HARDWARE AND METAL" en rendant hommage à la Province de Québec rend à Québec ce qui lui est due et je sais que j'exprime le pensée générale du commerce de Québec en félicitant du plus profond du coeur votre journal, le plus important du commerce de ferronnerie.

Votre journal a fait un bel acte en écrivant en francais la réclame de la Province de Québec. Je vous en remercie au nom du marchand détaillant qui est en presque totalité de langue francaise dans notre Province. Je vous invite pour le bien de votre journal et le commerce détaillant à continuer à nous intéresser en écrivant en francais un article chaque semaine. La prospérité ira toujours en grandissant, senlement que si nous laissons de côte toute question de clocher, qui j'en suis sûr la Province de Québec est la premiére â mettre en pratique.

Rien ne peut exprimer mieux l'idée de la réalité que les gravures dont vous vous êtes servis. Nul doute que ceci fera un grand bien pour notre commerce.

Comme président de la section des marchands de ferronnerie de Montreal, tresorier du district re Montréal et deuximiéme vice-president de la Province de Quebec de l'association des marchands détaillants du Canada je suis doublement intéressé a votre artic- un représentant d'expérience au gouvernement d'Ottawa et á tout les gouvle. Notre association a continuellement ernements Provinciaux pour surveiller les actes de legislature pour le plus grand bénifice de notre commerce. Merci pour votre belle réclame et continuez pour le plus grand bien de notre beau pays. Merci pour la reproduction dans votre journal des actes que notre association fait pour le bien de notre commerce.

Votre journal est pour moi indispensable à tout marchand dètaillant la ferronnerie, nous nous renseignons au jour le jour sur les prix et nous bénificions des nombreux conseils que vous mettez à notre disposition.

Veuillez agréer encore une fois les felicitations de votre devoué.

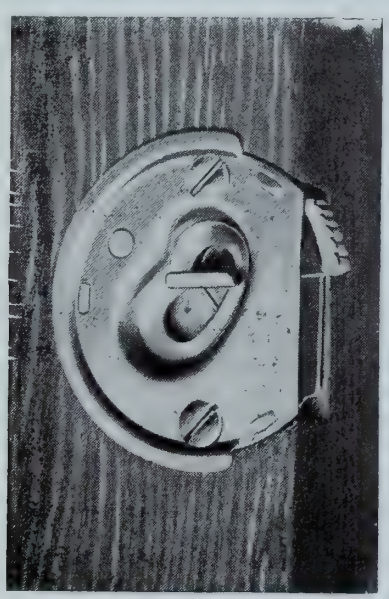
(Signed) E. Sauvé.

New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

"SNIVEY" SASH FASTENER

The Klay-Kirsh Company, 1221 East Broadway Toledo, Ohio, are placing on the markets a new patented window fastener called the "Snivey." This product is claimed to be burglar-proof, as the fastener sets flush with the window sash, and according to the manufacturers, cannot be jimmied. It is designed so that any force applied from the outside, is intended to cause the pawl to become more firmly set. Other favorable points, state the makers, are that it does not interfere with the curtains, and allows the window to be opened to any desired height from the inside, but will lock at that position and thus prevents further opening from outside influences.



"Snivey" Sash Fastener

CANADIAN METALINE NAILS

Canadian Metaline nails have been added to the regular lines of cut carpet, shoe tacks and cut nails manufactured by the Dominion Tack & Nail Company, Limited, Galt, Ontario. The new product is enamelled to match any colour of leather. Other additions to their lines are brass and brass plated chair nails, solid head steel and brass plated thumb tacks and steel drawer glides.

NEW SQUARE D MOTOR STARTING SWITCH

A new type of motor starting switch in various sizes has recently been placed on the market by the Square D Company, Walkerville, Ontario. It is a single throw positive make, quick make and break switch with cover control which prevents throwing the switch on except when the cover is closed and prevents the opening of the cover until the switch is thrown off. The cover control may be rendered inoperative by a key supplied to authorized persons. A further refinement of the cover control is to be added which will allow the cover to be locked so that it cannot be opened without a key even when the switch is off. The company have also placed on the market a few sizes in their new line of industrial service switches.

NEW COMBINATION STOVE

Lemarre & Company, Limited, St. Remi, Quebec, are putting on the market a new combination stove for coal and wood. The above firm have now patented this, and claim it is the only one of its kind on the market. In appearance, it is similar to the ordinary cooking range, but the fire pot is different as it is built on the principle of the Quebec Heater, lined with fire brick, either with or without grates. The manufacturers claim it will give better service for heating purposes, while it will cook just as well as any range.

ELECTRIC STOVE DISCS MADE FROM QUARTZ

Electric stove insulation discs and bricks have been found to be also satisfactory when made from quartz, where formerly they were of asbestos and porcelain. According to E. J. Woodburn, of Woodburn's, Limited, Montreal, who has recently been experimenting and has now placed the new composition articles on the market, they will not break so readily and have a much greater heat resistance.

Woodburn's Limited have also been appointed sole Canadian representatives for a new electric resistance wire, which is at present being favourably marketed among leading manufacturers of electrical appliances. Wiggan & Co., Birmingham, are the manufacturers and claim this was used for years in the British navy.

NEVERSLIP TIRE CHAINS

The "Neverslip" Tire Chains are put on unit by unit. They are fastened to specially designed "Bolts" which take the place of the ordinary rim bolts on the wheels of a car.

This product is manufactured by the United Chain and Manufacturing Co., St. Catharines, Ont. The makers claim that once the bolts are installed, they become permanent equipment, and then the "Neverslip" tire chains can be put on under practically any conditions.

"Neverslip" Tire Chain

1922 MODEL "A. B. C." WASHER

The new 1922 model of the A. B. C. Electric Laundress, as announced by the makers, Altorfer Bros. Company, of Peoria, Ill., embodies 24 refinements in construction.

These new features include an aluminum wringer with two-spring tension, 12 inch rolls, instantaneous safety release, and nickeled adjustable aluminum drain board; an improved wringer control mechanism with positive locking device that automatically locks the wringer in any of 20 different positions; the use of machine cut gears throughout; a threaded drain spout set at a 45° angle; a sediment drain groove in bottom of tub; the use of aluminum rivets to attach tub to frame; a nutmeg push button switch; large pressed steel quiet casters; spring latch on cylinder cover; one-piece snug-fitting, non-warping cover on cabinet; nickel-plated operating handles; one-piece "cord tire" belt; oil grooves in main gear case bearings; lock nuts on set screws to preserve alignments of shaftings—and numerous other minor betterments.

Weekly Hardware Market Reports

STATEMEETS FROM BUYING CENTRES

Markets at a Glance

PRICE developments on the current hardware markets are of an extensive nature, including new discount levels on compression goods, lower quotations having been announced on standard globe, angle and check valves. Reductions are also recorded on various makes of similar products. Easier price levels appear on malleable fittings, in both black and galvanized, while the discounts on cast iron fittings, plugs and unions are revised, thus registering another price reduction. Easier price levels are recorded on the Canadian Stillson wrenches; the Universal line of bread mixers; fireweld and electric-weld coil chain, in both proof and B.B.B. qualities; the Potts' line of sad irons in polished and nickle-plated sets; and also agricultural and knife-handled wrenches of various patterns. A reduction of approximately 10 per cent. has been announced on lower priced hand saws, with other qualities unchanged. Harness and saddlery chains, including halter chains, breast and trace chains, are under revision, while a new list of net quotations has been issued on wrought steel and nickle-plated butts. There has been a varying decrease on the different grades of bar iron and steel in some quarters, with prices generally showing a tendency to sag. A further decline is noted in poultry netting staples; while slight decreases appear on various lubricating oils, including paraffine, cylinder, machine and gas engine oils, also black oil, both summer and winter grades. Price advances on both linseed oil and turpentine feature the paint markets this week. Some improvement in demand is foreshadowed in the sheets markets by placing of contracts in primary centres, and the prevailing rate of output reported by mills. Just moderate trade is evident in scrap materials, with some easier levels noted in ingot metal prices.

Montreal Markets

MONTREAL, January 26.—Another lengthy budget of price revisions is apparent on the current hardware markets. Reductions appear on bar iron and steel; fireweld and electric weld coil chain; standard globe, angle and check valves; the Universal line of bread mixers; Stillson wrenches of Canadian pattern; and the Pott's make of sad irons in polished and nickle-plated sets. Easier price levels are also recorded on harness and saddlery chains, including halter, breast and trace chains. The extent of the reduction is approximatly ten per cent. Revised discounts are noted on agricultural and knife-handled wrenches, thus bringing quotations on these products to lower levels. A decline is also announced on lower priced hand saws. Through a change in discounts, lower quotations are now in effect on cast iron pipe fittings, plugs and unions. A similar downward revision is made in prices on malleable fittings, both black and galvanized. Little variation is noted in the sheet markets, with conditions on ingot metals evidently again on the downward trend.

SLIGHT REDUCTION ON MRS. POTT'S SAD IRONS

Montreal.

Mrs. Pott's sad irons, both polished and nicke. plated are slightly reduced in price. Polished will now sell for $1.81, nickel plated $1.87 per set.

EASIER PRICES NOTED ON STILLSON WRENCHES

Montreal

Canadian Stillson wrenches in all sizes show a slight reduction, the discount being revised from 50 per cent. to 52½ per cent. off list prices. List prices are shown on current market pages.

LOWER PRICED HAND SAWS SHOW PRICE REDUCTION

Montreal

A reduction of approximately 10 per cent. is announced by certain manufacturers on their lower priced hand saws. The finer quality lines remain unchanged up to the present.

REDUCTION IN HARNESS AND SADDLERY CHAIN

Montreal.

Harness and saddlery chains, including halter chains, breast chains, and trace chains, show a reduction in price of approximately 10 per cent.

REVISED DISCOUNTS ON SOME LINES OF VALVES

Montreal

Standard globe, angle and check valves are reduced approximately 6 per cent., while the Emco line of globe and check valves show a more substantial reduction with discounts revised from 20 per cent. to 33 per cent off list prices. The standard valves will now sell at less 20 per cent. Other lines of compression goods are unchanged for the present, with business said to be of a spasmodic nature, although generally showing a slight improvement since the close of inventory period. Following are present discounts;

Compression work, standard	43%
Fuller work, standard	30%
Bath cocks, compression	30%
Basin cocks, Fuller No. 0	30%
Do., Nos. 1 and 2	30%
Flatway stop and waste cocks, std	54%
Roundway stop and waste cocks, std.	46%
Brass steam cocks, standard	40%
Do., removable disc	58%
Globe, angle and check valves, standard	25%
Gate or straightway	16/10%
Emco Globe valves	33%
Emco check valves	33%
Jenkins Globe, angle, check and swing check	19%
Jenkins Iron body gate	33%
Jenkins gate or straight way	25%
Jenkins iron body, globe and angle	15%

UNIVERSAL BREAD MIXERS NOW LOWER IN PRICE

Montreal

A reduction of substantial proportions is recorded on both sizes of Universal bread mixers. No. 4 will now sell for $33.95 a dozen, No. 8 for $44.90 per dozen.

REDUCTION IS MADE ON BAR IRON AND STEEL PRICES

Montreal

Reduced prices are announced on all grades of bar iron and steel, and common bar iron will now sell for $2.65, a reduction of 25 cents per hundred pounds. Other lines show a proportionate decline with the exception of the higher grades of steel, such as mining tool steel and Black Diamond tool and cast steel, these being reduced ½ cent per pound. Although former prices were considered reasonably low, and many thought the next revision would be in the nature of an advanec, the trend of the market is undoubtedly still downward, due for the most part, according to local dealers, to the dull period at present apparent. One large local distributor stated that competition played no small part in present reductions. While business in these lines is at present seasonably quiet, there is every reason to believe that an improvement is in sight, and in the hope of securing the earlier trade some houses offered the lower figures, which were soon followed by the remainder. Following are revised quotations;

Common bar iron, 100 lbs.	2 65
Refined iron	4 15
Irish finish machinery steel	2 70
Mild steel	2 65
Single reeled machinery steel	4 75
Band steel	2 65
Spring steel	4 25
Sleighshoe steel	2 65
Tire steel	2 85
Toe caulk steel	3 55
Harrow tooth steel, per lb.	2 80
Mining tool steel, per lb.	0 21½
Black Diamond tool and cast steel, per lb.	0 21½

NOTE—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

SLIGHTLY EASIER TONE IN LEAD PRODUCTS

Montreal.

There is now a slightly easier tendency in the undertone of lead products in general, because of the softer tone ingot metals recorded in the last few weeks. This is not yet extensive enough to have any marked effect on the finished products, and a continuance of lower prices in primary circles is not looked for at the present time. However, for the present, the same amount of firmness that was displayed in these markets a few weeks ago is not now apparent. Following are the local prices now in effect:

LEAD AND ZINC PRODUCTS

Lead pipe, per 100 lbs.	12 50
Lead waste, per 100 lbs.	13 50

Note—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	10% off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10½
Lead sheets, 3 to 3* lbs., sq. ft., lb.	$ 10¼
Do., 4 to 8 lbs., sq. ft.	0 09½

Cut sheets ¼c lb. extra, and cut sheets to size, ¾c lb. extra.

Solder, guaranteed, lb.	0 28½
Do., strictly, lb.	0 26½
Do., commercial, lb.	0 23½
Do., wiping, lb.	0 24½
Do., wire, lb.	0 32½
Zinc sheets, casks	0 11½
Do., broken lots	0 12

BRASS AND COPPER GOODS STILL FAIRLY FIRM

Montreal

Notwithstanding certain developments in New York exchange, and the easier tone now reported on copper in primary markets, sheets, rods and tubing, both in brass and copper, are holding fairly firm. There was every indication of higher prices a few weeks ago on sheets but it is now thought the softer tone in the ingot metal will check this to quite a degree. Unchanged local prices are as follows:

BRASS—	Base.
Sheets, base	0 25
Rods, base ½ to 1 in., round	0 23
Tubing, seamless, base	0 32
F. o. b. Montreal.	
COPPER—	
Rods, ½ to 2 in.	0 30
Soft sheets, plain, 16 oz. and heavier	0 34
Plain tinned, 16 oz. and heavier	0 39
Polished and tinned, 16 oz. and heavier, lb.	0 43
Tubing, lb.	0 34

Above prices are full sheets and bars. Cut sheets and bars are 5c per lb. higher.

FURTHER DECLINE IN PRICES OF P. N. STAPLES

Montreal

Lower quotations again appear on poultry netting staples, a reduction appearing on these only two weeks ago. Following are prices now quoted;

P. N. STAPLES—	Galv. Per 100 lbs.	Bright.
10-lb. boxes	8 05	8 95
25 and 50 lb. boxes	7 55	8 45
100 lb. kegs	6 55	7 45

RANGE BOILERS STILL AT UNCHANGED QUOTATIONS

Montreal.

The standard list on range boilers still remains unchanged, with the 30 gallon boiler nominally quoted at $8.75. There was an effort put forth by different dealers last week to stabilize the present unsettled condition in the selling of these products, but up to the present nothing definite has been accomplished. Although some are of the opinion that a higher list of quotations will make its appearance it remains in doubt whether this will have the desired effect on the local market. Following are present quotations;

RANGE BOILERS—	Standard.	Ex. Heavy
30 gallon	$ 8 75	$11 25
35 gallon	11 25	13 50
40 gallon	13 50	16 00
52 gallon	20 00	24 50
66 gallon	28 00	34 00
82 gallon	35 00	46 50
100 gallon	45 00	55 00
120 gallon	54 00	63 25

GASOLINE AND COAL OIL PRICES ARE UNCHANGED

Montreal

Although a softer tone has crept into the oil markets at primary centres, there is no change in local quotations on petroleum products. One dealer stated that although there was an easier tendency, assisted also by the quiet season for practically all products, there was no present indication of a recession in prices. Motor grade gasoline is quoted at 32½ cents, higher grade at 35½ cents. Coal oil quotation, 22 cents.

LITTLE VARIATION NOTED IN SHEET MARKETS

Montreal

Local quotations on sheets are nominally unchanged with business in the various lines still of a moderate nature. Although the steel market, insofar as bar iron and steel is concerned, is again easier with lower prices now given, there is no present indication of a revision in sheets. On the other hand the market is said to be far from a healthy standing. Present levels are generally conceded comparatively low, but with increased business now in sight, with the approach of spring months, competition will be of such a nature that price concessions will have to be offered to secure business. This may only be of a temporary nature, with increased trade later on remedying any unsettlement. Unchanged nominal quotations are as follows;

BLACK SHEETS

10 gauge	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 40	4 70
16 gauge	4 50	4 80
18-20 gauge	4 55	5 05
22-24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35

Sheets 3 in. wide, 20 cents per 100 lbs. extra.

GALVANIZED SHEETS.

U. S. Standard.		
10¾ oz.	6 75	7 60
28 gauge	6 35	7 20
26 gauge	6 05	6 85
22-24 gauge	5 90	6 60
20 gauge	5 75	6 45
18 gauge	5 75	6 35
16 gauge	5 60	6 35
14 gauge	5 45	6 35
12 gauge	5 30	6 35
10 gauge	5 20	6 35

English Standard—	Queen's Head	Fleur-de-lis
28 gauge	7 75	7 25
26 gauge	7 50	7 00
24 gauge	6 90	6 60
22 gauge	6 55	6 15
18-20 gauge	5 85	6 00

NOTE.—These prices are full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. Extra for sheets 4 ft. wide. 50 cents per 100 pounds. Extra for sheets 3 ft. wide, 28 ga. and 10¾ oz. 25 cents per 100 lbs.

BRIGHT TIN PLATES

20 x 28 x 100 lb. basis	$16 50
20 x 28 IC, 112s	17 00
20 x 28 IX, 112s	19 00
20 x 28 IXX, 56s,	10 75
20 x 28 IXXX, 56s	11 50

18 x 24 x 60s	5 80 box
18 x 24 x 75s	6 10 box

WELSH CANADA PLATES

Polished—	
18 x 24 x 52s	8 00 box
12 x 24 x 60s	8 25 box

LOWER PRICES ANNOUNCED ON COIL CHAIN

Montreal.

A reduction of varying extent is announced on fire weld and electric weld coil chain, in both proof and B. B. B. qualities. This reduction follows many other heavier lines of iron and steel products which have shown easier quotations since the first of the year. New lower prices will be found on current market pages.

QUOTATIONS IN SOIL PIPE REMAIN UNCHANGED

Montreal

Current quotations on soil pipe and fittings remain unchanged, with the movement now seasonably quiet. Although present prices on these lines are considered very low with replacement figures, and are due to a great extent to competition, dealers state there is no immediate sign of a revision, and the market will in all probability continue fairly steady until the more active season in the Spring months. Following are the unchanged discounts:

SOIL PIPE—	
2 and 3 inch	47½%
4 inch	50%
5 and 6 inch	47½%
Fittings—	
2 to 6 inch	50-10%

CORRUGATED SHEETS REMAIN AT RECENT DECLINE

Montreal.

No further change is recorded in the market for corrugated sheets since the revision last week. Dealers look for a fairly steady position now on these products, current quotations being well down in proportion to flat sheets. However the situation on the latter is anything but promising, with lower prices not unlikely before the active period in later months commences. Business remains seasonably quiet at the following quotations:

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins., 75c a square extra.

Do., Table Spoons				5 50
$15 90	$17 70	$21 20	$28 00	$36 80

NO CHANGE IN WROUGHT IRON AND STEEL PIPE

Montreal

There has been no price development in wrought iron and steel piping since the issuing of list No. 54 a few weeks ago. Sales are seasonably small at present, although considered fair for the present season of the year.

REVISED DISCOUNTS ON ARGICULTURAL AND KNIFE HANDLED WRENCHES

Montreal

Discounts are revised on the regular agricultural, William's and Coe's knife handled wrenches. Agricultural are now quoted less 52½ per cent, W. & B. less 45 per cent., and Coe's less 40 per cent off list prices.

METAL MARKETS ON THE DOWNWARD TREND

The trend of the metal markets has been downward in all lines, and the London market is especially weak. The cause of the decline is unknown unless it is the unsettled condition in Europe, but certainly the tone of the market is disappointing.

TIN.—The London market continues to drop and is now down £16 a ton from the highest point reached last month. Stocks are undoubtedly large while the price is now very low. Local market is easier at 36½ cents.

COPPER.—This metal is lower, both in London and New York. The outlook is uncertain, but to-day's figures are certainly reasonable. Consumption is below normal but should gradually increase. Local prices are easier at 17½ cents, for electro, 17¼ cents for castings.

LEAD.—This is the steadiest metal on view, and prices show little change in any markets. Supply and demand are fairly well balanced and the outlook is fairly good for this metal. Quotation unchanged at 7 cents.

SPELTER.—Both London and East St. Louis continue to decline, and there seems little back bone to the market. It would not, however, take much buying to again stiffen prices. Local quotation remains at 7½ cents.

ANTIMONY.—Although antimony is very quiet, and the trend of the metal markets in general is downward, quotations are unchanged up to the present at 6¾ cents for Chinese, 7¾ cents for high grade English.

ALUMINUM.—Quotations on this metal are also unchanged at 26 cents, with the market dull and featureless.

Toronto Markets

TORONTO, January 26.—Another extensive budget of price developments attracts particular attention to the current hardware market reports. New discount levels have been announced on compression goods, with lower quotations on standard globe, angle and check valves. Substantial reductions are also recorded on various makes of similar products. Easier price levels appear on malleable fittings, in both black and galvanized, while cast iron fittings, plugs and unions, all have lower quotations through revised discounts. Other reductions are recorded on agricultural wrenches, with lower prices on adjustable and knife-handled wrenches of the Williams make. Pliers and other lines also register a general downward revision. Many lubricating oils are slightly reduced in price, this development reflecting the easier trend in the oil markets outlined in a previous issue. These current changes affect paraffine; black oil, both summer and winter grades; cylinder, machine and gas engine oils. A revised list of net prices has been issued on wrought steel and nickel-plated butts. There is also a new price list on both fireweld and electric weld coil chain, showing substantial reductions on the various sizes. Quotations are sagging on bar iron and steel, with price shading having almost resulted in a general lowering of current base prices.

NEW DISCOUNT LEVELS ON ADJUSTABLE WRENCHES

Toronto

There has been a general downward revision announced by the manufacturers of the Williams line of wrenches and pliers. This applies to adjustable and knife-handled wrenches, as well as several other products. The new discounts show a varying range of decline, with a most substantial reduction on some lines, and a moderate decrease on others.

PRICE REDUCTION ON MANY LUBRICATING OILS

Toronto

A slight reduction has been announced in prices on various grades of lubricating oils. This change affects such refined oil products as black oil, both summer and winter grades, cylinder, machine and gas engine oils. Paraffine is also revised, the reduction being one-tenth of a cent per gallon.

Quotations on gasoline in domestic circles remain unchanged, but some easier levels have recently been announced in New York and other Southern primary centres. Crude oil prices are also in a sagging condition, production of crude in Mexican and U. S. oil fields continuing to record an increased volume week by week.

The new levels on lubricating oils and paraffine, are contained in the current market quotation pages.

REDUCTION RECORDED ON AGRICULTURAL WRENCHES

Toronto

Through a revision in the discount, quotations on Agricultural wrenches are again on an easier level. The new discount is 50 and 5 per cent. off, compared with the previous quotation of 50 per cent.

REVISED NET PRICES ON WROUGHT STEEL BUTTS

Toronto

A revised list of net prices on wrought steel and nickel-plated butts and hinges has been announced. Some slight changes are reported, but on the majority of lines quotations are practically unchanged.

COIL CHAIN PRICES NOW ON REDUCED LEVELS

Toronto

Lower prices have been announced on firewe'd and electric weld coil chain, in both proof and B. B. B., qualities. Following are some of the revised quotations appearing on the local market:

COIL CHAIN—	Proof.	B.B.B.
Fireweld.		
3/8 inch	$13 65	$16 00
7-16 inch	11 25	13 75
1/2 inch	11 25	11 75
5/8 inch	10 50	.....
Electric weld.		
3-16 inch	$16 25	$19 50
1/4 inch	15 50	17 75
5-16 inch	12 75	15 75
3/8 inch	10 60	.....

REVISED DISCOUNTS APPEAR ON COMPRESSION GOODS

Toronto

Through a revision in the discounts, varying reductions are announced on certain lines of compression goods. These changes principally affect globe, angle and check valves. The discount on the standard, has been revised from 20 to 25 per cent., and a number of similar quotations have a'so been announced, the extent of the decline being greater on some other valves. Following is the new list of quotations on these products:

COMPRESSION GOODS—	
Compression work, standard	43%
Fuller work, standard	30%
Bath cocks, compression	32%
do., Fuller	25%
Flat way stop and waste cocks, standard	54%
Round-way stop and waste cocks, standard	46%
Brass steam cocks, standard	40%
Globe, angle and check valves, standard	25%
J. M. T.	20-10%
J. M. T. C.	25-10%
J. M. T. Gate Valves	25-10%
Jenkins gate or straightway	25|10%
Jenkins Globe	19|10%
Radiator valves, standard	58%
do., removable disc	58%
Emco. check valves, standard	25%
Emco, J. D. rad. valves, screwed	33%
Emco, swing check, 3/8 in. and 1/2 in.	40%
Do., Do., Do., other sizes	33%
Webber gate valves	33
Emco gate valves, standard	25%
Do., Do., Do., J. D.	33%
Unions, 1/8 in. 2 1/2 to 4 in.	47%
BASIN COCKS—	
No. 0 and 1, Fuller pattern	30%
Quick opening No. 3633	43%

STEADY UNDERTONE IN COPPER AND BRASS GOODS

Toronto.

Quotations on brass and copper products are remaining at the revised levels recently effective, and distributors state that these markets reflect the tone of copper on the primary metal centres. While copper is slightly easier in position, the current demand has nominally receded, a condition which is due to the prevailing quietness at this season of the year. Prices on tubing, sheets and rods, are generally maintained at the following levels:

BRASS—	
Sheets, base, per lb.	$ 0 23
Tubing, base, per lb.	0 25
COPPER—	
Rods, base, per lb.	0 20
Soft sheets, plain, 16 oz. and heavier, lb.	0 30
Do., plain tinned 16 oz. and heavier, lb.	0 37
Do., polished and tinned 16 oz. and heavier, lb.	0 42
Tubing	0 29

NET QUOTATIONS ON THE STANLEY LINE OF TOOLS

The revised net quotations now effective on the Stanley line of tools are based upon declines on these products recently announced. The extent of the reduction varies on the different lines, in some cases showing a substantial lowering of prices, while in others the drop is not so apparent. The new levels available for inventory valuation are as follows:

STANLEY TOOLS—	
Bevels	
No. 18 x 6 in., per doz.	9 00
No. 18 x 8 in., per doz.	11 55
No. 18 x 10 in., per doz.	12 55
No. 25 x 6 in., per doz.	5 85
No. 25 x 8 in., per doz.	6 55
No. 25 x 10 in., per doz.	6 85
No. 25 x 12 in., per doz.	7 60
BIT BRACES—	
No. 915 x 8 in., sweep, per doz.	32 75
Do., 10 in.	33 70
Do., 12 in.	34 65
No. 919 x 10 in., sweep, per doz.	45 70
Do., 12 in.	47 10
Do., 14 in.	59 05
No. 921 x 10 in. sweep, per doz.	47 25

No. 80 x 3 in., $1.85; 4 in., $2.20; 5 in., $2.30; 6 in., $2.50; 8 in., $3.40; 10 in., $4.10.

VICTOR VISES—

No. 741, $1.30 each; No. 742, $1.55; No. 743, $1.85; No. 744, $2.20; No. 745, $2.55; No. 746, $3.95; 761, $1.65; No. 762, $1.90; No. 763, $2.20; No. 772, $1.90.

MALLETS—

No. 4, $3.80 per doz.; No. 6, $15.40; No. 10, $12.60; No. 11, $14.60; No. 12, $18.55; No. 13, $22.45.

REDUCTIONS IN MALLEABLE AND CAST FITTINGS

Toronto

A decline of approximately 10 per cent. has been announced in the quotations on malleable and cast iron fittings, plugs and unions. This change revises the discount on cast fittings, and also the prices on pound goods, both black and galvanized. The new lists are expected to place the market on these products at a basis for Spring business anticipations. Following are the latest revisions:

PIPE FITTINGS—	Per cent.
Cast iron fittings	30%
Plugs, cast iron	30%
Do., solid	10%
Do., countersunk	net
Bushings, small	32%
Bushings, cast	32%
Unions, 1/4 in. to 2 in.	47%
Unions, + in., 2 1/2 to 4 in.	47%
Flanged unions	30%
Flanged fittings	30%
Dart Unions, blk., 1/8 to 2 in.	33 1/2%
Do., 1/8 in., 2 1/2 in. and larger	23%
Do., galv., add to black	30%
Nipples, blk., and galvd. 1/8 to 4 in., close and short	50%
Do., 4 1/2 in. and larger	40%
Do., long, 1/8 in. to 4 in.	60%
Do, 4 1/2 inch and larger	50%
Do., running thread	30%
Couplings, 4 in. and under	30%
Do., 4 1/2 in. and larger	10%

MALLEABLE FITTINGS—	Black	Galvanized
Class A	0 54	0 67
Class B	0 20	0 28
Class C	0 13	0 20

QUOTATIONS SAGGING ON BAR IRON AND STEEL

Toronto.

Prices show softness in the market for bars and shapes, with certain producers in the South having cut prices on bars around $1.00 per ton in the effort to obtain sufficient orders to keep the mills running at a moderate capacity during the present season. There has been no general changes recorded, however, but the current activity in steel circles contains more of an expectation for Spri[illegible] improvement than an actual volume of trade at present. Quotations are described as sagging, but whether this condition will spread to the local distributors also, cannot be ascertained. The following prices are nominally in effect, with shading for any attractive order being general:

IRON AND STEEL—		
Mild Steel bars, base	3 00	3 25
Mild steel bands, 3-16 in. base	3 50	3 75
Bar iron, base	3 00	3 25
Angle iron, base	3 10	3 35
Horseshoe iron	3 75	4 10
Tire steel	3 50	3 75
Spring steel	5 50	6 00
Sleigh shoe steel	3 00	3 25
Hoop steel	3 75	4 25
Norway iron	12 50	15 00
Toe caulk iron	4 00	4 50
Crucible cast sheet steel	30 00	.35 00
Mining drill steel	.. ..	18 50
Cast tool steel, high grade	30 00	36 00
Cast tool steel, medium	20 00	23 00

RANGE BOILER PRICES STILL BEING SHADED

Toronto

With sales of range boilers still of a small order, quotations are nominally unchanged but price-shading continues among certain distributors. The present period does not offer much assistance in improving this situation, dealers being anxious to obtain orders, even with a considerable price concession. It is the opinion of some that increased volume of trade in the early spring months will remedy the matter, and stocks will by that time have become depleted. Others again admit they cannot find a solution

for the problem, and it is their belief that much the same condition will prevail until dealers in general are unwilling to sacrifice their profit on boilers, and this may be a slow road to recovery from the present state of affairs. The most general quotation on the 30 gallon boiler is $8.75, with the following prices on other sizes:

RANGE BOILERS—	Standard.	Ex-Heavy
Size.		
30 gallon	8 75	11 25
35-gallon	11 00	13 25
40 gallon	13 50	16 00
52 gallon	20 00	24 50
66 gallon	28 00	34 00
82 gallon	35 00	46 50
100 gallon	45 00	55 00
120 gallon	54 00	63 25
144 gallon	78 00	93 00

IMPROVEMENT FORESHADOWED IN SHEET MARKETS

Toronto

Orders for sheets and plates are said to be of a moderate nature, but in fair proportion for this season. Steel companies generally report more anticipations for a higher rate of output during the next few months than of an upward trend to prices. Prevailing quotations are nominally unchanged, but it is recognized that any large-sized order might result in slight concessions.

Tin plate mills are still reported running at a high rate of production. The recent appearance in certain markets of some larger projects, points to a more general recognition of the present degree of liquidation in the steel industry, and is also construed as foreshadowing an increased volume of construction work with the approach of the open season. Nominal prices remain as follows:

BLUE ANNEALED—		
10 gauge, base	3 75	4 50
12 gauge	3 80	4 55
14 gauge	3 85	4 60
16 gauge	3 90	4 65
BLACK—		
18—20 gauge	4 30	5 05
22—24 gauge	4 35	5 10
26 gauge	4 40	5 15
28 gauge	4 50	5 25

Charge of from 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—	Queen's Head	Fleur-de-lis.
28 gauge	8 25	7 75
26 gauge	8 00	7 50
24 gauge	7 60	7 10
22 gauge	7 15	6 65
18 and 20 gauge	7 00	6 50
Premier and Apollo.		
10¾ oz.	6 25	7 00
U. S. 28 base	5 85	6 60
U. S. 26	5 55	6 30
22 and 24	5 40	6 15
18 and 20	5 25	6 00
16	5 10	5 85
12 and 14	4 95	5 70

An extra 40c per 100 lbs. is charged for Keystone and Premier brands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10 3-4 oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds.

PLATES, CANADA—	
Dull 60 sheets	$5 65
Ordinary, 52 sheets	6 60
PLATES, COKE TIN—	
I.C., 20 x 28, 112 shets	13 50
IX, 20 x 28, 112 sheets	16 50
IX, 20 x 28, 56 shets	9 00
PLATES, CHARCOAL TIN—	
1X, 20 x 28, 56 sheets	14 00
1XX, 20 x 28, 56 sheets	16 00
PLATES, TERNE—	
1C, 14 x 20, 112 sheets	12 00

JUST MODERATE TRADE IN SCRAP MATERIALS

Toronto

Considering that the majority of consumers are still confining their chases to current needs, dealers report that there is a fair amount of business being done. Business in scrap rubber is low, but copper scrap has continued to move, although less actively than during recent weeks. There have been no developments to record in other meta's, they having moved very slowly. Activity in iron and steel scrap is somewhat restricted. The following are averages of dealers' buying prices for fairly large quantities:

Gross Tons— Scrap Iron		
Heavy melting steel (Hamilton)	$11 50	$12 00
Borings and turnings	2 50	3 50
Rerolling rails	10 50	11 50
Scrap pipe	6 00	7 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	6 50	7 50
Agricultural malleable	10 00	11 00
Railroad malleable	11 00	12 00
Net tons—		
No. 1 cast	18 00	19 00
Stove plate	12 50	13 50
Grate bars	11 50	12 50
Standard car wheels	13 50	14 00
Scrap Metals.		
Heavy copper and wire	10 50	11 00
Light copper	8 00	9 00
No. 1 composition	9 00	10 00
No. 1 comp. turnings	6 00	7 00
Light brass	3 00	3 50
Heavy yellow brass	5 50	6 50
Heavy lead	4 00	4 50
Tea lead	2 00	2 50
Scrap zinc	3 75	4 25
Scrap Rubber		
Boots and shoes	2 50	3 00
Lumbermen's rubber boots	1 50	2 00
Auto tires	0 50	1 00
Solid tires	0 75	1 25

QUIET BUSINESS IN SOIL PIPE WITH NEW DISCOUNTS MAINTAINED

Toronto.

Soil pipe and fittings are still being quoted at the recently revised discount levels, with current business described as quiet. It is considered a little early in the season for any marked revival. Prices on American 8-inch extra heavy soil pipe and fittings are now quoted on an easier level, but this size is in very little request, and domestic quotations remain at net list.

SOIL PIPE—	
2 inch	40%
3 inch	40%
4-inch	40 and 5%
5 and 6 inch	40%
8 inch.	net
FITTINGS—	
2 to 6 inch fittings	50 and 5%
8 inch fittings	net

WOULD SHADE BOILER TUBE PRICES FOR GOOD ORDER

Toronto.

Prices on boiler tubes are nominally unchanged, with trade in these products of a quiet nature. Dealers state that the following quotations represent the average market. Any changes that might be made would constitute slight fluctuations, with little variation from the prevailing levels. Such see-sawing from week to week could hardly record any substantial change, according to the opinion of one local distributor. However, it was freely admitted that such price-shading from these figures is general, if any attractive business is in sight. For general purposes, however, the following quotations are generally in effect:

BOILER TUBES—	Seamless.	Lapweld.
1 inch	26 00	.....
1¼ inch	27 25	.....
1½ inch	26 25	.....
1¾ inch	29 75	25 00
2 inch	28 00	22 00
2¼ inch	32 00	25 00
2½ inch	40 00	27 00
3 inch	44 00	35 00
3½ inch	60 00	40 00
4 inch	75 00	50 25

QUIETER TONE RECORDED IN INGOT MARKETS

Toronto

The ingot metal markets are recording a slightly easier tone, with the exception of aluminum. Forward inquiry for aluminum has shown some improvement. A reaction from recent higher prices recorded at primary centres has developed on copper and spelter; with tin quotations fluctuating on most markets. Consuming demand is again of a quiet nature, with little activity generally reported.

COPPER.—The announcement that some copper mines are planning to resume operations in the near future, has caused a reaction from the firm position recently noted in copper circles. Some very slight concessions in price were again offered during the week to induce buyers to re-enter the market, but only declines have resulted. It is stated that large consumers are booked up for the present and are adopting a waiting position as regards futures. The local situation has failed to register any improvement, quotations remaining at 17½ and 18 cents.

TIN.—The tin market continues to fluctuate at primary centres, but there is little fundamental change to record. Prices have eased in London, and this has not encouraged the immediate outlook. Consumers' buying is reported light. Local actitvities are unchanged, with prices nominally quoted at 38 cents.

LEAD.—This metal has been quiet, but large producers are maintaining quotations, in spite of the absence of interest. It is reported that London stocks are fairly low, and an improved inquiry from this direction is expected in some quarters. Meanwhile, the local quotations are unchanged, generally ranging at $6.75.

SPELTER.—An easier tone has also been recorded in this market, and the improvement of recent weeks is only slight evidence now. Some concessions are reported from primary markets, but prices on domestic centres are generally unchanged, the local figure being $7.25.

ANTIMONY.—With prices locally ranging between 8 and 10 cents, there is little new to record in this market. Southern primary centres report an easier tone.

ALUMINUM.—The tone is firmer in aluminum. Consuming inquiry for forward delivery is reported better, and prices are moving up in some quarters. The change is only slight, however, as yet. Local prices still remain at 27 cents.

London Markets

LONDON, Jan. 26.—Lower quotations are noted this week on standard valves, including globe, angle and check, this revision appearing through changing discounts. Reductions are also recorded on the Wise line of shears and scissors, carpenters' chalk, agricultural wrenches, and Desolvo. There has been a rearrangement in the discounts on Dominion ammunition, but prices are not changed from the recent new levels. The revised net quotations on the Stanley line of tools are now in general use.

Hardware trade in this district has registered a slight improvement during the past week, orders being larger and more numerous.

REDUCTION ON WISS SCISSORS AND SHEARS

London, Ont.

New reduced prices are announced on the Wiss line of shears and scissors. The decline is approximately 12½ per cent. Quotations are now at the revised lower list, less 33-1/3 per cent.

LOWER QUOTATIONS NOTED ON CARPENTERS' CHALK

London, Ont.

The new quotations on carpenters' chalk are now around 10 per cent. lower than formerly. The revisions are as follows:

White, $2.00 per gross. Red and Blue, $2.60 per gross.

REVISED DISCOUNTS NOTED ON STANDARD VALVES

London, Ont.

Through a revision in the discounts lower prices are now in effect on standard valves, both globe, angle and check. The new quotations on these products is list less 52 per cent. A similar change is reported in the Jenkins pattern, the discount of 33 per cent. being quoted.

AGRICULTURAL WRENCHES REGISTER LOWER PRICES

London, Ont.

The new net quotations on the Agricultural wrenches are approximately 5 per cent. lower. Following are the revisions:

AGRICULTURAL WRENCHES—
6 in., $4.70 per doz.; 8 in., $5.65; 10 in., $6.60; 12 in., $8.40; 15 in., $11.40.

REDUCTION IN PRICES NOTED ON DESOLVO

London, Ont.

Reductions are also announced this week on Desolvo, the extent of the decline being 50 cents per dozen cans. This change brings the revised prices to $5.50 per dozen cans; and $5.00 per dozen in two-doz. lots.

FIRM TONE REMAINS IN TURPENTINE MARKETS

London, Ont.

Turpentine prices continue firm at the recently higher levels. There has been no revision in quotations, with the condition of present stocks described as low. Prices follow:

TURPENTINE—	Imp. Gal.
1 bbl. lots	$ 1 30
2 to 4 barrel lots	1 29
5 gallon lots	1 45

REVISION IN ARRANGING AMMUNITION DISCOUNTS

London, Ont.

Another revision in the arranging of discounts on Dominion shells and ammunition, merely reduces the number of discounts but does not materially change the prices. The later figures announced are as follows:

DOMINION AMMUNITION—
All metallic cartridges, rim, centre fire and military, list less 55 per cent.
Crown, Sovereign and Regal loaded shells, list less 50 and 2½ per cent.
Canuck and Imperial loaded shells, list less 50 and 5 per cent.
Empty shells, list less 30 and 2 per cent.

FIVE PER CENT. REDUCTION NOTED IN TOOL PRICES

London, Ont.

New net quotations on the "Yankee" line of tools are now available, showing an approximate reduction of 5 per cent. Following are prices on some of the popular lines:

"YANKEE" TOOLS—
Ratchet Screw Drivers
No. 11 x 2 in., $8.00 per doz.; 3 in., $9.80; 4 in., $10.45; 5 in., $11.50; 6 in., $12.90; 8 in., $14.65.
No. 12, $11.40 per doz.
No. 15 x 3 in., $9.10; 4 in., $9.50; 5 in., $9.90.
Spiral Screw Drivers
No. 30, $36.60 per doz.; No. 31, $49.10; No. 130, $41.80; No. 131, $56.40.
Automatic Drills
No. 40, $35.55 per doz.; No. 41, $31.75; No. 42, $25.10; No. 43, $15.85; No. 44, $38.20.

REVISED NET PRICES ON STANLEY TOOLS

London, Ont.

On another page in this section are inserted the net prices on some of the Stanley Level Co. make of tools, figured at the recent lower quotations. Some lines show little change, and others record a decline of around 10 per cent.

JUST FAIR BUSINESS IN SHOVELS AND SCOOPS

London, Ont.

Snow shovels and furnace scoops do not record the brisk activity that is usually expected in these lines at this season. Dealers report that business is just fair as regards these products, but prices are holding firm at the following levels:

SNOW SHOVELS—	Doz.
Prince L. handle	5 50
Common Japanned	4 00
Kink D handle	8 00
Moose D handle	10 50
Prince D handle	7 20
FURNACE SCOOPS—	
Long handle	5 50
D. handle	5 50

IMPROVED DEMAND FOR CROSS-CUT SAWS

London, Ont.

A better movement is now reported for cross-cut saws. Quotations on these products are holding unchanged at the following levels:

CROSS CUT SAWS:—
Maple Leaf Line.
Premier—5ft.—$5.50 each; Lance and Racer—5½ ft. $6.25 each; Pangborn—6 ft. $7.25 each.
Other Makes.
Philadelphia Lance and Champion—75c. foot.

LIGHT DEMAND FOR WHITE LEAD IN OIL

London, Ont.

Buying of white lead in oil is described as very light at present. Quotations are unchanged from the following levels:

WHITE LEAD IN OIL—	Tons.	Less Tons.
Pure, per 100 lbs.	13 30	13 65
Elephant	13 80	14 15

MAINTAIN CURRENT PRICE LEVELS ON LINSEED OIL

London, Ont.

There is little new to record in linseed oil as far as prices are concerned, the current levels still being maintained generally. Sales are light at the following quotations:

LINSEED OIL—	Raw.	Boiled.
1 to 2 bbls, per gal	0 84	0 87
3 to 5 bbls., per gal	0 83	0 86
6 to 9 bbls, per gal.	0 81	0 84

Less barrels, add 15 cents gal.

WINDOW GLASS STOCKS DESCRIBED AS LOW

London, Ont.

The current demand for window glass is of fair proportions considering the time of year. Stock are described as very low, while prices are firm. There has been no change recorded in quotations from the following:

Single Diamond, net list
Double Diamond, net list.
Cut Lights, 75 per cent. off light list.

STILL REPORT MODERATE DEMAND FOR PUTTY

London, Ont.

There is a good seasonable sale at present for putty, and dealers state the demand has been fair for this time of the year. There has been no change in the price from the following levels.

PUTTY—	Per 100 lbs.
Standard, 100 lb. drums	6 30
Do., 25 lb. drums	6 55
Pure, 100 lb. drums	7 80
Do., 25 lb. drums	8 05

IMPROVED SALES RECORDED FOR CARPET SWEEPERS

London, Ont.

Carpet sweepers are among those items registering improved sales recently. This activity has also been noted in vacuum cleaners, these products being in seasonable demand. Prices remain unchanged at the following list:

CARPET SWEEPERS—	
Bissell's Line—	
Universal Jappaned, per dozen	48 00
Universal N. P., per doz.	53 00
Grand Rapids, Japanned, per doz.	55 00
Grand Rapids, N. P., per doz.	55 00
Princess, per doz.	57 00
American Queen, per doz.	60 00
Parlor Queen, per doz.	62 00
VACUUM CLEANERS—	
Bissell Makes—	
Household, per doz.	94 00
Grand Rapids, per doz.	106 00
Superba, per doz.	120 00

Winnipeg Markets

WINNIPEG, January 26.—Price revisions to lower levels are numerous this week, including new quotations on Dominion and American ammunition,—also rifles of various makes. Lower prices are also announced on linseed oil, cotton waste, Trimo wrenches, and glaziers' points. Although most of the changes are declines, another sharp advance has been recorded on turpentine.

Quietness still prevails in the sheet markets, with very little business being done in bar iron and steel.

NEW PRICES ANNOUNCED ON GLAZIERS' POINTS

Winnipeg.

A downward revision has been announced on g'aziers' points. The new quotation for zinc coated glaziers' points now is $1.00 per dozen packages.

TRIMO WRENCHES NOW REDUCED IN PRICE

Winnipeg.

The new discount recorded on trimo wrenches this week is 45 per cent. off the list. This makes the current quotations a trifle more than 10 per cent. lower than the former prices.

REDUCED QUOTATIONS ON REMINGTON RIFLES

Winnipeg

New prices are now recorded on the Remington line of rifles. The extent of the reduction varies slightly on the different mode's. Following are some of the revised prices:

REMINGTON RIFLES—12A, $23.25 each; 14A, $52.25; 6, $8.35; 4, $12.30; 4S, $18.60; 12B, $27; 14R, $51.25; 14½A, $52.25.

EASIER PRICES RECORDED ON LINSEED OIL

Winnipeg.

The recent easier trend in linseed oil markets has resulted in another reduction in domestic prices. The extent of the current decline is 3 cents per gallon, and is now quoted at 85 cents per gallon for Raw and 88 cents for Boiled in barrel lots.

QUIET CONDITION NOTED SHEET MARKETS

Winnipeg

Business on the current sheet markets is still very quiet and prices are becoming more sett'ed. There does not seem to be any benefit derived from reducing prices as there is very little business to get. It is ra her early to determine future prospects, but there is a hopeful at itude among dealers generally. Following are the unchanged prices:

STEEL SHEETS, BLACK—	
10 gauge	5 70
12 gauge	5 70

LOWER PRICE LEVELS ON WINCHESTER FIREARMS

Winnipeg

Lower prices have been announced this week on Winchester rifles, and following are the revised quotations on a few popular models:

WINCHESTER FIREARMS—Model 1902, $8.10 each; 1904, $9.90; 1906, $23.40; 1903, $44; 1905, $51.04; 1907, $61.60; 1910, $61.60; 1890, $26.40; 1892, round barrel, $33.96; 1892 octagon barrel, $36.08; 1894, round barrel, 25-30 and 30-30, $40.01 each; 32-40 and 38-55, $38.02 each; 1894 octagon barrel, 25-35 and 30-30, $43.30 each; 32-40 and 38-55, $41.18 each.

REVISED DISCOUNTS NOW EFFECTIVE ON AMMUNITION

Winnipeg

As pointed out in last week's issue of Hardware and Metal, revised lower quotations are now to hand on ammunition. The changes in discounts are evident on both Dominion and American cartridges, and following are the revised levels now being quoted locally:

AMMUNITION—
Dominion metallic, 42 and 20 per cent. off.
Dominion shot cartridges, 42 and 20 per cent. off.
Dominion blank 42 and 20 per cent. off.
Dominion shells, Crown, 40 and 20 per cent. off; Sovereign, 37, 2½ and 20 per cent. off; Imperial or Canuck, 42 and 20 per cent. off.
American metallic, 47½ per cent. off.
Dominion list.

FURTHER ADVANCE IN TURPENTINE QUOTATIONS

Winnipeg

Due chiefly to the firm undertone on the southern primary distributing centres, prices on turpentine have been advanced another 10 cents per gallon. This revision brings the local quotation to $1.55 per gallon in one barrel lots.

REDUCTIONS ANNOUNCED IN COTTON WASTE PRICES

Winnipeg.

As outlined in a previous market report contained in a recent issue of Hardware and Metal, the easier price levels on cotton wastes have now materialized. Following are the revised quotations on both white and colored.

WASTE—Cream, polishing, 22c.
WHITE—XXX extra, 18½c; XX Grand, 17½c; XLCR, 16½c; X Empire, 15c; X Press, 14½c.
COLORED—Fancy, 15½c; Lion, 14c; Standard, 12½c; Popular J, 11c; Keen, 9½c.

Pittsburg Markets

PITTSBURGH, January 26.—Demand for steel is increasing in the new year but at a slower rate than was expected in most quarters. The result is a highly competitive market. In the trade generally, remark is being made as to the keenness of competition. The attitude of the mills is plain. Each feels that there is so little business going that it must get every order it possibly can. There seems to be a fear on the part of the individual sellers that if they once get out of the market they will never get in again. There is no thought of any mill, except very small ones, closing and waiting a few months for conditions to get better. This situation is of course due to the very large steel producing capacity existing. If one-third of the mills should withdraw entirely, the remaining two-thirds could make more steel than was required before the war when the country was very busy and consumers of steel felt they had all the business they wanted. The point must not be over.ooked that a volume of business that would satisfy consumers to a certain extent would not satisfy producers to the same extent.

Concessions More Frequent

A very decided change has come over the situation as to finished steel prices in the past ten days, one that is a matter of common remark, but the change is not that the market is quotable on a lower basis. As a matter of fact bars, shapes, plates, hoops, wire, nails, sheets, pipe and tin plate are every one quotable, in the open market, at the same figures as for a month past. Yet on the whole the market is lower. The change is that concessions from regular prices that were formerly being made on large lots have now exteneded to moderate sized lots. In some commodities the concessions are so frequent that the regular prices apply only on orders up to say 100 tons. A 250-ton order would draw a concession from the regular price when two or three weeks ago it would require an order for say 1500 tons to cause the same result.

The regular market remains quotable as follows: Bars, shapes and plates, 1.50c; hoops, 2.00c; standard steel pipe, 71 per cent basing discount; plain wire, 2.25c; galvanized wire, 2.75c; wire nails, $2.50; blue annealed sheets, 2.25c; black sheets, 3.00c; galvanized sheets, 4.00c; tin plate, $4.75. Of all these, black and galvanized sheets are easily the firmest. So far as is known, no buyer has been ab.e to budge any mill from the quotations shown, and in blue annealed sheets the market is probably firm also. Blue annealed sheets are misrepresented in some quarters by references being made to sales by plate mills. Such sales are made on the plate mill basis, and the price is necessarily lower than the blue annealed basis, but the material is not blue annealed sheets. The thickness may be the same but the finish is different and the material is practically certain to be less true to gauge. In the heavier gauges some buyers are satisfied with the plate material, when they can save money by buying it.

Salesmanship Doubles Trade in Paints

Comparison of Sales Arguments of Two Merchants as Applied to Paint Wherein One Merchant Talks Price and Loses the Sale While the Other Stresses Quality and Handles the Customer in a Tactful Manner

HERE WE have two pictures. The one dealer just "handles" paint. He generally complains about the weather or the price or the competition or something. He is usually the one who does the smallest paint business in town because he lets the other fellow put it over him. He waits for the business to come in and when it comes, which it occasionally cannot help doing, he loses the cream of it.

Here is a typical example of this dealer's "salesmanship":

Customer—Handle paint?

Dealer—Yes, a little, but not much demand. The people seem to be waiting for lower prices.

Customer—What's paint worth a gallon?

Dealer—$5.00.

Customer—What kind is it?

Dealer—Smith's ready mixed. I have a little of Blank's at $4.50 a gallon.

Customer—Do you think if I wait longer it will come down?

Dealer—Don't know; never can tell.

Customer—Is lead and oil better?

Dealer—Don't know. Some people say one and some say another. I'm pretty old-fashioned myself and stick to the lead and oil.

Customer—Well, I suppose my house can go another year without painting. Guess I will wait. The price sounds pretty high. It's going to be a tough winter. Lots of people out of work around here. Better hold off, I guess, to see how things look in the spring. Maybe I'll change my mind. If I do I'll let you know.

A Good Prospect Lost

Needless to say, the sale was lost. The prospect had the money and the intent to buy. What's more, his property was crying for paint, good paint. It could not stand up through another winter without a protective coating.

But this dealer never suggested that deterioration would set in; he never once confirmed the prospect's own idea that paint would save the house; he gave no talking points on the paint because he didn't know what was in it or what the comparison was; he never mentioned the advantage of painting at this season; he not only missed the sale of Smith's and Blank's, but he even lost the lead and oil sale.

The result was a lost customer, a lost profit, a lost opportunity and a prospect who went away uncertain as to whether paint of any kind was any good or not, or was necessary to his home. He made it hard for some live paint dealer to convince this man.

But the biggest loss was opportunity.

A Contrast

Contrast to this lost sale what occurs in the store of the live hardware merchant:

Customer—Handle paint?

Merchant—Yes, sir; we handle the best line there is, Smith's. Notice the Jones' house on your way down? That's Smith's; so's the church, the school, Rev. Simpson's house, and most of the best looking farm houses hereabouts.

Customer—How much a gallon?

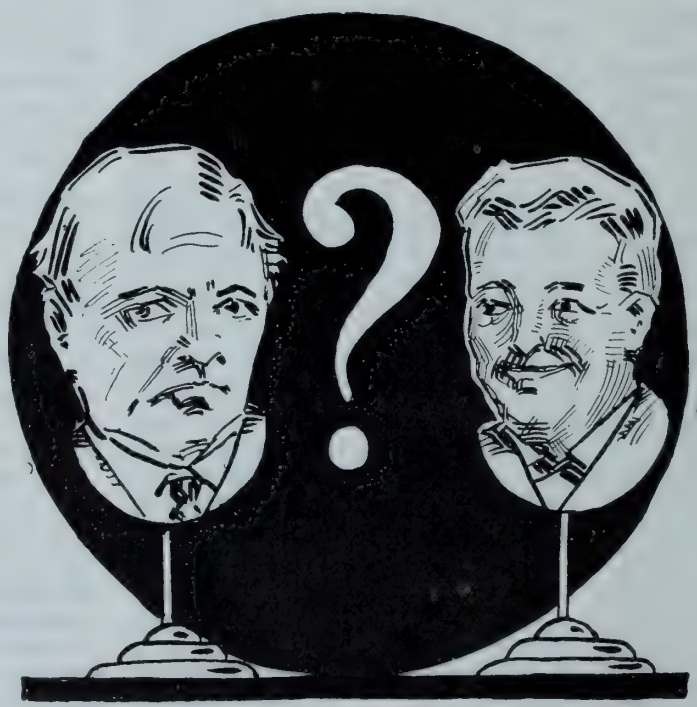
Merchant—What have you in mind painting—the house?

Customer—Thought I might if it wasn't too blame expensive. How much a gallon?

Merchant—Let's see, your house is about 30 by 30, isn't it? And about 20 feet high (customer verifies dimensions). And it needs two coats. Let's go over and we'll figure it out. (They go down the street and examine the surface, and check over the house, talking paint on the porch.) This house will require about 6 gallons of Smith's. Last year the paint would have cost you $42. I can supply you now for $30, as the price has taken three drops since then.

Customer—That isn't so bad, but someone said Blank's

(Cont'd. on page 60.)



Real salesmanship applied to paint puts a totally different aspect on the situation.

SERVICE

CONFIDENCE

FAIR DEALING

Perhaps You Wondered Too—

"The best business seal is an Honest Ideal."

THE FOLLOWING conversation took place recently between a Hardware Merchant and a mutual business friend:—

"Have you seen Lowe Brothers' Advertisements in the 'Hardware & Metal'?" "Yes! They are good aren't they?" "They sure are. I think they sound a new note in business methods, and they certainly appeal to me." "In what particular way?" "Oh! I don't know. They seem so characteristically sound. I suppose it is just a matter of opinion. They might not appeal to a hundred others just as they have to me."

In acknowledging this merchant's compliment and confidence, we wish first of all to thank him heartily and secondly, as a result of his expression, to make a declaration, to wit:

These advertisements are *not* intended to appeal to every Hardware Merchant in the Dominion for the obvious reason that our Proposition is *EXCLUSIVE*. This means that *only one* merchant in a town is allowed to sell our products. We believe in the law of attraction —that is to say, we believe "Like attracts like," and trusting this we seek, to represent us, that merchant who by virtue of his integrity is attracted to our high principles and staunch policies. Considering that every Hardware Merchant *cannot* represent us, we must necessarily strive for the best —not gauged by size—but worth.

The gentleman who made these remarks is not a "High Standard" Agent, but we expect him to be, shortly. "Like does attract like."

Decline in Rosin Imports Last Year

Cause of Big Decline in Rosin Imports in 1921 Compared With 1920 is Investigated—Varnish Manufacturers Not Buying for Future Needs and Had Fair Stocks on Hand—Demand From Soap Manufacturers Also Declined as Greases Became Cheaper

A REVIEW of Canada's trade returns for the year 1921 indicates a distinct falling off in total Canadian imports of rosin, particularly from the U.S., while turpentine and other naval stores were well maintained. An investigation of this matter was conducted by Hardware and Metal and some interesting information secured. In 1920, during the seven-month period, April-October, the shipments of rosin from the United States to Canada amounted to 42,937 barrels. For 1911, however, covering the same period, the figures are 24,410 barrels, or a drop of 43.2 per cent.

This falling off in demand for rosin is attributed to several causes. One of the principal factors is found in the varnish situation, which during 1921 assumed variable features not recorded in previous seasons. Supplies of this commodity for the current season's requirements were made mostly from stocks on hand, manufacturers of varnishes evidently waiting for prices to recede still further prior to extensive buying of raw materials. Rosin quotations at the commencement of 1921 were comparatively high, and a slackening in demand became apparent during the early months of last year, owing to the general impression that deflation was the "order of the day."

The comparison between this situation and that which prevailed the previous year, supplies one of the reasons for the falling off in rosin imports. In 1920, production of varnish was on a proportionate scale, having been stimulated through increased sales. The fact that stocks of this product are usually kept for several seasons, is another contributory feature, and explains why manufacturers were able to supply from stock during 1921, and at the same time only purchase rosin for a moderate degree of production.

Immediate Requirements

It must also be remembered that purchasing during 1921 covered immediate requirements only, and very little buying was done for the future, and practically none at all for speculative purposes.

The soap manufacturers as a whole did not use nearly as much rosin during 1921 as in other seasons, particularly 1920. In the latter year greases were high in price, and rosins were used by soap makers in fairly large quantities. Rosin quotations were also high, but greases registered a decline in price during the latter part of 1920, while the corresponding reduction in rosin values did not occur to the same extent until well into 1921. This factor caused soap manufacturers to use more greases and less rosin during 1921 in the preparation of their product.

THE REASONS IN BRIEF

In 1920 high prices of oils used in varnish increased the use of rosin as substitutes in cheaper grades. Last year prices on genuine products were such as to make this unnecessary.

Some rosin was imported from France, but was used by soap manufacturers, varnish manufacturers claiming it was not of the right quality for them.

General depression in trade in 1921.

Due to declining prices on rosin in 1921 manufacturers drew on stocks on hand and did not buy for future use.

Soap manufacturers did not use as much rosin in 1921, as greases were rapidly declining from previous high costs.

Turpentine Shows Increase

The imports of turpentine during 1921 show an increase in volume over the amount for the previous year. This is attributed to the fact that prices dropped towards the latter end of 1920, and with the market more or less liquidated, buying was not restricted to the extent as was rosin. The paint manufacturers required more turpentine during 1921, as paint products generally; from the viewpoint of quantity, enjoyed a prosperous season. There were no large stocks of turpentine purchased during 1920, while a similar statement may be made covering rosins for 1921.

These contributory elements, therefore, supply the reasons for the variation in the figures submitted. The corresponding figures covering imports of turpentine from the United States during the seven-month period, April-October inclusive, are as follows: 1920, 10,989 barrels; 1921, 12,776 barrels.

General Depression

Wilson, Patterson & Gifford, Montreal importers of naval stores, state that their sales of rosin showed a decrease in 1921 from those of 1920, both to varnish manufacturers and soap makers, but they attribute the decrease mostly to the general depression in trade during the year. However, during the past twelve months they imported about 4,000 barrels of rosin from France, used almost entirely by the soap manufacturers, varnish makers claiming the quality not being there. To their knowledge they are the only people who imported this French product.

For their sales to the paint and varnish industry it might be stated that two large Montreal makers have recently been importing their own supplies but of course this would have no bearing on the total import figures.

The main reason for less consumption insofar as varnish is concerned, seems to be that in 1920 the high prices of oil, including linseed and Chinawood oil, which are used quite extensively in varnish, made them almost prohibitive, especially in the cheaper grades. Rosin then was used to replace these as much as possible. It was also used quite extensively in the making of a linseed oil substitute which varnish manufacturers took advantage of. Prices on the genuine products are now down to a level where it is not necessary to use these substitutes.

SALESMANSHIP DOUBLES TRADE IN PAINTS

(Continued from page 58)

paint was the cheapest. Let's see, Smith's figures how much a gallon?

Merchant—$5.00—last year $7.00.

Customer—Isn't Blank's paint $4.50.

Merchant—I believe it is, but I don't handle it. If I thought it compared with Smith's I would handle Blank's and not Smith's. But it isn't worth $4.-50. If they charge that, it's too much because Smith's is 1 1-4 pounds per gallon heavier to start with and will take a big reduction in oil. You would need 10 gallons of Blank's paint to cover your house. Smith's is worth every cent it brings.

Customer—How about lead and oil?

Merchant—I handle Smith's white lead too and could sell it to you. You might get by for less money and it's the best lead made. But you are going to do your own work. Smith's comes ready to use. It is heavy and can be thinned down so that 6 gallons would do your job where it would take 9 or 10 gallons of the Lead and Oil paint. And Smith's has more gloss, can be washed down, will wear better, make a better re-painting surface, will not chalk off and has oxide of iron which makes it harder and whiter. I'll stand back of the job, never had one go bad yet.

Customer—Alright, send it over to-day.

Weekly Paint Markets

Montreal

MONTREAL, Jan. 26.—Linseed oil furnishes the feature of the paint markets this week, showing a price advance of 2 cents per gallon The market is somewhat firmer, seed recording slightly higher figures, while a slight improvement is shown in oil demands. Whether this is only another temporary turn in the oil market, as fluctuations have been prevalent for some time past, is hard to determine but with the demand in all probability becoming more active from now on, dealers are of the opinion that a firmer tone will continue to be displayed. Turpentine is unchanged in quotations since the rapid advance recorded last week. Locally the market remains firm, although conditions in the South are not as strong as last week, a recession in prices being reported. This is not of sufficient extent to cause any downward trend locally up to the present, and according to local distributors, little change in this direction is looked for. It is pointed out that with supplies light, and the active season gradually approaching, there is no factor to weaken the situation other than perhaps a slight temporary easier tendency.

Paint manufacturing circles report renewed activity now that salesmen are again on the road and every indication points to a successful year in paint sales. Preparations are being extended to make this a record year in the industry.

LINSEED OIL PRICES ADVANCED TWO CENTS

Montreal.

Quotations on linseed oil are advanced two cents this week, bringing present prices up to 83 and 85 cents for raw and boiled oil respectively in one barrel lots. The undertone of the market has firmed somewhat, seed quotations registering a slight advance in the past week. There is now a realization that seed supply will be none too ample for the active months which are soon to follow. It is reported that American crushers were recently discussing the possibility of obtaining supplies from Canada, and although these interests are hesitant about entering the Canadian market because of the possibility of heavy tax being imposed, if such did occur it would be a deciding factor in the future of domestic prices, and would cause some little concern over our home supplies. However, the slight increase in demand, and every indication of a continued improvement in this direction, is responsible for the present advance on the local market according to local dealers. With the month of February now well at hand, consumption should continue to increase, and this will in all probability further strengthen the oil market here. Following are increased quotations:

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrel lots, per gal. ...	0 83	0 85
3 to 5 barrel lots, per gal. ...	0 81	0 83

Less barrels, add 10 cents per gallon.

ACTIVITY IN PAINT AND VARNISHES RE-COMMENCES

Montreal

With the sales forces of the various paint houses again on the road, orders are commencing to come to hand in satisfactory numbers. Many of the larger orders that were withheld until after inventory, have already been received, and indications continue to point to a very successful year in paint industry. There is no change in the attitude of manufacturers regarding revised prices, the opinon being unanimous that products in general will remain steady throughout the active spring season.

GRADUAL IMPROVEMENT IN BRUSH SALES

Montreal.

Activity in brushes is gradually becoming more pronounced from week to week, although distributors state that care is apparently being exercised in purchases of outside dealers. Booking orders up to the present have only been of fair proportion, and in many cases merchants are awaiting actual demand for placing their order for the season's requirements. With the spring months fast approaching, however, there is a steady improvement looked for. Prices are remaining at revision of a few months ago with little further change thought likely by local manufacturers and distributors.

HIGH LEVEL ON TURPENTINE IS MAINTAINED

Montreal.

Local quotations on turpentine are held at the advance of last week, and although the situation is not as firm as one week ago, there is little at present to indicate a fall in prices locally. As is usual in a rapid gain, such as recently took place in turpentine, the health of the rise is questionable, and very often a reaction to some extent follows. This was the case this week in Southern circles, but the fall was not sufficient to alter the situation locally as far as prices was concerned. Reports from the South now indicate that a fairly steady market will likely prevail, and present levels be maintained. Further slight recessions may be made, but in view of the approach of the more active season, demand is expected to prove a deciding factor in holding the higher quotations. A price of 2 cents in advance to those given below is quoted in some quarters, but following are the most general:

TURPENTINE—	Imp. gal.
1 barrel lots	$1 23
2 to 4 barrel lots	1 21
Broken lots	1 33

Toronto

TORONTO, January 26.—Higher price levels on both linseed oil and turpentine feature the paint market reports this week. The higher levels on turpentine are again based on developments at the southern producing centres, where a strong speculative attitude is being maintained. Recent advices indicate that prices reached a new high level during the last few days after registering a slight recession last week. The fresh supplies from the woods are stated to be very limited, and the holders of turpentine are placing small quantities on the market, as demand seems to require. Current buying is limited to immediate requirements, and while the present conditions are evident, purchases will undoubtedly be of a limited nature.

The market situation principally depends upon the amount of turpentine offered by producers from their holdings. When a liberal supply made its appearance, the prices sagged immediately, and the concerted action on the part of manipulators is apparent in the restriction of offerings which resulted in prices again soaring. The foreign demand for turpentine is very dull at present. The domestic enquiries are spasmodic and scattered, consumers questioning the health of the prevailing upward trend, and limiting their orders accordingly.

In the case of linseed oil, the advance is attributed to a combination of factors. The market is reported to be considerably firmer, while seed prices are slightly higher, and there has also been recorded an improvement in demand.

Activity in the brush market is becoming more pronounced from week to week. Paint prices continue firm, with manufacturers predicting a steady level for Spring business. Bookings are

(Continued on page 64)

Muresco

And the 5¾" Brush

"Save the surface and you save all" *Paint & Varnish*

A Desirable Addition to Business

It works both ways; Muresco and the special No. 6 brush are desirable additions to business because they result in adding a desirable volume of business to that you already have.

The sales of Muresco are steadily increasing—a sure indication that you will find a ready sale for this popular, well-liked wall finish. Consumers know that nothing excels it for the artistic, soft, velvety effects obtainable through its use.

This is a No. 6 brush of absolutely pure Chinese Bristles. There is absolutely no horse hair used, or other hair of any kind. As can be seen, it is a broad, full, generous brush; suitable, in every way, to get the best results from Muresco with consequent satisfaction to all concerned.

The Moore Line consists of :

Muresco: The best wall finish.
House Colors: A pure linseed oil paint.
Floor Paint: "Can't be beat for under feet."
Tile-Like: Varnish and stain combined.
Mooramel: Perfect flowing enamel.
Sani-Flat: A non-poisonous flat oil paint.

TORONTO PAINT MARKETS

(Continued from page 62)

described as coming along in nice volume, and distributors generally express satisfaction with the outlook for the 1922 season.

PRICES ADVANCE ON LINSEED OIL MARKETS

Toronto.

The advance in the linseed oil markets attracts particular attention this week. This change is attributed to a combination of factors. The primary markets are described as considerably firmer, while there has been a slight increase in the flax seed prices. An improvement in the current demand served to stimulate interest in this product. With the ensuing weeks, consumption of oil is generally expected to increase, and the condition of the markets to record improvement. The demand for cake and meal is described as a little better, but prices on these by-products are still easy. Following are the new price levels now generally in effect:

LINSEED OIL—	Per Gallon.	
1 to 2 barrel lots	0 87	0 90
3 to 4 barrel lots	0 86	0 89
6 to 9 barrel lots	0 84	0 87

Less barrels, add 15 cents per gallon.

WINDOW GLASS PRICES ARE FIRMER

Toronto

Quotations on window glass remain steady at net list, but owing to a recent improvement in the Belgian situation, and higher transportation costs, prices are now said to be considerably firmer. The Belgian mark has gained on the exchange market in recent weeks, this chiefly reflecting on window glass from that source. In addition, since the close of navigation, rail transportation is added from outside ports to the local market. It was pointed out by one large importer a few weeks ago that this alone might be the cause of slightly higher prices.

ANOTHER ADVANCE IN TURPENTINE QUOTATIONS

Toronto.

Further advances in the price of turpentine are recorded in many quarters, this change reflecting the higher levels attained on southern producing centres. The speculative condition at Savannah and similar distributing points, has been maintained through the careful attitude adopted by producers when placing offerings on the markets. Although buying is restricted to immediate needs, yet purchases are in excess of fresh supplies, and this condition is expected to continue for the next few weeks. While the extent of the advance is more in some quarters, than in others, yet certain distributors are still maintaining the levels of $1.30 per gallon in barrel lots, while others again are a cent or so under that price. It is noticeable however, that many have advanced quotations another five cents, which brings prices up to the high level of $1.35 per gallon. The following levels, therefore, reflect the average quotations at the time of going to press, although the condition of the primary markets may cause further revisions in the domestic prices at any time:

TURPENTINE—	Imp. gal.
1 barrel lots	$1 30
2 to 4 barrel lots	1 29
5 gallon lots	1 45

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $15 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph Windsor, or Montreal but freight may be equalized from any of these points.

Car load lots of 70 bbls. Price on application.

Less than 1 barrel lots—15 cents per gallon

MORE ACTIVITY NOW EXPECTED IN PAINT AND VARNISH

Toronto.

A resumption of activities is expected in paint and varnish manufacturing circles at an early date. With the holiday season now over, salesmen will again take up their duties on the road, and prospects point to a brisk season in these products this year. Manufacturers still look for no change in present price levels in any line. They state that basic costs do not warrant a revision, and although a discussion on this year's prices may take place in the near future, there is no one who can see any chance of lower prices.

PITTSBURGH MARKETS

(Continued from page 57)

Wire products probably come next to sheets in point of firmness. There are some price irregularities, but perhaps these are simply departures from Pittsburgh basing, not representing weakness as to deliveries in most sections of the country. In tin plate, concessions are given on large orders, just as was the regular thing before the war. In pipe, the irregularity is chiefly that the independents are going a trifle under the prices of the National Tube Company, as they usually do.

Rate of Production

Mills had so little forward business on books that the decrease in consumption that comes with winter, and the lull that occurs in buying just before the annual inventory date, promptly made an impression on the rate of production. In most years the mills have enough momentum to carry them over the turn of the year. While a close estimate cannot be made, it seems to be a fair guess that at this writing steel ingots are being produced at the rate of 18,000,000 tons a year, against average rates of 20,000,000 tons in December and 23,000,000 tons in October and November.

VALUE OF CANADA'S MINERAL PRODUCTION IN 1921

It is officially estimated that value of Canada's mineral production last year was $169,552,000. This compares with $227,859,000 in 1920 Figures for last year were made up as follows: Metallics $50,167,531; non-metallics, $89,884,877; structural materials and clay products $30,000,000.

PROFITS BY UNSEASONABLE WEATHER

(Continued from page 39)

wooden fixture has been placed in the center. It has four shelves, each about three feet in diameter, and on these are shown a wide veriety of nickel-plated goods and tinware. Prominent among the articles shown are a number of shining kettles in various sizes. Hooks have been inserted in the sides of the shelves and from these are hung a great many small articles. The floor of the window is used to display various lines of tinware and enamelware.

A plate glass shelf hung from the ceiling by picture wire in the center of the window of J. G. Steels brings a neat display of straight and safety razors, strops and blades, right under the eyes of every man who is passing. On the floor of the window is shown a variety of articles including electric heaters, vacuum bottles, pieces of aluminumware and some cutlery.

Discussing the business outlook hardware merchants stated to Hardware and Metal that business has been steady, and turnover maintained, although weather conditions have made sales of skates and other seasonable lines slow.

HOW WELSH MILLS GET CANADIAN PLATE BUSINESS

(Continued from page 36)

steel, it is impracticable to apply the heat treatment which rustless steel requires.

As an outcome of these experiments it is now claimed that a stainless iron which is tougher than ordinary iron and stronger than brass has been produced. It is stated that this iron can be forged, stamped, pressed, embossed, chased or engraved, and burnished equal to electroplate, and, as indicated above, that it possesses the primary advantage in that no heat treatment is essential to bring out its stainless properties. The iron can also be soldered, brazed, and electrically welded, and can be supplied in bars of various sections, strips, sheets, tubes and wire.

The following is a list of a few of the articles for which it is expected the new stainless iron will be used, but the ultimate application of the material would appear to be without limit:

Art metal work, bathroom fittings, bedsteads, bicycle parts, cooking utensils, curtain rods, cylinders, dairy utensils, dish covers, door furniture, drop forgings, electric fittings and shades, electric irons, electric ovens and grillers. Hotel and restaurant ranges, kitchen utensils, lamp reflectors, lamps and shades, motor car bonnets, motor car furnishing, portable ranges, pump parts, radiators, bolts and nuts, builders' hardware, cigarette cases, cisterns, coal boxes, range tops and fronts, rods, screws, sheets, shop fittings, spoons, stair rods and eyes, tram fittings, trays, tubes, valve discs, water bottles, wire, engine fittings, fire extinguishers, fire irons, forgings, forks, gas ovens, golf-club heads, gongs, harness fittings.

C. J. Elderfield is known as one of the foremost hardware men in Western New York.

"We believe the tints will nearly double our Vitralite business this year, as they greatly widen the field for enamel sales,"

says C. J. Elderfield, President Elderfield-Hartshorn Hardware Co., Niagara Falls, N. Y. "We find our customers are educated to Vitralite Quality," writes Mr. Elderfield. "They come in and ask for Vitralite because it is a material they can rely upon."

And thousands of other dealers would tell the same story concerning this largest-selling enamel! Write *now* for details of the special introductory proposition on Vitralite, *the Long-Life Enamel*, in White and tints, and capitalize on the advertising in national magazines which is creating sales for Pratt & Lambert dealers everywhere.

Dairy Supplies

Railroad Milk Cans, Cream Cans, Dairy Pails, Milk Strainers, Etc., Etc.

We make a very complete line of Sanitary Dairy Supplies. The Railroad Milk Cans in particular, on account of their superiority, find a ready sale all over the Dominion. Each of these lines comes in several styles and weights, all of good dependable workmanship and long wearing quality.

Our "Sterling" Dairy Pail of finest tin is a big seller—reinforced body and soldered—of exceptional strength and durability.

Prices on application—prompt shipment on receipt of order.

It Pays To Sell — *Walker's Quality Products*

Your Sales Will Leap Ahead When It's Known You Stock

OWL BRAND ROOFING

FREE SAMPLES

Two sizes of samples furnished Owl Brand Roofing dealers — 3½ x 5¼ in. for consumer use, and dealer sample 8 x 4 in. showing the five weights in "Owl" Roofing.

The Best Advertised—Quickest Selling —Most Dependable—Most Economical Guaranteed Roofing Made

Owl Brand Roofing is made right—that much we guarantee—it's priced right also. Your customers will buy Owl Brand Roofing with much confidence and but little effort on your part. You can emphasize its fire resisting qualities—how that rain water is untainted by contact—that it is made 32 inches wide in place of 36, so that the laps are closer and the tendency of buckling is practically eliminated. Owl Brand Roofing **will surely bring you**

More Sales — More Profits

Like all other Walker quality products—Owl Brand Roofing is not a "sticker"—it **does** sell—and it **does** bring customers back for more. If you could see the modern new factory where Owl Brand Roofing is made, under the supervision of men who have had long experience in the manufacture of asphalt roofings of quality, you would better understand our **implicit confidence** in this product.

"Owl" Brand Roofing made in 1,2,3,4,5-Ply

Owl Roofing carries a guarantee with every roll —108 sq. ft., 32 inches wide, nails, cement for seams, and instructions for laying are included. The label on each roll is lithographed in bright colors, which makes an attractive display for store or window showing.

DEALERS' HELPS

We believe in **publicity** — advertising material — electros —signs and selling helps—is generously supplied with Walker Aero Quality Products to develop and encourage sales.

W. Walker & Son, Limited

10-16 ALCORN AVE. WHOLESALE HARDWARE AND IRON MERCHANTS **TORONTO**

We ship same day as order is received. Just you try Walker service. Write for list of "Aero" quality products.

Illustration to the left shows the **Walker** fleet of "White" Trucks which cover the city of Toronto twice daily.

PILKINGTON
BROTHERS ~ LIMITED

We manufacture GLASS for all purposes, including:—

Polished Plate—For store fronts, high-class buildings and homes, automobile windshields, wind deflectors and visors, show cases, shelves, bureau and table tops, etc.

Polished Wired—A transparent fire retardent, for elevator doors, light wells, and all places where fire-resisting qualities with a high percentage of light and transparency are required.

Mirrors—Plain and bevelled—for furniture, store fixtures, etc.

Window Glass—Manufactured at our factory, Thorold, Ont., for all general purposes where a good clear glass is required at low price.

Wired Rolled and Cast—¼ inch thick. A highly efficient fire-resisting glass for factory windows, skylights, etc.

Rolled and Cast—⅛ inch to ⅜ inch. A substitute for Wired Rolled and Cast, but without the fire-resisting qualities of the latter.

Prismatic—For transmitting light into dark interiors. Particularly suitable for store front transoms, the rays of natural light being diverted to the inner parts of store.

Cathedral—White and tinted, for leaded lights, church windows, etc. Clear white Cathedral is also an artistic semi-opaque glass for doors, screens, etc.

Figured—White and tinted and of various patterns for screens, partitions and doors in office and other buildings, bathroom windows, vestibule doors, etc., or wherever an opaque glass with good lighting qualities is desired.

Muffled, Fluted, Enameled—Used for the same purposes as Figured Rolled Glass, but in cases where a prominent raised pattern is not desired.

Washboard Glass—For making washboards. Highly regarded for cleanliness, and, of course, rust proof.

Patent Corrugated—For working in with standard corrugated iron in walls and roofs of buildings.

Glass Battery Cells—For storage batteries. Glass is immutable and therefore does not deteriorate, so that with ordinary usage a glass cell will last forever. Also with glass cells the elements can be seen without removing the lid, thus saving a lot of labor and eliminating an important cause of breakage. These cells are now being used by many railroad companies in Europe for train lighting systems.

Strong, Thick, Durable Fibre Chair Seats
THE "STANDARD"

These handsome, leather-like, fibre seats will not split, splinter, crack or warp. They are very attractive in appearance and cost no more than the old-style wooden seat. They offer the merchant a marked advantage in selling. Fully guaranteed. Write your jobber to-day for facts and prices.

United Chair Seat & Novelty Co., 1470 Gates Ave., Brooklyn, N. Y.

Just a few words about Hardware and Metal

HARDWARE AND METAL is Canada's national hardware weekly and has been published every Saturday since 1888 by the MacLean Publishing Co., Toronto, who publish fifteen papers.

HARDWARE AND METAL'S circulation is national, and has been audited by the Audit Bureau of Circulations.

HARDWARE AND METAL is edited by a staff of editors who have had practical hardware experience.

HARDWARE AND METAL'S weekly market service is one of its strongest features. Our reports are used as a basis for Canadian Government's annual report on wholesale prices.

Write to any 100 retail hardware dealers in Canada, asking them "Do you subscribe to HARDWARE AND METAL?"

If you will do this, you will use HARDWARE AND METAL too, for it is better than any other medium in Canada, gets your proposals home to the men of value to you as sellers of your goods.

***HARDWARE AND METAL*---Montreal, Toronto, Winnipeg**

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

ASHDOWN'S

Sporting Goods

Summer Catalog

THE 1922 edition of our Summer Catalog is ready for your use. In it you will find the most complete line of summer sporting goods in Canada. There is no Canadian sport for which we cannot supply equipment, and we can furnish the hardwareman with many interesting, quick-selling lines of reliable sporting goods. Canadian hardwaremen all over Canada have increased business by Ashdown Sporting Goods. The price list accompanying this catalog is approximately correct at the date of issue, but owing to the constant fluctuation of market prices it is subject to change without notice. Only such changes in prices and lists will be made during the season as are absolutely necessary, and we assure you that we will give you the advantage of a decline as quickly as a change in advance. We expect to issue corrected lists monthly during the season.

Everything for

Developing Canada's Foreign Markets

Thoroughness is essential—Goods kept up to best quality—Supplies exactly what are promised even to seeming trifles as labels, etc.

By **F. C. T. O'HARA**

Deputy Minister of Trade and Commerce

THE foreign trade of Canada must expand rapidly, and it is the policy of the Government to lend all practicable help to its development. To this end the Commercial Service was established. The department takes pride in its belief that, all things considered, no finer commercial intelligence service exists today throughout the world. This service does not cover so many fields, nor has it so many representatives as others, but man for man few countries, if any, can show a higher and more efficient personnel. It is an essential part of the general scheme of the service that these representatives, Canadian Government Trade Commissioners as they are designated, should be located in foreign countries.

Direct representation is, therefore, now maintained in the following countries: the Argentine Republic, Australia, Belgium, Brazil, British West Indies, Italy, Japan, New Zealand, South Africa, the United Kingdom at London, Manchester, Liverpool, Bristol and Glasgow, and the United States at New York. In addition L. D. Wilgress, who was at first in Russia, is now on special duty in the course of which he has made a thorough review of the new countries of South Eastern Europe. There are four Commercial Agents at Sydney, N.S.W. Australia; Christiania, Norway; Port of Spain, Trinidad and Nassau, Bahamas.

Subsidiary to these is the assistance which under an arrangement made by the Minister of Trade and Commerce with Sir Edward Grey, in July, 1912, may be rendered by the more important British Consulates whose offices have been instructed by the Foreign Office to answer inquiries from and give information to Canadians who wish to consult them in reference to trade matters. These Consulates are located in the following countries: Chile Columbia, Ecuador, Egypt, India, Mexico, Panama, Peru, Portugal, Spain, Sweden Switzerland, Uruguay and Venezuela.

The duties of a trade commissioner are exceedingly comprehensive and demand from him a high measure of versatility. He must be familiar with the natural and industrial products of Canada, as well as the character of such commodities as are available for export. He may have to answer questions of a technical nature in relation to a wide range of Canadian products, as well as be able to prepare reports which would furnish information to exporters with respect to all these commodities. In that connection the facts with regard to competition, packing, shipping, customs duties, financing and so on must be within his knowledge.

He must be more than a medium of information. In the event of misunderstandings or disputes between exporters and consignees, he may be called upon to act as an intermediary, and such a duty calls for tact and skill. He must make himself familiar with shipping and railway facilities, as well as the special conditions which attach to foreign markets. Furthermore the very nature of his work requires him to make the acquaintance of every importer of importance in the smaller countries, and with as many as may be practicable in the large.

The dissemination of information to Canadian manufacturers is conducted through the medium of the "Weekly Bulletin." This corresponds to the official trade publications of other countries, and, once again, all things considered, is comparable to any. It is circulated from Ottawa throughout the Dominion every Monday morning. The circulation is now, roughly, eight thousand copies. It is sent free of charge in Canada to any bona fide applicant. The "Weekly Bulletin" contains regular reports from the trade commissioners abroad, supplemented by special articles in the Department, dealing with tariff changes and customs regulations, proposed steamship sailings from Canadian ports, Canadian trade statistics as issued by the Dominion Bureau of Statistics, statistics of grain movement in Canada; Exhibitions abroad, and other matters of commercial interest.

In addition to the "Weekly Bulletin" is issued a large number of miscellaneous publications outlining the possibility of trade in various countries. All these may be had on application to the commercial intelligence service, without charge. These reports are prepared with the utmost care, and not infrequently high commendations of their value are received. Such reports are usually the result of special investigations by trade commissioners, and in the past three years, particularly, very valuable information has been circulated, as, for instance, in respect of the trade of the new countries of South Eastern Europe, Egypt, Greece, South China and Spain.

As is to be expected, from time to time criticisms are made of the commercial intelligence service, particularly in respect of the efficiency of the trade commissioners. Most of this criticism is destructive rather than constructive; but the writer is firmly convinced that such criticism is not founded on an adequate knowledge or a just appreciation of their usefulness.

The following headings briefly indicate the matters dealt with by trade commissioners:—

The present and future demand for Canadian goods.

Foreign competition.

Specifications of best selling goods.

Reports on foreign buyers.

Recommendations of responsible parties to act as import agents, assistance to such agents by way of introducing them to influential individuals or associations.

Advice as to the best media in which to place advertisements, and the form which such advertisements should take.

The proper display of catalogues, price-lists and samples.

Receiving visitors from Canada and introducing them to possible buyers.

Collecting information as to freight rates, customs tariffs, port dues, etc.

Furnishing details respecting storage arrangements overseas.

Foreign Government regulations which must be complied with.

Terms of credit which can be given to foreign buyers.

Advice as to financial houses and banks which will discount bills or give credits.

Information as to regulations governing the recovery of debts and other legal matters.

Confidential commercial information.

Settling difficulties which arise between Canadian exporters and buyers abroad, as, for example, the disposal of goods abroad contracted for but not accepted.

Infringement of trade marks or patent rights, and advice as to registration, etc.

Consular invoices, documentation and packing.

It will be appreciated, therefore, that the scope of the service which we can render is exceedingly wide, but it should also be borne in mind that unless we are advised of individual difficulties encountered by exporters and kept informed as to the exact type of information which is found by them to be of practical utility, the service must necessarily be of limited value.

The Foreign Tariff division of the commercial intelligence branch was established a year or so ago. There are 189 different and intricate tariffs to be studied, and the constant amendments, preferences, surtaxes, restriction, reclassifications, agreements, treaties, decisions, and the like, can only be accurately interpreted by experts.

Until the department succeeded in obtaining the necessary appropriation for establishing the Foreign Trade division, this portion of its work was badly handicapped. Now, with a well-equipped office, every inquiry in connection with the foreign tariff of any country can be promptly dealt with.

In the consideration of export trade there is one word which the writer desires to impress with all possible emphasis—that word is "thoroughness." This idea should not be regarded as too commonplace or as the criticism of an arm-chair critic, but after many years' service in the department he is convinced that in the observance of this quality lies the key of success in business abroad. Want of thoroughness has been the cause of countless complaints received in the department of trade and commerce for many years. The writer does not wish to stress the point in general condemnation of Canadian methods, but thinks it is a complaint which is heard too often. Goods must be up to the quality to the last degree, and not only that, but if a reputation is to be maintained abroad, especially in Asiatic countries, (though the same applies very largely in Africa, and South America) such details as the identical color and marks on the label must be consistently retained.

For example, a Chinaman takes a fancy to goods put up in a certain label. The goods are sold "on the label." If he likes them, a competitor cannot beguile him from his fancy. Better goods might be put up, but if the label be changed in the slightest respect he will refuse them. This may seem absurd from a Canadian point of view, but it must not be forgotten that the foreigner has his peculiar point of view, his prejudices and his idosyncrasies. The man who has goods to sell is the man who has to meet these peculiarities. The buyer is entrenched in his position; he is not forced to buy any special line of goods, hence exporters must meet him all the way if they want him as a customer. You cannot send him what you think is just as good as that which he knows he wants.

Exporters Assured Of Gov't. Assistance

Export Club of Montreal and District Hears Hon. J. A. Robb, Minister of Trade and Commerce in Opening Address as Minister—Department Created to Help, Not to Hinder, Export Business

MONTREAL.—The Export Club of Montreal and District at its opening dinner held co-jointly with the Quebec Division of the Canadian Manufacturers' Association, had the privilege of hearing Hon J. A. Robb, Minister of Trade and Commerce, on his first public appearance as a Cabinet Minister. Commencing his address, Hon. Mr. Robb assured his hearers that he was with them not as a teacher, but as a student, willing and eager to learn so that the department of the government over which he had been called to preside, might become even more useful than it had in the past

Created to Help, Not to Hinder Trade

Proceeding, Hon. Mr. Robb said that the Department of Trade and Commerce had been created to help, not to hinder trade, and he hoped to see that it was conducted in such a manner as to help. The extent to which this aid could be given would largely depend on the assistance given by those interested in the production and transportation of Canadian goods. Having worked as a producer, manufacturer and trader, always willing to trade where there was a profit to be made, he had learned that it took time and work to create business, and that profitable trade could not be built up in an afternoon, or even at a banquet

Nor could trade be built up by the Government alone, without the co-operation of the business community. Therefore he was present as a representative of a government which wanted to be useful in developing Canadian trade at home and abroad

Speaking on the question of Canadian exports and imports, he said: "It is a rule of trade that whenever and wherever your sales increase your purchases also grow, and when a country puts up extreme tariff barriers, hindering necessary purchases, that country places a stumbling block against its own trade, fostering discontent among its own people." He quoted statistics showing that whereas the imports into Canada from the United States were double in 1921 the amount that they were in 1914, the exports from this country to the United States had tripled. Similarly the exports to the United Kingdom had increased in greater proportion than the imports. It was pointed out that to compete with other nations in the markets of the world, Canadian products must be carried at low rates of freight. "Canada has the railway lines. Canada has ships. Surely Canada should carry from Canadian ports Canadian exports at as favorable rates as those offered at any other ports on this continent."

The speaker concluded by stating that he strongly supported increased immigration with such a policy as would lead to the upbuilding of the population, which could produce for export and live cheaply and well at home. Our resources were useless unless people would get down to work and develop them, so as to give employment to the people and revenue to the nation.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

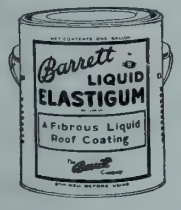
Sales-Pulling Advertisements All Over Canada

Advertising on Barrett Specialties will continue through 1922 to tell people why Barrett Products are better—why they are more economical—why they never fail to give satisfaction.

This advertising is certain to make new customers for Barrett dealers—and hold the old ones. Demand will be particularly heavy for the four popular products described below:

Everlastic Liquid Roofing Cement

Makesold"rubber"andother prepared roofs like new. Seals up the holes, gives a new surface, and adds years of extra service. Easy to apply and quick-drying. Comes ready for use in packages ranging from 1-pint tins to 40-gallon barrels and steel drums containing 43 gallons. Don't be without a stock.



Barrett Liquid Elastigum

One of the most popular products in the Dominion for keeping roofs of all kinds watertight under all conditions. Waterproof, durable and easy to apply. Even after years of service it is still tough and elastic. Put up in various size containers from 1-gallon cans to 40-gallon barrels.

Plastic Elastigum Patching Cement

Unequalled for repairing leaks in roofs, for re-lining gutters, stuffing cornices. Can be applied to wet or dry surfaces, and holds its waterproof qualities through all kinds of weather. Put up, ready for use, in packages of various sizes, from 1-lb. tins to barrels of about 600 lbs.

Everjet Elastic Carbon Paint

A proved protective paint of known reputation. Prevents metal from rusting. It dries quickly, forming a smooth, glossy surface, proof against acids, alkalis, and fumes. Put up in 1-gallon cans, lithographed (cases of one doz.), . 5-gallon cans, ½ barrels (about 20 gallons), barrels (about 40 gallons) and steel drums (43 gallons).

Be sure to have sufficient stock of these fast selling products to supply the demand. If you have not already received your copy of our latest Price List—write for it today.

Why has Hardware and Metal Such a Large Western Canada Circulation?

There are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Winnipeg.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London and Pittsburgh — and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the *only* hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 33 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

HARDWARE AND METAL

"Canada's National Hardware Weekly"

143 University Avenue, Toronto, Canada

Montreal Branch, Southam Building **Winnipeg Branch, Union Trust Building**

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

THE CREDIT MAN

of a manufacturing or commercial concern must know now the financial standing of the firms to whom his company extends credit. He has his Dun or Bradstreet.

The Purchasing Agent or the buyers of various departments must be convinced that the goods delivered are as represented in both weight and quality. They have their scales and testing apparatus.

The Advertising Man must know that the circulation claims of the papers with which he does business are justified by the facts. He has the reports of the Audit Bureau of Circulations.

Good firms invite investigation of their rating or their merchandise.

Good papers furnish A. B. C. reports to their advertisers.

Hardware and Metal is a member of the Audit Bureau of Circulations.

If interested tear out this page and place with letters to be answered.

A PIECE OF TABLE-WARE *may* be solid silver without the "sterling" stamp, the accepted "Hall Mark" of quality.

But you don't know.

A Bank might be honest and efficient without Government inspection.

But you don't know.

A business concern may be absolutely responsible without a commercial rating.

But you don't know.

A publication may have the circulation it claims without verification by the Audit Bureau of Circulations.

But you don't know.

Better be sure.

The circulation of Hardware and Metal is verified by the A. B. C. Hardware and Metal is the only hardware publication in Canada that will supply an A. B. C. Audit.

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

SITUATIONS WANTED

WINDSOR, ONT.

TAPES *and* RULES

1922

THIS marks the 89th year of progress of the Brown & Sharpe Mfg. Co.—89 years during which this enterprise has given to America many of its mechanical inventions and the first precision tools.

The accuracy and quality which make Brown & Sharpe tools the choice of mechanics today were characteristic of the pioneer workshop of 1833. The accuracy and the quality of these tools, ever predominating, have continued through the years, making the name Brown & Sharpe known world-wide. Today there exists a factory of nearly 34 acres devoted to making Brown & Sharpe Products that go to every country where metal is worked.

We want our dealers to know that the policy of making the best is always faithfully followed and that Brown & Sharpe tools are justly deserving of the confidence mechanics have in them because of their superior qualities.

BROWN & SHARPE MFG. CO.

Providence, R. I., U. S. A.

STOCK IT NOW—GET READY FOR THE SPRING SALES OF

THE HANDIEST OF ALL ABRASIVE TOOLS

THE CARBORUNDUM FILE No. 57

IT'S an abrasive tool that you can sell to almost anyone—particularly the farmer, the gardner and the handy man.

The Carborundum File is a general abrasive tool for sharpening Mower-Section Knives and Ensilage Knives, for edging Spades, sharpening Scythes and Grass Hooks and Clippers; for keeping the Household Knives sharp—for a hundred-and-one Sharpening Jobs.

IT'S A GREAT TOOL AND A GREAT SELLER

The Size, Shape, Design and Grit of the Carborundum File combine to permit it to be used more generally than any abrasive tool ever produced. We repeat—it's a Great Tool and a Great Seller.

Mr. SMP Will Talk a Blue Streak

Just in a few days now our new friend Mr. SMP will beam out at you and your customers from newspapers all over Canada.

He'll talk a blue streak and he'll keep on talking all through 1922 telling housewives in every part of Canada convincing things about Diamond Ware and Pearl Ware.

His line of goods is just as good as his line of talk. And Mr. SMP is a star salesman.

He'll come to you and invite you to hitch up closely with him for a banner year for Pearl or Diamond Ware—or both! He knows a live one when he sees him so be ready for action when he calls.

He will give you every possible help, and he guarantees that every retailer that comes in with him in a whole-hearted way will show a real profit in Diamond or Pearl Ware at the end of 1922.

'RICE LEWIS' NEWS

It's not too soon now to get your spring-cleaning stocks in good shape

for the "early bird" in the house-cleaning movement.

O-Cedar Mop Polish

O-Cedar Mop

Liquid Veneer Mop

As Spring approaches and the sun becomes stronger, the good housewife begins to get uneasy to start house-cleaning. Many a woman starts with the first week in March and will be ready to make her purchases in house-cleaning lines in a week or so. Are you ready for the "early bird"?

We suggest that you sort your stocks of the following lines.

- O-Cedar Mops
- O-Cedar Polish
- Liquid Veneer Polish and Mops
- Red Cross Polish
- Glo Polish
- Nonolio Polish (Especially fine for Automobile bodies)
- Brasso (for brass)
- Bon-Ton Metal Polish
- Putz Cream (Brass Polish)
- Silvo Silver Polish
- Nonsuch Stove Polish
- English Dome Black Lead
- Johnson's Floor Wax in paste and liquid
- Old English Floor Wax
- C. & B. Floor Wax
- Linolio Wax Polish
- Martin-Senour Stovepipe Enamel
- Steel Wool for cleaning aluminum and hardwood floors. Put up in 1-pound and household packages (Nos. 0, 1, 2 and 3).
- Abrazzo Steel Wool and Soap for cleaning aluminum, etc., etc.

Let us sort your stock. Ask the Rice Lewis man or write direct.

UNIVERSAL

The Line that Makes Loyal Customers

EVERY housewife has a market value. Her trade is worth getting. Her loyalty is worth keeping. It cannot be bought. It must be earned—and deserved. The pleasurable and profitable thing about selling "Universal" home needs is that they never lose caste with trade. There is always the satisfying certainty that one sale will lead to **many.**

THE dealer who stocks and features "Universal" products isn't flirting with chance, but building surely and soundly for constancy of customers.

UNIVERSAL
Bread Makers
Food Choppers
Kitchen Cutlery

SHOW the housewife you can save her something and you can sell her anything. The "Universal" Bread Maker saves time and labor in making better bread. The "Universal" Food Chopper is also a waste stopper. Cuts out waste of bits of food by chopping it for tasty dishes. She wants sharp Kitchen Knives—the sharper the better—which means "Universal." They save time in cutting—spend no time at the knife grinder's.

"UNIVERSAL" products have thousands of homes to go to. Now is the time to start them on their way. Write for advertising material when you need it. There's always plenty. You're always welcome.

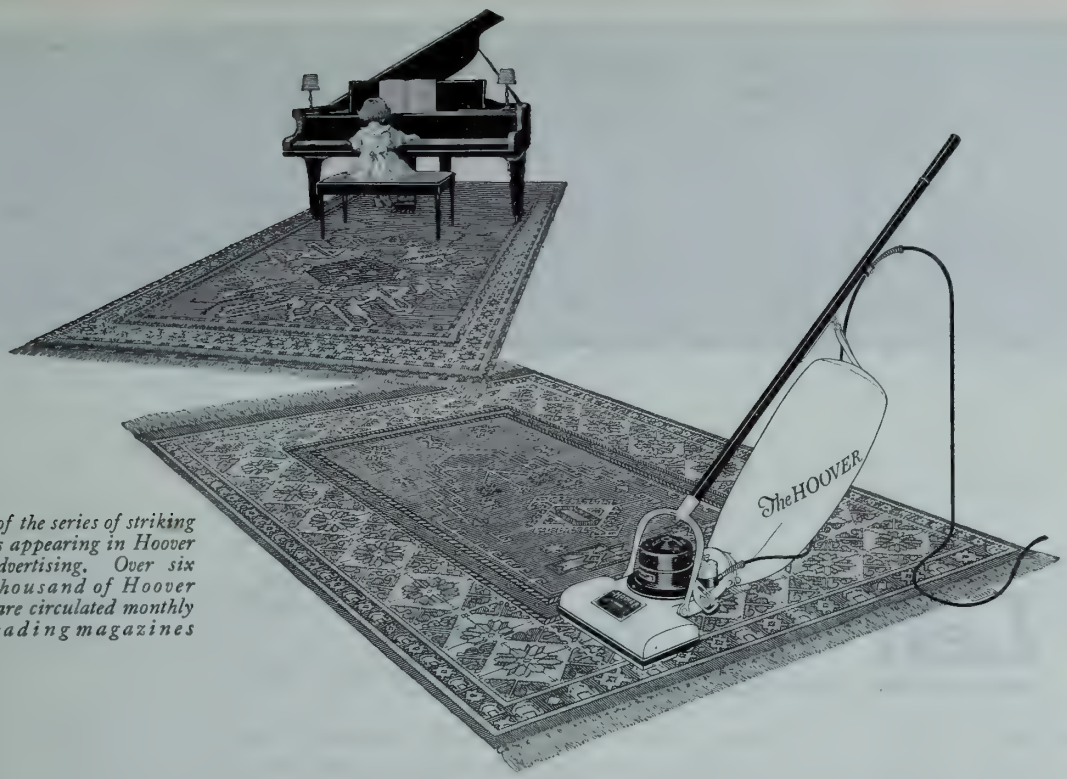
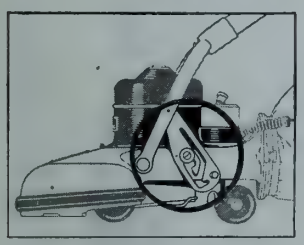
UNIVERSAL

"The Trade Mark known in Every Home"



This is one of the series of striking illustrations appearing in Hoover national advertising. Over six hundred thousand of Hoover full pages are circulated monthly through leading magazines

Become an "Authorized Hoover Dealer" in 1922!



Convenient Improved Handle Control Exclusively Hoover—

UNTIL the new "tilting bar" was brought out by The Hoover no satisfactory means of handle control on an electric cleaner existed. Now complete control of the machine is assured without stooping or stretching, without tightening bolts or screws. The user of The Hoover may easily tilt it backward or forward in order to pass any obstruction—may leave the machine to answer doorbell or telephone and return to find the handle held in a convenient operating position—may lower the handle for use under low furniture or lock it in an upright position for storage. All this is done quickly and easily by a slight movement of the foot. Protected by patents granted May 1, 1917, February 15, 1921, and pending. A total of 18 valuable patents are now the exclusive property of The Hoover Suction Sweeper Company of Canada, Limited. Still others pending.

This year every Hoover Dealer is to enjoy, more than ever, an enviable position among all dealers in household appliances.

Each dealer will be granted the Authorized Hoover Dealer's License, which publicly places the endorsement, confidence and moral backing of The Hoover Suction Sweeper Company of Canada, Limited, behind the store that secures an Authorized Hoover Dealership. Inquiries received as a result of our large national advertising campaign will naturally be referred only to such dealers.

Furthermore, the company will enter into a contract with each dealer which will be to his benefit.

The sale of Hoovers is to be limited to those dealers who are thus licensed to demonstrate, sell and service Hoovers. The license, framed and displayed in each store, informs the public that the dealer has been chosen to represent Hoover interests in his locality.

An "Authorized Dealer" window transfer is also furnished. It states that the dealer is licensed "to sell and service Hoovers bearing the factory guarantee."

Any Hoover purchased from other than an Authorized Dealer will carry no factory guarantee. Every legitimate effort will be made to protect licensed dealers.

The confidence of the buying public in the Authorized Hoover Dealer will be thus forcibly strengthened through this official authority granted by the factory.

Become an "Authorized Hoover Dealer" in 1922! The franchise will prove an asset of ever-growing value to you.

Lest we forget

Oft times in the valley the mists obscure our vision and we are prone to forget that eternal sunshine bathes the hill-tops.

Conditions today in the world of buying and selling at times cause confidence to waver. It is then we must remember Canada's splendid present position in comparison to any other and the greatness of her tomorrow.

The Smart people at Brockville, believing in the Dominion of Canada, and in a speedy resumption of better business, are now increasing production. They are also extending the number of their lines, and, where possible, the quality of their products.

AMES HOLDEN

AHM System

Compare This Evidence With YOUR Experience

Ames Holden "Grey Sox" and "Red Sox" Tubes also cost less per mile.

Read this extract from a letter written by Mr. J. A. Knoepfli who motored from Calgary, Alta., to Kitchener, Ont., and back, last summer.

On the way east, Mr. Knoepfli had considerable tire trouble but at Kitchener he put a pair of Ames Holden Auto Shoes on the rear wheels of his Studebaker Big 6 and here is what he writes from Calgary:

> "My Ames Holden tires are still going strong at a mileage of 13,043 and have never been off nor had a flat tire. Going back home there were several stretches of crushed rock roads which would ruin the average tire—I can truly say that they are the best tires I have ever had — especially considering the weight of my car and the equipment I carry."

Since Ames Holden Auto Shoes are the same price as other tires, this is convincing proof that they cost less per mile.

"Frost" Fence

Will Help All Your Other Lines

We know very well that every manufacturer you deal with naturally wants you to put the loud pedal on his particular line. We know you can't "push" them all. So---

Why not put the emphasis on Frost Fence that runs into a tidy sum of money every time you make a sale. At the same time you save the farmer money because Frost Fence is selling at practically the same prices as ordinary fence.

Frost Fence needs less selling effort than any other fence. It is known from coast to coast. Our big advertising campaign is stirring up business, and the farmer is looking for the man who sells Frost Fence.

Put a roll or two outside your store

You'll find the very best class of customers coming through your door—the kind you want for all your lines.

Sell the Fence with the Famous Frost Hold-Tight Lock that keeps every wire in place always, the fence that saves money both in erection and maintenance, the fence that stands up tight and tidy year in and year out ***and keeps the farmers' goodwill warm towards your store always.***

Frost Fence is made from the raw material to the finished fence in our own factory. We control the quality.

If you want to meet the farmers' desire for real economy—handle Frost Fence and let everybody know you are the man who sells it. Write us for full particulars.

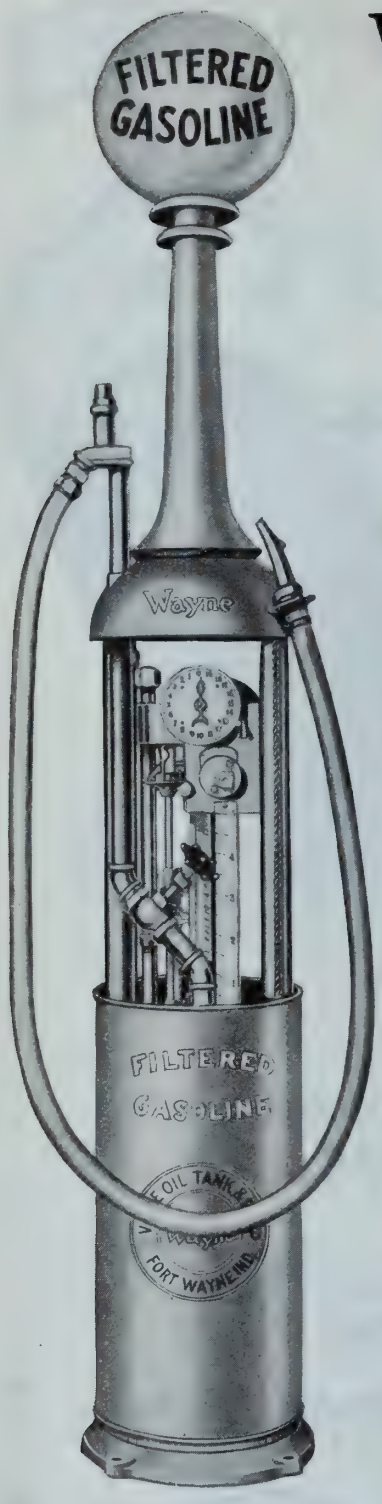
Why Wayne Leads



The Wayne Monarch
CUT 276

The fastest five-gallon pump. It operates easily by hand. Sturdy, dependable, and mechanically accurate. Preferred by motorists because of its many exclusive features. Bulletin 276-HM describes it in detail.

For thirty years, without intermission, Wayne's inventive minds, skilled, fashioning hands, supervisors and executives have worked by day and by night, to keep apace with the ever-increasing demand for Wayne Honest Measure Gasoline Pumps.

Full time, full force is our daily schedule.

This condition, unusual in this industry, we attribute to the justly earned good will of the world's most prudent gasoline pump buyers. In substance, leadership gained as a reward for superior quality and better service.

Back of this superior quality, greater accuracy, quicker delivery, dependability and safety of each Wayne Honest Measure Gasoline Pump is the accumulative result of thirty years' exhaustive experimental and actual-test work. These pumps are the fruits of painstaking yesterdays.

The deep-seated satisfaction which you feel, the certainty of performance, the accuracy, economy and the service you enjoy through long years of use all flow out of the experience gained in the development of these pumps.

When better pumps are made to measure gasoline, Wayne will make them.

And Wayne's goal is to make its business a bigger, better business, to grow always, but to grow only so fast as we can keep faith with our policy and confidence with all patrons and users of Wayne Honest Measure Gasoline Pumps the world over.

BILLMONT WRENCHES

with Interchangeable Sockets

The "Master" Wrench

This wrench is a masterpiece among tools. With the strength of a pile driver, with its hooked nose and knurled hand grip, sliding handle, it is probably the most universal tool in the world.

No car, truck or tractor owner should be without one.

No farmer or mechanic should be without one. It is useful in every household.

This wrench gets in the most difficult places, where often you have to use a chisel and hammer to remove the nut. Hours of labor could be saved by having at hand the master wrench.

Ball and spring in cap keeps handle in place. The solid "T" bar handle which slides back and forth, in order to pass any obstruction, gives tremendous power.

The Master Wrench is everybody's wrench, and with it comes an assortment of sockets up to 1″. This Master Wrench, as well as the complete Billmont Wrench outfit, can be obtained at all good dealers.

Ask your dealer or write us.

Russell Gear & Machine Co., Ltd.
1209 King St. West
Toronto - Ontario

The Universal Billmont Nose-Piece

The nose, turned at an angle at the end of a long, straight shank, makes it possible to reach places that would otherwise be hard to get at. The outer tube is stationary and offers a firm grip. The universal nose piece takes sockets of all sizes.

If interested tear out this page and place with letters to be answered.

Ford TRUCK

The Load?

YOU intend buying a truck. You have a varying quantity and weight to move from one place to another in each working day.

Can you transport the necessary quantity daily in one ton loads? If so, you should buy a Ford One-Ton Truck rather than a heavier truck.

Because.

(1) The first cost of a heavier truck is at least three times that of a Ford One-Ton Truck.

(2) A heavier truck demands the employment of a more expert and consequently a higher paid driver.

(3) The operating cost of a Ford One-Ton Truck is only a fraction of that of the heavier truck.

(4) Service—which is so essential in the operation of commercial vehicles—is always available "round the corner" when you own a Ford Truck.

Stake Body

Platform—97" x 64½" inside measure, racks—24" high with four slats running all around platform. Sign board 21" x 29" on each side of racks. Stakes and racks solid hardwood; cab has full length doors and double-ventilating windshield

Express Body

94" x 57" inside measure; panels 13" high inside with 7" flare board; rear end gate hinged and chain fasteners. Heavy malleable braces on panels and flare boards; stringers, panels, etc., hardwood. Cab—full length doors and double ventilating windshield; drop windows in doors.

Canopy Top Body

96" x 46" inside measure; panels 14" high, flare board 5½" high; top of roof from floor 58", drop tail gate, with chain and hinges. Top is removable; side rear and driver's storm curtains with Paralyn lights; full ventilating windshield.

Call up the nearest Ford dealer, he can prove these statements by cold hard figures from the experience of others.

Dealers are now able to make delivery of the Ford Truck Chassis equipped with standard Stake, Express or Canopy Top body.

FOLDING FURNITURE

"GOLD MEDAL" FOLDING FURNITURE

TRADE MARK REG. U.S. PAT. OFF.

FOR HOME AND CAMP

A Reputation That Means More Profits For You.

A generation and a half of consistently high quality has established the name of "Gold Medal" Folding Furniture among men who know the great outdoors. Campers, hunters, explorers — all have learned to bank on "Gold Medal."

This acceptance has made the Gold Medal line an exceptionally good seller in the past. This year—an outdoor year—will be a Gold Medal year. Our national advertising in the Saturday Evening Post and other mediums is teaching your customers and prospective customers to look for the Gold Medal trade mark.

Is your name on our list for complete dealer co-operation?

Spring Edition of the "*Camper*" Ready to Mail.

This interesting little magazine is issued quarterly to keep you posted on any new items—tips for better business—selling helps, etc. The February issue is now on the presses. Send in your name and your jobber's name and we will put you on our mailing list.

We refer inquiries from national advertising to dealers. Send in your name to-day.

Sugar Makers' Supplies

Sap Buckets, Spouts, Covers, Syrup Cans

For durability and sturdy service Davidson sap buckets are unequalled. Made in galvanized or heavy tin, double seaming prevents leakage and strength of material will withstand all ordinary rough usage. In several sizes and shapes ranging from 4 to 12 quarts.

"Sterling" sap spouts of best quality open hearth steel—coated to prevent rust—non-injurious to trees.

Syrup cans—plain tin with screw tops—in round and square shapes in several sizes.

He Stopped for Imperial Polarine—

Enterprising garages and hardware stores like to sell Imperial Polarine Motor Oils because of the high degree of satisfaction which they give to all purchasers. Imperial Polarine Motor Oils create the sort of customers who come back.

There is profit and satisfaction for dealers as well as customers in every gallon of Imperial Polarine sold. The motorist who stops for them will buy many other things and Imperial Polarine Motor Oils will thus build up your trade.

Consistent advertising has made the high quality of Imperial Polarine known everywhere throughout the Dominion. Tie your place of business up to this advertising by displaying Imperial Polarine in your window and on your counter.

Sell the complete line of Imperial Polarine Motor Oils, Transmission Oils and Cup Grease. Make your store lubrication headquarters. Display the Imperial Chart of Recommendations.

Mr. Retailer—

Would you buy a fine locomotive never been used, at less than cost?

Once more—What would you do with it after you got it?

Have we pointed a little moral in these two questions? **Namely,** that you as a successful merchant must buy **sales,** not goods? It makes no difference what an attractive chance you have for a bargain —remember that **you don't even get your money back, much less a profit, till you have made a sale.**

Because you appreciate the value of "salability" you carry nationally advertised articles, and sell them even when the profit on **individual sales** is less. **Volume** makes up the difference many times over.

Among Taps, Dies, Screw Plates, Drills, Reamers and Pipe Tools the GTD trademark is the sign of "salability." It's the "oh, yes, I know about that concern" mark. It makes the sale easier for you. Isn't it time for you to see if this "salability" asset is working in your small tool department?

And don't forget that **one source of supply** saves you money in

SHIPPING COSTS

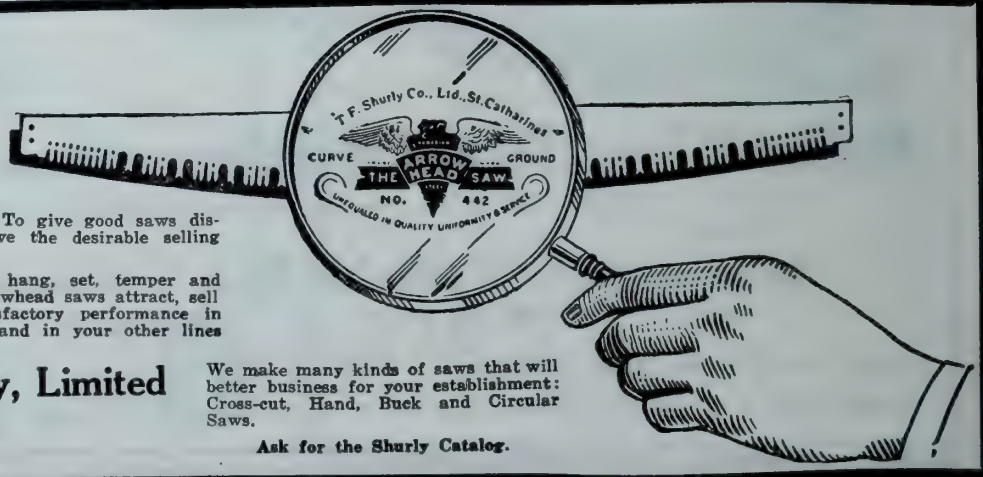
Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.



T. F. Shurly Company, Limited

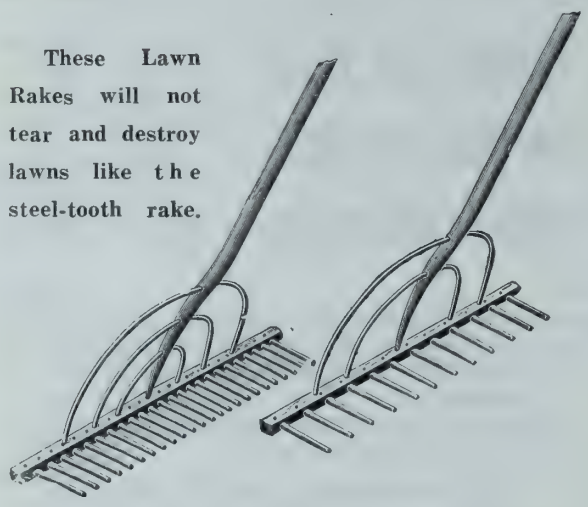
Steel Tube Bow Hay and Lawn Rakes

These Lawn Rakes will not tear and destroy lawns like the steel-tooth rake.



It is easy to convince your customers of the superiority of this rake.
The steel tube bow makes a much stronger and better looking rake and does not add anything to the weight.
Note the improved double bend in the handle, making a much better hanging rake.
We also make the wood and wire bow rake.

JARDINE

Pedestal Blower

A new, simply designed blower with only two pairs of gears which, because of scientific designing, run practically silently, without friction. The gears are flooded in oil; the fan shaft runs in ball bearings. Superior design gives the Jardine No. 14 a superior blast pressure for the power applied, and straight into the air pipe without the loss, by faulty direction, as in many ordinary blowers.

Ask for Catalogue No. 18 of our full line of Blacksmiths' Tools and Machines.

"THE SAW MAKERS"

Montreal, Que., St. John, N. B.
Vancouver, B. C.

If interested tear out this page and place with letters to be answered.

"Please send me," he said,

and we mailed him the book. This is the letter he wrote us:

Dayton, O., June 2, 1921.

"Henry Disston & Sons, Inc.
Philadelphia, Pa.

"Gentlemen:—I want to thank you for your 'Saw, Tool and File Book,' which I received several days ago, and with which I am very much pleased.

"Your Book is just what I need, I have six of your saws, but the way I have been filing them I think I shall need a jointer.

"I feel very good toward you for your courtesy to me! In fact, I think you are just about as fine as your saws. I don't think that I could pay you a higher compliment.

"I am fifty-five years old, and in all my years I have heard only two men praise any but the 'Disston Saws.'

"I am not familiar with your other tools, and, frankly, I didn't know that you made any others, but I shall get acquainted with some of them very soon.

"In conclusion let me again thank you for the Book; it has so much valuable information in it, and so many fine illustrations that I hardly know which to praise more—its utility or its art. I like both, and am immensely pleased.

Yours truly,
WM. BENZING,
1220 Wyoming Street."

When a man gives us a compliment like that, do you wonder that we want to talk about it? We wish you would read the book. If you would like a copy, or several for your clerks and customers, write your name and address on this page, and mail it to us. Address the envelope to Desk No. 2. We will send you the book free of charge.

Tire Dealers Say Themselves to Blame

Unsatisfactory Conditions Prevailing in Tire Business Discussed at Annual Meeting of Automotive Equipment Section R.M.A.—Manufacturers Said to be Doing Their Part to Right the Situation —Want "Seconds" Eliminated—What is a "Legitimate" Dealer?

AN EXTENSIVE discussion on the present tire situation and recent developments in the automobile accessory field, took place at the early sessions of the fifth annual convention of the Retail Automotive Dealers' section of the Retail Merchants Association held in Toronto the latter end of this week.

One Toronto dealer objected to the policy of certain tire companies of selling their whole output of "seconds" to certain large distributors and thus making it impossible for the smaller dealer to get a portion of such trade. Objection to this was taken by other dealers present on the ground that a business in "seconds" was not desirable and that the trade should do everything in their power to discourage it in the interests of business in first quality tires only. He added that the manufacturers would be well advised to destroy all "seconds" in the factory and this would add very little to the cost of the first grade tires and give much better satisfaction among users. On it being pointed out that while other dealers sold "seconds," the customer would insist on going to them for such tires, it was the opinion of several dealers that in such cases a customer was not lost, but that a friend was gained inasmuch as the merchant's desire to sell only first grade tires would later be appreciated by that customer when experience had been had with "seconds."

"Second" Tire Market Undesired

"The 'second' tire market is rotten but we cannot do anything unless the tire companies try to clear up the market of these lines," said G. Grainger, Toronto, pointing out that tires are down in price again and there is therefore less excuse now for selling "seconds." This dealer further referred to the practice of tire companies in opening commercial accounts which he thought were the rightful customers of the dealer.

"In my section of the city there is no market for the dealer," said Mr. Grainger, "and the only way to sell a tire is to put big pressure on the air pump and blow up an occasional one."

Margin Not Sufficient

D. Rowe, London, Ont., contended that the margin of profit on tires was not sufficient. "You can get 30, 35 and 40 per cent on accessories, but on tires you get only approximately 20 per cent and generally the service must be given of putting on the tire free of charge. Nevertheless, I believe the tire companies are sincere in their efforts to maintain prices, but unfortunately some of them have a very poor check on their dealers." Mr. Rowe mentioned the case of one rubber manufacturer who lost the mechanical goods business of a local firm because they would not cut prices on tires to them. This would have been all right if other manufacturers had not stepped in and granted the request.

"Some manufacturers who are supposed to buy tires at wholesale prices on a ten car basis are buying tires on a three or four car basis," said Mr. Rowe.

Manufacturers Trying to do Right

As evidence that many manufacturers were endeavoring to do the right thing under the circumstances, Mr. Grainger pointed out that he knew of cases where certain tire manufactuers have recently cut out commercial accounts.

C. Pearce, Toronto, referred to the big investment in plant and equipment made by the tire manufacturers and thought they were really endeavoring to market their product through legitimate dealers. "The fault lies with the dealers themselves," said Mr. Pearce. "In the past five years I have listened to many manufacturers who have told us that they are behind the association but unfortunately the association cannot always say the same thing about its own members. There are 150,000 to 200,000 automobiles in the province of Ontario alone, which would ordinarily use four tires a year, or a million tires annually. What percentage of that business are the dealers getting? We are not foolish enough to believe that the tire companies are selling that product without profit and that the dealers who sold the tires were working on a losing proposition.

"When a customer asks you for 10 per cent. of the 20 per cent. which you get and you give it to him, you yourself are starting the whole trouble of which you complain. We should clean our own house first and the tire companies will then take action. If we can guarantee not to cut the prices on tires you will have no trouble."

Situation Improved

J. J. Duffus, President of the Association, agreed with the sentiments expressed by Mr. Pearce, pointing out that there was a desire on the part of the manufacturers to deal with legitimate dealers. "There are 1,400 automotive and tire dealers in Ontario," said Mr. Duffus, "and if we had the opinion of that body of men we would soon have the manufacturers take action. The tire situation is improving. Another year like the last one and dealers would not care who the manufacturers sold. The margin on tires was reduced to 15 per cent. and there was no profit to be made. One of the reasons for cutting the margin of profit was in order that dealers would refrain from the policy of constantly cutting prices by a slight margin."

Mr. Pearce who recently visited some conventions of accessory and tire dealers in the United States, pointed out that in many sections of that country the dealers stand solidly behind the companies which look after their interests, and this policy has resulted not only in eliminating the price cutting dealers, but also those manufacturers who will not live up to such a policy. "The result is that they have turned the acces-

(Continued on page 36)

Who Will be Next?

In connection with the lists of long service employees of various hardware firms which have been appearing recently in Hardware and Metal, the following letter has been received from T. McAvity & Sons Ltd., St. John, N. B.:—

Editor Hardware and Metal, Toronto.

We noticed in a recent issue of "Hardware and Metal" a list of long service employees of the Chinic Hardware Co., Quebec City, which while it is quite a remarkable showing, we believe that the record we enclose will eclipse.

The names included in the list are bona fide employees, no members of the firm, or directors being included. Only the jobbing end of the business is represented, although you will note that we have added the names of three men, who are employed in our manufacturing branch, just to show that we have them, and to see if the record as given can be equalled or beaten by any other hardware house, or for that matter, any business house of any kind in the country.

We think it is a unique showing, and worthy of comment, insomuch as nearly all the names appearing on the list are men who have served their whole business career with T. McAvity & Sons, Ltd.

We might add that during the last two years, we have lost through death two long service employees, one of whom was over fifty years in the firm's service, and the other over forty.

WINTER SPORT GOODS MOVING WELL

London, Ont.—The turn to co'der wea'her is welcomed by hardware merchants and has resulted in a big jump in the turnover of seasonable lines. Sales of skates, hockey sticks, pucks, etc., have been larger than in several years. There is also an active demand for various household lines. Apparently a much larger amount of indoor painting is being done this winter than ever before as paint sales show a large increase in recent weeks. This is believed by hardware men to be one result of unemployment, men who are temporarily out of work taking advantage of the chance to do odd jobs around the home that they have been putting off for many months.

Inquiries which are coming in indicate a brisk demand later for builders' hardware and an unusually large number of plans for new homes are being prepared.

An enterprising Canadian company advertising a certain electric washer was amazed one morning to find the following letter in the morning mail:

"Deer sir: Your macheen, she look good to me How many galens will she hold and how much money will it cost to put pipe for cooling in. Does she work on wheet or barlie. You work great bluf on wash macheen. I fal. You let me know what you take to fix me up."

Labor and Transportation Costs Play Large Part In Steel Prices

COL. Arthur F. Hatch, Canada Steel Goods Co., Hamilton, Ont., when asked by Hardware and Metal for his opinion regarding steel prices for 1922, stated as follows:

Opinions differ. It's hard to determine the proper relative index when taking pre-war prices in comparison.

As manufacturers, we know that present prices are lower than they should be.

The ten year average prices 1904 to 1913 were,

Bars	1.403
Plates	1.496
Shapes	1.510

The average prices were,

Bars	1.38
Plates	1.41
Shapes	1.510

Labor and transportation are 80 to 85% of the cost of making Steel.

Labor is now at least 50% above pre-war cost.

Transportation more than 100% above pre-war cost.

I predict that whatever the 1922 prices are, they will be little lower than, now, and I am equally confident that a demand sufficient to relieve pressure from operating departments, will promptly be reflected in higher prices than are obtainable at present.

It is clear that any further price adjustment in steel during 1922 will be reflected in single dollars.

Buyers can have this confidence, and should provide against their needs, rather than wait so long that deliveries are impossible, and their own operating schedules, or those of their customers curtailed at the expense of added costs and probably loss of business.

TIRE DEALERS SAY THEMSELVES TO BLAME

(Continued from page 35)

sory and tire business into the legitimate channels," said Mr. Pearce.

A committee was formed consisting of Messrs. S. Rowe, London, G. Grainger, Toronto, C. Pearce, Toronto, Mr. McGraw, Brantford and J. J. Duffus, Peterboro, to go fully into the situation and interview the tire manufacturers with a view to having some changes of policy made, and a definition given of "legitimate" dealers.

One morning of the convention was spent in a trip through the plant of the Goodyear Tire & Rubber Co. in which the delegates were much interested in the various processes.

James T. Craig, general manager E. T. Wright Co., Ltd., Hamilton, who was on a business trip to Winnipeg has returned to the east after visiting W. Reynolds & Co., which represented this firm in western Canada.

What Followed the Rejuvenation of the Cutlery Department in E—'s Hardware

How "Bill" Realized That Just Carrying a Few Samples Allowed Potential Business to Escape Into Competitors' Stores — What Changes Were Made to Rejuvenate This Department—Planning to Attract Current Trade Through Snappy Window and Counter Displays.

"HELLO Bill! Why the dazzling new showcase and all the silver display?"

"Howdy Tom. So you rather like our showcase, eh? Well, let me introduce you to the newly rejuvenated cutlery and silverware department of Everybody's Hardware Co."

"What's the big idea, Bill? You always did carry those lines, anyway, didn't you?"

"That's just it, Tom. We CARRIED them. And I've come to believe that 'carrying' a few samples of any line is not good business. As you say, we previously had just sufficient of these articles on hand to justify including them in our catalog. But at best, it was merely an excuse for a stock. The only time we ever showed them to the public was just before Christmas, when people might be purchasing cutlery and tableware for presents.

"Figure it out for yourself just what we were missing. It mean't wilfully passing up and deliberately failing to 'cash in' on what I now believe to be just as profitable a class of goods as the average hardware store carries."

"So now you have both reformed ideas, and a reformed department?"

"Yes. That's just it. Why, Tom, when I first began to consider the sales we must have lost in the past, it surely opened my eyes."

"But Bill, how did you come to realize all this?"

Cutlery is a line which can be featured in the hardware store as an all-year seller. A window or store display confined to cutlery may be used periodically to good advantage, and such an arrangement presents a striking appearance. In this display a wide range of cutlery lines have been grouped attractively and prices shown on each. Few passers-by would not recognize some piece of cutlery which they could use to advantage.

Junior Does His Best

"Ah, That's quite a story, Tom. It was this way:—Hector, that's my youngest assistant you know, was taking care of the store one day while George went to lunch. I was sitting up here in the balcony, having a snack to eat while on the job, and looking over some accounts.

"Presently in walks a smartly dressed lady, who was also one of our average good customers. You know, the kind you begin to look upon as steady and reliable when they need anything in your line of goods. I had sold her husband tools and paint, when he put up a garage this spring, and they have been kind of neighbourly folks ever since.

"Well, I didn't notice who it was all at once, mind you. It was when I first heard her speak that I looked down. There was no one else in the store at the time, and Hector did his best to make the sale; I'll say that for the boy. The fault lay with our poor stock, and my own lack of judgment.

"Mrs. Keenbuy asked to see some tableware, particularly sets of forks, spoons, and so on, in cases; while she also wanted to compare prices on cutlery pieces by half dozen lots.

"Hector leads her over to the case you can see down there in the far corner. It was rather poorly lit in that part of the store, then, but I have fixed it since. He digs down under the counter, near the floor, and finally comes up with a couple of dusty boxes. He blows off the dirt —'phew'—just like that, and lays them on the counter in front of her. 'These are the Blank plated ware, Madam' he says, 'and this is the popular Space brand of cutlery.' 'What design is that?' she says. 'That top style, Madam, is the June design; and this one is the favorite Garden pattern.' So saying, Hector unwraps another layer of spoons, and takes 'em over to the next counter where the light was better. Even from up here I could see how tarnished the top one was, and it certainly didn't encourage Mrs. Keenbuy in selecting her purchase. 'Haven't you any other kinds?' she asked. So I

saw Hector manfully do the submarine act again, and finally come up for air with a catalog and booklet in his hand, but no more stock. 'This Madam, 'he began, 'illustrates the various patterns available in this line of cutlery. I can quote you prices on any one you select from that catalog, and we would be pleased to get them for you.'

The Usual Broadside

"So the lady looks over the catalog, and says, 'How much are these per dozen? That is knives, forks, and spoons in two sizes of each.' Hector looks 'em all up in the little price folder, and tells her one at a time. She meanwhile takes a few notes of the prices, and then springs the usual broadside, 'Haven't you got them in stock? How long would it take to get them? I would like to see some other designs.' So poor Hector has to explain that we don't —or at least we didn't—carry samples of all those different designs; but we could get anything she chose at very short notice.

" 'How soon could you get me an assortment in this Garden pattern,' was the lady's next question. 'Not more than ten days, Madam.' Hector replies. 'At the outside,' he added quickly. 'Oh my,' she says. 'I couldn't think of waiting that long. You see, we wanted this right away. It's my niece's wedding gift. Mrs. Jones got a lovely set in a case over at the jewellers' when her daughter was married last month.' And there was a lot more talk of the same nature which I didn't catch, as I was hurrying downstairs to explain matters before she went out.

"But it was no use, Tom. Our stock didn't satisfy, and our methods didn't suit. Then there were a few other details which failed to encourage such a prospect, among them I might mention the dust-laden box, and the tarnished spoons and knives. I made up my mind right then to change things. Our store didn't justify a reproach like that; so that's why I made the change. As you see, we now have a showcase containing nothing else but cutlery of various kinds; with the designs neatly laid out, and what is more important, clearly priced. The case is in a prominent and well-lighted part of the store, and I think the display on the top is attractive, don't you?"

"Sure, Bill. It looks fine. But do you think the returns will justify this expense?"

Expense Justified

"Why, sure. We've had returns already, Tom. The girl didn't get married just as soon as Mrs. Keenbuy evidently expected, for when we had this new stock and fixture installed, I 'phoned and asked her to come in when she was near. She came down next morning, and brought her niece along, too. Of course, she was sorry, but had already purchased what she wanted at the jewellers', but this is where it counted. She sent her sister-in-law over before the wedding, who bought a set of egg spoons, something which had been overlooked. Then another aunt drifted in and made the girl a present of one of those carver sets in a plush case, similar to the one on the counter. And a couple of days ago, when the 'newlyweds' arrived back from their honeymoon, I made it my business to place before them the suggestion that they would probably need some kitchen cutlery and less expensive table ware for everyday use, thus saving the presents for special occasions. And, believe me, those tactics are bringing results.

"Furthermore, I am already planning on a better stock of pocket-knives, more variety, you know. I notice that the drug store has a pretty complete line, and what with both them and the jeweller's making a specialty of this class of goods, the consequence is that the hardware merchant is fast losing hold upon what are really legitimate hardware lines. So we've instituted a real department in silverware, cutlery, and pocket-knives, and expect to see business materialize all the year round."

The Prospects

"Why not, Bill? Look what you've got to work on. There's June brides, and September brides; Christmas presents, Easter presents; and if you can't locate a few birthday gifts, anniversary celebrations, and club presentations in the 'tween times, you are not the live merchant I take you for, Bill."

"So you think the idea is all right, eh?"

"Sure, Bill. Go ahead and prosper. You'll not only regain some of the lost ground, but you are successfully meeting competition, and at the same time elevating the tone of the hardware store in the opinion of the public. A bright display like that is an asset to the store and a tribute to your business judgment."

Planning Windows Too

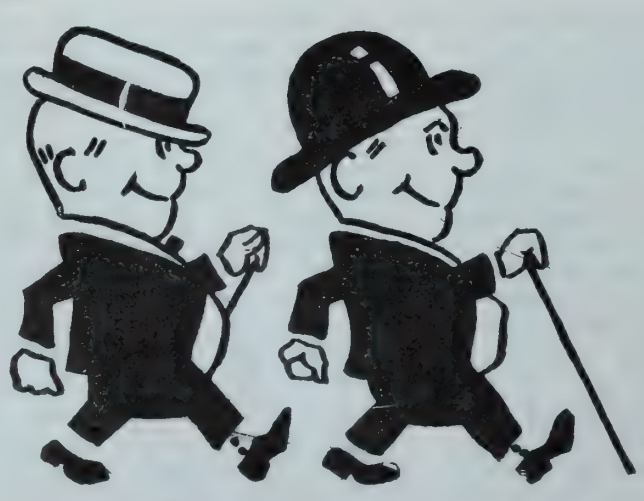
"You're an old flatterer, Tom. But listen. You see the smaller window of the left-hand side: well, I'm going to put a snappy little display in there, also. But that'll have to wait a week or so until we get the lighting changed. Instead of those dropped lights, I was planning on having some permanent fixtures put in along the top on the inside of the window. The illumination will then play directly upon the goods, without causing a glare in the eyes of the passers-by. George can put up

(Continued on page 54)

CHRISTMAS WINDOW CONTEST WINNERS

Competition was close in the last Hardware and Metal Christmas Window Contest and it has taken a great deal of consideration to establish the various points of merit in the various entries. Every effort is being made to give a decision which will be authoritative and fair to all and an announcement of the standing of the various contestants will be made in next week's issue of Hardware and Metal.

There will also be a number of other interesting features of a special nature in the February 11 issue, which will justify careful perusal.



We'll Soon be There!

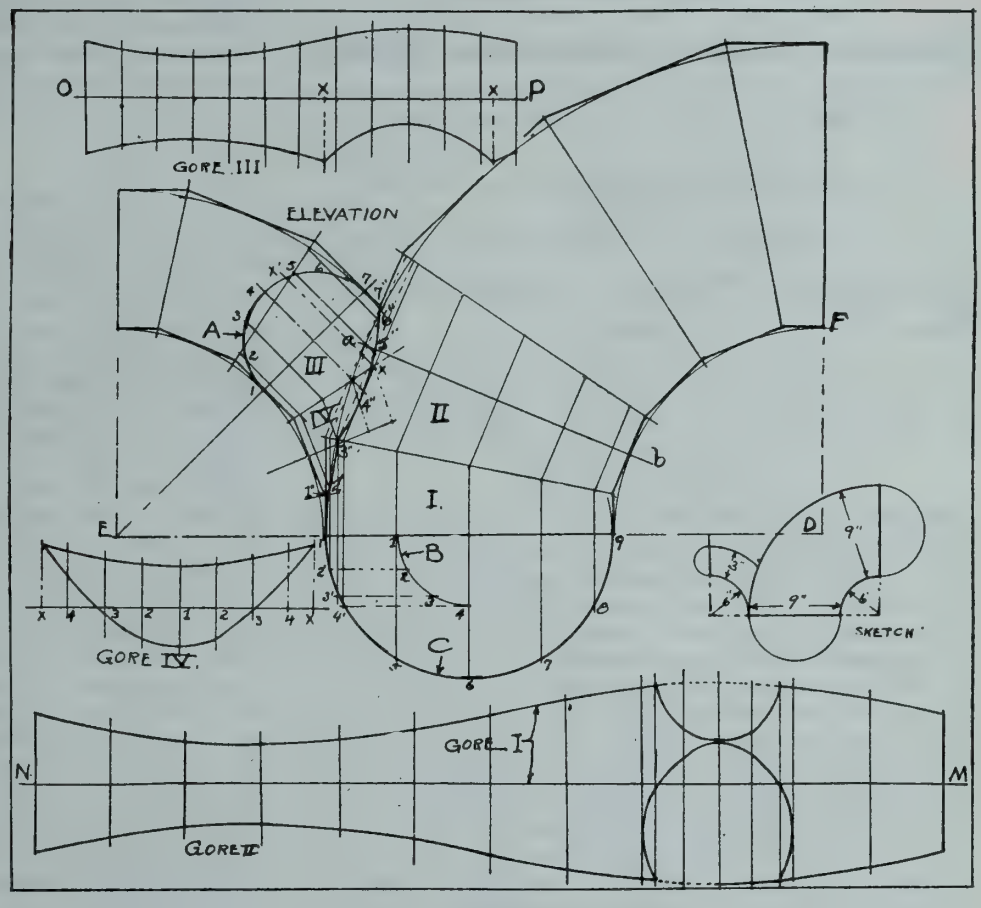
Patterns for Intersecting Elbows

Written for Hardware and Metal by O. W. Kothe, Principal St. Louis Technical Institute, St. Louis, Missouri.

OUR SKETCH of elbow shown in this drawing was used in connection with a forge piping system with measurements as shown in the sketch. It might have been possible to shift the smaller elbow with an angle to intersect the straight pipe elbow, with a straight tee and that would be saved quite a bit of developing, but such possibilities a person never knows whether they are permissible from the bare drawing.

In this case the large elbow is described first, following the measurements for the throat as D-9, and for the heel as D-1. Then treat the elbow for a 5-piece elbow, or 8 equal spaces in the heel and draw your miter lines as shown. Then describe the small elbow so it is tangent with the heel of the large one as F-1, and adding the diameter. Then treat this also for a 5-piece elbow, making the heel of throat into 8 equal spaces, and draw the miter lines as shown. Through the centre of the gore III draw the line F-7 and from its center describe the half section A and divide in equal spaces. From here draw the lines parallel with the heel to intersect the miter line between gores III and IV, and then from this 4th gore extend them as shown.



Patterns for Intersecting Elbows

Next describe the half section C and reproduce the half section A and set a quarter of it as B, with all its points and from here project them to intersect the large section as in points 1-2-3-4. The balance of C divide in equal parts and square up lines thereby producing elevation lines. Now where these lines intersect those lines from A you establish the miter line as shown. Observe that the miter between gore III and IV crosses the developed miter in point X. This will be the high point as a start and the finish for the gore IV. So this point X is projected to A as X'. This completes the working drawing from which the patterns may be laid out.

To set out the pattern for the large elbow, we pick the girth from the section C and set it off on a line M-N. Draw straightout lines and then pick each line from gore L of elevation and set on the top and on the bottom side M-N the same as you would develop any elbow pattern. Only in this case the upper half of pattern will represent the gore I and they both together will represent the gore II. All the other gores can be laid off from this pattern. If the opening in the large elbow is desired then from the line a-b pick those distances to points 7-6-5 x 4-3 and set them off on the proper line working in each case from the center of the line M-N. This will give the outline for the large opening shown. In the same pattern we set off the opening as required for the heel of gore I by picking the lines from base 1-9 to 1-2-3 and setting them off on similar lines working from the center line M-N. In this way we lay off both patterns for openings in the one girth and they can be transferred in the other gores cut out of metal by simply quick punching through the lines thus established.

To set out the pattern for gores III and IV of the small elbow, they are set off in much the same way being careful to pick the girth from A and setting the point X' in its proper position. Otherwise the process of common elbows is applicable. Laps for riveting the various gore pieces together must be allowed extra, also for seaming.

It will be observed that by extending the lines from section A direct into the large elevation and thereby ignoring the miter between gores III and IV a regular tee intersection would be made and this would save making the small gore piece IV separately, as this is always a loose part and gives more or less trouble when assembling.

ONTARIO'S PRODUCTION OF HARDWARE

Industrial statistics for the province of Ontario which have just been issued, reveal the extent of the investment and value of products of various industries for the year 1919. The value of products in that year by Ontario industries was as follows:—automobiles $80,619,846; rubber goods $43,638,975; rolling mills and steel furnaces $34,451,720: plumbing and tinsmithing $24,142,553; electrical apparatus and supplies $21,981,206; pig iron $17,823,451; iron and steel products $12,167,718. The total investment in Ontario industry in that year was $1,583,161,271 using material costing $943,622,018 and producing maetrials va'ued at $1,737,543,996.

Canada's Trade

EMERGENCY tariff legislation enacted by the United States is having the effect of diverting much of Canada's foreign trade to other markets. It has little direct effect upon hardware lines and it is rather noteworthy that exports of Canadian flaxseed to the United States to be used largely for making linseed oil, have increased nearly one hundred per cent. in seven months ending December, 1921, compared with the previous year. However other trade figures in this issue indicate that whereas during the calendar year, 1920, the United States was far ahead of the United Kingdom from the standpoint of value of purchases from Canada, last year saw these two countries practically equal, both buying in the neighborhood of three hundred million dollars worth of Canadian goods. The extensive decline in metal values is indicated in figures showing trade comparisons between 1920 and 1921 on iron and steel, copper, brass and other metals.

* * * *

Careful Guidance

IN LAYING plans for carrying on retail business during 1922 careful consideration should be given by the merchant to the trend of the times. The extent of the merchant's success will be governed largely by his ability to anticipate the trend of public sentiment and other influences which will affect this year's business. Many lessons were learned from business in 1921 and with these lessons learned and business now in better condition than at the commencement of last year, the retailer has a fair start toward making 1922 a better year for business than was 1921. Without attempting to make any predictions as to what is likely to transpire, attention can be drawn to some developments which are bound to affect the situation. For instance, conditions are such that economy, conservatism and efficiency will prevail in business because the pressure of circumstances compels observance of these measures.

Business that tries to run ahead of the conservative progress of the times is liable to disaster. This does not mean that plans for stimulating trade should not be encouraged, but that these should take into consideration existing sentiment and keep in mind the fact that business is business and not speculation. During the boom, business had to speculate despite itself, due to the rapid change of circumstances. Rising markets often made it unsafe not to "go long on materials." Failure to expand under conditions then existing seemed like turning one's back on opportunity. But that is not true of prevailing times. Undue stimulation and expansion will not bring the same response this year. Profits can be made and success can be established but they must be built up by means of economy and efficiency. Turnover will probably not reach the volume experienced in the boom times due to the economies which in turn are being practised by the consumer. Therefore profit margins in business can only be increased by economies in production costs, coupled with a fair and justifiable effort to encourage business.

* * * *

Importance Is Unappreciated

THE RETAILER is receiving a great deal of unjust criticism these days in regard to his alleged laxity in carrying forward the plan of readjustment by liquidating stocks and keeping up turnover by replacing with lower priced goods and so passing on any advantage to the consumer in the interests of a bigger turnover. True, in some isolated instances, some retailers may be refusing to base prices on replacement values, but they are greatly in the minority. The competition which exists to-day for business is sufficient in itself to bring all prices to a fair level above production and distribution costs, and some retailers have only been brought to a complete realization of the necessity of following this plan when they have lost some valuable connections. However, to-day this evil has been largely minimized, and meanwhile there is a good deal to be said about the handicaps under which the retailer is laboring.

As an instance, a recent investigation of several hundred retail institutions in Canada and the United States revealed the fact that while a gross margin of 27.9 per cent. was secured on goods sold, distribution costs amounted to 25.9 per cent. which left an average margin of 2 per cent. Again, as result of public clamorings for investigation of retail prices, representatives of Marshall, Field & Co., one of the world's largest retail stores recently visited Washington and laid before Government officials figures indicating that this large firm showed last year only a margin of profit of 5 per cent. on capital invested.

Very few, if any, other branches of business would carry on with such a small margin as this, and if the consumer is not getting the benefit of lower prices being made by manufacturers, care should be taken not to include all retailers in the charge of restraining the process of readjustment. In view of the outstanding importance of the retailer in the structure of merchandising, he is deserving of better consideration than he has had in recent years. The retail merchant is the link in the scheme of distribution who is closest to the consumer and if he does not play his part the whole scheme suffers. To-day the retail merchant, as a class, is encouraging morals and honor in business and as such he is deserving of encouragement and should not be made the scape goat of every abuse which public whim sees fit to extend.

* * * *

SEMI-OFFICIAL figures showing registrations of motor vehicles in Canada during the year 1921, reveal considerable increases in most provinces, notably in those which heretofore have not figured very largely in the records. This is an encouraging sign for a year which was comparatively dull in this industry. With lower prices on most vehicles as an added incentive, the number of vehicles should greatly increase this year, thus offering an ever-widening field for trade in auto accessories for hardware merchants in all parts of Canada.

News of Western Canada

For comment on Winnipeg hardware market tendencies see "WEEKLY HARDWARE MARKET REPORTS." For current prices see Winnipeg section of "CURRENT HARDWARE QUOTATIONS" in this issue.

Many Hardware Price Changes in B. C.

Water Competition by Panama Canal Causing Railways Serious Concern—First Welsh Tinplate Arrives—Business Well up to That of a Year Ago—Collections Slow in Some Districts

VANCOUVER.—Wholesale hardware dealers and jobbers on the Pacific Coast are mildly optimistic as to trade prospects for the present year. A distinct slowing up has been noticed in collections, particularly from districts where payment for last year's crops has not been made in full. There has been a gradual reduction in list prices as a result of which momentary values are generally below the output of the first month of last year. Several lines of tools have declined, cross-cut saws have been dropped ten per cent. and graniteware and tinware has eased off from fifteen to twenty-five per cent. Garden hose and lawnmowers are about ten per cent cheaper than last year.

Deliveries are said to be good both from Eastern Canada, the States and the Old Country. Water competition by way of the Panama Canal is causing serious concern to the railway companies which are adjusting rates to save as much of this business as possible. At this time of the year the trade is stocking poultry netting and quotations from the Old Country have been decidedly favorable. To save this trade if possible, the C.P.R. and other lines have for a period of two months made a special rate which amounts to a cut of practically one-third of the existing all rail rate.

First Welsh Tin Plate

Probably the feature of the week was the arrival of the first shipment of 2,000 tons of Welsh tin which is to be used by the canneries the coming season. This will it is said cut deeply into the operations of a local company, as heretofore the raw material was imported from the United States. The boat service is proving satisfactory and almost every month new steamer services are added to this port's growing list.

Opinions vary as to the outloook for the year's trade. One member of the trade points out that there is no great activity as yet in lumbering, mining and fishing, the three most vital industries. Though lumbering is starting he says that there is little money on the prairie to buy and even so, when the buying starts, prices will be boosted with the result that operations will be curtailed. The same person stated that copper had not yet risen to a sufficient height as to cause any special activity in that quarter. In the meantime he says that trade is coming along slowly and that sales are almost equal with those of a year ago in tonnage.

Stocks in Good Shape

Another section of the trade takes a more hopeful outlook and states that for the month orders are well up in number with those of a year ago and greater, even, than November's. He expresses the opinion that merchants have their stocks in better shape now and are operating on a more substantial basis.

Business is slow in development from the Cariboo district due to the bad transportation and scarcity of money in the district. Along the main line of the Grand Trunk it is said to be quiet and collections slow.

Okanagan trade is only fair due to the fact largely, that with heavy apple crop of last year, a much longer time was necessary in its marketing. A couple of hundred cars are still said to be awaiting sale on the New York market which means that the growers will have to wait a considerable time yet before receiving returns from the pool. This means that they are undertaking none but essential building works until they find where they stand. Illustrating the seriousness of the situation, one Okanagan grower stated to Hardware and Metal that he had sold several thousand boxes of crabapples through the marketing organization, and when his returns were made, he learned to his dismay that his fruit had actually cost him eight cents a box to market, his loss being around $600.

WESTERN CANADA NOTES

Oliver Roulstone, of Roulstone Brothers Hardware, was a business visitor to Winnipeg.

Mr. Finch, Strathclair member of The Finch Hardware, Co., Elphinstone, Manitoba, was a visitor to Winnipeg, attending the Lumbermen's Convention.

J. H. Ashdown, president J. H. Ashdown Hardware Co., Winnipeg, is on a trip to the south accompanied by his wife and daughter.

WESTERN CANADA NOTES

Nanaimo—W. H. Morton, hardware merchant of this city is receiving the condolences of the retail trade on the death of his daughter.

Victoria—Milner Toy Manufacturing Co., Ltd., has been incorporated with head office in Vancouver with a capitalization of $5,000.

Victoria—The Dominion Wire Manufacturing Co. Ltd., has ceased to do business in British Columbia and its license has been cancelled.

Vancouver—Prescott W. Robertson, direct manufacturers' agent of Montreal, has been here this week making the rounds of the jobbing trade, representing Three-in-One Oil, tools and other lines.

W. G. Hellier, general manager Brandram-Henderson, Ltd., Montreal, spent a few days in Winnipeg en route from Vancouver to Montreal.

J. Leonard Paul, Winnipeg manager Brandram-Henderson, Ltd., is on a trip to the firm's headquarters at Montreal.

J. Noelniven, manager J. H. Ashdown Co., at Saskatoon, was a visitor to the Winnipeg office.

Thomas E. Yuill, manager J. H. Ashdown Hardware Co., Calgary, Alta., was a visitor to the firm's head office during the week.

Short Course for Western Retail Merchants

Winnipeg.—The University of Manitoba will offer its 5th Annual Short Course for Retail Merchants and Retail Salespeople in Lecture Theatre "A" of the Science Building on Broadway.

The Course will commence at 9.30 Tuesday morning, Feb. 28 and continue until Friday afternoon, March 3, 1922, four days. Lectures and discussions every day. Every part of retail merchandising will be dealt with.

Two or three outside speakers will be engaged to co-operate with the local experts in presenting the lectures and conducting the discussions.

The enrolment fee for the course is $2.00. Anyone may attend, regardless of where he or she may come from. Further particulars may be obtained from:

J. H. Curle, secretary, Manitoba Board, the Retail Merchants' Association of Canada, who is also secretary of the Advisory Committee on Commercial Education of the University of Manitoba.

Events in the Trade

BUSINESS CHANGES

Atwood, Ont.—Mrs. S. E. Stockford, hardware, has sold to George Douglas.

Ottawa, Ont.—Somerset Repair Shop has changed its name to Somerset Hardware and repair shop.

Arnprior, Ont.—R. Stafford Rudd & Co. are admitted to partnership in a hardware business to be known as Rudd & Scott.

INCORPORATIONS

The Beauty Brush Co., Ltd., with capital of $50,000 and head office in Ottawa.

Alcan Oil Corporation Ltd., to deal in oils, petroleum, etc., capital $50,000 head office Montreal.

Scales and Store Specialties Ltd., head office Windsor, capital $40,000 to manufacture store fixtures and equipment.

Excello Co., Ltd., capital of $50,000, head office in Toronto, to manufacture washing machines, wringers, etc.

Ontario Potteries Ltd., capital of $300,000, head office in Bowmanville, to manufacture tiles, pottery ware, china ware and other articles of clay.

Prendergast Fence Co., Ltd., capital of $100,000, head office in Sarnia, Ont., to manufacture woven wire fences and fencing material.

Canadian Moludite Ltd., to manufacture and deal in moludite, paint, waterproof materials. Capital $400,000, head office Vancouver, B. C.

Premier Petroleum Corporation Ltd., to develop oil and gas lands and market this product. Capital $2,000,000, head office Windsor, Ont.

Beldam's Asbestos Packing and General Manufacturing Co., Ltd., to manufacture packings, jointings, insulations in asbestos, rubber, etc., head office Toronto, capital $300,000.

L. S. Tarshis & Sons, Ltd., to manufacture and carry on wholesale and retail business in glue, paints, varnishes, rubber goods, metals, hardware, etc. Capital $125,000, head office Montreal.

Canadian Pneumatic Automobile Accessories Ltd., to manufacture and deal in automobiles, motorcyles, motorboats, tools, valves, and other accessories. Capital $500,000, head office Montreal.

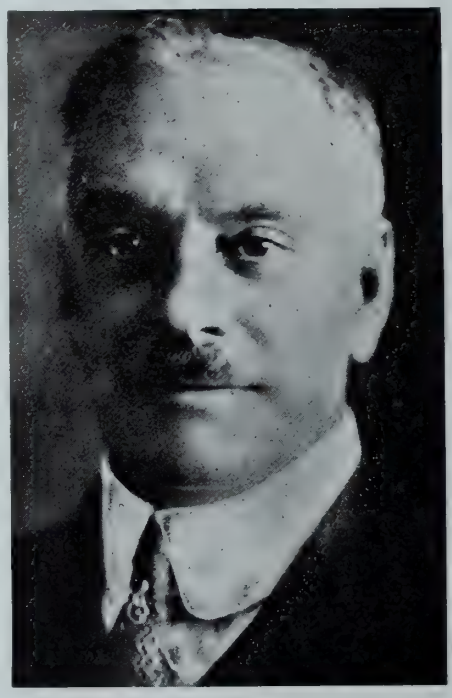
General Manager Edward Penniwell, of the Beaver Board factory, Thorold, Ont., was injured by a shot in the leg. Penniwell and two other officers of the company were walking towards the plant, when a shot was fired, hitting Penniwell on the leg below the knee.

CHANGES AMONG OFFICIALS OF IDEAL ALUMINUM PRODUCTS CO.

Some changes are noted among the officials of the Ideal Aluminum Products, Ltd., due to the fact that E. Roderick formerly general manager is no longer identified with the company. F. W. Hudson late of Hudson Brothers is now General Superintendent and F. G. Davies has been added. J. Hunter, vice-president advises Hardware and Metal that the following is a list of the present officials of the company:—James A. Richardson, Winnipeg, Director; George E. Cathcart, Winnipeg, President; J. Hunter, Winnipeg, Vice-President; F. G. Davies, Acting General Manager, F. W. Hudson, General Superintendent, R. K. Gemmell, Secretary Treasurer, W. P. Buzzek Sales Manager.

FIRE LOSS

Ottawa, Ont—Plaunt Hardware Co. suffered loss in a recent fire.



HERBERT B. SEYBOLD

Sales Manager of Starke-Seybold, Ltd., wholesale hardware, Montreal, who, as announced in last week's issue of Hardware and Metal, was elected alderman of one of Montreal's most important wards by a large majority in the election just concluded.

PERSONAL

Among the members elected by the Toronto Board of Trade to various committees for the forthcoming year are the following:—E. H. Gurney, President Gurney Foundry, C., (Educational); W. H. Lamont, Financial Manager, H. S. Howland Sons & Co., G. W. Booth (Foreign and Domestic trade) C. R. Peckover, J. O. Thorn, Metallic Roofing Co., also on Foreign and Domestic trade committee.

D. W. Clark has resigned his position as managing director of the Canadian B. K. Morton Co., whose head office is in Montreal, and will in future devote his time to the interests of the Anglo-Canadian Wire Rope Co., of which company he is president and general manager. Mr. Clark has traveled the Dominion for years in the interests of the brand of Sheffield Tool Steels handled by Messrs. B. K. Morton & Co. of that city.

COURSES ON RETAIL SALESMANSHIP

Toronto.—The first school of retail salesmanship to be held in Canada opened this week at the Central Y.M.C.A. with an enrollment of 75 men students. The course includes 16 lectures on the principles of retail selling and 16 on merchandise or a knowledge of metal products, house furnishings, etc.

Dr. Reaman, Educational Director of the Y.M.C.A., said, in speaking of the school: "It is going to be a big thing for this city. The average person who sells behind the counter does not appreciate the contribution he can make to the general public. This study will make him something more than a phonograph, where he says, 'This is such and such at so much.' We wish to enlarge the vision of these people so that they feel there is a whole world behind what they are selling. In the United States practically every city has a school of retail selling, and it is taught also at the high schools in Boston.

"If we are going to force children to go longer to school, we must have them study something that will make them worth more to the community, and I predict that within 25 years retail salesmanship will be taught in all our high schools," said Dr. Reaman. "We have made a beginning here, and we hope as time goes on to branch out and enlarge our field."

R. M. A. To Take Case to Supreme Court

The long drawn out controversy between the retail merchants of the Dominion and the Government on the question of what constitutes a manufacturer, for the purposes of the sales tax, is now to be taken to the Supreme Court of Canada, the highest court in the land. Every member of the executive of the Retail Merchants' Association of Canada has expressed the desire that this course be taken, and E. M. Trowern, Dominion Secretary, has been instructed to proceed with the case.

The matter will be dealt with in the form of an appeal from an Exchequer Court judgment recently rendered in favor of the Government, in a case in which the Government sought to establish the fact that confectioners, manufacturing for sale direct to the consumers, were manufacturers and thus liable for payment of the tax.

This decision, in the opinion of the Retail Merchants' Association, upsets previous judgments in favor of the retail merchants and this leaves various classes of merchants, including tinsmiths and others, subject to a manufacturers' tax, at the will of the Government. This matter is one of great importance, and subsequent moves will be followed with profound interest by retailers throughout the Dominion.

Funds Diverted by Brenner & Co. Officials

Investigation of Officials of Defunct Metal Firm of N. Brenner & Co. Reveal Large Transactions With Metal Firms in Canada and United States—Many Remittances Unaccounted for and Others in Personal Accounts of Officials

WHAT IS LIKELY to be one of the most fiercely contested and prolonged legal battles known in Toronto courts for some time, is the trial of Nathan Brenner, Myer Brenner, his son and Gordon Blackford, the first two officials and the latter accountant of the defunct firm of N. Brenner & Co., metal dealers, details of whose arrest last year appeared in Hardware and Metal. This concern was formed in July 1918 to take over the business of Nathan Brenner, who had operated as a scrap metal dealer, and the company's activities were greatly enlarged taking in the buying and selling of foreign exchanges and dealing in metals in the markets of the world. An assignment was subsequently made and investigation by the liquidator brought out many serious discrepancies in the firm's accounts in which many metal firms in Canada, United States and other firms were interested as creditors.

The three men named were charged with conspiracy to defraud the creditors and the company itself, and they were also charged with stealing and receiving $700,000. As directors of the firm Nathan and Myer Brenner were charged with falsifying, mutilating and destroying the books and records of the company and making false entries in the books. The accountant was also charged with making false entries.

Many folios were shown by the liquidator to be missing from the books. A ledger account missing was that of Zimmerman & Forshay of Broadway, New York, which firm had in six months transacted $400,000 worth of business with Brenner & Co. Dealings with Clendenning & Co., Baltimore, were not noted in the books. J. W. Milliard, president Wheeling Bronze & Casting Co., Wheeling, W. Va., gave evidence of a transaction with Brenner & Co., in May 1920, when his company had purchased a carload of copper ingots and paid $9,150 for it and this amount never figured in the latter company's accounts. Other firms which had dealings with the Brenner Co. which never figured in the latter's accounts included Columbia Smelting Co., New York; Continuous Casting Co., New Jersey; Frankel Bros. Toronto; Pope Metal Co., Jersey City, N. J.; Mueller Metal Co. In some cases cheques sent by these firms found their way into the private accounts of the Brenner officials.

F. J. PENBERTHY

Manager, Lowe Bros. Ltd., Toronto, who presided at the recent banquet tendered to the Retail Hardware and Paint Dealers' Club of Toronto, by the Paint, Oil and Varnish Club.

Twenty Years Ago

Following items are reproduced from Hardware and Metal of February 1, 1902:—

* * *

By the death of the late H. S. Howland, Toronto loses a venerable and greatly respected citizen. He was not a presumptuous man. He was the contrary. Quiet and unassuming, he went about his business without any blare of trumpets. But he was a man of more than usual ability in the commercial sense and by force of this he won a place in the commercial and financial world such as is attained by few. Besides being head of the wholesale hardware firm of H. S. Howland, Sons & Co., Toronto, and of his extensive flour milling properties at Kleinburg, Ont., he was president of the Imperial Bank and in spite of the 78 years that rested upon him was, up to within three or four days of his death, apparently hale and hearty.

* * *

Ashdown's hardware merchants, Yorktown, N.W.T., have been succeeded by S. G. McKee & Co. A. Doig, hardware merchant, Birtle, Man., has sold out to Taylor & Mitchell.

* * *

The Board of Trade of Berlin, Ont. (Kitchener), elected the following officers for 1902:—President, R. Smyth; vice-president, J. P. Bell; secretary, H. J. Sims; treasurer, E. Smuth, council, S. J. Williams, H. L. Janzen, C. K. Hagedorn, J. U. Clemens, D. B. Detwiler, C. A. Ahrens (jun.), G. Shirk and C. H. Mills.

* * *

Among those elected to the Toronto Board of Trade for 1902 were the following: Members of council, Edward Gurney, Peleg Howland, A. E. Kemp, Miles Vokes.

* * *

W. J. Leed, of London, has disposed of the hardware stock of W. S. Rodgers & Son, Glencoe, Ont., to T. Poole.

* * *

A large number of Hamilton retail merchants gathered to listen to President Rogers of the Toronto Branch, R.M.A., and Secretary Trowern concerning the advisability of forming a branch in Hamilton. It was decided to form a Hamilton branch of the R.M.A.

* * *

The sporting members of the staff of the Sherwin-Williams Co. and the Canada Paint Co. met on the Crystal Rink, Montreal, for a friendly game of hockey, which the former won 4 to 1. Two of the Sherwin-Williams Co.'s Cleveland officials, Mr. Martin, manager of trade sales, and Mr. Ford, advertising manager, who were enjoying their first sight of Canada's national winter sport, felt proud of their team and entertained them to an oyster supper.

* * *

H. J. Clare, of Clare Bros., is succeeding Horace Wilson as manager of the Gurney Stove and Range Co., Winnipeg, at Toronto.

* * *

Douglas Macpherson, of Toronto, has accepted a position with the McClary Mfg. Co., of London, and will represent that firm in southern Ontario. Mr. Macpherson was formerly connected with the Kemp Mfg. Co.

Value of the 1922 O. R. H. A. Convention

A Message From Secretary W. F. Macpherson to O.R.H.A. Members and the Hardware Trade of Ontario

THE VARIOUS reports which will be presented by the officers of the association at the coming annual convention will be the best in our history. Not only that, but the convention and exhibition will be in keeping with this progress, and with our visions of a larger future and more extended sphere of usefulness for the association.

The 1922 convention is a "members" convention, discussion of questions of interest to members, having precedence on the program. We bespeak a large attendance at these sessions, which will start promptly on time, in order to carry out the time schedule on the program.

I recently read an interview given a leading magazine, by Dr. Alexander Graham Bell, the famous inventor, who gave a rule as the basis of all self-education.

The rule was: Observe! Remember! Compare!

Only three words, but they hold the key to a successful business career. Why not profit by the experience of this wonderful inventor, and adopt this rule as a guiding star for the years to come? In your visit to the convention and exhibition, why not begin to train these faculties. "Observe." — The exhibition comprising over one hundred booths filled with the goods you sell, in charge of able demonstrators will give ample scope for profitable observation.

"Remember."—The convention program replete with useful addresses, on extremely live topics, by outstanding business and professional men, will give splendid opportunity to store your mind with new ideas, and higher conceptions of business life, to your lasting betterment.

"Compare."—The opportunity for intercourse with fellow dealers from all parts of the country, conceded to be a most valuable feature of convention work, and active participation in Question Box sessions, will enable you, by means of comparison of the ideas presented, with your own practice, to adapt to your business lines of action which will prove of untold benefit.

Your present business is only building for a larger future, and in order to give your best to that future, take a few days relaxation, which spent at the convention will give added vim and pep to your efforts, and will more than repay you for the time and expense incurred.

Lay your plans now to be one of the big crowd at Hamilton, February 14th to 17th.

Copy of program appears herewith.

(Signed) W. F. Macpherson,
Secretary.

Program of 17th Annual Convention Ontario Retail Hardware Ass'n

February 14, 15, 16, 17th 1922, at Hamilton, Ont.

TUESDAY, FEBRUARY 14
Royal Connaught Hotel.

8.30 a.m.—Secretary's office, located on mezzanine floor, open for registration of members and guests, distribution of badges and general information.

9.45 a.m.—Convention Hall on mezzanine floor, community singing.

10.00 a.m. (promptly)—Opening session, President Nelson Mills presiding.

Song, "God Save the King."

Invocation, Rev. Dr. W. H. Sedgewick, minister Central Presbyterian Church, Hamilton.

Annual Address, President Mills.

Civic welcome, Mayor of Hamilton.

10.30 a.m.—Question Box, Ed. Wanless, Chatham, presiding.

Special topics for the day, questions 1 to 5, inclusive.

11.00 a.m.—The maintenance of established resale prices on well advertised products, H. J. Haire, The Alabastine Co., Paris.

11.30 a.m.—How dealers may successfully advertise, L. R. Green, advertising manager Tucketts, Limited.

12.00 a.m.—Appointment of convention committees and introduction of new business by members.

12.30 p.m.—Adjournment.

1.00 p.m.—Opening of hardware exhibition at the Armouries, John St. North. Hours, 1 to 10 o'clock.

During the afternoon, only merchants and ladies accompanying them will be admitted to the exhibition. These hours every day are reserved for business intercourse between exhibitors and those why buy to resell or use the products exhibited.

Members and their ladies require no admission tickets, their badges are credentials at all hours.

Non-members and other buyers will be provided with "Merchant Tickets" by exhibitors and by secretary.

7.00 p.m.—Exhibition open to the public. Children unaccompanied by parents not admitted. Music provided both afternoon and evening.

10.00 p.m.—Closing hour.

WEDNESDAY, FEBRUARY 15

8.30 a.m.—Secretary's office open on mezzanine floor of hotel.

9.15 a.m.—Community singing.

9.30 a.m. (promptly)—Convention Hall, Question Box, George E. May, Toronto, presiding. Topics for the day, Questions 7 to 12 inclusive.

10.30 a.m.—Reports of officers and committees. Treasurer's report; Secretary's report; Auditors' report.

11.00 a.m.—The banker and the retailer, J. P. Bell, General manager Bank of Hamilton.

11.30 a.m.—Hardware mutual fire insurance, C. L. Clarke, Winnipeg, Canadian manager, Canadian Hardware & Implement Underwriters.

12 a.m.—F. J. Penberthy, Lowe Bros., speaking on "Business Disease."

1.00 p.m.—Hardware exhibition at the Armouries. Afternoon for buyers and representatives of business houses. Evening open to the public.

7.00 p.m.—Association banquet for ladies and men, Royal Connaught Hotel. Tickets, $2.50 each. John D. Wells, Buffalo, managing editor "Buffalo Times", will speak at the banquet. Subject, "Whoa," (full of wit and humor.)

Tickets should be secured at secretary's desk not later than Wednesday noon, if possible.

THURSDAY, FEBRUARY 16

9.15 a.m.—Convention Hall, Community singing.

9.30 a.m. (promptly)—Question Box, H. N. Joy, West Toronto, presiding. Topics for the day, Questions 12 to 18, inclusive.

10.00 a.m.—H. E. Mihell, executive member "Save the Surface" Campaign.

10.30 a.m.—Prof. W. C. Clark, director of courses in commerce, Queen's University.

11 a.m.—J. R. Shaw, Vice-President Canadian Manufacturers' Association.

12.00 a.m.—The association price book, introduced by secretary. Open discussion by members.

12.30 p.m.—Adjournment.

1.00 p.m. to 6.00 p.m.—Hardware exhibition at Armouries open to buyers and dealers.

6.30 p.m.—Complimentary banquet tendered by the Hardware Manufacturers of Hamilton.

7.00 to 10.00 p.m.—Exhibition open to the public.

FRIDAY, FEBRUARY 17

9.15—a.m.—Convention Hall Community Singing.

9.30 a.m.—Question box. Topics for the day. Balance of Questions.

10.00 a.m.—Reports of committees.
Resolutions.
Nomination of Officers.
Election of Officers.

Unfinished business.

10.30 a.m.—Visit new factory of Libbey Owens Sheet Glass Co.

1.00 p.m.—Visit Hardware Exhibition, finish buying and file buyer's cards with the Secretary at booth No. 99 or else mail it to him at Prescott, Ont.

QUESTION BOX DISCUSSION

1. How closely should we follow declining markets in adjusting our selling prices?
2. Are the Jobbers as prompt as they should be in meeting the declining market?
3. What shall we do with wage question as the high living costs decline?
4. How can the cost of doing business be cut and maintain service?
5. What new lines did you add during 1921, that have proved profitable?
6. How many dealers present, pay a bonus on sales by Clerks?
7. Could not active steps be taken by this Association to prevent Wholesalers from doing a Retail business?
8. What is the best way to get results from advertising folders etc., as furnished by manufacturers?
9. How much should a dealer pay for goods he takes out of stock for his own use?
10. What should properly be included in over-head Expenses?
11. What is the average wage paid, Clerks, Tinsmiths, Plumbers? Have any reduced wages yet?
12. Has anyone definite information regarding workshop in connection with store? Does it pay?
13. What is the best way to handle slow accounts without offending customers?
14. What is the average percentage of loss on credit accounts?
15. Have any members successfully turned a credit business into a cash business? How was it done?
16. In changing credit to cash business would it be advisable to allow monthly accounts to telephone customers, and to customers who are building or painting?
17. How do you proceed to collect tough accounts?
18. What experience have dealers present had in handling auto supplies, tires, etc., in a small town? Do they find it profitable, or is most of the business going to garages? If Hardware dealers get bulk of the business, how do they do it?
19. What are the advantages or disadvantages of marking selling prices in private code?
20. Why are cheap platform scales still, many times the pre-war price?

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

Markets at a Glance

REDUCTIONS in price continue to supply the feature on the current hardware markets. Developments of this nature now recorded cover such products as bar iron and steel, certain makes of woodenware, miscellaneous wire nails, grindstones, Heller's rasps, and brass and copper wire. A revised list has been adopted on range boilers, with discounts quoted on the standard and extra-heavy weights. Further declines now appear on cream polishing and certain grades of white cotton wastes. Other reductions reported on the current markets include fuel oil, japanned steel shelf brackets, both japanned and galvanized clothes line pulleys, wood dash churns and the White mop wringers. Reduced prices are announced in certain quarters on roller skates for Spring trade.

Owing to the recent recessions on the raw cotton markets, some lowering of quotations on such cotton products as sash cord, cotton rope, wrapping twines and candle wick, is looked for in certain quarters. This development has already been recorded in American centres, and conforms to the price advances made on these products when corresponding increases appeared on raw cotton. Fair trade is recorded in boiler tubes, while a few brighter spots are reported in the sheet markets, but general conditions in the steel industry are typically seasonal, with only moderate business available. Scrap materials are generally easier, with slight price changes on copper grades. Business in general is described as quiet, with improvement being anticipated. Wholesalers report shipments of early Spring lines and a gradual increase in volume is expected to become evident as the season progresses.

Montreal Markets

MONTREAL, February 2.—Price recessions continue to feature the hardware markets, and important lines are again shown with revised quotations this week. Range boilers are now quoted at list prices with a discount, where formerly net quotations were given. The standard weight boilers are now quoted less 50 per cent., extra heavy at 40 per cent. off new list prices, which brings the smaller boilers down in price, while the larger sizes are advanced. The 30-gallon boiler's net price remains at $8.75. A general revision is also made in pipe fittings, where lower prices are announced on practically all kinds through changing of discounts. Net prices on pound goods, with the exception of Class A, are also reduced. A further reduction is given on cream polishing waste, also on the higher qualities in white. Lower grades remain unchanged. Sectional sash weights have new lower prices, this bringing the quotations on these to a more uniform basis with solids. Wrought steel butts show a revision on the various numbers, some lines showing a slight reduction while others are practically unchanged. Heller's rasps are now quoted at less 65 per cent., while grindstones are reduced 50 cents on all weights and sizes. Ingot metals continue to display a softer tone, with slightly easier quotations appearing on some metals on the local market.

HIGHER QUALITY WASTES RECORD LOWER PRICES

Montreal.

There is a further reduction announced in the prices of the higher grades of cotton wastes, cream polishing being lowered one cent per lb., and the three qualities of white are now quoted one-half cent lower. Other lines, also wool packings and wipers are unchanged in price. The cotton market is now said to be somewhat steadier, although an easier tendency has crept in in recent weeks. Dealers now look for little further change in quotations, as prices are now well down in line with productive costs and raw materials. Following are revised prices;

COTTON WASTE—

Cream polishing, 18c.

White, XXX, 16c; XX grand, 15c; XLCR, 14c; X Empire, 13c; X Press, 11½c.

Colored, Fancy, 13½c; Lion, 12c; Popular, 9c; Keen, 7½c.

Wool Packing, Arrow, 25c; Axle, 22c; Anvil, 18c.

Dominion Wipers, White cotton, 20c; colored, 14c.

SLIGHT REDUCTION ON SECTIONAL SASH WEIGHTS

Montreal

A slight reduction is recorded in the quotations on both one pound and one-half pound sash weights, this bringing the differential between solids and sectionals to a more uniform basis. One lb. sections are now quoted at $3.25 per 100 lbs., half lb. at $3.50. Solids remain unchanged at $3.00 per 100 lbs.

QUOTATIONS ON WROUGHT STEEL BUTTS ARE REVISED

Montreal.

Through a revision in discounts, quotations on the various lines of wrought steel butts show a slight reduction, although some numbers remain unchanged. Following are revised discounts;

BUTTS—

No. 840	Less 10 per cent.
No. 800	Net
No. 838	10 per cent.
No. 808	plus 10 per cent.
No. 804	17½ per cent.
No. 802	Net
No. 810	plus 25 per cent.
No. 814	plus 20 per cent.

GRINDSTONES NOW RECORD EASIER QUOTATIONS

Montreal

A reduction of 50 cents per 100 lbs. is made in the quotations on grind stones in the various weights and sizes. Following are new prices;

GRINDSTONES—

Under 40 lbs. weight.	Per cwt.
Smaller than 2" face	$4 75
Two-inch and over	4 00
40 to 80 lbs. weight.	
Under 2" face	4 25
Two-inch and over	3 75

HELLER'S RASPS NOW 65 PER CENT OFF LIST

Montreal

New lower prices are given on Heller's rasps, through revising the discount to 65 per cent. off list prices.

EASIER PRICES ANNOUNCED ON PIPE FITTINGS

Montreal

Through a revision in discounts, practically all kinds of pipe fittings are reduced in price. Cast iron fittings are now quoted at less 30 per cent., formerly being less 25 per cent. On the other cast and malleable fittings the reduction varies from approximately 5 to 10 per cent. Class A in pound goods is the only line showing an advance in price, quotations now being one cent per pound higher. Class B and C are both slightly reduced. Following are revised prices and discounts;

FITTINGS—	
Cast iron fittings	30%
Bushings, cast	32%
Do., malleable	32%
Flanges	40%
Plugs	30%
Flange unions	30%
Malleable unions	47%
Dart unions, black	33%
Do., galvanized	13%
Nipples, ⅛ to 4 in, close and short..	50%
Do., long	60%
Do., 4½ to 8 in., close and short....	40%
Do., long	50%
Couplings, 4 in. and under	30%
Do., 4 in. and longer	10%

POUND GOODS—	Black.	Galv.
Class A	0 54	0 67
Class B	0 20	0 28
Class C	0 13	0 20

ROOFING NOW REGISTERS FAIR AMOUNT OF ACTIVITY

Montreal.

Roofing manufacturers report a fair amount of activity in booked orders for later delivery. There is the usual hesitancy on the part of many dealers in placing their orders until the actual consuming demand is apparent, and for this reason dealers look for a particularly busy season after the weather opens in the later months of Spring. Quotations on both roofings and papers are remaining at the revision at the beginning of the year, with the undertone of the market stated to be very steady at present.

NEW LIST PRICES ADOPTED ON RANGE BOILERS

Montreal

A new standard list on range boilers is now issued, list prices quoted with a discount, where formerly net prices only were given. Manufacturers state that in future list prices will remain at set figures, any revisions occurring to be made through the changing of discounts. Present discounts are 50 per cent. for the standard boiler, and 40 per cent. for the extra heavy in all sizes. These new prices are really a revision, as some of the smaller boilers in standard weight are reduced, while larger sizes are advanced in price. The 30 gallon boiler, however, remains unchanged at $8.75 net. In the extra heavy, all the better selling sizes are shown at reduced figures, and only the very large boilers show increased quotations. The amount of reduction varies on the different sizes, some being of minor proportions, while others show a substantial decline. Although at the moment the new quotations are not yet adopted by all concerned, it is expected that in the next few days all dealers will adhere to these revisions, and hope is expressed that the market will now settle down with uniform prices quoted in all quarters. Following are list prices and discounts;

RANGE BOILERS—	
5-gallon	$ 13 50
12-gallon	14 00
18-gallon	15 00
25-gallon	16 50
30-gallon	17 50
35-gallon	20 50
40-gallon	22 75
52-gallon	38 00
66-gallon	60 75
82 gallon	74 00
100-gallon	103 00
120-gallon	117 00
144-gallon	164 00
168-gallon	187 00
192-gallon	210 00

Discounts, Standard weight, 50 per cent. Extra heavy, 40 per cent.

SLIGHTLY EASIER TONE IN LEAD PRODUCTS

Montreal

The continued easier trend of metals in primary markets has now reflected to an extent on the finished lead and zinc products, although up to the present quotations are locally unchanged. Previous to the past two or three weeks, the undertone of these products was strengthened considerably by the firmer tone in the ingot markets in general, but with the subsiding, an easier tone has crept into the market, which if continued for any length of time will, according to dealers, produce lower prices. Only a limited amount of business is yet in evidence, this also tending to further weaken the situation. Unchanged prices are as follows:

LEAD AND ZINC PRODUCTS	
Lead pipe, per 100 lbs.	12 50
Lead waste, per 100 lbs.	13 50
Note—Lead pipe is subject to a discount of 10 per cent.	
Lead traps and bends	10% off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10½
Lead sheets, 3 to 3* lbs., sq. ft., lb.	$ 10¼
Do., 4 to 8 lbs., sq. ft.	0 09½
Cut sheets ¼c lb. extra, and cut sheets to size, ¼c lb. extra.	
Solder, guaranteed, lb.	0 28½
Do., strictly, lb.	0 26½
Do., commercial, lb.	0 23½
Do., wiping, lb.	0 24½
Do., wire, lb.	0 32½
Zinc sheets, casks	0 11½
Do., broken lots	0 12

SOIL PIPE AND FITTINGS AT UNCHANGED DISCOUNTS

Montreal

Quotations on both soil pipe and fittings are unchanged, discounts remaining at former figures. Sales are still limited to smaller orders, such as is required for the present amount of building construction now under way. Although any change taking place in prices is expected to be in the upward direction, there is no present indication of a revision. Following are exsting quotations;

SOIL PIPE—	
2 and 3 inch	47½%
4 inch	50%
5 and 6 inch	47½%
Fittings—	
2 to 6 inch	50-10%

IMPROVEMENT LOOKED FOR IN CORRUGATED SHEETS

Montreal

Current business in corrugated sheets remains at a low ebb, but end of the quiet period is in sight according to local dealers. The middle of February usually brings a revival in trade for these sheets, and this year should be no exception, considering the low dealer stocks in all sections. Quotations remain unchanged at recent revision as follows;

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 16 gauge	16 50

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins., 75c a square extra.

BAR IRON PRICES REMAIN AT RECENT DECLINE

Montreal

Local quotations on bar iron and steel are this week unchanged, following the reductions recorded last week. There is again a variation existing among the jobbing houses, the quotations on common bar iron ranging from $2.55 to $2.75 per hundred pounds, with the same proportion appearing on the other grades. The reason for this is that last week some jobbers announced a reduction, while others maintained their former prices because of no actual change in replacement costs. However, there was a slight recession in prices at primary centres, but not to the extent that would cause any marked change in the local market, and the situation seems to be that while some recognized these lower quotations by announcing a slight reduction, others apparently ignored it. There is little change in the movement of these lines, business remaining seasonably quiet, and orders for small quantities only coming to hand as yet. Dealers however, look for a gradual improvement in the coming weeks, the month of February usually commencing the more active period. Following are prices more generally quoted.

Common bar iron, 100 lbs.	2 65
Refined iron	4 15
Irish finish machinery steel	2 70
Mild steel	2 65
Single reeled machinery steel	4 75
Band steel	2 65
Spring steel	4 25
Sleighshoe steel	2 65
Tire steel	2 85
Toe caulk steel	3 55
Harrow tooth steel, per lb.	2 80
Mining tool steel, per lb.	0 21½
Black Diamond tool and cast steel, per lb.	0 21½

NOTE—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

IMPROVEMENT LOOKED FOR IN SHEET MARKETS

Montreal.

Business in the various lines of sheets is still of a limited nature, but not unusually so for this season. In fact, sales seem quite satisfactory to dealers who still anticipate a revival in business in the not far distant future. With the month of January now past, the pre-

sent month should bring a gradual improvement. At primary sources much the same conditions prevail at present but here too a higher rate of output during the next few months is looked for. Quotations locally are nominally unchanged, but the range in prices is still necessarily quoted because of the variations among the different jobbing houses. It is thought by some that quotations will reach a more uniform standing when business becomes more active in the following months, as at present exceptionally low prices are offered in some quarters to obtain orders, especially if of a large size. Following are unchanged local prices.

BLACK SHEETS

10 gauge	4 00	4 50

BOILER TUBE QUOTATIONS NOMINALLY UNCHANGED

Montreal.

A fair movement continues in boiler tubes, repair work, constituting almost the entire demand. Quotations are nominally unchanged, with a price concession, however, offered if any attractive business is in sight. For small orders, following are the most general quotations;

BOILER TUBES—	Seamless	Lapweld
1 inch	24 70	.....
1¼ inch	24 50	.....
1½ inch	24 00	.....
1¾ inch	26 00	26 00

3 inch	40 00	34 75
3½ inch	52 50	34 75
4 inch	65 00	44 00

EASIER TENDENCY STILL EVIDENT IN METAL MARKETS

Montreal

The trend of the metal markets continues in a downward direction, with tin and copper showing slightly easier quotations on the local market. Other lines are for the present unchanged, but the softer tone is evidenced in the market in general. Lead continues the steadiest metal on the list, and demand in this metal should from now on show a gradual increase.

TIN—The London market continues its decline for the most part of the week, but in the past two days it strengthened a little. Notwithstanding this slightly better tone, local quotations are recorded a little easier at 36 cents.

COPPER—This metal again records lower levels both on the London and New York markets, and although present prices are considered very reasonable, it would seem the bottom has not yet been reached. Local prices are slightly lower, with electro now quoted at 17¼ cents, casting 17 cents.

LEAD—Lead has been fairly steady all week, and is without doubt the most staple metal on the markets. A gradual improvement in consumption is now looked for, and the future of this metal shows more promise than any others at the moment. Quotation is unchanged at 7 cents.

SPELTER—London market displayed a little more strength at the end of the week, but East St. Louis continues to decline. It is still said that a reasonable amount of buying would stiffen prices. Local quotation remains at 7½ cents.

ANTIMONY—Antimony fails to show much activity, while the trend of the market is undoubtedly in the downward direction. Local prices are unchanged, Chinese being quoted at 6¾ cts., high grade English at 7¾ cts.

ALUMINUM—Aluminum remains the quietest metal on the list, with little or no interest shown on the local market. Quotation is unchanged at 26 cents.

Toronto Markets

TORONTO, February 2.—Another lengthy list of current price revisions is composed mostly of reductions on various hardware commodities. Lower levels on bar iron and steel follow the general sagging market on these grades reported in last week's issue. An easier base price is also recorded on brass rods, while brass and copper wire are slightly reduced. There has been a new price list adopted on range boilers, with both the standard and extra-heavy weights being quoted at a discount. Another downward revision appears in the current price on fuel oil, and some lines of woodenware, such as bake boards, ironing boards, step, single and extension ladders, register a similar change. Another decline is noted on cream polishing and certain grades of white cotton wastes. The discount on miscellaneous wire nails is also revised again. Owing to the failure of the raw cotton markets to maintain the higher levels recorded some few months ago when corresponding price advances were made on the majority of cotton products, it is surmised in some quarters that lower quotations on cotton rope, wrapping twines, sash cord and candle wick may develop in the near future. Changes of this nature have already appeared in certain American centres. Scrap materials are now in an easier position, with an easing of prices noted on copper grades.

BRASS AND COPPER WIRE SLIGHTLY REDUCED

Toronto

A decline of between 2 and 2½ per cent. has been announced by the manufacturers in prices on brass and copper wiring. This change reflects the recent easing of exchange rates and reduction in similar costs.

MAY BE LOWER PRICES ON COTTON PRODUCTS

Toronto

Owing to the recent easier trend in raw cotton markets, some corresponding lowering in prices on cotton cordage and similar products is anticipated in certain quarters. It is noticeable that quotations on wrapping twines, seine twine and candle wick have recently been reduced by some American manufacturers , and it is considered possible that this easier tendency may be reflected on the domestic markets on such products as wrapping twines, cotton rope and sash cord, in the near future.

FURTHER REDUCTIONS IN FUEL OIL QUOTATIONS

Toronto

Another reduction in the current price of fuel oil reflects the further easing of crude oil on the primary markets. The extent of the reduction is approximately a half-cent per gallon on the different quantities. Following are the revised quotations:

FUEL OIL—	
In barrels, per gallon	$0.10.40
In tank wagons, per gallon	0.09.40
In tank cars, per gallon	0.08.40
Do., countersunk	30%

EASIER PRICES ON SOME LINES OF WOODENWARE

Toronto

There have been some price revisions announced by the manufacturers on certain lines of woodenware, such as bake boards, ironing boards, step, single and extension ladders, and also clothes horses. These show varying reductions on the different products, according to price lists recently issued. The revised quotations are contained on the current market pages.

NEW LIST ADOPTED ON RANGE BOILERS

Toronto.

For the purpose of placing the market on a more satisfactory basis for Spring trade, manufacturers now advise that a new standard list on range boilers has been adopted. This shows a complete revision from the prices which have recently been in effect but a varying discount quotation is announced on the standard weight and extra-heavy range boilers. The following is the new price list, together with discounts as announced by certain local manufacturers and distributors:

RANGE BOILERS—

Size	List Price
5 gallon	$13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 50
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 50 per cent.
Extra heavy, 40 per cent.

EASIER BASE PRICE NOTED ON BRASS RODS

Toronto.

A recession of one cent per lb. in the base price on brass rods has appeared in certain quarters, with quotations covering other copper and brass products remaining unchanged. Copper in the ingot stage has recorded slightly easier levels with these developments attracting considerable attention in view of the recent firmness reported in these markets. The announcement that some copper mines are contemplating a resumption in operations is considered one of the contributing factors in the easier tone. The fluctuations, however, are not considered of sufficient extent to reflect similar changes in prices on these products in general.

BRASS—	
Sheets, base, per lb.	$ 0 23
Tubing, base, per lb.	0 25
Rods, base, per lb.	0 20
COPPER—	
Rods, base, per lb.	0 28
Soft sheets, plain, 16 oz. and heavier, lb.	0 30
Do., plain tinned 16 oz. and heavier, lb.	0 37
Do., polished and tinned 16 oz. and heavier, lb.	0 42
Tubing	0 29

LOWER PRICE LEVELS ON BAR IRON AND STEEL

Toronto.

As announced in the last issue of Hardware and Metal easier prices have now appeared on bar iron and steel. The sagging quotations recently noted resulted in lower levels being generally adopted, a condition which is attributed to the quiet season coupled with the resultant price shading for moderate sized orders. The extent of the reduction amounts to approximately 15 cents per 100 lbs. on different grades, although in some cases a lowering of 25 cents is noted. Following are the revised levels:

IRON AND STEEL—	
Mild steel bars base	2 85
Mild steel bands, 3-16 in. base	3 35
Bar iron, base	2 85
Angle iron, base	2 95
Horseshoe iron	3 60
Tire steel	3 35
Spring steel	5 50
Sleigh shoe steel	2 85
Hoop steel	3 75
Norway iron	12 50
Toe caulk iron	4 00
Crucible cast sheet steel	30 00
Mining drill steel	18 50
Cast tool steel, high grade	31 00
Cast tool steel, medium	18 00

FURTHER DECLINE NOTED ON WHITE WASTES

Toronto

A further reduction has been announced on some grades of white cotton wastes, and also on the cream polishing. The extent of this additional decline is one cent on the cream polishing, and one half on the finer grades of white waste. This change is attributed to the condition of the raw cotton markets, and places prices on these products on a more uniform basis. Following are the revised quotations:

WASTE—	
Cream, polishing	0 18
White, XXX	0 18
XX	0 16
X	0 15
XC	0 14
XXX, extra	0 16
XX, grand	0 15

Fancy,	0 13½
Lion	0 12
Standard	0 10½
Popular	0 09
Keen	0 07½

Above lines subject to trade discount for quantity.

REVISED DISCOUNT ON MISCELLANEOUS WIRE NAILS

Toronto

A revision has been announced in the discount on miscellaneous wire nails, the current quotation being 75 per cent. off list, compared with the previous discount of 70 per cent.

SLIGHT DISCOUNT CHANGE ON SOME STEEL BUTTS

Toronto

Following are the revised discounts on certain makes of wrought steel butts, outlined in last week's issue of Hardware and Metal.

BUTTS— Wrought Steel.	
No. 840	Less 10 per cent.
No. 800	Net
No. 838	Less 10 per cent.
No. 808	Add 10 per cent.
No. 804	Less 17½ per cent.
No. 802	Net
No. 810	Add 25 per cent.
No. 814	Add 20 per cent.

GUELPH IS NOW ON F. O. B. SHOVEL LIST

Toronto.

It is announced that Guelph has been added to the list of f.o.b. points for spades and shovels.

NET PRICES ON HALTER AND TIE-OUT CHAINS

Toronto.

The revised list prices on halter and tie-out chains, referred to in last week's market reports, are as follows:

TIE OUT CHAINS—	Per doz.
No. 1 by 30 feet,	$8 40
No. 1 by 50 feet	15 00
1-0 x 30 feet	8 75
1-0 x 40 feet	12 00
1-0 x 50 feet	15 00
HALTER CHAINS (American)	Per doz.
4½ feet by 1-0	$ 4.70
4½ feet by 2-0	5 50
4½ feet by 3-0	5 85
4½ feet by 4-0	6 50
6 feet, by 2-0	6 85
6 feet by 1-0	5 75
6 feet by 1	5 25
6 feet by 2	4 85
6 feet by 3	4 40
6 feet by 4	4 10
6 feet by 5	3 65
6 feet by 6	3 40
6 feet by 7	3 35

LEAD MATERIALS AWAIT BASIC MARKET TRENDS

Toronto

No further change has been made in quotations of the various lines of lead products since the repeated advances in solder quotations a few weeks ago. If the marked strength had continued in metals on primary centres, changes would no doubt have developed in other lines besides solders, but a slightly easier trend is now reported in ingot circles, although dealers state not to the extent as to cause any immediate lower prices in the finished products. For the present the market on a whole is fairly steady apparently awaiting developments in basic materials. The market is seasonably dull, but with the turn of the year, more activity is looked for in following weeks. Prevailing quotations are as follows:

LEAD AND ZINC GOODS—	
Lead pipe, list, per lb.	0 12½
Lead waste pipe, list, per lb.	0 13½
Do., over 8 in., list, per lb.	0 14½
Lead pipe is subjected to a discount of	10%
Lead traps and bends	10%
Lead sheets, 4 to 6 lbs. sq. ft. in rolls, lb.	09½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, per lb.	0 32½
Do., strictly, lb.	0 24½
Do., commercial, lb.	0 22½
Do., guaranteed, lb.	0 27½
Do., wiping, lb.	0 22½
Zinc sheets, per lb.	0 12

SOME BRIGHT SPOTS IN SHEET MARKETS

Toronto.

Moderate trade is the keynote of the current sheet markets. While a better feeling is generally in evidence, and in some cases a larger volume of inquiry is reported, yet there has developed very little real improvement in business. The month of January has been described by distributors as typical of the average winter season, and while it has been up to expectations, yet that statement carries very little consolation with it. The fact that many industries

—which in normal times required a fair amount of sheets and plates—are not now operating at anything like a moderate rate of capacity, reflects upon conditions in the sheet markets. The demand for stove pipes, cooking stoves, ranges and furnaces, has generally been of a restricted nature this season, and manufacturers of these products have in turn confined their purchases of raw materials.

Prices are generally unchanged, but a few bright spots have been noticed on the horizon. Dealers state however, that close figuring is required in order to land any current business.

BLUE ANNEALED—		
10 gauge, base	3 75	4 50
12 gauge	3 80	4 55
14 gauge	3 85	4 60
16 gauge	3 90	4 65

SCRAP MATERIALS NOW IN EASIER POSITION

Toronto.

Scrap metals are not so well placed this week. Demand for copper scrap has again diminished. Prices on copper scrap have contracted, dealers bidding no more than 10.75c. Yellow brass grades are also lower. Comparatively little is being done in white metals.

Iron and steel scrap grades are quiet, but prices are resisting attempts by melters to obtain concessions.

The following are averages of dealers' buying prices for large quantities.

Gross Tons— Scrap Iron		
Heavy melting steel (Hamilton)	$11 50	$12 00
Borings and turnings	2 50	3 50

Lumbermen's rubber boots	1 50	2 00
Auto tires	0 50	1 00
Solid tires	0 75	1 25

ANOTHER REDUCTION IN AUTO TIRE PRICES

Just as Hardware and Metal goes to press, another reduction in automobile tire prices is reported. The extent of the decline is announced as varying on the different grades, and manufacturers state that this places the tire market on a rock-bottom basis for future trade. Following on the recent downward revision in tire quotations, the current change indicates the marked tendency to lower levels in this industry, and reflects the declines in the rubber markets, as well as easier levels in cotton and other contributory cost elements.

MORE INQUIRIES REPORTED FOR PIPE FITTINGS

Toronto.

Quotations on pipe fittings are generally being maintained at the recently revised levels, with current business of a spasmodic nature. The anticipated development of spring business has not yet materialized, distributors admitting that it is early in the season for any marked improvement. There has been reported, however, a larger number of inquiries, but whether this is due to potential business, or is a result of the many recent price changes, is hard to determine. Following are the current prices, with no change having been recorded as yet on Dart unions, or wrought nipples and couplings:

PIPE FITTINGS—	
Cast iron fittings	30%
Plugs, cast iron	30%
Do., solid	30%
Do., countersink	30%
Bushings, small	32%
Bushings, cast	32%
Unions, ¼ in. to 2 in.	47%
Unions, ⅛ in., 2½ to 4 in.	47%
Flanged unions	30%
Flanged fittings	30%
Dart Unions, blk., ⅛ to 2 in.	33½%
Do., ⅛ in., 2½ in. and larger	23%
Do., galv., add to black	30%
Nipples, blk., and galvd. ⅛ to 4 in., close and short	50%
Do., 4½ in. and larger	40%
Do., long, ⅛ in. to 4 in.	60%
Do, 4½ inch and larger	50%
Do., running thread	30%
Couplings, 4 in. and under	30%
Do., 4½ in. and larger	10%

MALLEABLE FITTINGS—

	Black	Galvanized
Class A	0 54	0 67
Class B	0 20	0 28
Class C	0 13	0 20

FAIR TRADE RECORDED IN BOILER TUBES

Toronto.

Trade in boiler tubes is described as fair at present, with one distributor stating that it was as good as could reasonably be expected at this time of the year. There has been some improvement in demand evident during recent weeks, and according to the general opinion in these markets, current business has not been at all bad. Prices are generally unchanged, with the following list governing all moderate orders. It is admitted, however, that some shading of these quotations has appeared where an unusually attractive inquiry is made:

BOILER TUBES—

	Seamless.	Lapweld.
1 inch	26 00	.....
1¼ inch	27 25	.....
1½ inch	26 25	.....
1¾ inch	29 75	25 00
2 inch	28 00	22 00
2¼ inch	32 00	25 00
2½ inch	40 00	27 00
3 inch	44 00	35 00
3½ inch	60 00	40 00
4 inch	75 00	50 25

MAINTAIN RECENT NEW DISCOUNTS ON TROUGH

Toronto.

Quotations on eavestrough and conductor pipe remain at the recent easier levels, with business in these products naturally restricted at this season of the year. Weather conditions offset any activity in such construction work where trough and piping are required, but with the recent price developments placing quotations on a moderate basis for

Weekly Hardware Letter from Hamilton, Ont.

A Weekly Market Letter from Hamilton, Ontario, dealing with the iron and steel trade and manufactured products of interest to the hardware and metal trade as a whole, will be a feature of Hardware and Metal commencing with next week's issue (February 11). It will be somewhat along the same line as the Pittsburg letter which now appears each week from our Pittsburg correspondent, and it will be designed to provide readers with authoritative data concerning movements in this important centre of production and trade, and thereby supplement the extensive service on markets which is provided Hardware and Metal readers.

spring trade, future improvement is generally looked for in these markets. Following are the current levels and discounts:

TROUGH (Eave)—

O. G. Square Bead and half round. Size in girth:

Size	Per 100 ft.
8 in.	15 90
10 in.	17 70
12 in.	21 20
15 in.	28 80
18 in.	36 50

Less 70 and 10 per cent.

PIPE (Conductor)

Plain, round or corrugated.

	Per 100 ft. in 10 ft. lengths.

6 inch, list	29 00

Less 60 per cent.

IMPROVEMENT LOOKED FOR IN COMPRESSION GOODS

Toronto.

Quotations on compression goods generally are being maintained at the recently revised discounts, with trade of a quiet nature at this season of the year. Dealers are looking forward to improved business conditions with the advent of Spring, and current buying is quiet with little variation having been recorded.

COMPRESSION GOODS—

Compression work, standard	43%
Fuller work, standard	30%
Bath cocks, compression	32%
do., Fuller	25%
Flat way stop and waste cocks, standard	54%
Round-way stop and waste cocks, standard	46%
Brass steam cocks, standard	40%
Globe, angle and check valves, standard	25%
J. M. T.	20-10%
J. M. T. C.	25-10%

No. 0 and 1, Fuller pattern	30%
Quick opening No. 3633	43%

CORRUGATED SHEETS AT RECENT NEW LEVELS

Toronto.

The corrugated sheet market reflects the trend of developments in primary sheet circles and quotations remain at the recently revised levels. Conditions are described as quiet, at present, but with general expectations prevailing for improvement in the early spring. The discount of 10 per cent. is now in effect, with the list prices remaining unchanged as follows:

CORRUGATED SHEETS	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 00

Less 10 per cent.

Lighter than 24 gauge and wider than 24 ins., 75c a square extra.

London Markets

LONDON, Feb. 2.—Price revisions to lower levels continue to be apparent from week to week and included among the products affected on the current hardware markets are: mop wringers, wood dash churns, clothes line pulleys, roller skates, wrought staples, japanned steel shelf brackets, wrought steel and nickle-plated butts, and electric weld coil chain. The discounts on the revised capped goods list are identical with the recent new tack list. Increased quotations are recorded on both turpentine and linseed oil.

Collection reports continue good, and current trade is described as slightly improved in volume, with seasonal lines moving fairly well.

PRICES ADVANCE ON LINSEED OIL MARKETS

London, Ont.

The advance in the linseed oil markets attracts particular attention this week. This change is attributed to a combination of factors. The primary markets are described as considerably firmer, while there has been a slight increase in the flax seed prices. An improvement in the current demand served to stimulate interest in this product. The total increase amounts to six cents per gallon from the previous levels, and following are the new prices:

LINSEED OIL—	Raw.	Boiled.
1 to 2 bbls., per gal.	0 90	0 93
3 to 5 bbls., per gal.	0 89	0 92
6 to 9 bbls., per gal.	0 87	0 90

Less barrels, add 15 cents gal.

ANOTHER ADVANCE IN TURPENTINE QUOTATIONS

London, Ont.

Further advances in the price of turpentine are recorded in many quarters, this change reflecting the higher levels attained on southern producing centres. The extent of the local advance is five cents per gallon, thus bringing the following quotations into general effect:

TURPENTINE—	Imp. Gal.
1 bbl. lots	1 35
2 to 4 bbl. lots	1 34
5 gal. lots	1 50

DISCOUNTS ON REVISED CAPPED GOODS LIST

London, Ont.

The revised capped goods list, which was adopted under date of January 5, 1922, takes the same discount as the new tack list, which is 65 and 25 per cent.

REDUCTIONS ON HEAVY TEE AND STRAP HINGES

London, Ont.

Lower prices are again in evidence on heavy tee and strap hinges, the extent of the reduction being around 10 per cent. Following are the new local quotations:

HINGES—

	Price Per Doz. Pair Tee	Strap
4 in.	1 40	1 70
5 in.	1 70	2 00
6 in.	1 95	2 20
8 in.	2 15	2 95
10 in.	3 60	5 20
12 in.	5 85	6 35
14 in.	6 85	7 50

REVISED NET PRICES ON WROUGHT BUTTS

London, Ont.

Revised lower prices have now been issued on wrought steel and nickle-plated butts. Following are some of the new net quotations on these products:

WROUGHT BUTTS—

Plated Butts

No. 241, antique copper finish, dull brass, antique brass; 2½" x 2½", 30c per pair; 3" x 3", 31½c; 3½" x 3½", 32½c; 4" x 4", 45½c; 4½" x 4½", 65c; 5" x 5", $1.18.

Loose Pin Steel Butts

No. 804—2" x 2", 90c doz. pair; 2½" x 2½", $1.06; 3" x 3", $1.50; 3½" x 3½", $1.94; 4" x 4", $2.63; 4½" x 4½", $3.50; 5" x 5", $4.38.

Narrow Riveted Steel Butts

No. 800—1 in., 32 c doz. pair; 1¼ in., 37c; 1½ in., 50c; 1¾ in., 56c; 2 in., 69c; 2½ in., 81c; 3 in., $1.06; 3½ in., $1.50; 4 in., $2.12.

Light Narrow Loose Pin Butts

No. 840—1¼ in., 48c doz. pair; 1½ in., 50c; 1¾ in., 62c; 2 in., 69c; 2¼ in., 81c; 2½ in., 88c; 3 in., $1.13; 3½ in., $1.60.

LOWER QUOTATIONS NOTED ON COIL CHAIN

London, Ont.

New lower prices are now in effect locally on electric weld coil chain. Following are the revised quotations on this product:

COIL CHAIN—

Electric weld, 3-16 in., 16½c per lb.; ¼ in., 15½c; 5-16 in., 12½c; ⅜ in., 10½c; 7-16 in., 10c; ½ in., 9¾c.

REVISED LOWER PRICES ON SHELF BRACKETS

London, Ont.

A reduction of approximately 10 per cent. has been announced in prices on japanned steel shelf brackets. Following are the revised prices:

SHELF BRACKETS—

No. 140—3" x 4", 80c doz. pair; 4" x 5", $1.10; 5" x 7", $1.75; 6" x 8", $2.05; 7" x 9", $2.40; 8" x 10", $2.75; 10" x 12", $4.05; 12" x 14", $6.40; 16" x 18", $13.80.

REDUCTIONS ALSO NOTED ON WROUGHT STAPLES

London, Ont.

Prices on wrought staples are also reduced this week, the extent of the reduction being in the neighborhood of 10 per cent. The revised quotations follow:

WROUGHT STAPLES—

No. 155—1¼ in., 45c per gross; 1½ in., 50c; 2 in., 65c; 2¼ in., 80c; 2½ in., 90c; 3 in., $1.25; 3½ in., $1.40; 4 in., $2.10.

LOWER QUOTATIONS IN EFFECT ON ZENOLEUM

London, Ont.

Newer lower prices are now in effect on Zenoleum. Following are the revised quotations on this product:

ZENOLEUM—

8 oz. cans, per doz.	3 00
16 oz. cans, per doz.	4 50
1 quart cans, per doz.	6 25
½ gal. cans, per doz.	11 00
1 gal. cans, per doz.	18 00

REDUCED PRICES ANNOUNCED ON ROLLER SKATES

London, Ont.

Roller skates are now reduced in price, in anticipation of spring trade. Following are some of the revised prices.

ROLLER SKATES—	
No. 5 Ball Bearing Wheels, per pr.	2 65
No. 3 Steel Wheels, per pr.	1 10

EASIER PRICE LEVELS ON CLOTHES AND PULLEYS

London, Ont.

Clothes line pulleys, both japanned and galvanized, are quoted lower in price this week. The revised prices are as follows:

CLOTHES LINE PULLEYS—	
Ralston, japd. per doz.	3 20
Ralston, galv., per doz.	3 75

CROQUET SET PRICES FOR SPRING DELIVERY

London, Ont.

New prices for spring delivery on croquet sets show very little variation from the previous quotations. Following are the 1922 season price levels:

CROQUET SETS—	
No. 5 x 8 ball, per set	5 50
No. XA x 8 ball, per set	3 75
No. 7 x 6 ball, per set	2 75
No. 6 x 4 ball, per set	2 15

WOOD DASH CHURNS SHOW PRICE REDUCTION

London, Ont.

Wood dash churns are now quoted lower in price. The new prices recently announced on the 5, 7 and 10-gallon sizes are as follows:

WOOD DASH CHURNS—	
5 gal., per doz.	25 00
7 gal., per doz.	26 50
10 gal., per doz.	28 00

LOWER PRICES APPEAR ON MOP WRINGERS

London, Ont.

Revised quotations which are approximately ten per cent. lower have been announced on the White mop wringers. Following are the new prices on these products:

WHITE MOP WRINGERS—	
No. 1, per doz.	41 00
No. 2, per doz.	28 75
No. 3, per doz.	35 00

MAINTAIN DISCOUNT LEVELS ON PIPE AND TROUGH

Winnipeg

Although revised discounts are quoted on both eavestrough and conductor pipe in the Eastern markets; this change is not yet apparent on the Western markets. Following are the present prices:

	Per 100 ft.
EAVESTROUGH—	
8 inch	$5 48
10 inch	6 08
12 inch	7 29
15 inch	10 13
CONDUCTOR PIPE—	
2 inch	6 69
3 inch	7 70
4 inch	9 72
5 inch	13 77

Winnipeg Markets

WINNIPEG, February 2.—Several more price revisions supply the feature of the current hardware markets, these changes including easier price levels on Beaver board, the Universal line of food choppers, and agricultural wrenches. Lower quotations are also recorded on copper sheets, while a firmer tendency has appeared in both the linseed oil and turpentine markets. Conditions on other primary materials generally remain unchanged, with distributors looking forward to a gradual improvement in trade activity as the Spring season approaches.

SLIGHT REDUCTION ON AGRICULTURAL WRENCHES

Winnipeg

A slight decline is recorded in the prices of Agricultural wrenches this week. Following are the revised quotations.

AGRICULTURAL WRENCHES—	Per doz.
6 inch	5 00
8 inch	6 00
10 inch	7 00
12 inch	9 00
15 inch	12 00

LOWER QUOTATIONS APPEAR ON BEAVER BOARD

Winnipeg.

A reduction in price is recorded on Beaver Board and following are the new quotations:

BEAVER BOARD—	Per 100 ft.
Plain in original bundles	$42 00
Do., in less than original bundles	44 50
Grained in original bundles	45 75
Do., in less than original bundles	48 25

LOOK FOR IMPROVEMENT IN SHEET MARKETS

Winnipeg.

Black and galvanized sheets remain unchanged this week. Prices are considered to be at a low level in comparison with replacement costs. Business locally is not very good in this line, although during the past week a slight improvement has been reported. It is the opinion of several jobbers that sales will gradually increase in the coming weeks. Following are the unchanged quotations:

STEEL SHEETS, BLACK—	
10 gauge	5 70
12 gauge	5 70
14 gauge	5 80
16 gauge	5 90
18-20 gauge	6 30
22-24 gauge	6 35
26 gauge	6 40
28 gauge	6 65
IRON GALVANIZED—	
Premier; Apollo and "Fleur de Lis".	
10¾ oz. or 28 Eng.	8 20
28 Am. or 26 Eng.	7 80
26 Am. or 24 Eng.	7 20
24	7 05
22	7 05
18 and 20	6 90
16	6 75

SHEET COPPER PRICES ON EASIER LEVELS

Winnipeg

A decline in price is recorded on both polished and tinned sheet copper. Planished is now quoted at 56 cents per lb. and tinned at 50 cents per lb.

REDUCED PRICES NOTED ON FOOD CHOPPERS

Winnipeg

A decline in price is recorded this week on Universal food choppers. Following are the new quotations.

FOOD CHOPPERS—	Each.
Universal Line:	
No. 0	$1 45
No. 1	1 70
No. 2	2 10
No. 3	2 85

Pittsburg Markets

PITTSBURGH, February 1.—Demand ITTSBURGH, February 2.—Demand as was expected. The volume of business is hardly larger than in the last week or two of December, and perhaps in some lines it is not as large. The condition is decidedly disappointing. Pittsburgh steel men, noted for their sanguine temperament, are quite dissatisfied with the situation and take an unfavorable view of the future.

It was not a great deal that the mills were looking for, practically no more than a resumption of business at the rate that obtained before the holiday lull, a poor enough rate at that. Here and there business has been picking up, but in other quarters orders are running out and on the whole production of steel is not increasing to any extent.

The tonnage of demand in proportion to productive capacity varies widely in the different products. Easily the best line is tin plate. This is a peculiar commodity among steel products, having a way of being in good demand in years that are "off" as to steel demand in general. Conditions that make business in general poor have a tendency to make tin plate better. The canning crops, for instance, are heavier when labor is plentiful and cheap, while the household demand is good when housewives have not had the capital to put up goods themselves. There has been a very thorough liquidation in stocks of all sorts of goods put up in tin cans, and production this year will be in relation to ultimate consumption.

The tin plate mills ran fairly well in the late weeks of the old year and at the present time they are running at about 75 per cent. of capacity, and this despite the fact that buyers generally are very cautious and are not buying ahead, so that there is room for considerable expansion as the year wears along. It is quite possible that a new record will be made this year for tin plate production, which would mean about 1,500,000 gross tons.

Rail Orders

The Carnegie Steel Company has received a fair batch of specifications against rail contracts, for February and March rolling, and the Gray rail mill,

(Continued on page 58)

Trebles Paint Trade in Two Years

How A Hardware Merchant Initiating Clean-up And Paint-up Movement And Introducing Certain Reforms In His Paint Department Greatly Increased Paint Business—Advantages of Spring Paint-up Campaigns—Early Plans Which Should be Laid

PLANS might be put under way at a very early date having for their object the commencement of clean-up and paint-up campaigns in local communities during the forthcoming spring season. Each year sees additional municipalities go into this matter on a broad scale and the results are highly desirable both to the inhabitants of the town or city and to the merchants who link up with it. Very frequently the merchants themselves are instrumental in initiating the movement.

Just this week Hardware and Metal was advised of the action of a group of retail merchants in a certain Ontario city who are bringing before the local branch of the Retail Merchants Association a recommendation that the retailers set a good example by giving their stores a thorough cleaning up and painting. It is realized that while many of these merchants will gain no business directly by the movement, that all will gain indirectly due to the constant attraction of trade to stores which present a clean appearance. Of course the hardware merchants will get some business in supplying the paint, but it is significant that the merchant who took the lead in making this recommendation was not a hardware merchant, nor a paint dealer.

An Industrial Advantage

There are many advantages of the annual clean-up and paint-up campaign in local communities and it will take little persuasion to get the movement under way. There are hundreds of towns in Canada and the United States which conduct these campaigns in the spring of each year, and, in the case of one city, insurance premiums were reduced $160,000 in a year and fire losses were reduced $800,000. The case of a prominent manufacturer who was anticipating the location of a new factory is also pointed to as evidence of the value of clean-up and paint-up. This manufacturer's decision finally rested between two towns and on investigation he found that city number one had dirty streets and alleys and buildings. Although the inducements otherwise were very material it was decided to turn down this offer for the reason that the citizens were so apparently lacking in self-respect that it was not considered worth while to try to arouse them.

The second city was selected for the plant even though the inducements were not so great. The reason lay in the city's appearance. The streets were clean and the homes and business buildings were well kept, suggesting thrift and self-respect. This is a striking illustration of how one community benefited industrially simply by having a clean appearance.

Every city and town might wisely adopt the plan of having regular clean-up and paint-up periods. The spring season, of course, is the logical time, but in order for the campaign to be permanently effective, the good work must be planned well in advance and perpetuated. The city will be freer from disastrous fires, its merchants will be more prosperous and its people generally will be more receptive toward new ideas tending to raise the community to an even higher plane of development and visitors will always like to pay visits. The health of the community is also better where attention is given to cleanliness.

Other Merchants Interested

There have been outlined such a number of outstanding advantages of a local campaign that the hardware merchant who plans to initiate such a movement locally will have plenty of pointers with which to secure the attention and interest of other merchants. The profits to the hardware merchant who supplies the paint will pay well for any energy spent in getting it under way.

One hardware firm which has successfully developed considerable local trade through the medium of educational effort along the lines of clean-up, paint-up, is now devoting some attention to improving the facilities in the paint department of the store with the idea of assisting customers in the selection of their requirements. The plan has been adopted of selling rooms-full of paint, this means the selling of the various lines required for all the household purposes where complete renovation is to be undertaken. This firm have completely decorated a sample room, and they have found that customers are much more impressed with large actual samples of color combination than they are by looking at paint cans or color cards. Then, too, an experienced painter is kept on hand to visit the homes of paint buyers and show them the best way of applying the finishes they purchase. The business of the paint department of this store has trebled in two years by following out these two plans.

A Sample Room

The sample room merely consisted of a corner of the store which lent itself to the purpose without making it necessary to curtail the display of other lines. The walls were finished attractively with oil paints, giving the appearance of wall paper, and stencils were used for border designs. Customers become enthusiastic over the splendid combinations which could be secured by the use of stencils. In this case the customer pays for the painter's time but it is arranged that the painter merely gives preliminary instructions to customers who wish to save labor costs by doing the work themselves. It has been found that many customers will do much more painting when they do it themselves, but they are reticent

SERVICE

CONFIDENCE

FAIR DEALING

New Agent but Old Friend

"As the Sun is in the Firmament, so is friendship in the world, a most divine and heavenly band."

R. Burton.

What an institution say about themselves is *one* thing—what they actually achieve as recorded by those whom they serve is another.

Three days before this writing we wrote a "New" High Standard Agent asking why, when he had a choice of so many worthy propositions, he elected to represent us. This is his reply:—

"I take pleasure in answering your letter of the 25th, also stating why I became a "High Standard" Agent. I sold your goods while with ———— for 4 years and during that time I watched the way you *looked after* your agents. Your paint always gave satisfaction; your deliveries were good, your Advertising Department was always ready to help us, and we *never had to ask twice* for color cards.

"That's what used to make me 'sore' while working for other firms; they would have lots of paint but nothing to help you sell it with. I watched all these things when you didn't know it and that's the *very reason why I am selling 'Lowe Brothers' High Standard' Paint now.* I nearly forgot to say a word about the Shipping Department, they sure look after me out here. Hoping that 1922 will be your best year, believe me," (*Name on request*).

Talk is *one* thing. Deeds are another.

Lowe Brothers, Limited.

The Brush Department

Sales Opportunities Are Numerous

Brush Department Offers Unique Opportunity For Selling Wide Range of Articles Including Accessory Lines to Fulfill Purpose For Which Brush Is Designed

TOO FREQUENTLY the salesmen in the brush department take it for granted that women customers know all about the various types of brushes provided for household use and that if they want one, they will ask for it. Part of the reason for this attitude is due to the fact that in selling specialized lines such as tools and in selling brushes to the mechanic, the article is frequently selected by the purchaser who already has a knowledge of the purposes for which it was designed. Few housewives however are aware of the great number of uses to which household brushes can be put, nor of the wide range of brushes provided to lesson the drudgery of household labor. Again, when the housewife buys a brush she expects it to be capable of doing several other duties as well. It is generally safe to say that every brush sold to a housewife represents an excellent sales opportunity for some other article which is needed in the cleaning process. By following this plan the merchant will soon come to realize that brushes make an excellent "lead off" item and encourage the purchase of many other lines of hardware. The purchaser of a new floor brush may require a new dust-pan. The purchaser of a floor polishing brush may require some floor wax, etc. The possibilities are unlimited. If the brush department is looked upon as capable of developing trade in other lines it will receive the attention which it deserves. It might be well to make a list of the accessory lines which might be sold with the brush designed for the particular purpose including those already noted and others such as silver polish with the silver cleaning brush, etc. These lines might be grouped together in the advertisements dealing with the brush department and also in a window display, and the salesman who realizes sales opportunities in every inquiry will do his utmost to sell some of the accessory lines with each brush sale.

Canada Paint Company Entertains

Masquerade and Beggars' Ball Held at Monthly Gathering of Get-Together Club in Montreal

MONTREAL.—One of the most enjoyable monthly entertainments under the auspices of the Get-Together Club took place at Norman Hall, Montreal, when the Canada Paint Co., were hosts at a masquerade and Beggars' Ball, a decidedly new and original variation on the theme of masked balls. Under the able chairmanship of E. A. Crawford, the committee is to be congratulated for the success of the affair from the opening "Fallis" waltz to the Captain Courtemanche Good-Night Waltz. Although opening and closing with a dreamy waltz, the programme was well balanced, offering, apart from the breezy fox-trots and Jazzy one-steps different featur numbers. The programme also formed an amusing souvenir on its printed form as the various dances were identified in a manner highly entertaining to the assembled guests. The 22 numbers were as follows:

Programme

1, Fallis Waltz; 2 , Cluxton Fox Trot; 3, Conover One Step; 4, Fred Scott Paul Jones; 5, Houghton Song Fox Trot; 6, Ward One Step (Serpentine); 7, Bill Newton Surprise Fox Trot; 8, Misson Nose and Feather Waltz; 9, Weir-D Balloon One Step; 10, Bill Cottingham Song Waltz; 11, Alphonse Leclaire Grand Prize Costume Parade.

Liquid and Dry Fillers

12, Grimes Ticket One Step; 13, Whittaker Extra; 14, Taylor Lucky Waltz; 15, Haldane One Step; 16, Byford Paul Jones; 17, Crawford Waltz; (Moonlight), 18, Daly Fox Trot; 19, Letham Waltz; 20, Mortimer One Step; 21, Marlow Fox Trot; 22, Captain Courtemanche Good-Night Waltz.

Following the Grand Prize Costume Parade, Royal Cluxton, under a fitting ceremony, presented the prizes awarded for the most artistic and most comical costumes, both ladies and gentlemen. The choosing of these proved a very difficult task for the judges as over 60 couples paraded, displaying costumes both original and beautiful, the comic side being shown in make-ups from the "baby" to the "Skipper of the Toonerville Trolley."

Refreshments formed the next item on the programme, "Liquid and Dry Fillers" being served. Following this much-enjoyed number a few of the older members were forced by exhaustion to bid good-night. It was surprising, however, the number of "older" members who could be found on the ball room floor in the early hours of the morning, apparently determined to be the last of the 100 couples to bid au revoir to the most enjoyable evening.

WHAT FOLLOWED REJUVENATION OF THE CUTLERY DEPARTMENT

(Continued from page 38)

some attractive window dressings, if he has the right material to work with. So I'm confident this venture will be a success, for the outlay is not large, and as I pointed out, it's begun to stimulate trade already. Then there's one other point, Tom. Prices on cutlery and tableware have all been reduced and in securing this new stock, I got the advantage of the new lower quotations."

"That price decline is a healthy argument to pass along to prospective customers, Bill. Backed up with your other plans, I can see some fair business ahead for you. I'll sure be glad to know how you get along."

TREBLES PAINT TRADE

(Continued from page 52.)

about attempting any work which ordinarily only an experienced hand should do. Hence the plan outlined has worked out well.

Another plan has been that when a customer enters the store and enquires for a certain line, the salesman makes enquiries as to what purpose the paint or varnish is being purchased for. It is frequently found that customers ask for something which will not do the job as well as some other line, and therefore a valuable opportunity is opened for authoritative advice of the kind which makes a permanent and satisfied customer.

A LOCK TO CANADIAN DISTRIBUTORS

The Miller Lock Company on their 50th anniversary are donating an indestructible padlock to each of their Canadian distributors. Although alst year marked their fiftieth year, these were not ready for distribution, but are being mailed through their Canadian agent this week.

BOECKH'S BRUSH NEWS

The Kind of a Brush to Sell

YOU will often get a customer who is very particular about the quality of the paint he is getting, but who, when it comes to a brush to apply the paint, thinks the cheapest brush he can buy is plenty good enough.

He may buy a cheap brush, which while perfectly good for putting on stove pipe varnish, etc., is entirely unsuited for better work. As a result he gets a streaky job—and blames it on the paint.

That's bad for you, because he probably holds you responsible for the quality of the job.

When you sell a can of good paint it is good business to recommend a brush that will give good service.

If your customer wants to paint his car, it is well to remember that the important thing is to recommend a brush that will put on the finishing coat smoothly. For this work, sell Boeckh's Camel Hair, Fitch Hair or Badger Hair Brushes. Your customer will have reason to be grateful for your recommendation.

The whole point is, if a man buys good paint he should buy good brushes to apply it with. Your customer needs your advice and assistance in this matter and it is good business for all parties concerned.

Weekly Paint Markets

Montreal

MONTREAL, February 2—Higher quotations on linseed oil again feature the paint markets this week. Prices are increased 2 cents per gallon with the tone of the market continuing firm. Although ample seed supplies are being questioned by some well informed, this can hardly be stated as reason for the present upward tendency. More interest in the market in general is now evident, and with the demand becoming more active with the approach of the painting season, this should have a strengthening effect in the oil situation. Locally buying is still limited, the larger buyers not yet entering the market, but with the opening of the present month an improvement is looked for in this direction.

Turpentine prices are unchanged locally this week, although a quotation 2 cents in advance is given by some jobbing houses. The undertone of this market is again firm, after the slight recession recorded last week. A strong tendency has again developed in Southern circles, and quotations here in general show a slight increase. With the demand gradually increasing, with the approach of the painting season, a steady to firm market is looked for on this product.

There is little or no change in the window glass situation business being seasonably dull in this product at present. White lead in oil and putty also remain at former figures, with the undertone of both products said to be very steady. The future of these products along with other paint products, insofar as price is concerned, is expected to be taken up shortly, but there is very little indication of a change in either direction at present.

FURTHER ADVANCE IN LINSEED OIL PRICES

Montreal

A further increase of 2 cents per gallon on linseed oil quotations, and the tone of the market now continuing firm, is the position of the oil market this week. The stronger tendency commenced last week, when practically all markets began to record advance quotations. This is now well maintained, with Argentine prices showing a further increase at the close of the week. Although ample supplies of seed are questioned in some quarters, the better feeling in the market, owing to more interest being shown by all concerned, is said to be the reason of the present upward tendency. With the painting season approaching, buyers, both large and small, will anticipate their requirements and a continued improvement is now looked for, as the beginning of February usually sees the close of the more inactive period for this product

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrel lots, per gal. ..	0 85	0 87
3 to 5 barrel lots, per gal. ...	0 83	0 85
Less barrels, add 10 cents per gallon.		

TURPENTINE PRICES UNCHANGED MARKET FIRM

Montreal.

Turpentine quotations are this week unchanged in most quarters, although $1.25 per gallon is now quoted by a few jobbing houses. The undertone of the market continues firm, Savannah quotations registering a slight advance, and reports state that from appearances the market is upward bound. Fluctuations may be looked for, and only at the close of last week prices receded a little, after the former strong position was evident. However, with increased demands in the following weeks, there seems little but a steady to firm situation on this product, as demand has been the factor expected to place the market in a firm position. Fresh supplies are not heavy, and although demand is light, purchases are said to be quite sufficient for amount of new supplies obtainable. Locally sales are still limited, but with the approach of the painting season, dealers are quoted optimistic of the future, and stocks in all sections of the country are undoubtedly low.

TURPENTINE—	Imp. gal.
1 barrel lots	1 25
2 to 4 barrel lots	1 23
Broken lots	1 35

LITTLE VARIATION RECORDED IN WINDOW GLASS

Montreal.

There is little or nothing new in the window glass market, quotations being unchanged and very little activity in evidence. Stocks are low in keeping with present volume of business transacted, and local distributors look for little improvement until building operations require supplies in the Spring and Summer months. Although replacement costs have been increased owing to higher transportation rates since the close of navigation, this has so far failed to produce advance quotations, and there seems little likelihood of this factor producing this result for the remainder of the closed season. On the other hand, it is stated that any easier tendency is offset also by the higher standing of the Belgian franc, notwithstanding slightly lower levels now quoted from this source. With one factor balancing the other, a fairly steady outlook is forecast in window glass, at least while business is in its present quieter state.

Toronto

TORONTO, February 2.—Owing to the recent higher prices on flax seed, coupled with the improved demand for linseed oil, the current quotation on this product has advanced on the local market another three cents per gallon. This increase follows the higher level recorded last week, and constitutes one of the features of the prevailing paint markets. The undertone in linseed oil is now described as considerably firmer, and some additional revisions are looked for in certain quarters.

The higher prices on turpentine, referred to in last week's reports have now become more or less general, and the average quotation this week registers an advance of five cents per gallon over previous levels. A variation in local prices however, is still apparent, some distributors offering turpentine at several cents below this figure. It is admitted however, that the state of the market renders such quotations liable to revision at any time. The firm showing in primary producing centres is still being maintained, and this condition is naturally reflected in the domestic markets.

More interest is being shown in paint and varnishes, with current orders indicating brisk seasonal activity in these products during the spring period. The demand for brushes is also described as coming along nicely, and the manufacturers and distributors express confidence as regards the volume of future business in these lines.

STEADY TRADE REPORTED IN BRUSH MARKETS

Toronto.

Orders for paint brushes are now described as very good, and while purchases are not being made in large quantities, yet the manufacturers and distributors state that the current volume is satisfactory and well up to expectations for this time of the year. Steady conditions have maintained in the primary markets, and no price developments are anticipated, the present levels having been announced last year for this spring's business.

Your Farmer Customers Can Always Rely Upon—

COMMONWEALTH BARN PAINT

IT'S a Sherwin-Williams Product—one of the "Cover the Earth" quality group—made to furnish **paint insurance** on Barns, Silos, Outhouses, Wood Roofs, Fencing and other farm property requiring protection against wind and weather.

Commonwealth Barn Paint is a rich heavy-bodied Red or Gray of unusual covering power, even on rough lumber. Good looking and extremely durable, it is just the kind of paint a farmer will appreciate—the kind that reflects favorably upon the dealer selling it.

Farmers everywhere know Commonwealth Barn Paint and the other "Cover the Earth" Paints and Varnishes. That's why these S.W. Products are so easily sold and why S.W. dealers everywhere are securing the greater share of the paint demand.

Why not investigate this agency proposition? A post card addressed to any of our branches will bring you full particulars by return mail

TORONTO PAINT MARKETS

(Continued from page 56)

MAINTAIN INCREASED LEVELS ON TURPENTINE

Toronto

As was pointed out in last week's issue of Hardware and Metal, some higher prices on turpentine have recently appeared on the local markets. This advanced level has now become more or less general, thus increasing the average quotation around $1.35 per gallon in one barrel lots. However, it is noticeable that one distributor is still quoting around $1.29, and in discussing this matter with Hardware and Metal, it was stated that this quotation represented new stock, based on costs which have been evident during the past two weeks when primary market levels have also been higher. It was also admitted that the condition of the market at present would probably cause further revision in such prices from day to day, and as the increased quotations at Savannah and other distributing points become reflected in fresh purchases, corresponding advances are evident in domestic circles.

Current reports from southern producing centres indicate that the recent firmness is being maintained. If a more normal supply, or fresh receipts, were available at this time, the prevailing levels would generally be considered high. It must be remembered, however, that turpentine is a highly speculative product, and this is the principal factor controlling the current producing centres. Following are the revised local prices:

TURPENTINE—	Imp. gal.
1 barrel lots	$1 35
2 to 4 barrel lots	1 34
5 gallon lots	1 50

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $15 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph Windsor, or Montreal but freight may be equalized from any of these points.

Car load lots of 70 bbls. Price on application.

Less than 1 barrel lots—15 cents per gallon

MODERATE DEMAND FOR LEAD IN OIL & PUTTY

Toronto.

The current demand for both white lead in oil and putty is described as of a moderate nature. This is usual at the present season of the year. Quotations on these products are still maintained at the following levels:

WHITE LEAD IN OIL—	
In 5-ton lots	12 45
In 1-ton lots	13 20
Less quantities	13 65

PUTTY—

Standard, per 100 lbs.	5-ton lots	1-ton lots.	Less
Bulk bbls	$ 4 45	$4 95	$5 25
100-lb. drums	5 45	5 95	6 20
25-lb. irons	5 70	6 20	6 45
Bladders in bbls.	6 70	7 20	7 45
Do., less quantities	6 95	7 45	7 70

Pure Linseed Oil Putty, $1.50 per 100 lbs. advance over above prices for similar quantities

FURTHER ADVANCE IN LINSEED OIL PRICE

Toronto.

An additional increase of three cents per gallon in the local prices on linseed oil, provides one of the features of the current paint markets. After recording an advance of three cents last week, the market retained the improved showing, and the undertone was further strengthened by higher prices on flax seed, coupled with the recently improved demand for oil. This additional rise places quotations at ninety cents for raw, and ninety-three cents per gallon for boiled in one to two barrel lots. It is intimated in some quarters that additional revisions are looked for. As is usually the case when sudden price advances are recorded, there has appeared a range in the quotations noted on the domestic markets. However, the following is the average list now in effect:

LINSEED OIL—	Per Gallon.	
1 to 2 barrel lots	0 90	0 93
3 to 4 barrel lots	0 89	0 92
6 to 9 barrel lots	0 87	0 90

Less barrels, add 15 cents per gallon.

MORE INTEREST IN PAINT AND VARNISH

Toronto

The present volume of orders for paints and varnishes is described as satisfactory by both manufacturers and distributors. There is more interest prevailing in the markets for these products, and general indications point towards a much greater proportion of construction work of various kinds during the ensuing year than was recorded last season. This is anticipated as one of the primary factors in making 1922 the record year for paint and the allied products. The movement towards spring painting of all kinds is expected to make an early start, and stocks are generally being replenished in preparation for brisk activity. Paint prices are firm, at present, with manufacturers still predicting a steady level for spring trade.

PITTSBURGH MARKETS

(Continued from page 51)

in the Chicago district, is starting in operation with about three months' work ahead.

In tubular goods, which showed a better demand in the closing months of last year than most steel lines, there has been a decided falling off in demand in the past six months, partly in standard steel pipe, but chiefly in oil country goods, which are out of season. While demand is expected to come back by early spring, a little doubt is entertained as declines in oil prices may discourage drilling.

Sheets show a moderate demand, giving the mills as a whole an operation of about 48 per cent. The demand is widespread and is not strong in any particular trade. It is quite fair in sheets for building material, such as lathing and ceiling, eavestrough and conductor pipe, etc., while demand from the automobile trade is approximately normal for the season of the year. Bar demand has improved a shade according to reports of some mills, but other mills hold that there is scarcely any demand. Plates and shapes are very quiet.

Sheet prices are being held very rigidly, at 2.25c. for blue annealed, 3.00c. for black and 4.00c. for galvanized, and what is perhaps more remarkable is that extras are very tightly held also. In tin plate the market is quite steady. Slight concessions are given on large orders, as is normal, the concessions being no greater in percentage than usual.

Bars, shapes and plates remain quotable at 1.50c., where they have been for six weeks or more, but there is a difference in that the price is shaded on smaller orders than formerly, while even less than carload lots can sometimes be obtained at the 1.50c. price.

Standard steel pipe remains at 71 per cent. basing discount. Independents are giving the usual 2½ per cent beyond the regular trimmings of the leading interest, but do not always stop there.

Plain wire remains quotable at 2.25c. and wire nails at $2.50. Divergences from Pittsburgh basing are more common. The Ironton district mills and mills in Alabama are quoting delivered prices well below the Pittsburgh equivalent. This divergence usually occurs in a dull market, but is particularly conspicuous now. An entirely new departure, perhaps of decided significance, is the decision of the American Steel & Wire Company (Steel Corporation) to sell wire and nails to customers in Cleveland at 10 cents per 100 lb. over the Pittsburgh basis, when the material is made in Cleveland, instead of at the Pittsburgh price plus the rail freight Pittsburgh to Cleveland. While in various products there have been divergences from the "Pittsburgh plus" system of quoting delivered prices, even by the Steel Corporation, it is a new thing for the corporation to do this openly in wire products.

Mill Operations

The official report on steel ingot production in January is awaited with unusual interest, as mill operations have been so irregular that it is difficult to make a very close estimate as to just what they have been doing. Last July steel ingot production was at the rate of 11,000,000 tons a year, the rate increasing until in October and November it averaged 23,000,000 tons. During December production declined, averaging about 20,000,000 tons a year during the month, but being at probably no more than 18,000,000 tons towards the close of the month. The rate in January probably averaged around 18,000,000 or 20,000,000 tons, whereas a quick return after January 1, to the 23,000,000 ton rate was expected, with further improvement as spring approached.

Pig Iron and Coke

A Pittsburgh district steel interest inquired for 1,000 tons of basic iron and drew quotations from valley furnaces at $18, furnace, against the former nominal market of $18.25. The purchase, however, was made on the basis of $17.75, valley, a middle interest offering some resale iron at this figure.

"The Right Paint to Paint Right"

That Ramsay slogan is entitled to thought and consideration. It is in people's minds; it helps make sales, because it is based on truth that proves itself in service.

It is easy to sell paint to painters who are thoroughly imbued with the idea that the paint you sell is "the right paint to paint right."

They know that Ramsay's is—it is unexcelled for covering, spreading and durability.

"Remember the Agate Family"

C. J. Elderfield is known as one of the foremost hardware men in Western New York.

"We believe the tints will nearly double our Vitralite business this year, as they greatly widen the field for enamel sales,"

says C. J. Elderfield, President Elderfield-Hartshorn Hardware Co., Niagara Falls, N. Y. "We find our customers are educated to Vitralite Quality," writes Mr. Elderfield. "They come in and ask for Vitralite because it is a material they can rely upon."

And thousands of other dealers would tell the same story concerning this largest-selling enamel! Write *now* for details of the special introductory proposition on Vitralite, *the Long-Life Enamel*, in White and tints, and capitalize on the advertising in national magazines which is creating sales for Pratt & Lambert dealers everywhere.
